In making the announcement, First Midwest Bancorp President and Chief Executive Officer Robert P. O'Meara stated, "We are pleased that our precedent-setting strategy of establishing a less active national bank charter and subsequently reactivating it as a trust company was favorably

received and that the trust company is now an operating subsidiary."

O'Meara announced that First Midwest Senior Vice President Thomas A. Hickey will serve as chairman of the board and chief executive officer of First Midwest Trust Company. Hickey has responsibility for overall non-bank subsidiary activities.

"Although First Midwest Trust is a new company, it was formed through the consolidation of three long-established bank trust departments," said Hickey. "We offer a broad array of fiduciary and investment services and manage some $1 billion in assets."

In addition to the trust company, another nonbank subsidiary, First Midwest Asset Management Co., a recently formed SEC registered investment advisory company, provides investment management services.

"The primary thrust of our non-bank subsidiary group is to meet the broader financial needs of our many clients. Our mission is to manage, preserve, and grow the assets of our clients. We have the experience and expertise to provide these services and plan to make them available throughout our entire banking system," said Hickey.

With assets exceeding $2 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies, currently operating 35 banking offices and 5 trust offices primarily in northern Illinois.

AUSTIN, TX (JAN. 8) PR NEWSWIRE - Communications Transmission, Inc. (NASDAQ: CTIA) ("CTI") is the owner of all of the issued and outstanding shares of the Series B and C Preferred Stock of ALC Communications Corporation (NASDAQ: ALCCC), a telecommunications company based in Birmingham, Michigan, with principal operations in the upper midwest and the northeast ("ALC"). The Series B and C Preferred Stock is convertible into approximately 17 million shares of ALC. ALC and Telecom USA, Inc. (NYSE: TTT), a telecommunications company with principal operations in the southeastern and midwestern United States ("Telecom USA"), today jointly announced the signing of a letter of intent under which ALC would merge into a subsidiary of Telecom-USA.

Under the letter of intent, all oustanding capital stock of ALC would be converted in units of Telecom-USA Common Stock and cash. Holders of ALC Common Stock and Series B and C Preferred Stock would receive units valued at $3.00 for each share (on a Common Stock Equivalent basis). Holders of ALC Series A Preferred Stock would receive units valued at $20.00 per

share, plus accrued unpaid dividends. Prior to closing, certain holders of ALC's Series A Preferred Stock would be required to contribute to ALC's capital one million shares of Series A Preferred Stock and accrued dividends. Distributions to the Common Stock and Series B and C Preferred Stock would be subject to an escrow with respect to ALC's compliance with certain financial conditions relating to stockholders' equity and average gross revenues.

The business combination is contingent, among other things, upon the completion of due diligence, execution of a definitive agreement, and regulatory and shareholder approvals. The merger is also subject to ALC's redemption of at least 70 percent of outstanding Senior Subordinated debentures of ALC at 70 percent of the debentures' principal amount and 100 percent of the accrued upaid interest.

In addition, the merger would require amendment of an existing 10-year telecommunications capacity agreement between ALC and CTI. The amendment would permit the purchase of additional transmission capacity from CTI at a fixed price in exchange for payment to CTI of $8.5 million.

CTI is a leading provider of sophisticated communications transmission services, leasing its transcontinental fiber optic and digital microwave network to large corporations and common carrier users.

SAN FRANCISCO CA (JAN. 8) PR NEWSWIRE - In a presentation to investors at a meeting sponsored by Hambrecht & Quist, Glaxo Inc. Chief Executive Officer Charles A. Sanders, M.D. expressed confidence in Glaxo's prospects for the 1990s.

Citing Glaxo Inc.'s record sales growth during the past seven years, Sanders said Glaxo products had consistently grown faster than their prescription drug markets. Continuing that trend through new uses and dosage forms is one of the organization's three immediate goals. Accelerating the introduction of Glaxo's full pipeline of new products and expanding discovery research round out the corporate objectives.

Sanders also discussed the contribution from Glaxo Inc.'s highly productive sales force of 1800, which represents 47 percent of the total workforce; and noted Glaxo's continuing efforts to control expenses.

Sanders further stated that over the next five years, Glaxo Inc., expects sales growth to come largely from new products and Zantac(R) (ranitidine hydrochloride), the world's largest selling prescription medicine.

Zantac, an H2 antagonist for the treatment of gastrointestinal disorders, will remain a market leader because of its excellent safety record and unparalleled efficacy, Sanders said.

Sanders expects the ulcer market to continue growing through increasing

recognition for the need for maintenance treatment of chronic ulcer disease and increased treatment of patients with gastroesophageal reflux disease.

Sanders predicted that over the next five years 50 percent of Glaxo Inc.'s incremental sales growth will come from Zantac, 40 percent from new products, and ten percent from existing products. New chemical entities in full development bold great promise for continued success. Among those products:

- Zofran(TM) (ondansetron) a 5-hydroxytryptamine (5HT3) antagonist for the management of chemotherapy-induced vomiting and nausea;
- Sumatriptan, a 5HT1-like agonist for the treatment of migraine;
- Salmeterol, a long-acting beta 2 agonist for the maintenance treatment of asthma;
- Fluticasone, a corticosteroid for the treatment of the inflammatory component of asthma and rhinitis.

Significant activity also is taking place in research where, among Glaxo Group worldwide research, Glaxo Inc. has discovery responsibility for work in cardiovascular disease and metabolic disorders. United States research also includes investigating treatments for cancer and the immune system.

BOULDER, COL (JAN. 8) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL), the Colorado-based biotechnology firm specializing in the development of biological response modifier (BRM) technology, today announced the commencement of an important new clinical trial in patients with primary adult brain cancer. This clinical trial is a Phase I study combining ImuVert(R), Cell Technology's lead anticancer BRM, with standard radiation therapy.

The trial began in late December under the direction of Dr. Keith Black, assistant professor of neurosurgery at the University of California at Los Angeles (UCLA). Dr. Black is one of the company's principal investigators in its current Phase II brain cancer trial. This Phase I combination trial will involve approximately 32 patients and will evaluate the safety of the therapeutic combination. In addition, the results from this study should provide an indication about the effectiveness of administering ImuVert simultaneously with radiation in this group of newly diagnosed patients. In previous clinical trials, patients receiving ImuVert had already failed standard therapies such as chemotherapy and/or radiation therapy. Results from this study should also be useful when designing Phase II-III ImuVert

combination clinical trials.

Dr. Michael J. Andrews, vice president-clinical and regulatory affairs for Cell Technology, stated, "This Phase I study is being conducted to determine whether ImuVert and radiation therapy can be administered jointly. In addition, we are interested in learning if ImuVert can be more effective when administered during an earlier stage of the disease process. We are fortunate to have the expertise of Dr. Black and his staff at UCLA for this trial."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative biologic response modifier products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

HOUSTON (JAN. 8) PR NEWSWIRE - American General Corporation today announced that Edward H. James has been elected president and chief executive officer of American General Investment Corporation, the lead company in American General's mortgage/real estate operations. James succeeds Robert Conklin, who will continue with American General as a consultant.

James, 51, joined American General Investment Corporation in 1978 as a regional vice president and served in a number of key management positions prior to being named managing head of mortgage loan operations in 1987. He was elected to the board of directors of American General Investment Corporation in 1988.

James, a native of Gulfport, Miss., is a graduate of Emory University (B.A. Economics '58). He served on active duty for three years as an officer in the U.S. Navy Atlantic Fleet. He returned to Emory University after military service and pursued a course of study at the Graduate School of Business Administration prior to joining the mortgage/real estate division of the Prudential Insurance Company in 1963.

Headquartered in Houston, American General Investment Corporation (AGIC) manages a $4.9 billion mortgage and real estate investment portfolio for American General's life insurance companies. Through joint venture partners, as well as through direct investments, AGIC is one of the largest developers of master-planned communities in the country. American General Investment Corporation is a subsidiary of American General Corporation, a Houston-based insurance and financial services organization with assets of more than $30 billion and shareholders' equity of $4.1 billion.

NEW YORK (JAN. 8) PR NEWSWIRE - Charlotte St. Martin has been promoted to executive vice president. The announcement was made by Jonathan M. Tisch,

president & CEO of Loews Hotels, founding division of Loews Corporation (NYSE: LTR).

In her latest assignment, a newly created position, Ms. St. Martin will oversee both domestic operations and marketing and report directly to Tisch. Regarding the appointment, Tisch said, "Our philosophy at Loews is that operations and marketing go hand in hand, especially in this increasingly competitive era. We feel that by creating this new position, and filling it with one of the industry's most talented resources, our Loews team is better positioned than ever to lead our growing company into the decade."

After taking a one-year leave of absence from Loews to serve as president of the Dallas Convention & Visitors Bureau, Ms. St. Martin returned to the company in early 1989 as president & CEO of Loews Anatole Hotel and regional vice president-marketing for Loews' Southwest/Western region. From 1982 to 1988 she served as regional vice president.

Ms. St. Martin joined Loews in 1977 as director-marketing of the Anatole. She was the first employee of the hotel which is now the largest in America's Southwest, with a staff of 2,000; 240,000 square feet of meeting space, and 1,620 guest rooms.

Ms. St. Martin has been active in the hospitality industry for 20 years and has served on the boards of directors for ASAE (American Society of Association Executives), PCMA (Professional Convention Management Association), and MPI (Meeting Planners International.)

Prior to joining Loews, Ms. St. Martin made a steady climb in catering and sales positions at Dallas' Fairmont Hotel.

Ms. St. Martin will maintain offices at Loews Anatole and the Loews Hotels corporate headquarters in New York. She assumes her new position immediately, replacing William H. Maibach who resigned to pursue other interests after 22 years with the company.

Loews Hotels owns and/or manages 15 distinctive properties: Loews Anatole Dallas; Loews Giorgio, Denver; Loews Glenpointe, Teaneck, N.J.; Harbour Cove Inn, Paradise Island, Nassau, the Bahamas; Loews Summit, The Regency, Howard Johnson's and Ramada Inn, New York; Loews La Napoule, La Napoule, France; Loews Le Concorde, Quebec City, Canada; Loews L'Enfant Plaza, Washington; Loews Monte Carlo, Monte Carlo, Monaco; Loews Ventana Canyon, Tucson, Ariz.; Loews Santa Monica Beach, Santa Monica, Calif.; and its newest acquisition, Loews Vanderbilt Plaza, Nashville, Tenn.

GASTONIA, NC (JAN. 8) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) has been selected as the preferred vendor to design, construct, test and operate an $8 million materials recovery facility (MRF) in Gaston County, N.C.

The MRF will be integrated with the Gaston County/Westinghouse Resource Recovery Center, a waste-to-energy plant planned for construction near High Shoals, N.C. In December of last year, Westinghouse contracted with the county to design, build and operate -- through a wholly-owned subsidiary -- the $42 million waste-to-energy facility for 25 years. The center will be capable of processing 400 tons of the county's municipal solid waste each day to fuel a 10-megawatt power plant. Construction is scheduled to begin in mid-1990 and be completed in 1992. The MRF will be tested and operated ahead of the waste-to-energy plant.

The MRF will be capable of preparing 3,500 tons of unseparated municipal solid waste per week for recycling. Glass, cans, plastic, paper products and ferrous metals will be removed from the trash by sorting and mechanical separation. Sixty people will operate the MRF over two shifts.

Waste which cannot be reclaimed will be processed in a Westinghouse O'Connor rotary combustor. Eighteen O'Connor combustors are currently operating at nine waste-to-energy plants in the U.S. and Japan.

"We are delighted to work with a county that has the foresight to take an integrated solid waste management approach, including recycling and waste-to-energy," said Joseph W. Dorrycott, Westinghouse resource energy systems division general manager. "Together, we will bring comprehensive, sound waste management to the community for a quarter century."

In addition to the Gaston County facility, Westinghouse or its subsidiaries has waste-to-energy plants under contract, construction or operation in Bay County, Fla., Dutchess County, N.Y., York County, Pa., Delaware County, Pa., San Juan, Puerto Rico and Mercer County, N.J.

DALLAS (JAN. 8) PR NEWSWIRE - Clini-Therm Corporation (NASDAQ: CLIN) today announced that its Prostek 3000 hyperthermia device for the heat treatment of benign prostate tumors has been granted a conditional Investigational Device Exemption by the Food and Drug Administration for initial testing. It is believed to be the first such approval ever

granted by the FDA.

John W. Jenkins, chairman of Clini-Therm, said the company has received inquiries about the Prostek 3000 from many of the nation's most prestigious teaching hospitals and clinics since the device was introduced in May 1989 at the American Urology Association annual meeting in Dallas. He added that more than 20 of these institutions had expressed interest in conducting clinical trials of the device. Initial sites will be announced following their approval by the FDA.

Jenkins described the non-surgical technique using the Prostek 3000 as a possible alternative to conventional surgery for the treatment of Benign Prostatic Hyperplasia (BPH). The condition is a urological disorder that affects primarily men over 50, with approximately 75 percent of them suffering from an enlarged prostate which can obstruct urinary flow. In the United States alone, about 400,000 prostate operations involving expenditures of some $4 billion are performed annually, almost all of them transurethal resections (TURs) which entail hospitalization.

Obtaining the FDA's Investigational Device Exemption is the first step toward proving the Prostek 3000's efficacy among practitioners and gaining full approval from the FDA to market the equipment, Jenkins said.

"If the techniques are successfully verified in clinical trials and full pre-market approval is received from the FDA, we envision them to become routine outpatient office procedures for use in any urology practice," Jenkins said. "Since the procedures could eliminate the need for costly hospital stays associated with the standard surgical procedures, use of the equipment could offer the opportunity for substantial cost savings to Medicare, private insurance and individuals."

Dallas-based Clini-Therm Corporation is the leading domestic developer, manufacturer and marketer of high-technology hyperthermia equipment for medical applications. Through its wholly owned Ntronix division, the company develops, manufactures and markets radio frequency drying and crystallizing equipment for industrial plastics.

LEONIA, NJ (JAN. 8) PR NEWSWIRE - Jaguar plc (NASDAQ: JAGRY) is pleased to announce effective immediately the appointment of two Ford nominated directors to the board of the company. They are Lindsey Halstead, chairman of Ford of Europe, who will have a non-executive role, and John Grant, who becomes deputy chairman. Until now Grant has been executive director of Ford's Detroit-based corporate strategy and diversification planning staff.

Jaguar executives on the board will be Sir John Egan (chairman), Mike Beasley, John Edwards, Ken Edwards and Graham Whitehead. Sir Austin Pearce and Sir John Baring remain as non-executive directors.

Edward Bond, a non-executive director of Jaguar plc since its formation in 1984 has retired from the board.

Commenting on the changes, Sir John Egan, chairman of Jaguar said: "I welcome John Grant and Lindsey Halstead. Their experience will clearly strengthen our board. In his role as executive deputy chairman, John Grant will assist in the development of a smooth working relationship between Ford and Jaguar, and will also be responsible for the effective coordination of forward planning processes and Jaguar's access to Ford's technical and financial resources.

"I would like to express my sincere appreciation for the hard work put in by Ted Bond over the past five and a half years. He has made a major contribution to the success of our company."

MINNEAPOLIS (JAN. 8) PR NEWSWIRE - Grand Metropolitan PLC today announced that it would purchase 20 Wimpy franchised restaurants located in the United Kingdom from Allied Leisure PLC, London, and convert them to Burger King outlets. The sale is scheduled for completion Jan. 29.

''These 20 prime locations in London and the south coast of England will significantly strengthen our planned expansion of the Burger King brand in the United Kingdom,'' said Ian A. Martin, chief executive of Grand Metropolitan's U.S. operations and chairman of the Burger King subsidiary. ''Following our acquisition of U.B. restaurants in October 1989, which included more than 800 restaurants in the the United Kingdom and Europe, this is the latest step in our strategy to build Burger King as a major international brand.''

In the past three months, Burger King has doubled the number of its outlets in the United Kingdom and now operates 60 restaurants there. These include 23 former Wimpy counter service outlets which were purchased as part of the U.B. Restaurants acquisition. Burger King anticipates having over 200 owned or franchised outlets in the United Kingdom by the end of this year.

Burger King operates approximately 6,000 restaurants worldwide, including over 5,400 in the United States.

Grand Metropolitan PLC, with annual sales of over $15 billion, maintains operations in three core sectors: food, drinks and retailing. In addition to Burger King, its U.S.-based subsidiaries include Pillsbury, Haagen-Dazs, Alpo, Carillon, Heublein, Paddington and Pearle.

#90008p0171 01/08/1990 ~PR Newswire

NEW YORK (JAN. 8) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) said today it has doubled production capacity for polydextrose, its low-calorie bulking agent, and can now supply more than 50 million pounds a year to the food industry.

Donald F. Farley, executive vice president of the Pfizer Specialty Chemicals Group, said growing consumer demand for "lite" foods has required continued expansion at Terre Haute, Ind., for the bulking agent used to replace sugar and some fat in a variety of lower calorie foods.

Brought on stream at year-end, the latest polydextrose expansion enables Pfizer to meet worldwide demand for the foreseeable future, Farley said, adding, "These modular expansions have been installed to allow for further expansion as the market for 'lite' foods continues to grow."

At the same time, Pfizer announced that a second-generation product will be introduced early next year. To be known as polydextrose II, the new premium grade bulking agent will offer food technologists greater versatility in formulating lower calorie foods, Farley said.

While the slight flavor in the polydextrose now being marketed is compatible with many products, he explained, polydextrose II is intended for foods with a more delicate taste.

"Based on our feedback from major food companies and on surveys indicating consumer preference for better tasting 'lite' foods, we anticipate that polydextrose II will become the quality standard for bulking agents in the food industry," Farley said.

The additional capacity at Terre Haute is the second phase in a capital investment program calling for greater polydextrose output for the United States and overseas markets. The company has chemical manufacturing facilities in 40 countries worldwide.

Pfizer Inc. is a diversified, research-based health care company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.4 billion for 1988.

FOUNTAIN VALLEY, CA (JAN. 8) PR NEWSWIRE - Newport Corp. (NASDAQ: NEWP) announced today an agreement in principle to acquire privately held Burleigh Instruments Inc., based in Fishers, N.Y., near Rochester, N.Y.

Terms of the acquisition were not disclosed.

The transaction is subject to completion of the due diligence process, execution of a definitive agreement and approval by the directors of the respective companies.

A Newport spokesperson said the acquisition of Burleigh is expected to be complete within two or three months.

Tom Galantowicz, president of Newport, said, "We have much in common with Burleigh in terms of complementary products, global markets and emphasis on providing our customers with high quality products and outstanding customer service. Although we expect some near-term dilution of earnings because of the proposed acquisition, this business combination would significantly strengthen the ability of the combined companies to provide precision instruments for targeted domestic and international markets."

Newport Corp. designs, manufactures and markets a comprehensive line of instruments, components and accessories for the laser and electro-optical market which includes industrial, government and laboratory customers. Burleigh, founded in 1972, develops, manufactures and markets high-precision piezoelectric micropositioning instruments, laser diagnostics, and near-infrared laser systems for laser and biomedical research laboratory markets as well as specialized industrial niches.

Newport sales for fiscal 1989 were $57 million, with 24 percent coming from international markets. In the first quarter ended Oct. 31, Newport reported sales of $13.8 million. Burleigh's revenues for the most recent 12-month period were about $7 million, with 40 percent of that attributable to offshore markets.

LOS ANGELES (JAN. 8) PR NEWSWIRE - Jeff H. Reynolds, chairman of Weatherby Investments, Inc., (OTC), stated today that the company shall change its name to California Pacific Industries Corporation.

The change will be voted upon at the company's annual shareholders meeting in April.

Reynolds stated that the change was to be made to reflect the change in corporate structure, business objectives and future plans.

Reynolds also stated that Weatherby was preparing a Registration Statement on Form 10 by which the company shall register its securities pursuant to the Securities Exchange Act of 1934, of which they are presently exempt. The registration is expected to be made prior to March 1. Reynolds stated that this action was necessary to permit the listing of the company's securities for trading on a national or regional securities exchange. At present the company's securities are traded in the OTC - Pink Sheet Market.

Weatherby in cooperation with its parent company, California Pacific International Holdings Co. PTE Ltd. of Singapore, is presently negotiating for the acquisition of Bond Corporation Holdings Ltd. of Australia as previously announced on Friday, Jan. 5.

JACKSON, MI (JAN. 8) PR NEWSWIRE - Consumers Power Company has begun purchasing electricity from a Morley, Mich., hydroelectric generating facility.

This is the first purchase to take place under the terms of a contract filed with the Michigan Public Service Commission (MPSC) in May 1989, in connection with a proceeding involving cogeneration and independent power projects. The proceeding, pending before the MPSC, involves capacity rates for the utility's power purchases from the Midland Cogeneration Venture and other facilities qualified under federal law.

The 230-kilowatt Morley Hydroelectric Generating Plant, located on the Little Muskegon River in the Village of Morley, Mecosta County, is selling its entire output to Consumers Power Company under a long-term contract signed in January 1987. The $300,000 facility was redeveloped from an abandoned hydroelectric project by Neshkoro Power Associates of Neshkoro, Wis.

"The Morley hydro dam, and other independent and small power projects under development in Michigan, will provide much-needed electricity to help meet the increasing demand for power in Michigan," said Gordon L. Heins, the utility's senior vice president of energy supply.

Consumers Power continues to purchase electricity from 18 other cogenerators and small power producers under previously executed contracts.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

BERKELEY HEIGHTS, NJ (JAN. 8) PR NEWSWIRE - Customedix Corporation (AMEX:

CUS) announced today that it will redeem on March 5, 1990, $100,000 of its outstanding 15 percent convertible subordinated debentures due 1997.

In conjunction with the redemption, the company will prepay its principal lending bank $100,000 of the principal outstanding under its current bank loan. This is pursuant to an agreement with the bank under which any purchase or redemption of the debentures requires an unequal prepayment of principal.

"This is another step in our program to pay down our debt. With revenues rising, cost of sales being lowered and debt being reduced, we continue to strengthen the company and anticipate the upward trend in sales and profits will maintain its course throughout this fiscal year and beyond," Gordon S. Cohen, chairman and chief executive officer, said.

For the first quarter ended Sept. 30, 1989 net income rose to $474,875, or $.01 per share, compared to $33,890, with no reportable per share earnings in the same period last year. Revenues for the first quarter were the highest for any first quarter in the company's history, rising to 12,703,497 from $11,383,448 for the first quarter last year.

Customedix Corporation, through its subsidiaries, supplies materials, devices and disposables for dental and medical health care.

NEW YORK (JAN. 8) PR NEWSWIRE - Kenneth Sitomer, president and chief executive officer of Russ Togs, Inc. (NYSE: RTS), a leading apparel manufacturer, announced today that the company has acquired exclusive rights for the Diane Von Furstenberg collection of women's sportswear.

Under the new Russ Togs agreement, Von Furstenberg's complete sportswear collection will be manufactured, marketed and totally coordinated through a single company directed by a newly formulated merchandising concept. Operating under a targeted marketing strategy, she intends to create a line of moderately priced sportswear and separates that reflects her personal attitude toward lifestyle dressing. Backed by Russ Togs' substantial financial resources and merchandising support, Von Furstenberg will be able to focus her efforts on design.

The Diane Von Furstenberg collection will function as a completely autonomous operation with its own sales force and marketing team. Separate showrooms will be maintained at 1411 Broadway, New York. The company has retained the services of Buckley/DeCerchio to advertise and promote the line throughout the United States and Canada.

The new sportswear line will be available in department stores and specialty shops. The launch of the first collection, to a limited distribution, is scheduled for an October/November in-store delivery. Von Furstenberg is personally committed to opening the lines of communication between herself and her ultimate consumer through selected personal store appearances and various media events.

According to the designer, the women's sportswear license will become the core of her licensing business. Her future plans are to add new licensees which will follow a similar marketing strategy. Current Von Furstenberg licensees include fragrance, childrenswear, luggage, eyewear, stationery and fashion accessories.

CHARLOTTE, NC (JAN. 8) PR NEWSWIRE - First Union Corporation (NYSE: FTU) said today its banking organizations in North Carolina, South Carolina, Florida and Tennessee have lowered their prime interest rate from 10 1/2 percent to 10 percent. This change is effective today. First Union National Bank of Georgia will lower its prime lending rate to 10 percent effective tomorrow.

"This prime rate reduction was widely anticipated, having been delayed almost a month by uncertainties surrounding Federal Reserve policies and year-end seasonal pressures," said David Orr, First Union vice president in charge of economic research. "A lower prime rate starts 1990 on a positive note for consumer borrowers and for small to mid-sized companies.

Today's prime rate change is the first for 1990 and the fifth since

January 1989. The prime rate last changed from 11 percent to 10 1/2 percent on July 31, 1989. The prime rate is a benchmark used to set interest on various forms of corporate and consumer credit.

As of September 30, 1989, First Union Corporation reported assets of $32.2 billion.

HELSINKI, Finland (JAN. 8) PR NEWSWIRE - Hill and Knowlton, Inc., the worldwide public relations unit of WPP Group Plc, has acquired Extern Oy, the leading public relations agency in Finland and one of Scandinavia's largest firms.

The Finnish agency will operate under the name of Extern/Hill and Knowlton

Robert L. Dilenschneider, president and chief executive of Hill and Knowlton, said. He said Extern's management will continue to be headed by managing director Kim Nyberg.

Extern, with a full-time staff of 28 persons, had revenues of approximately US$2.2 million in 1989, ranking it among the leading public relations firms in the Scandinavian countries. It raises the number of Hill and Knowlton offices to 61 in 23 countries. The Finnish firm becomes part of Hill and Knowlton's European division.

Extern's relationship with Hill and Knowlton started in 1988 under an agreement to serve as an associate firm in Finland.

"Up to now Extern has played a critical role for our clients by its ability to provide capable services inside the Soviet Union as well as in Finland and other parts of Scandinavia," said Dilenschneider.

"As Hill and Knowlton's northernmost office, geographically closest to the USSR, and already involved in activities related to the economic integration of Europe, we expect Extern's importance to expand substantially," Dilenschneider said.

Hill and Knowlton, based in New York City, is a leading international public relations and public affairs counseling firm with 61 offices in 23 countries. Its parent company, WPP Group plc, is one of the world's largest marketing services company.

#90008p0228 01/08/1990 ~PR Newswire

DALLAS (JAN. 8) PR NEWSWIRE - Southmark Corp. (NYSE: SM) and MGF Oil Corp. (OTC) today announced that they have entered into agreements with Kaiser-Francis Oil Co. which, if consummated, will result in the sale of all MGF common stock held by Southmark and MGF's minority shareholders. Southmark currently owns 94.1 percent of the outstanding common stock of MGF, with the remaining 5.9 percent being publicly held.

Pursuant to the terms set forth in the agreements, MGF will sell assets to Kaiser-Francis for $30.7 million in cash, subject to reduction for title defects and certain other adjustments. Following the asset sale, MGF and a wholly-owned subsidiary of Southmark will merge, resulting in the minority shareholders of MGF receiving for their common stock a cash payment of approximately $.078 per share, subject to reduction. After the merger, Southmark will sell for approximately $.078 per share, subject to reduction, all of its post-merger MGF common stock, 90 percent to MGF, 5 percent to Kaiser-Francis, or its assigns, and five percent to the MGF Trust, an Oklahoma trust to be formed by Kaiser-Francis. The estimated proceeds to Southmark from these transactions, assuming no reduction in the purchase price, will be approximately $24.6 million cash and a long-term non-recourse note for $1.3 million.

The consummation of these transactions is subject to certain conditions including the approval of the U.S. Bankruptcy Court for the Northern District of Texas. The agreements have been approved by the respective boards of directors of Southmark and MGF.

Southmark, headquartered in Dallas, is a real estate and financial services company, operating under Chapter 11 of the U.S. Bankruptcy Code. MGF, headquartered in Midland, Texas, is principally engaged in the production of crude oil and natural gas. Kaiser-Francis, privately owned and headquartered in Tulsa, Okla., is one of the largest Oklahoma based

independent oil and gas companies and is actively engaged in the purchase and sale of oil and gas producing properties.

#90008p0229 01/08/1990 ~PR Newswire

PHILADELPHIA (JAN. 8) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that Unit No. 2 at the Limerick Generating Station achieved commercial operation at 12:01 a.m. today, after completing its power ascension program in record time.

From reception of its fuel loading license on June 22, 1989, the unit achieved commercial operation in 200 days, besting the former record of a boiling water reactor, set by the Hope Creek plant in New Jersey, by 49 days.

PE said that in an almost flawless startup power testing program, Unit 2 had only one unplanned shutdown in the 200 days, against an average of 15 unplanned shutdowns for the nation's boiling water reactors built in the last ten years.

The unit, the last boiling water reactor to be completed in the United States in this century, is located in Montgomery County, Pa., near the borough of Pottstown.

Paquette said indications of the quality of Unit 2 include:

-- It was only the second unit in the country to receive all top construction grades from the U.S. Nuclear Regulatory Commission (NRC), and it also received the top NRC grades for its preoperational testing and startup operations.

-- It was completed more than eight months ahead of schedule and $382 million, or 12 percent, under the $3.2 billion cost cap set in 1985 by the Pennsylvania Public Utility Commission.

-- The unit set another record as it was brought from fuel load to full power in 151 days, with no unplanned shutdowns.

-- Corbin A. McNeill, Jr., PE executive vice president, nuclear, said Unit 2 began its "warranty run" of 100 hours at full power on Tuesday, Jan. 2, completed the run on Saturday, Jan. 6, and was declared in commercial operation at one minute past midnight today.

The price PE pays for oil on the spot market rose from $16 a barrel in

late November to $33 a barrel early in January.

#90008p0232 01/08/1990 ~PR Newswire

PASADENA, CA (JAN. 8) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today announced that its subsidiary Colin Energy (Toronto: CN), has successfully drilled 11 wells in the Eaglesham area of Northern Alberta, Canada. Six wells have been completed and are producing oil. Four additional wells are waiting completion. Only one of the 11 wells drilled has been dry and abandoned. As a result of these drilling activities, Colin's current net daily oil production has tripled to 650 barrels from 215 barrels since June 30, 1989.

According to John McGrain, chairman of both Colin Energy and Conversion Industries, Colin achieved a 91 percent success rate to date in the Eaglesham area. In addition, the company expects to participate in the drilling of an additional 19 wells in the same area by June 30, 1990. Colin's current drilling program in the Eaglesham area is under agreements with Canadian Occidental Petroleum Corp., Esso Resources Canada and other oil companies.

Commenting on these developments at Colin, McGrain stated, "We are very pleased by our investment in Colin. By tripling its daily oil production, Colin has exceeded our internal projections to date. We expect that Colin's goal of producing approximately 1,000 barrels of oil per day will be met by mid-year 1990."

Colin, through its development of oil and gas reserves, plays an important role in Conversion's development of cogeneration power facilities by providing the long term fuel source needed to obtain construction financing.

Conversion Industries, a fully integrated independent power producer, holds a 51 percent interest in Calgary-based Colin Energy. Conversion has developed, through its subsidiaries, more than 100 hydroelectric, cogeneration and waste-energy facilities that are in operation or under construction.

JACKSONVILLE, FL (JAN. 8) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI)

announced the formation of a new consumer finance company, CreditQuick, on Jan. 1, 1990. The company will provide small personal loans and loans for items such as furniture, appliances and older used cars.

"We're attempting to fill a void in the marketplace that we were unable to fill before," said Dave Barnett, executive vice president of Consumer Credit and head of CreditQuick. "CreditQuick is intended to complement our current loan business rather than compete with it."

Three Florida CreditQuick offices operate in Pensacola, Ocala, Casselberry (near Orlando) and one Georgia CreditQuick office in Brunswick.

The CreditQuick offices are separate from Barnett banking locations.

Barnett is a $28-billion-asset, two-state banking organization. It is the leading financial institution in Florida and the eighth-largest in Georgia. The company's stock (BBI) is listed on the New York Stock Exchange.

RALEIGH, NC (JAN. 8) PR NEWSWIRE - McM Corporation, a Raleigh based insurance holding company, today announced the execution of a definitive agreement for the sale of Atlantic Southern Insurance Company to Colonial Life Insurance (Trinidad) Limited for a cash purchase price of U.S. $10,350,000. Atlantic Southern is a Puerto Rican life insurance company located in San Juan, Puerto Rico which markets life and health insurance products in Puerto Rico and the Virgin Islands. Colonial Life (Trinidad) is a Trinidad and Tobago corporation with its principal offices located in Port of Spain, Trinidad. Substantially all of the outstanding shares of Atlantic Southern are currently owned by Occidental Fire & Casualty Company of North Carolina, which is a second tier subsidiary of McM.

The agreement has been approved by the Boards of Directors of McM and of Occidental Fire. Certain conditions remain to be satisfied before

completion of the transaction, including the approvals of the Insurance Commissioners of North Carolina and Puerto Rico.

Efforts to sell McM and its remaining subsidiaries, which include Occidental Life Insurance Company of North Carolina, Peninsular Life Insurance Company, Occidental Fire & Casualty Company of North Carolina and Wilshire Insurance Company, are continuing. PaineWebber Incorporated has been retained as investment banker for the sale of these companies.

#90008p0249 01/08/1990 ~PR Newswire

CHICAGO (JAN. 8) PR NEWSWIRE - FNW Bancorp (NASDAQ: FNWB) today announced that it expects net income for 1989 to exceed $13.7 million for the year ended Dec. 31, 1989, up 12.1 percent from net income in 1988 of $12.3 million. The anticipated net income would translate into earnings of $2.00 per share in 1989, a return on shareholders' equity (ROE) of 17.76

percent, compared to $1.79 per share in 1988, or a return of 18.39 percent. Analysts had been predicting earnings for the eight- bank holding company in the range of $1.90 to $1.95 per share for the year just ended.

''In all respects, 1989 was a good year for the company and its stockholders,'' commented Wilber G. Smith, chairman of the board. ''We continued an unbroken history of record earnings and asset growth for the holding company and its predecessors dating back to 1983. This pattern of success pays tribute to the distinct character, independence and decision-making authority retained by each bank within the holding company.

''Since its creation in 1986, the current holding company has benefited from significant growth in assets, loans, income, book value and in most other measures used to gauge the success of a financial institution. And, if year-to-date figures for other members of our 20- bank peer group in Illinois hold to their reported 1989 patterns, our performance could be better than most, as well.

''FNW Bancorp had a per share earnings increase of 11.7 percent, which was 32.9 percent higher than the 8.8 percent trailing 12-month average for our 20-bank peer group. The company's return on average assets (ROA) stood at 1.17 percent for FNW Bancorp; trailing 12 months return on average assets for our peers was 1.12 percent. ROE for FNW was 17.76 percent, more than 34 percent ahead of the trailing 12 months peer average of 13.23 percent.''

Indications are that cash dividends paid on the holding company's common stock for the year will total $.36 per share for 1989, up 24.1 percent over the $.29 per share paid in 1988.

In reviewing the unaudited results for the year ended Dec. 31, 1989, FNW Bancorp anticipates reporting net interest income of $44.5 million, an increase of 21.5 percent over the $36.6 million recorded in 1988. Assets grew 6.9 percent to $1.227 billion in 1989 from $1.148 billion in 1988. Year-end deposits stood at $1.089 billion and $1.021 billion for 1989 and 1988 respectively, representing a 6.7 percent growth rate. Book value per common share is estimated at $12.18 for the year ended 1989, compared with $10.54 per share in 1988, an increase in value of 15.6 percent.

Commenting on prospects for the coming year, Harold R. Pehlke, chief operating officer, offered the following forecast:

''There are three key factors which could contribute to record performance in 1990. The first is our exceptionally strong portfolio -- with a net charge-off ratio of less than .25 percent and a net interest margin average of 4.54 percent, which we expect to maintain in 1990. The third is the generally accepted forecast that interest expenses on deposits in 1990 will decline. Declining money costs coupled with a high-quality loan

portfolio, we feel, should position FNW Bancorp for continued growth in net income and could even improve our return on average assets. We are comfortable with the projected 1990 earnings of $2.20 per share estimated by certain members of the investment community.''

FNW Bancorp is a $1.2-billion multibank holding and equipment leasing company operating in selected markets in Northeastern Illinois with 15 locations in the high-growth areas of Cook, Kane, Lake and DuPage Counties.

DEERFIELD BEACH, FL (JAN. 8) PR NEWSWIRE - CheckRobot Inc. (NASDAQ: CKRB) today announced that Wakefern Food Corp. has purchased and leased to its member ShopRite store in Marlton, N.J and ACM (R) (Automated Checkout Machine) system consisting of six lanes. Wakefern Food Corp. is the largest retailer-owned food cooperative in the United States.

Wakefern and the Perlmart ShopRite in Marlton have been conducting extensive testing of the automated checkout machines under a lease agreement that had been offered by CheckRobot. This agreement allowed an opportunity to test an ACM system in a live environment for a limited amount of time. At the completion of the test, the ShopRite store had the opportunity to either retain the system or return it to CheckRobot at no

charge. Based on the success of the test, the ACM system was acquired. As a result of the test, other retail members of the Wakefern cooperative have indicated an interest in the ACM system.

"Wakefern represents another significant retail operation that has confirmed the value of ACMs," says Charles J. Beech, CheckRobot's president and chief executive officer. "This purchase continues the movement of new customers to buy ACMs across the U.S."

CheckRobot develops and markets ACM automated checkout machines for supermarkets. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar code scanners and a proprietary merchandise security system, the ACM allows shoppers to quickly scan and check out merchandise before paying centrally located cashiers.

CONTACT: Richard Honerkamp, chief financial officer of CheckRobot Inc., 305-426-1600.

MINNEAPOLIS (JAN. 8) PR NEWSWIRE - Network Systems Corp. (NASDAQ-NMS: NSCO) today announced that its revenues for the fourth quarter ended Dec. 31, 1989, were stronger than anticipated and should exceed $42,000,000. Exact revenue figures won't be known until normal processing procedures have been completed, but with this estimate, revenue for the year would exceed $141,000,000.

The company said that it will report complete financial results sometime before the middle of February, but that it expected income per share to exceed estimates by stock market analysts, who have predicted results for the year ranging from 50 cents to 55 cents. For the first nine months, the

company earned 33 cents per share on revenues of $99,019,000.

Last year the company had revenues of $131,470,000 for the year and $36,246,000 for the fourth quarter. Income per share was 39 cents and 5 cents for the respective year and quarterly period. These income per share amounts included a 10 cent charge to earnings for potential inventory obsolescence taken in the fourth quarter of 1988.

Network Systems, based in Minneapolis, makes and markets high-performance data communication systems.

LONG BEACH, CA (JAN. 8) PR NEWSWIRE - Heinz Pet Products Co., one of the

nation's leading pet food producers, today announced plans to relocate its corporate headquarters offices from Long Beach to northern Kentucky, directly across the Ohio River from Cincinnati.

The relocation, which will involve approximately 300 employees, is scheduled to begin Aug. 1, 1990.

The more central location of the company's new headquarters will bring it closer to its distribution and manufacturing facilities and contribute to a significant decrease in operating costs, while improving the working environment for its employees.

All Heinz Pet Products corporate headquarters employees, which include approximately 200 managerial/professional and 100 administrative/staff positions, have been offered their present jobs at the new location. The company will provide assistance to those employees who choose to relocate to the Greater Cincinnati area.

Company officials stated that the move will have no impact on the company's Terminal Island, Calif., facilities. Officials of Star-Kist Seafood Co., a Heinz subsidiary that formerly oversaw Heinz's pet food operations, has indicated that it has no plans to move its offices from Long Beach.

Heinz Pet Products Co., a subsidiary of Pittsburgh-based H.J. Heinz Co. (NYSE: HNZ), manufactures such major pet food brands as 9-Lives, Amore and Kozy Kitten cat foods, and Reward, Skippy Premium and Recipe dog foods. The company also produces Jerky Treats and Meaty Bone, two leading brands in the dog snacks market.

MINNEAPOLIS (JAN. 8) PR NEWSWIRE - International Multifoods (NYSE: IMC) announced today that K. Marvin Eberts, Jr., vice president-Finance and chief financial officer, is leaving the company effective Feb. 1 to pursue other interests.

Gerhardt P. Kirchmann, vice president and controller, will serve as acting chief financial officer until a successor is named.

''We appreciate Marvin's contributions to the company,'' said Tony Luiso, chairman, president and chief executive officer. ''He helped strengthen the company's financial position during our major restructuring, and we wish him well in his future plans.''

Eberts, 57, has held his current position since joining Multifoods in 1985. Prior to that he worked as an independent consultant and had a 25-year career with Stokely-Van Camp Inc. in Indianapolis, Ind.

Kirchmann, 62, has been with Multifoods since 1956. Following a wide variety of assignments in accounting, auditing and financial analysis, he was promoted to director of accounting in 1969 and was elected controller by Multifoods' board of directors in 1973. In 1986, he was elected to the additional office of vice president.

Minneapolis-based International Multifoods is a diversified food company with major operations in the United States, Canada and Venezuela.

#90008p0277 01/08/1990 ~PR Newswire

PHILADELPHIA (JAN. 8) PR NEWSWIRE - Jetronic Industries, Inc. (AMEX: JET) announced today that its board of directors, by a unanimous vote of the directors present at a special meeting held on Jan. 5, 1990, decided that the tender offer by Flagship Acquisition Corp. for all of the outstanding common stock of Jetronic for a price of $3.50 per share is illusory, the price offered is inadequate, the offer is not in the best interests of

Jetronic and its shareholders, and the offer is false and misleading and omits material information.

Accordingly, the board strongly recommended that the shareholders of Jetronic not tender their shares in response to the Flagship offer. The board reached those conclusions after thorough and careful review of all relevant factors and with the advice of its financial adviser and legal counsel, Jetronic reported.

At the Jan. 5, 1990, meeting, the board received the opinion of its financial adviser, the investment banking firm of Legg Mason Wood Walker, Inc., that the price proposed to be paid for Jetronic's shares pursuant to the Flagship offer is inadequate from a financial point of view. Jetronic said that the board considered other legal, commercial and financial factors, among them several significant uncertainties in the Flagship offer, including Flagship's admission that it has neither the financing nor commitments for financing to consummate the offer, The board also considered the difficulties in obtaining financing for the offer in light of the effects of certain provisions of the Pennsylvania Business Corporation Law on the offer. In addition, the board considered the potentially adverse affect of the offer on Jetronic's governmental business, Jetronic's employees, suppliers and customers and the communities in which Jetronic operates.

The board also directed Jetronic management to consult with Legg Mason "to promote shareholder value in the exploration and development of any alternative courses of action."

Jetronic also announced it is filing today with the Securities and Exchange Commission a solicitation/recommendation statement on Schedule 14D-9, setting forth the board's recommendation with respect to the Flagship offer. The Schedule 14D-9 will also be mailed to all shareholders, along with the opinion letter of Legg Mason containing its conclusion that the Flagship offer is inadequate from a financial point of view.

Jetronic Industries, Inc. headquartered in Philadelphia, is a diversified company engaged in the manufacture of electronic equipment and furniture retailing.

NEW YORK (JAN. 8) PR NEWSWIRE - The election of Ann D. McLaughlin as a director of General Motors (NYSE: GM) was announced today by Roger B. Smith, chairman of the GM Board of Directors.

Mrs. McLaughlin served as the U.S. Secretary of Labor from 1987 to 1989, a period in which she focused public and private sector attention on the needs of a rapidly changing workforce. She is currently a visiting fellow at The Urban Institute in Washington, D.C., a private research organization that studies national socio-economic problems and related government policies and programs.

While in public service Mrs. McLaughlin also held senior management positions at the Department of Interior and the Treasury Department. In the private sector, her extensive experience with public issues included roles as a consultant at The Center for Strategic and International Studies and in the management of McLaughlin and Co. and the Union Carbide Corp.

The election of Mrs. McLaughlin increases the number of directors on the GM Board to 18, including 14 whose primary line of business is outside of General Motors.

BALA CYNWYD, PA (JAN. 8) PR NEWSWIRE - The board of directors of Atlantic Financial (NASDAQ/NMS: ATLF) announced today that it had accepted the resignation of Donald R. Caldwell, president and chief executive officer.

Caldwell, while resigning his officer positions as of Jan. 31, 1990, will remain a member of the board of directors and will assume the position of chairman of the executive committee.

Calvin D. Baker, chairman of the board of Atlantic Financial, said, "We accepted Mr. Caldwell's resignation with great personal and professional regret. His contributions over the years as chief operating officer and president and, since 1984, chief executive officer, have been immeasurable. We are extremely grateful for his continued presence on our board of directors."

Succeeding Caldwell as president and chief executive officer is Joshua C. Thompson, presently chief operating officer. Thompson has been with Atlantic Financial since July 1987, and has over 30 years of commercial and investment banking experience. Most recently, he was executive vice president with Meridian Bancorp, Inc., the holding company for Central Penn National Bank, where he was president and chief operating officer for six years. He is a graduate of the College of William and Mary and a resident of Bryn Mawr, Pa.

Commenting on the change, Thompson said, "Those of us who have worked with Don will surely miss his day-to-day leadership. Our goal is to continue operating with the same sense of diligence and integrity he brought to the company. Going forward, we obviously face a new set of conditions as a company. We have developed a restructuring plan which we have begun to implement. We believe this plan represents the best course of action for

our stockholders, customers, and employees and will pursue it aggressively."

Caldwell has been with Atlantic Financial, beginning as a consultant to the thrift industry, since 1982. He was named president and chief executive officer after the death of the company's founder, Raymond G. Strecker, in September 1984. Upon leaving the company, Caldwell will become a senior officer of a privately held corporation outside of the Philadelphia area in a non-competing industry.

"I cannot imagine time better spent than the years I've been at Atlantic Financial. The company has embarked upon a totally new strategic direction and, therefore, I think it is an appropriate time for the change. I intend, however, to still remain active as a director and am confident that, given the support of the regulatory authorities, the present management team -- under the most capable leadership of Josh Thompson -- will guide the company through what are surely the most tumultuous times in the industry's history," Caldwell said.

Atlantic Financial, with over $7 billion in assets, is the largest savings and loan association in Pennsylvania and West Virginia, and has other thrift operations in California and Nevada. Its common stock and $1.05 cumulative convertible preferred stock, Series A, are traded on the NASDAQ National Market System under the symbols ATLF and ATLFP, respectively. Its 7.75 percent convertible debentures are traded over- the-counter under the symbol ATLFG.

LOS ANGELES (JAN. 8) PR NEWSWIRE - TransTechnology Corporation (NYSE: TT) today said that Ralph E. Hutchins has become president and chief executive officer effective Jan. 1, 1990, with the retirement of former President Dan McBride.

McBride, 67, led TransTechnology for over 20 years and continues as a consultant to the company and as a board member. Hutchins, 52, formerly executive vice president and chief operating officer and a 12- year executive with TransTechnology, became the new chief executive officer according to a plan of succession adopted by TransTechnology's board last September. Hutchins additionally has been elected to the board of directors. According to the company, there are no immediate plans to fill the position of chief operating officer.

"We appreciate the many years of dedicated service that Dan McBride has

given to TransTechnology," said Chairman Dr. Arch Scurlock. "Under his leadership, we have grown a hundredfold into a $235 million diversified organization providing products and services to customers around the world. We are pleased that his experience and expertise will remain available to us.

"Our new president also has exceptional leadership capabilities. Ralph Hutchins is our most capable ad experienced manager and is highly qualified for his new responsibilities. He has proven his dedication to TransTechnology, and we are looking to him to lead us into the new decade."

Hutchins joined TransTechnology in 1977 and was elected executive vice president and chief operating officer in January 1989. He previously served as a group vice president. Hutchins earned his bachelor of science degree in chemical engineering from Northeastern University and his master of business administration degree from Boston College.

TransTechnology Corporation is a diversified company manufacturing and servicing a wide range of aerospace-defense products, advanced- technology products, and industrial products.

HARRISBURG, PA (JAN. 8) PR NEWSWIRE - Paul Franklin of Hunlock Creek, Luzerne County, today was named director of the Williamsport regional office of environmental protection for the Department of Environmental Resources (DER).

"With more than 15 years of experience in the administration of environmental and public health programs, Paul Franklin is well- qualified to direct the state's environmental programs in northcentral Pennsylvania " DER Secretary Arthur A. Davis said.

Franklin will supervise 115 employees involved in air, water, sanitation, and waste management programs for 14 counties. The counties are Bradford, Cameron, Clearfield, Centre, Clinton, Columbia, Lycoming, Montour, Northumberland, Potter, Snyder, Sullivan, Tioga and Union.

Since 1986, Franklin has been employed as DER's Wilkes-Barre regional sanitation manager and regional water quality manager. He was responsible for administering regional regulatory programs involving sewage treatment, sewage planning and grants administration, enforcement of the Clean Streams law, drinking water, public eating and drinking establishments, public bathing facilities and vector control.

Franklin, who joined DER in June 1974, also served as a sanitation supervisor for various DER offices in north central and northeastern Pennsylvania.

He was a police officer for Bloomsburg and a public school teacher in Pennsylvania and New Jersey.

Franklin holds a bachelor degree from Bloomsburg University and a master's degree from Marywood College, Scranton.

LANDOVER, MD (JAN. 8) PR NEWSWIRE - Applied Research Corporation (ARC) (PHLX: ARL) has recently been awarded three new contracts worth an estimated $3.6 million, bringing ARC's total contract backlog to around $17.5 million.

ARC has signed a subcontract with General Sciences Corporation to continue support of the Cosmic Background Explorer (COBE) Mission. This satellite was launched by NASA into Earth orbit to collect and relay scientific data on the cosmic background. This contract is expected to be worth $3.1 million over the next five years.

In addition, ARC is pleased to announce significant progress in their efforts to expand the more profitable instrumentation business with the recent award of a Phase II Small Business Innovative Research (SBIR) contract from the National Aeronautics and Space Administration (NASA)/Goddard Space Flight Center for development of a Star Tracker. This contract of $0.5 million will fund the development and fabrication during the next 24 months of a high precision low cost tracker used in the guidance system of rockets and satellites. The goal of this effort is to produce an instrument that will replace current hardware for fraction of the cost with no loss of accuracy.

ARC has also been awarded an SBIR for $50,000 by the NASA/Johnson Space Flight Center to develop a Cosmic Dust Velocity Sensor.

NEW YORK (JAN. 8) PR NEWSWIRE - Guilford Mills, Inc. (NYSE: GFD)

announced today that Alan G. Lewis has been named vice president of marketing for the athletic wear and swimwear focused marketing unit assigned to Guilford's Gilbert Frank business unit. Lewis will be responsible for market development and sales for all Guilford products designed for or suitable for any athletic wear or swimwear applications. This is a new position in the company.

After a strong background in sales and retailing Lewis joined Gilbert Frank Corporation, America's leading print converter to the swimwear industry, as east coast sales manager/swimwear. Subsequently, he held various marketing positions in Gilbert Frank until this recent appointment.

Lewis will report to Alfred Greenblatt, president of Gilbert Frank and executive vice president of Guilford Mills.

In announcing this appointment Greenblatt stated, "It is with great satisfaction that we are offering this important position at Guilford Mills to a man of Alan Lewis' experience and talents."

Lewis will be headquartered at Gilbert Frank's offices in New York City.

SPRING VALLEY, NY (JAN. 8) PR NEWSWIRE - Par Pharmaceutical, Inc. (NYSE: PRX) today announced that its board of directors had authorized the adoption of a shareholder rights plan designed to protect Par's shareholders from various abusive takeover tactics, including attempts to acquire control of Par at an inadequate price.

The plan provides for the issuance of one "Right" for each outstanding share of common stock. Each right entitles the holder to buy one share of common stock for $25. The rights may be exercised only if a person or group acquires 15 percent or more of Par common stock or a tender offer is announced that would result in ownership of 15 percent or more of Par's common stock. Par may redeem the rights (at one cent each) at any time up to ten days after a buyer acquires 15 percent of Par common stock, and thereafter under certain circumstances.

Kenneth I. Sawyer, president and chief executive officer of Par, said, "This plan is not aimed at preventing a takeover, but to encourage a buyer to negotiate appropriately with the board prior to attempting a takeover. The rights will help the board assure that all Par shareholders realize the full value of their investment in the company."

Sawyer also noted that, while Par is currently unaware of any attempts by

other parties to acquire control of Par, the adoption of the plan is a prudent action in light of the current environment.

Under certain circumstances, including those involving the acquisition of Par by a holder of at least 15 percent of its common stock, or involving the acquisition of at least 25 percent of Par common stock, all rights holders except the acquirer may purchase, at the exercise price of the rights, Par common stock (or stock of the acquirer) having a value of twice the exercise price of the rights.

The rights will be issued to common shareholders of record as of the close of business on Jan. 19, 1990. The rights will expire ten years later. The rights are more fully described in a letter that will be mailed to all Par shareholders.

Par Pharmaceutical, Inc., headquartered in Spring Valley, N.Y., is engaged in the manufacture of prescription generic drugs primarily in tablet and capsule form and, through its Indianapolis subsidiary, Quad Pharmaceuticals, Inc., in injectable form.

BALA CYNWYD, PA (JAN. 8) PR NEWSWIRE - The board of directors of Atlantic Financial (NASDAQ/NMS: ATLF) announced today that it had accepted the resignation of Donald R. Caldwell, president and chief executive officer.

Caldwell, while resigning his officer positions as of Jan. 31, 1990, will remain a member of the board of directors and will assume the position of chairman of the executive committee.

Calvin D. Baker, chairman of the board of Atlantic Financial, said, "We accepted Mr. Caldwell's resignation with great personal and professional regret. His contributions over the years as chief operating officer and president and, since 1984, chief executive officer, have been immeasurable. We are extremely grateful for his continued presence on our board of directors."

Succeeding Caldwell as president and chief executive officer is Joshua C. Thompson, presently chief operating officer. Thompson has been with Atlantic Financial since July 1987, and has over 30 years of commercial and investment banking experience. Most recently, he was executive vice president with Meridian Bancorp, Inc., the holding company for Central Penn National Bank, where he was president and chief operating officer for six years. He is a graduate of the College of William and Mary and a resident of Bryn Mawr, Pa.

Commenting on the change, Thompson said, "Those of us who have worked with Don will surely miss his day-to-day leadership. Our goal is to continue operating with the same sense of diligence and integrity he brought to the company. Going forward, we obviously face a new set of conditions as a company. We have developed a restructuring plan which we have begun to implement. We believe this plan represents the best course of action for our stockholders, customers, and employees and will pursue it aggressively."

Caldwell has been with Atlantic Financial, beginning as a consultant to the thrift industry, since 1982. He was named president and chief executive officer after the death of the company's founder, Raymond G. Strecker, in September 1984. Upon leaving the company, Caldwell will become a senior officer of a privately held corporation outside of the Philadelphia area in a non-competing industry.

Atlantic Financial, with over $7 billion in assets, is the largest savings and loan association in Pennsylvania and West Virginia, and has other thrift operations in California and Nevada. Its common stock and $1.05 cumulative convertible preferred stock, Series A, are traded on the NASDAQ National Market System under the symbols ATLF and ATLFP, respectively. Its 7.75 percent convertible debentures are traded over- the-counter under the symbol ATLFG.

SAN FRANCISCO (JAN. 8) PR NEWSWIRE - Collagen Corp. (NASDAQ: CGEN) today announced a 46 percent increase in product sales for the first six months of the company's fiscal year. The announcement was made at Hambrecht & Quist's Annual Life Sciences Conference in San Francisco.

Collagen Corp. President and CEO Howard Palefsky said product sales for the first six months increased to over $24,000,000 from last year's $16,654,000, representing a 35 percent increase in revenue contribution from Collagen Biomedical and a 115 percent increase from the company's Target Therapeutics subsidiary.

Palefsky reported that results from ongoing clinical studies of the company's Contigen(TM) Bard Collagen implant for urinary incontinence have progressed favorably, and data has been submitted to the FDA for review. Discussing the clinical data for Collagen's Collagraft(TM) Bone Graft Substitute, Palefsky said results to date demonstrate the desired level of efficacy, and the company expects to submit data to the FDA in spring of this year.

Headquartered in Palo Alto, Calif., Collagen Corp. is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

#90008p0343 01/08/1990 ~PR Newswire
GUILDERLAND, NY (JAN. 8) PR NEWSWIRE - Intermagnetics General Corporation (NASDAQ: INMA) today reported net sales for the second quarter ended Nov. 29, 1989 of $9,515,000 compared to $10,140,000 in the corresponding quarter of last year. The company's net earnings decreased to $126,000, or $.02 per share, from $419,000, or $.07 per share in the same period last year.

For the first half of fiscal 1990, net sales were $19,083,000 compared to $19,605,000 in the previous year. Net earnings for the half were $326,000 or $.05 per share, compared to $820,000, or $.13 per share last year.

In announcing the results, Carl H. Rosner, president, commented, "As indicated when reporting last quarter's performance, results continue to be affected by start-up costs and production scale-up delays relating to our new MRI magnet system. We believe these issues will be resolved in the third quarter, with shipments increasing sharply thereafter. We remain very optimistic about the sales potential for this magnet, based upon the market reception reported by our customer. Also impacting the quarter was a decline in the production of superconductive wire due to reduced customer demands in the period and additional inspection necessary to insure compliance with quality standards. Partially offsetting these factors was the benefit from a recovery of costs associated with a $1.4 million order canceled in the prior fiscal year which contributed approximately 15 percent of the company's gross margin for the quarter."

Rosner concluded by stating, "Our backlog of orders remains near record levels and we are confident the planned higher production rates for our new MRI magnet systems will be achieved in the second half of the fiscal year."

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in Magnetic Resonance Imaging (MRI)

medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent systems and material separators.

NEW YORK (JAN. 8) PR NEWSWIRE - DPC Acquisition Corp. announced today that, with the assistance of its financial advisor, PaineWebber Incorporated, it is continuing to implement its plan to acquire Dataproducts Corporation (AMEX: DPC) pursuant to its $10 per share cash tender offer. It stated that financing commitments for the offer would not be in place by the Jan. 9, 1990 deadline fixed by Dataproducts Corporation for closing of an offer. DPC Acquisition Corp. stated, however, that it is not bound by this artificial deadline and that it is extending its tender offer to 12 midnight New York City time on Tuesday, Jan. 23, 1990. The offer had been scheduled to expire at 12 midnight on Tuesday, Jan. 9, 1990.

DPC Acquisition Corp. further stated that PaineWebber, in connection with its efforts to arrange financing, has contacted potential senior financing sources and also expects to contact potential participants in bridge financing. Members of the DPC Acquisition Group and PaineWebber also are pursuing potential presale arrangements for certain of Dataproducts'

operations.

DPC Acquisitions Corp. also announced that its consent solicitation had not yet received sufficient support to replace the directors of Dataproducts, although it had received the support of a significant constituency of shareholders. DPC Acquisition Corp. believes that the magnitude of the dissatisfied shareholder group is significantly larger than the group which had expressed consent to its proposals, but that certain large holders have chosen at this time not to consent until DPC Acquisition Corp. obtains financing for its tender offer. DPC Acquisition Corp. intends to continue to concentrate its efforts on obtaining financing for the offer, but reserves the right to take action with respect to a consent solicitation or otherwise which it may deem appropriate.

The depository for the offer has advised that at the close of business on Friday, Jan. 5, 1990, approximately 6,632,061 Dataproducts common shares had been tendered, which, together with the 1,534,600 shares of Dataproducts common stock owned by affiliates of DPC Acquisition Corp., represent approximately 41 percent of Dataproducts' outstanding common stock, and approximately 38 percent of Dataproducts outstanding common stock on a fully diluted basis.

ST. LOUIS (JAN. 8) PR NEWSWIRE - INTERCO Inc. (NYSE: ISS) announced today the operating results for the third quarter and nine months ended Nov. 30, 1989.

The company reiterated that because of the commitment to offer for sale its Apparel Manufacturing Group and General Retail Merchandising Group, the financial results for these groups are reported as discontinued operations. The results for the Footwear Manufacturing and Retailing Group and the Furniture and Home Furnishings Group are reported as continuing operations, including the results of Ethan Allen to the date of its sale in the second quarter of the current year and Senack Shoes, Inc., the majority of which was also sold at the end of the second quarter.

THIRD QUARTER RESULTS

Net sales from continuing operations were $376.9 million, compared with $547.4 million one year ago. Core companies' (Broyhill, Lane, Converse and Florsheim) net sales were $373.2 million, compared with $435.2 million last year. Earnings from continuing operations before interest expense, restructuring costs, asset dispositions and income taxes were $28.7

million, compared with $51.8 million in the prior year. Core companies' earnings were $31.4 million, compared with $37.2 million a year ago. Net loss, including discontinued operations, was $28.5 million, compared with net earnings of $10.5 million last year.

NINE MONTHS RESULTS

The operating results for the nine months ended Nov. 30, 1989, compared with the prior year, were as follows:

Net sales from continuing operations were $1.28 billion, compared with $1.53 billion one year ago. Core companies' net sales were $1.10 billion, compared with $1.21 billion last year. Earnings from continuing operations before interest expense, restructuring costs, asset dispositions and income taxes were $101.6 million, compared with $144.1 million in the prior year. Core companies' earnings were $94.0 million, compared with $106.9 million a year ago. Net earnings, including discontinued operations and gains from asset dispositions, were $58.5 million, compared with net earnings of $76.1 million last year. Operating performance for the year to date was led by the core furniture companies, Broyhill and Lane, whose combined results were ahead of the prior year. The third quarter performance was slightly below the year ago period reflecting softness in the furniture industry. Results for the footwear group were behind the prior year's performance for both the third quarter and the year to date.

HOUSTON (JAN. 8) PR NEWSWIRE - Continental Airlines announced today that it will introduce the lowest air fares in Texas history, continuing the tradition of keeping Texas the low fare capital of the nation. The new fares, called TexSavers, will be as low as $9 each way, as much as 69 percent lower than existing fares. They are good for one-way travel.

TexSaver fares will be good between all Texas cities served by Continental. In addition, the fares will be good from Houston to New Orleans, Oklahoma City and Tulsa, Okla.

More than 5,000 TexSaver seats will be available on 112 daily flights. In 12 months consumers will save nearly $35 million with TexSaver fares.

TexSaver fares will be as low as $9 for travel between Houston and Austin, Corpus Christi, Dallas/Fort Worth, Harlingen, McAllen, New Orleans and San Antonio.

Continental's announcement was made in front of a 50 year-old Continental DC-3 parked on a taxi-way in front of the historic Houston Municipal Airport building at Hobby. The setting symbolized the history of low fares in the state.

BALA CYNWYD, PA (JAN. 8) PR NEWSWIRE - Atlantic Financial (NASDAQ/NMS: ATLF) announced today its intent to sell the Southern California branches of its wholly owned subsidiary, Atlantic Financial Savings Bank, FSB (AFSB), to Columbia Savings and Loan Association (NYSE: CSV), of Beverly Hills, Calif.

Terms of the transaction were not disclosed. The sale depends on the execution of a definitive agreement and securing required regulatory approvals. The six branches represent approximately $170 million in deposits. Following the sale, AFSB will retain 11 branches in the San Francisco Bay area.

Donald R. Caldwell, president and chief executive officer at Atlantic Financial, said, "The sale represents one more important step in our restructuring plan to consolidate Atlantic's operations in response to the pressures of new regulatory capital guidelines.

"In addition, we are confident that our customers in Southern California will be pleased with the products offered by Columbia and by the continued

high quality of branch service." Two branches are based in Los Angeles and there is one each in Century City, Santa Monica, Northridge and Sherman Oaks.

Columbia Savings and Loan Association, with approximately $12 billion in assets as of Sept. 30, 1989, operates 22 branches and seven lending centers in Southern California. Its securities are traded on both New York and Pacific stock exchanges under the symbols CSV and CSVPRA, respectively.

With more than $7 billion in assets, Atlantic Financial is the largest savings and loan association in Pennsylvania and West Virginia and has other operations, in addition to AFSB in California and Nevada. Its common stock and $1.05 cumulative convertible preferred stock, Series A, are traded on the NASDAQ National Market System under the symbols ATLF and ATLFP, respectively. Its 7.75 percent convertible subordinated debentures are traded over-the-counter under the symbol ATLFG.

HORSHAM, PA (JAN. 8) PR NEWSWIRE - Decision Data Inc. (DDI) announced today the appointment of Joseph J. Kroger as president and chief executive officer.

Kroger will report to Don E. Ackerman, chairman of the board for DDI and general partner of J.H. Whitney & Co.

Kroger has extensive experience in the computer industry, primarily in sales and marketing management, culminating in his appointment as president and chief operating officer of Sperry Corp. in 1985. He was subsequently named vice chairman of Unisys after the merger of Sperry and Burroughs. Kroger most recently was president and chief executive officer of BIIN, a joint venture start-up company owned by Siemens A.G. and Intel Corp. According to Ackerman, "Joe Kroger is a seasoned senior executive with the experience and leadership to drive the growth phase of DDI's strategic plan after the successful restructuring of the company."

DDI was formed in January 1988 as the result of a successful buyout of Decision Industries by private investors including J.H. Whitney & Co. and Welsh, Carson, Anderson and Stowe. In September 1988, Momentum Technologies Inc. (MTI), another private company owned by the investors, was merged with DDI.

DDI is the leading independent computer peripherals distribution company

to the IBM System 3X/AS 400 market and is the leading supplier of independent computer maintenance to the information processing middle market. DDI's headquarters is located in Horsham.

BOSTON (JAN. 8) PR NEWSWIRE - Chancellor Corporation (NASDAQ: CHCR), a Boston-based leasing and financial services company, announced today its intent to reduce the estimated residual values associated with certain transportation equipment as a result of a recent re-evaluation of that equipment.

This action will result in an after-tax charge of approximately $10 million in 1989.

Stephen G. Morison, chief executive officer, stated that "Our residual values are most typically realized only after our investors who own the equipment have received an economic return upon their original investment.

As a result of numerous changes in the transportation industry, we no longer believe that residual values of certain equipment will be substantial enough to provide sharing by Chancellor. Due to changes in accounting rules, little of the write-down is expected to be attributable to equipment leased since 1987."

Chancellor is 59 percent owned by Bruncor, Inc. of Saint John, New Brunswick, Canada. The Bruncor Group of companies also has interest in telecommunications, data processing and commercial real estate. Its common shares are listed on the Toronto and Montreal stock exchanges (symbol BRR).

Founded in 1977, Chancellor has, in recent years, concentrated on the leasing of transportation equipment. It is also involved in the leasing of aircraft, communications, medical, agricultural and other equipment. Chancellor common stock is listed on National Association of Securities Dealers Automated Quote (NASDAQ), National Market System (symbol CHCR).

DALLAS (JAN. 8) PR NEWSWIRE - InterVoice Inc. (NASDAQ: INTV) announced today earnings of $1,678,602, or 32 cents per share, on sales of $6,080,136 for the third quarter of fiscal 1990, which ended Nov. 30, 1989.

This compares to earnings of $566,684, or 16 cents per share, on sales of $2,867,606 for the third quarter of fiscal 1988. Third quarter revenues continue the growth in earnings and revenues as shown by the two fold increase on a year-to-year basis.

The company reported nine month, year-to-date, earnings of $4,905,062, or $1.09 per share, on sales of $17,879,845, as compared to earnings of $1,366,350, or 40 cents per share, on sales of 7,456,491, for the first nine months of fiscal 1989.

InterVoice develops, sells and services interactive voice response systems known as the RobotOperator(R) System,which enable callers to use the keys on their touchtone telephones, the dials on their rotary telephones, the keyboards of their personal computers, credit card terminals or their voices, to request a variety of information directly from a computer database.

Current applications of the company's systems include processing of bank accounts, credit, loans and other information requests and the provision of automated telephone operator services.

SAN BERNARDINO, CA (JAN. 9) PR NEWSWIRE - Lockheed Corp. (NYSE: LK) today formally submitted a proposal to the Norton Economic Expansion Committee (NEEC) to establish a commercial aircraft maintenance facility at Norton Air Force Base in San Bernardino, one of 86 military facilities that are scheduled for closure by 1994.

The proposal calls for Lockheed to begin operations at Norton in early 1990 under a joint-use agreement with the U.S. Air Force. Lockheed's forecast shows that employment will grow from 630 personnel at the end of the first year to 970 by 1994.

According to Lockheed's H.T. (Skip) Bowling, "We have been investigating this commercial aircraft maintenance opportunity with major domestic and foreign airlines that have large numbers of 747 aircraft in their fleets. These airlines have expressed interest in working with Lockheed provided we can meet their immediate maintenance needs. The hangars at Norton will give us that capability to respond."

Bowling, who is vice president of Lockheed Corp. and president of Lockheed Aircraft Service Co., Ontario, Calif., formally submitted the proposal today at the monthly meeting of the NEEC.

The NEEC was formed by San Bernardino County last year to plan the orderly transition of Norton from a military operation to a commercial/industrial complex.

Lockheed's proposal calls for occupancy of Norton hangar facilities in two phases. In Phase I, the company would use two of the four hangars. In Phase II, scheduled for the latter part of 1994, Lockheed would occupy the remaining two hangars. Each of the four hangars is 48,000 square feet and can accommodate 747 aircraft.

MALVERN, PA (JAN. 8) PR NEWSWIRE - James E. Wavle Jr., president of Centocor Inc. (NASDAQ: CNTO), spoke before the Hambecht & Quist Life Sciences Conference in San Francisco today.

Commenting on the company's product for gram negative sepsis and septic shock, Centoxin (TM), for which a Product License Application seeking marketing approval is pending in the United States and Europe, Wavle stated, "In our judgment, the results of the clinical trial will be regarded as very favorable to Centocor."

Centocor plans to present the results of the Centoxin pivotal trial at a major medical meeting in early May. An abstract containing key information about the trial results has been submitted and should be publicly available in mid-April.

Wavle further indicated that the company's 1990 operating results will depend in large part on the timing on any regulatory approval of Centoxin. "The timing and precise terms of regulatory approvals for new pharmaceutical products are always difficult to project," he added.

Centocor Inc., based in Malvern, develops, manufactures and markets diagnostic and therapeutic products for human health care. The company's products are based on monoclonal antibody technology and are primarily used in the management of patients with cardiovascular, infectious and autoimmune disease and cancer.

JACKSONVILLE, FL (JAN. 9) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) increased its Florida banking deposits by $1.6 billion during the 12 months ended Sept. 30, 1989, representing a 22.47 percent market share share, according to information just released by the Florida Bankers Association.

Barnett's individual, partnership and corporate (IPC) deposits were more than $21.7 billion at the end of September, or more than 8 percent higher than the same period last year, according to the FBA.

Barnett achieved this position in Florida by attracting more than 19

percent of all new deposits for the 12-month period. In the 45 counties in which it operates, the company is first in 25, second in 14 and third in four. Barnett experienced market-share gains in 18 counties from a year ago. They are:

Alachua, Brevard, Clay, Citrus, Dade, Desoto, Duval, Escambia, Hernando, Lake, Indian River, Martin, Monroe, Okaloosa, Okeechobee, Osceola, Santa Rosa and St. Lucie.

Although Barnett continues to maintain a more than 1,000-share-point advantage over its closest banking competitor (SunTrust), the company registered a decrease of 31 share points during the period, from 22.78 percent a year ago.

Barnett operates 520 offices in Florida and 40 offices in Georgia. The company has consolidated assets of more than $28.0 billion, and its stock (BBI) is listed on the New York Stock Exchange.

SAN FRANCISCO (JAN. 8) PR NEWSWIRE - Repligen Corporation (NASDAQ: RGEN) will be presenting at the Hambrecht & Quist conference in San Francisco on Tuesday, Jan. 9, 1990 in the Colonial room of the St. Francis Hotel. Presenters will be Sandford D. Smith, president and chief executive officer, and Walter C. Herlihy, Jr., Ph.D., vice president and director of research.

Items to be discussed will include the following:

1. Repligen stock reached a 52-week high of 12-1/2 on Friday, Jan. 5. The company expects to release its next earnings statement on Jan. 9, 1990.

2. A Repligen paper published in the Jan. 5, 1990 Science indicates that a human protein - PF4 (platelet factor 4) - blocks the inappropriate formation of new blood vessels that occurs in a number of diseases, including Kaposi's sarcoma and other cancers.

3. Repligen received a $3 million bonus payment from Merck & Co., Inc. in Dec., 1989, in recognition of a discovery that is expected to enable formulation of a broadly protective AIDS vaccine able to neutralize 80 percent of known HIV (human immunodeficiency virus) variants.

4. Analysts Amy Berler of First Boston and Jeffrey Casdin of Oppenheimer issued positive reports on Repligen in November, with Berler making a "buy" recommendation.

For additional information or assistance with interviews, please call contact below.

SAN FRANCISCO (JAN. 9) PR NEWSWIRE - Collagen Corp. (NASDAQ: CGEN) today announced a 46 percent increase in product sales for the first six months of the company's fiscal year. The announcement was made at Hambrecht & Quist's Annual Life Sciences Conference in San Francisco.

Collagen Corp. President and CEO Howard Palefsky said product sales for the first six months increased to over $24,000,000 from last year's $16,654,000, representing a 35 percent increase in revenue contribution from Collagen Biomedical and a 115 percent increase from the company's Target Therapeutics subsidiary.

"We are extremely proud that the strong sales momentum from our marketing efforts in the first quarter has translated so solidly into first half year results," said Palefsky. "In addition to tremendous growth in operational income, I am pleased to announce that results from our ongoing clinical trials continue to be very promising."

Palefsky reported that results from ongoing clinical studies of the company's Contigen(TM) Bard Collagen implant for urinary incontinence have progressed favorably, and data has been submitted to the FDA for review. Discussing the clinical data for Collagen's Collagraft(TM) Bone Graft Substitute, Palefsky said results to date demonstrate the desired level of

efficacy, and the company expects to submit data to the FDA in spring of this year.

Later in his presentation, Palefsky announced that Collagen's Celtrix Laboratories has recently received approval from the FDA on its first Investigational New Drug (IND) application allowing treatment of humans for psoriasis in clinical trials with the company's proprietary Transforming Cell Growth Factor beta, type 2 (TGFb2).

"This is an extremely important and exciting occasion for us," said Palefsky. "This is the first of our growth factors to be approved for human trials and our first drug-type approval."

As part of a joint agreement to develop and market TGFb2-based products for deramtological diseases, Collagen and Bristol-Myers plan to begin phase 1 and phase 2 clinical studies on a 30-patient group in January at the University of Michigan. Psoriasis and eczema effect more than 5 million people in the United States.

Headquartered in Palo Alto, Calif., Collagen Corp. is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

AUSTIN, TX (JAN. 9) PR NEWSWIRE - Electrosource Inc. (NASDAQ: ELSI), today announced the appointment of Clive Lankford to the position of executive vice president for Research, Development, and Manufacturing.

Lankford, formerly executive director of Engineering for Tracor Aerospace Inc., Austin, brings to Electrosource more than 20 years of experience in mechanical engineering, electronic component assembly, and manufacturing engineering.

Chris Morris, president and chief executive officer of Electrosource, said "Clive Lankford's expertise in the development, researchh, and manufacturing areas, as well as in electronic component assembly, should contribute to the company's capabilities in providing availability of the Horizon(TM) battery and the delivery of the electronic battery sensor."

Lankford joined Tracor Aerospace in 1983 from Mega Micro Inc., Houston, where he was manager of Mechanical Engineering. From 1967 to 1983, Lankford was with Texas Instruments Inc., Austin and Dallas, and was instrumental in the development of Texas Instruments' manufacturing

engineering capabilities in Dallas. Lankford was graduated from Texas Tech University, Lubbock, Texas, in 1966, with a Bachelor of Science degree in mechanical engineering, which he augmented with graduate studies in engineering at Texas Tech University and in business at the University of Texas at Austin.

Electrosource Inc., is a publicly traded company headquartered in Austin. The company's principal business is developing the use of coextruded wire in electrodes for lead-acid batteries.

LONDON (JAN. 8) UPI - Stock prices were slightly lower in light trading at midday Monday on the London International stock exchange.

The Financial Times 100-stock index, which fell 7.1 points Friday, was off 13.5 points to 2,431.0. The narrower top 30 industrial average was down 6.7 points to 1,942.1.

Volume amounted to around 210 million shares compared with 225 million shares traded during the same period Friday.

Shortly after the market opened, the Central Statistical Office reported British retail sales volume fell a revised 0.4 percent in November from October and was up 0.5 percent from November 1988.

In a separate report, the government said new consumer credit in November rose from October but fixed-sum lending declined for the first time in about three years. Traders almost totally ignored both reports.

Analysts said with no clear lead emerging from the futures market, attention focused on the volume of buy orders, which were significantly below recent levels.

Among the most widely traded stocks, Unilever fell 24 cents to $11.25 amid speculation the company may announce a rights issue to fund a takeover.

B.A.T. Industries added two cents to $13.45, English China added four cents to $7.66 and British Aerospace fell 18 cents to $9.10.

#90008u1364 01/08/1990 ~United Press International

DETROIT (JAN. 8) UPI - Two of the nation's largest pension funds that have large stakes of General Motors Corp. stock have asked directors of the giant automaker to consider a broader range of candidates to succeed company Chairman Roger B. Smith when he retires Aug. 1.

Both the New York and California public employee pension funds, which have expressed concern about GM's long term competitive position, also asked GM in letters to its top directors that they be consulted before any major policies or decisions are made, a New York Times report said Monday.

GM's board met Monday at a regularly scheduled montly session in New York, company spokesman William Winters said, but declined to specify if discussion concerning Smith's successor was on the agenda. Winters said GM would most likely have a response to the report following the meeting.

Last fall Smith, who has been GM chairman since 1981, said an executive committee was being formed to consider his successor. That fueled already intense speculation about who would take over the reins of the nation's top automaker, which has seen its share of the U.S. market erode despite a $40 billion modernization program in the 1980s.

One company spokesman in Detroit hinted that a successor to Smith could be named this May, when GM holds its annual shareholders' meeting. The actions by these pension funds - and increasingly vocal criticism of company management from other top shareholders - underscore moves by such groups to get more involved in the operations of major companies, especially if they are not doing as well as expected.

Such institutions have large financial stakes in these corporations and must ensure the value of their holdings to provide for their vast numbers of retirees.

A spokesman for the New York State and Local Retirement System said the pension fund's letter expressed concern over GM's loss of market share, recent reports about its manufacturing efficiencies, and the poor growth rate of its stock.

Richard Copus, general counsel of the California Public Employee Retirement System, said his fund's letter to GM also expressed dismay over GM's performance.

"There seems to be agreement among the people we talk to that this American institution is going downhill fast, and we're paying for it," he said.

#90008u1822 01/08/1990 ~United Press International

DETROIT (JAN. 8) UPI - United Auto Workers President Owen Bieber said Monday the existing infrastructure of the U.S. auto industry and its jobs should be preserved through sensible legislation, not replaced with operations of foreign carmakers.

Bieber, during a speech to the 14th annual Automotive News World Congress in Detroit, reiterated the union's call on the Japanese government to lower the voluntary export restraint levels from 2.3 million cars to 1.5 million units this year because of the added production of "transplant" facilities, or U.S. assemply plants set up by Japanese automakers.

Those transplant operations produced more than 1 million cars in 1989, with output slated to double by the early 1990s.

The Japanese trade ministry will set its annual voluntary export level within the next month or so for the fiscal year that begins in March. "That's a realistic approach, but so far I haven't heard the Bush administration endorsing it," said Bieber, who heads the one million-member union.

"When are policymakers in this country going to wake up and realize that when you already have a developed automotive infrastructure in your country, you are a little bit crazy if you invite foreigners to come in and build a second one whose only purpose is to displace the first?" Bieber told the four-day congress that ends Wednesday and is sponsored by the weekly industry publication.

"Common sense argues that you seek to protect the industry you've got in view of the jobs it provides and its many linkages to other important sectors of the national economy," he added.

The union leader also chastised those who think a "worker be damned" type of free trade is acceptable in this country, pointing out that when Europe lowers its trade barriers in 1992, voluntary export restraints with Japan will include their European transplant production.

"I think what they have now resolved to do with respect to Japanese auto companies is very interesting and is directly relevant to our situation in North America," Bieber said, noting that he thinks the Japanese "will try to cut a better deal" with the Europeans before the trade restrictions come down to open the world's biggest and most lucrative market.

Bieber also praised top U.S. automakers for being what he called "highly accountable" to consumers, adding that consumers will not be hurt if the government "decides it's time to preserve the domestic automotive sector." "But I can tell you that America will be shafted if our goverment continues to sit on its behind as this industry goes down."

The UAW is to begin negotiations with General Motors Corp., Ford Motor Co. and Chrysler Corp. late this summer for a new national labor pact to replace the ones that expire Sept. 14, 1990.

Bieber has said that enhancing job security is the UAW's main goal, while carmakers have said they must finds ways to be more productive and cost-efficient.

#90008u1934 01/08/1990 ~United Press International
CUPERTINO, CA (JAN. 8) UPI - Tandem Computers Inc., capitalizing on its reputation for reliability, introduced a mid-range computer Monday that gives it a foothold in the fast growing market for computers based on the Unix operating system. Analysts said the computer would open new opportunities for Tandem in the telecommunications and manufacturing industries.

The Integrity S2 system, priced from $172,000 to $248,000, is designed for companies that want to use the Unix operating system for critical business applications and can not afford to have it break down, Tandem said. The computer is built with three separate microprocessors made by Mips Computer Systems, allowing it to continue operating if one fails.

Tandem, with sales of $1.6 billion in the fiscal year ended in September, made its name with "non-stop" computers used by stock exchanges, airline ticketing offices, automated bank teller machines and other high-volume users.

Analysts said the company's reputation for reliability would help ease fears among mainstream business computer users about the complex and sometimes difficult-to-use Unix operating system. "That's what Tandem brings to the table," analyst Lucianne Painter with Salomon Bros. said.

Unix, developed by American Telephone & Telegraph, was initially targeted at engineers and other technical professionals but has gained acceptance among other business users because it can be used on a wide variety of systems, from personal computers to giant supercomputers.

James Treybig, chief executive officer and founder of Tandem, said the Unix system would lay the foundation for "a major new business for Tandem." The company has signed up Nixdorf AG Computer of West Germany to jointly

market the system. "We look forward to a growing worldwide demand for this system in the telecommunications, manufacturing and government markets," Treybig said.

#90008u2274 01/08/1990 ~United Press International

DETROIT (JAN. 8) UPI - Chrysler Corp. said Monday it will soon propose a cellular telephone system installed inside the driver's sun visor on selected 1990 models.

The telephones will be available to customers in California beginning March, on large sedans including Imperial, New Yorker, and Dodge Dynasty models, and throughout the country in the fall, the company said.

The Visorphone, developed by Chrysler and OKI Telecom of Atlanta, is an industry first, the company said. It has a 100-number memory, programmed one-touch dialing, and hands free operation. It is expected to be priced at below $900, the company said.

#90008u2339 01/08/1990 ~United Press International

DETROIT (JAN. 9) UPI - A Washington consumer group Monday charged Chrysler Corp., and the former American Motors Corp. which Chrysler acquired in 1987, with trying to cover up findings concerning safety defects in Jeep CJ sport utility vehicles.

Public Citizen also charged the National Highway Traffic Safety Administration with failing to demand a recall of the Jeep CJs both in 1982 and 1986.

The group said that instead, Diane Steed, NHTSA's administrator at the time, merely issued a pamphlet warning consumers of the special precautions drivers should take when operating a sport utility vehicle.

There are still 400,000 CJ models on the road, according to the consumer group.

''NHTSA has a legal duty to demand evidence pointing to a possible defect '' retired NHTSA chief counsel Frank Berndt told the safety group, founded in 1971 by Ralph Nader and now headed by former NHTSA chief Joan Claybrook.

Public Citizen, in its January/February magazine now being distributed to members said that Chrysler, which inherited about $1.5 billion in outstanding Jeep lawsuits in the AMC takeover, launched an offensive to counter its opponents.

Those opponents, including the families of numerous victims, claim the CJ models were prone to roll overs to cause thousands of deaths, the group said.

Part of that offensive by Chrysler was to put a gag order last May on Rahn Huffstutler, a metallurgist with AMC who reportedly found that the CJ models had a defective leaf spring shackle pin that could cause them to easily roll over if it snapped.

The consumer group said Huffstutler urged AMC to redesign the pin, but no such part was ever made.

Chrysler spokesman Steve Harris said the company is not ''gagging any company engineer.''

''What we have done is gone to the courts, successfully, I might add, to keep an ex-employeee that worked with our legal department from distributing stolen documents and other information that are privileged and confidential.

''Because this material is privileged, we cannot comment on the information,'' he said. ''But we can assure you that several courts have looked at this issue and agreed with us that the material is privileged and confidential.

''NHTSA has on at least three occasions reviewed the Jeep CJ and found no safety related defect. We are confident that the Jeep CJ is safe when driven in a responsible manner.''

Chrysler has insisted in the past that it knows of no safety defects in the Jeep CJs, which were replaced in 1986 with a larger and redesigned model called the Wrangler.

NHTSA is also currently investigating the Bronco II sport utility vehcile made by Ford Motor Co. for its propensity to roll over.

Ford has replaced the Bronco II with a new vehicle called the Explorer, with company executives ackowledging that negative publicity related to the government investigation was part of the reason for the name change.

-30- 3155

#90008u2358 01/08/1990 ~United Press International

NEW YORK (JAN. 8) UPI - Citibank N.A. and other major financial institutions took the lead of the First National Bank of Chicago Monday in lowering the prime interest rate, charged on loans to corporations and other major borrowers with sterling credit ratings, to ten percent from

10.5 percent.

The cuts, effective immediately, had been awaited since the Federal Reserve's Dec. 20 easing of U.S. banking system credit. But financial institutions were slow to act on the central bank's downward adjustment.

First Chicago's rate cut was quickly matched by Citibank, the largest U.S. bank, Chase Manhattan Bank N.A., Morgan Guaranty Trust Co., BankAmerica, Security Pacific National Bank, Manufacturers Hanover Trust Co., Bankers Trust Co. and a number of "super-regional" and regional banks.

"It was time," said First Chicago chief economist James E. Annable, who with other bank officers decided on the cut in a morning conference. "We looked at each other and asked, 'Why isn't anyone else doing it?"'

Annable said the bankers concluded that the United States is in for more economic slowing, that the Fed is going to ease credit policy further and that bank interest rates will not be moving back up soon.

Economic indicators like the U.S. unemployment data released Friday, showing less job growth than expected, "really affirmed our view that in the quarter that just finished we looked flat," he said. December gains of only 140,000 jobs left unemployment at a 5.3 percent rate. "We don't see any sharp rebound in this quarter," Annable said. "It's not a recession, but there's going to be a little pause."

Chief economist Jerry Jordan of the First Interstate Bank Corp., based in Los Angeles, said he expected to see the prime rate come down once or twice again as the economy continues to soften into the spring.

Prime cuts could brace the economy, said Lyle Gramley, chief economist at the Washington-based Mortgage Bankers Association. "This will help to keep the economy from tipping into recession," he said. But he predicted that the Fed will ease further, as "interest rates have some way to go yet."

The prime rate is used as a base rate to calculate interest on a variety of loans to consumers and small businesses. A lower prime could mean savings for many consumers with home-equity loans pegged to the key rate. "That's certainly good news for people who have that kind of indebtedness - their monthly payments are going to come down," said Gramley.

But he said the prime rate reduction, while generally beneficial, was likely to have only a marginal effect on the housing industry, which normally leads the economy out of a slump when stimulated by lowered rates.

"We have seen and we will see more of a response by the housing industry, but it's a very subdued response," said the economist. "The housing market isn't taking off like gangbusters like it used to."

Unfavorable demographics are behind this, he said. The size of the 25-34 age group that fuels the first-home market leveled off in 1989 and will decline in 1990. And overbuilding in the early 1980s has led to a housing glut.

In any case, said First Interstate's Jordan, home mortgages rates are tied to yields on U.S. Treasury bonds, not the prime. "Unfortunately, out there across the land a lot of homeowners or potential homebuyers are thinking mortgage rates are going down, which isn't true - they're going up."

Banks' slowness to cut their prime rates perplexed analysts, who noted that since the last across-the-board cut in the prime rate - in July, when it was reduced from 11 percent to 10.5 percent - the banks' own cost of short-term borrowing had been substantially reduced.

At that time the federal funds rate, which banks apply on overnight loans to each other and is indirectly controlled by the Fed, stood at 9.25 percent. Fed moves have brought it down one point to 8.25 percent.

The banking industry's failure to promptly respond to the Fed easing provoked some criticism and accusations that financial institutions wanted to enjoy the resulting widened credit margin as long as possible. Annable commented, "We don't think profit motives are bad, but you do have an obligation to your customers."

Gramley said the banks "were a bit slow," but he thought this was excusable because the last Fed easing move came Dec. 21, shortly before the year-end period when interest rates seasonally fluctuated upwards. "Interest rates generally were under considerable pressure at year-end. That kept the banks' cost of credit high," he said.

Banks also may have had in mind the experience of Southwest Bank of St. Louis, which lowered its prime rate to ten percent Nov. 9 but raised it back to 10.5 percent when the Fed slowed its easing pace. Ambiguous moves by the Fed around Thanksgiving Day further muddied the waters.

#90008u2413 01/08/1990 ~United Press International

NEWARK, NJ (JAN. 8) UPI - An appeals court ruling dismissing the first damage award in a smoker death suit was a costly victory for the industry that will make future suits easier to win, lawyers battling the tobacco companies said Monday.

But an industry analyst said the decision by the Third Circuit U.S. Court of Appeals is likely to have little effect on the cigarette manufacturers' enormous profits.

A three-judge panel issued a complicated 88-page opinion Friday in the suit filed in 1983 by Antonio Cipollone of Lakehurst, N.J., and his wife, Rose, who died of lung cancer before the case came to trial. The appeals court threw out $400,000 awarded to Cipollone in June 1988 after a five-month trial in federal court in Newark.

While the reversal left the tobacco industry once again with an unbroken record of victories, the judges also opened the door to claims that cigarette manufacturers were producing an inherently dangerous product while smokers were unaware of the risks they were taking.

''They revived the risk-utility test, which is basically the test in New Jersey to show that the product shouldn't be marketed,'' said Cipollone's lawyer, Marc Z. Edell.

Edell said he intends to retry the Cipollone case and expects the second trial to be shorter and easier than the first, because some issues will not have to be retried. For example, he said he will not have to prove a second time that Mrs. Cipollone's illness and death was caused by her smoking.

When the Cipollone case ended, more than 100 smoker death suits were pending in state and federal courts around the country. After the favorable verdict, which cost Cipollone's lawyers $2 million to $3 million many were dismissed or dropped.

''There have been two Pyrrhic victories in this case,'' said Richard Daynard, chairman of the Tobacco Products Liability Project at Northeastern University in Boston. ''The first was for us. This is clearly a Pyrrhic victory for them on the reversal.''

The Cipollones sued Liggett Group Inc., Philip Morris Inc. and Lorillard Inc., makers of the brands Mrs. Cipollone smoked over 40 years. But rulings by U.S. District Judge H. Lee Sarokin before and during the trial effectively removed Philip Morris and Lorillard from the case.

One of Sarokin's key rulings, following an earlier Third Circuit opinion, concerned the health warnings on cigarette packs and in advertising, which have been required since 1966. The judge said the tobacco companies could not be found liable for failure to warn smokers after 1965.

Jay Nelson, a tobacco analyst for Brown Brothers Harriman & Co., called the Third Circuit's opinion ''a modest negative'' for the industry.

''They will have to deal with the issue of pre-1966 failure to warn,'' he said.

But he said the ruling will not harm the industry unless the companies lose several suits.

''That doesn't look too likely,'' Nelson added. ''No one's ever won one.''

Stock prices of the three defendants were down slightly Monday - Philip Morris was one from Friday at 41 1/8 in mid-afternoon, Liggett was down 1/8 at 9 7/8 and Loews Inc. of Lorrilard was down 2 7/8 at 120 7/8.

Cigarettes remain the most profitable consumer product on the market, even though sales have been dropping slightly. Cigarettes, for example, generate a far larger share of Philip Morris's profits that they do of its sales.

''Growth in the profits continues very strongly because they have terrific pricing power,'' Nelson said. ''They raise their prices every year by 10 percent. Not too many industries can do that.''

Donald J. Cohn, lead lawyer for Liggett during the trial and appeal, said juries will still have to decide whether smokers knew what they were doing.

''That's the issue we always win on,'' he said.

ROCHESTER, N.Y. (JAN. 8) UPI - Eastman Kodak Co., continuing its aggressive restructuring, announced Monday it will turn over management and operations of its telecommunications and data networks to Digital Equipment Corp. and IBM.

Terms were not disclosed, but the photography and chemicals giant will

shed 275 employees, equipment and other assets necessary for Digital and IBM to take over the networks and sell the services back to Kodak.

''These agreements are another example of the significant steps Kodak is taking to strengthen its position as a world-class competitor,'' said Katherine Hudson, director of Kodak's corporate information system.

The agreements, which company officials said will be signed within 60 days highlight a growing trend among large companies who decided to ''run their own phone companies'' after the divestiture of AT&T but now are looking for experts in the field to operate them, said Peter Bernstein, senior analysts with Probe Research in Cedar Knolls, N.J.

''They build up these systems and then the question becomes, do you want to spend a lot of money on in-house expertise to run all that?'' he said. ''Their business has become international, so you just don't need (experts) here, you need them everywhere.''

Digital will operate all aspects of Kodak's telecommunications systems not related to development of a new data center and network, which will be handled by IBM, Kodak spokesman Paul Allen said.

''We want to put our dollars into our core businesses,'' Allen said.

For Digital, the agreement is ''a significant strategic win against stiff competition,'' helping to pull the company up among the ranks of AT&T, IBM and other telecommunications and computer giants who are targeting the turn-key telecommunications operations of large companies, said Digital spokesman Jeff Bartman.

Digital ''hasn't been mentioned as a significant player, and it's very important to (Digital) get that kind of major contract with that kind of major client,'' Bernstein said.

Berstein said ''it wouldn't surprise me'' if one estimate putting Digital's annual revenues from the agreement at $30 million turned out to be true, but he could not confirm a figure.

As part of the agreements, Digital is offering jobs to 241 current Kodak employees who operate the telecommunications systems. IBM will hire another 25 Kodak employees and assign several managers to the project, a spokesman said.

#90008u2654 01/08/1990 ~United Press International

SAN FRANCISCO (JAN. 9) UPI - Pacific Telesis Group, coming off an excellent year of growth and new opportunities, said Monday it would buy

back 25 million shares of its common stock, valued at approximately $1.2 billion.

The repurchase program amounts to about 6 percent of the telecommunications company's 416.3 million common shares. In three previous repurchase programs, PacTel has bought back 30 million shares of common stock over the last two and a half years.

The latest repurchase program is 2.5 times as large as the company's three previous stock buybacks. Analysts said the plan was agressive, but not surprising because of the company's performance last year.

''The company has a lot of things going for it,'' Drexel Burnham Lambert analyst Linda Meltzer said.

Pacific Telesis's stock closed up $1.25 at $49 Monday.

Announcing the stock repurchase plan, Chairman Sam Ginn called 1989 a ''landmark year'' for the company. Among the year's highlights:

- A consortium in which PacTel is a 26 percent owner won a license to build West Germany's second cellular telephone system. Analysts say the deal could be worth more than $1 billion to PacTel over the long term.

- The California Public Utilities Commission approved a new regulatory structure for telephone companies in the state that will allow Pacific Bell to boost its profits by becoming more efficient. Analysts expect the change to add to earnings as early as next year.

- Pacific Telesis International won approval from a federal court to hold a 10 percent interest in a Japanese international communications consortium. The approval made PacTel the first U.S. company to enter the Japanese long-distance market.

- A consortium in which PacTel owns a 20 percent interest was offered a license to set up a mobile phone system in the United Kingom. Pacific Telesis International is also licensed to provide cable television services to nearly 750,000 home in the United Kingdom.

- Cellular telephone operations boomed, and were recognized as more than a hidden asset for the company. PacTel Cellular contributed $39 million in earnings through the first nine months of the year, up 333 percent over the same period last year.

The many positive accomplishments were reflected in the company's stock, which appreciated 63.2 percent in 1989.

In addition, the company announced plans last week to cut 11,000 workers

from its workforce over the next five years to reduce labor costs and become more efficient.

#90009b0005 01/09/1990 ~Business Wire

REDMOND, WA (JAN. 9) BUSINESS WIRE - Microsoft Corp. announced that Microsoft Word for Windows, the new full-featured graphical word processor for the Microsoft Windows environment, is currently in broad distribution.

Microsoft manufacturing was in full-scale production in December to fill the more than 38,000 orders that have already been placed.

''We're very excited about this version of Word because it vastly improves upon character word processing by virtue of its graphical user interface '' said Jeff Raikes, general manager of the Office Business unit, Microsoft Corp. ''Our development team worked very hard to successfully make our projected ship date.''

One of Microsoft Word for Windows' first major wins is its installation on up to 40,000 personal computers being purchased by the Department of Transportation during the next eight years. Microsoft, as a subcontractor to AT&T, played a crucial role in helping AT&T be selected as the primary contractor for the Office Automation Technology Services (OATS) contract. Microsoft Windows and Microsoft Excel were also included in the bid by AT&T as the core productivity environment and spreadsheet application to be used on all desktops. The FAA chose AT&T's bid in part due to the productivity increases that users can realize when working in the Windows environment.

Microsoft Word for Windows was designed to improve mainstream word processing tasks where users are most concerned with speed of editing, ability to handle long documents and ease of basic formatting. Word for Windows contains all the strengths of the leading character-based word processors but goes beyond to provide full WYSIWYG (what you see is what you get) editing, an intuitive graphical interface and unique customization capabilities for automating routine tasks.

Users who want to experiment with MS Word for Windows before making a purchase decision can get a copy of the Working Model for $9.95 beginning Jan. 15, 1990. The Working Model, which can be copied, contains all the Word for Windows product features but saves only two pages worth of text. Its cost is refundable upon purchase of Word for Windows. The Working Model will be widely publicized through advertising and direct mail campaigns, or users can call 800/426-9400 to acquire a copy.

VANCOUVER, BRITISH COLUMBIA (JAN. 10) BUSINESS WIRE - The directors of Breakwater resolved Monday to offer to acquire all the outstanding shares of American Pacific Mining Co. Inc. on the basis of three Breakwater common shares for each share of American Pacific. American Pacific owns and operates the El Mochito Mine located in Honduras, which produces zinc, lead, silver, and copper.

The acquisition will be effected by means of a formal offer or other form of business combination. Discussions have commenced with American Pacific to determine the most effective method of achieving the combination. It is expected that the transaction will be concluded in March, subject to regulatory and governmental approvals where required.

American Pacific has 11,594,133 shares outstanding (fully diluted) of which Breakwater currently owns 1,060,671 shares (9.14 percent). The acquisition will result in the issuance of 31,600,386 common shares of Breakwater.

The El Mochito Mine has supplied metals to world markets since 1948. For the six months of operations ended Aug. 31, 1989, the El Mochito Mine processed 244,280 tons of ore with an average grade of 8.21 percent zinc, 1.69 percent lead and 2.81 ounces of silver with earnings of $8,857,514. Total reserves at Aug. 31, 1989, were 5,760,012 tons averaging 8.40 percent zinc, 2.14 percent lead, 2.64 ounces of silver and 0.32 percent copper.

Breakwater believes the combination with American Pacific will significantly increase Breakwater's earnings and cash flow on a fully diluted per share basis.

Breakwater, which owns 49 percent of the Cannon Mine at Wenatchee, Wash., had earnings of $3.8 million or 12 cents per share for the nine months ended Sept. 30, 1989. There are currently 31,320,986 common shares of Breakwater issued and outstanding.

SANTA MONICA, CA (JAN. 9) BUSINESS WIRE - National Medical Enterprises Inc. (NYSE, PSE, LSE:NME) announced Tuesday that the Securities and Exchange Commission has declared effective the registration statement for Hillhaven common stock.

An information statement describing Hillhaven and terms and conditions of the distribution will be mailed to NME record holders and other interested investors on Jan. 10.

NME also reported that Hillhaven common has been approved for listing on the American Stock Exchange (ASE), subject to official notice of issuance. Hillhaven will trade under the symbol ''HIL''. ''When issued'' trading in Hillhaven is expected to begin on Jan. 12 on the ASE and continue through Feb. 1. ''Regular way'' trading for Hillhaven on the ASE is expected to begin on Feb. 2.

National Medical Enterprises common stock is now trading on the New York Stock Exchange (NYSE) on a ''regular way'' basis with due bills attached. The due bill transfers to the buyer the right to receive the Hillhaven dividend. All ''regular way'' trades in NME from Jan. 8 through Jan. 31 will include the due bills.

In addition, the NYSE also expects to trade NME on a ''when issued'' basis without due bills for the Hillhaven dividend. ''When issued'' trading in NME is expected to begin on Jan. 12.

The record date for the distribution has been set by NME's board of directors as Jan. 12. The distribution date will be Jan. 31. Shares of Hillhaven will be distributed to NME common shareholders at a ratio of one share of Hillhaven for each share of NME. NME will trade ex-dividend on Feb. 1, at which time all trading in NME will no longer include due bills or the right to receive Hillhaven shares.

National Medical Enterprises is one of the nation's largest health care services companies. Hillhaven is a leading provider of quality long term care services.

SANTA CLARA, CA (JAN. 10) BUSINESS WIRE - Catalyst Semiconductor President and chief executive officer, B.K. Marya Monday announced that Manuel Mere has joined Catalyst as director of operations.

Most recently, Mere was vice president of operations for Xicor Inc. Mere will be responsible for all worldwide manufacturing operations at Catalyst reporting to Ari Schifrin, Catalyst executive vice president.

"Mr. Mere brings 22 years of semiconductor experience and broad manufacturing expertise to the Catalyst team. Company sales have grown 300 percent annually, and the addition of Mr. Mere will assure continuation of this successful growth," said Schifrin. Prior to Xicor, Mere was with IBM,

National Semiconductor, and Harris Corp.

"Catalyst is positioned to lead the market in CMOS nonvolatile memories and Smart Card chips," declared Marya. "The depth of manufacturing expertise that Mr. Mere brings to the company will help us to achieve the leadership position."

Catalyst was founded by B.K. Marya in 1985. The company introduced the world's first single-chip Smart Card circuit in 1986. Catalyst is a major supplier of EEPROM, SRAM, EPROM and Smart Card circuits.

#90009b0077 01/09/1990 ~Business Wire

LAKE WORTH, FL (JAN. 9) BUSINESS WIRE - Great Western Bank Tuesday announced that it will offer a new service from Electronic Filing Centers Inc., beginning Jan. 22, that will allow customers to receive their personal federal tax refunds within two weeks of filing.

Great Western is the first financial institution in Florida to provide this service statewide.

EFC-Electronic Tax Filing is a system of transmitting income tax returns by computer directly to the IRS, which confirms receipt in 12 to 24 hours. To use the service at Great Western, taxpayers must be due a refund, and have -- or open -- a Great Western checking or savings account.

The refund will be automatically deposited to the customer's Great Western account, eliminating lost or stolen refund checks. Normal processing of returns takes six to eight weeks.

The IRS established electronic tax filing in 1986. Prior to 1989, the service was available only through professional tax preparers and excluded taxpayers who prepare their own returns. The IRS estimates that 70 percent of all tax filers receive a tax refund, and 50 percent of all filers prepare their own returns.

Electronically filed returns are processed by Electronic Filing Centers Inc., of Farmingdale, N.Y., using IRS-accepted software and its EFC-Electronic Tax Review to check for common mistakes that could delay a refund for months.

If an error is found, the taxpayer is contacted by an EFC tax advisor to discuss ways of correcting the problem. Because of this computerized review, electronically filed returns have an average error rate of only 3

percent compared to 16 percent for paper returns according to the IRS.

For additional information on the Great Western electronic tax filing service and individual retirement accounts, call the tax information helpline, 800-GW-ASK-US (800-492-7587), or visit your nearest Great Western branch in Florida, California and Arizona.

Great Western Bank is a subsidiary of Great Western Financial Corp., a diversified financial services company with $37 billion in assets.

#90009b0090 01/09/1990 ~Business Wire

CINCINNAT (JAN. 9) BUSINESS WIRE - Star Banc Corp. Tuesday reported a 16.4 percent increase in fourth quarter earnings for 1989.

For the year ended Dec. 31, 1989, income before a change in accounting

method increased 4.6 percent. The announcement was made by Oliver W. Waddell, chairman and chief executive officer of the corporation.

Consolidated net income for the final quarter of 1989 increased 16.4 percent to $16.3 million compared to $14.0 million in 1988. This amounted to 57 cents per share in 1989 compared to 49 cents in 1988.

For the year ended Dec. 31, 1989, income before a change in accounting method increased 4.6 percent to $58.0 million compared to $55.4 million in 1988. On a per share basis, this amounted to $2.01 in 1989 compared to $1.92 in 1988.

In the first quarter of 1988, the corporation recorded a change in accounting method which increased 1988 earnings by $3.1 million. When this change is included in 1988 earnings, net income for the year ended Dec. 31, 1989, was $58.0 million compared to $58.5 million in 1988. On a per share basis, this amounted to $2.01 in 1989 compared to $2.03 in 1988.

Total assets of Star Banc Corp. averaged $5.69 billion in 1989 compared to $5.21 billion the prior year, an increase of 9.1 percent.

Loans averaged $4.05 billion in 1989 compared to $3.69 billion in 1988, a 9.9 percent increase.

Deposits increased to an average of $4.71 billion from $4.28 billion a year ago, a 9.9 percent increase.

As reported in the second quarter of 1989, the corporation took possession of income-producing properties securing real estate loans to a borrower who experienced financial difficulties. As a result, the level of other real estate owned, which is carried at fair market value, increased from $1.7 million at the end of 1988 to $14.6 million at year-end 1989.

Commenting on that matter, Waddell said, ''The corporation's lending policies are conservative and prudent. Real estate lending is extended only to well established customers in our market areas on a fully secured basis.''

At Dec. 31, 1989, real estate construction and land development lending comprised only slightly more than 5 percent of the corporation's total loan portfolio.

Another area of lending that has received attention in 1989 is lending to finance highly leveraged transactions. According to Waddell, ''The corporation's policy in this type of lending is first, to make such loans only to established customers in our market areas, and secondly, to take a senior, secured position, thereby minimizing our exposure.''

At the end of 1989, such lending amounted to slightly more than 5 percent of the corporation's loan portfolio.

Star Banc Corp. is a regional bank holding company headquartered in Cincinnati. The corporation has 15 separate banking subsidiaries which operate under the shared name Star Bank. Star Banks operate 157 offices in Ohio, Indiana and Kentucky.

#90009b0100 01/09/1990 ~Business Wire

ANCHORAGE, AK (JAN. 9) BUSINESS WIRE - National Bancorp of Alaska (NBA) earned a decade record of $22.7 million in 1989, compared to $6.23 million for 1988, according to Ed Rasmuson, chairman of the board.

''We are pleased to conclude this decade on an upbeat note,'' Rasmuson added. ''The 1980s have certainly challenged the bank and its customers, but we feel we successfully met the challenges presented. The past three years in particular have been extremely busy for NBA as we've expanded our services to several new communities through the acquisitions of Alaska National Bank of the North, First Interstate Bank of Alaska and Alliance Bank. In 1989, we opened a centralized consumer services building in Anchorage, as well as three new branches -- one in Craig on Prince of Wales Island and secondary branches in Homer and Kodiak.''

Net income for the quarter ended Dec. 31, 1989, was nearly $5.95 million, compared to $752,000 reported for the fourth quarter of 1988. The 1989 earnings per share were $3.80, compared to $1.04 for 1988. The fourth quarter earnings per share were 99 cents, compared to 12 cents for the fourth quarter of 1988. At the December board meeting, the board declared a 25 cent per share cash dividend which was paid on Friday, Jan. 5, 1990, to all shareholders of record on Dec. 29, 1989.

''The increase in earnings is a result of higher net interest income and a decrease in the provision for loan losses,'' Rasmuson said. ''We also feel that a general strengthening of the Alaskan economy contributed to the increased earnings. Many of our customers benefited from the greater cash flow into the economy as a result of the Prince William Sound oil spill.''

National Bancorp of Alaska's deposits as of Dec. 31, 1989, were $1.68 billion, an increase of 32 percent from $1.27 billion as of Dec. 31, 1988. Included in these deposits are $108 million in brokered deposits which will not be replaced as they mature. These were acquired in the Alliance Bank transaction last April.

As of Dec. 31, 1989, National Bancorp of Alaska's total assets were nearly $2.14 billion, an increase of 29.5 percent from assets of $1.65 billion as of Dec. 31, 1988. Total shareholders' equity (capital) as of Dec. 31, 1989, was $196.1 million.

National Bancorp of Alaska is the holding company that owns all of the shares of National Bank of Alaska. NBA is one of the highest capitalized banks in the United States. Its stock trading symbol is NBAK.

KANSAS CITY, MO (JAN. 9) BUSINESS WIRE - William G. Obermayer has been named president of North Supply Co. and Michael B. Fuller has been named president of the Midwest Group, according to Curtis G. Fields, executive vice president of United Telecommunications Inc.

Both appointments are effective Feb. 1.

Obermayer, 50, will replace Stanley F. Fisher, who has served as president of the Industrial Airport, Kan., company since 1978 and is retiring. A wholly owned subsidiary of United Telecom, North Supply is a leading wholesale distributor of telecommunications equipment, security/alarm systems and electrical products with annual revenues exceeding $500 million.

Fuller, 45, most recently served as president of United Telephone of the Northwest in Hood River, Ore., since 1988. He succeeds David D. King, who last month was named executive vice president-chief human resources, technology and planning officer on United's corporate staff here.

The Midwest Group, headquartered in Overland Park, Kan., provides local telephone service to more than 400,000 subscriber lines in Kansas, Minnesota, Missouri, Nebraska, Texas and Wyoming.

Obermayer joined a North Supply predecessor company in 1969, and served in a variety of marketing and sales positions of increasing responsibility. He was named a senior vice president in 1978, vice president and general manager of North's communications division in 1980, and to his most recent position as executive vice president -- operations in 1981.

Prior to joining United of the Northwest, Fuller had served as executive vice president-staff at United's US Sprint long-distance unit. He joined United Telecom in 1974 as a financial analyst and was named vice-president planning for telephone operations in 1981. He was named president of US Sprint's southeast division in Atlanta in 1986.

Fisher has been president of North Supply since 1978. His career began as a lineman with United of the Northwest in 1952, and he subsequently held data processing assignments there before moving to the Southeast Group as general manager in 1971. In 1974, he joined North Supply as a staff director.

MILPITAS, CA (JAN. 9) BUSINESS WIRE - Plus Development Corp., a wholly owned subsidiary of Quantum Corp. (OTC:QNTM), Tuesday introduced the Hardcard II 80 and Hardcard II 40 high-performance hard disk card.

Available immediately, the products are aggressively priced at $999 for the Hardcard II 80 and $849 for the Hardcard II 40 (suggested retail prices).

Designed to be the most convenient, reliable mass-storage upgrade for 286- and 386-class computers, the Plus Hardcard II packs 80 or 40 Megabytes (MB) of mass storage onto a single, 1-inch thick card that users can easily plug into any 16-bit expansion slot.

The design is optimized to meet the performance requirements of the more than 13 million 286- and 386-class computers in use today (source: Dataquest).

The Hardcard II represents a major technological achievement, combining 16-bit architecture and high reliability in a compact, convenient drive-on-a-card package.

Plus created the market for convenient, user-installed drive-on-a-card storage upgrades in 1985, when the company first introduced the Hardcard, which has received every major personal computer industry award.

Based on their reputation for quality and performance, more than 500,000 Hardcard 20 and Hardcard 40 drives have been sold worldwide. Hardcard II is an evolution of Plus' product strategy, enabling the company to serve the largest installed base of active PCs today.

The Hardcard II 80 and the Hardcard II 40 are available through all authorized Plus resellers. Additionally Plus announced new pricing for the Hardcard 40, now $849, and the Hardcard 20 now $749.

The products are sold through retail outlets and VARs in the United States including Businessland, ComputerLand, MicroAge, Entre and Egghead Software and through distributors including Microamerica, Softsel and Tech Data.

The entire product family is also distributed worldwide through a network of major international distributors.

Plus Development Corp., based in Milpitas, is a subsidiary of Quantum Corp., a leading manufacturer of hard disk drives for personal computers and workstations for the original equipment (OEM) marketplace.

VANCOUVER, WA (JAN. 9) BUSINESS WIRE - Pacific Telecom Inc. (NASDAQ:PTCM) announced that it has signed a Memorandum of Understanding with US West Communications under which they will each exchange certain service areas serving approximately 13,500 customers in Oregon and Washington.

As part of the agreement, Pacific Telecom will also purchase US West operating assets serving 2,300 customers in Oregon, Washington, Montana and Wyoming. The proposed transaction is subject to negotiation of definitive agreements and the receipt of satisfactory regulatory approvals as well as approvals by the boards of directors of both companies

C.E. Peterson, executive vice president of Pacific Telecom said: ''The properties to be acquired through this transaction are adjacent to or near our existing properties. The transaction will facilitate the efforts of both companies to consolidate serving areas. The synergies resulting from this consolidation will have a long-term beneficial effect for customers within the affected service areas.''

LOS ANGELES (JAN. 10) BUSINESS WIRE - Bank of Trade, one of the oldest Asian-owned banks in California, is changing its name to LIPPOBANK on Jan. 18, 1990, announced Bank President David T. Yeh. Ownership and management of the bank will remain unchanged.

Yeh cited two key reasons for the name change. "We wanted the bank to become more directly affiliated with the Lippo Group, our parent company," said Yeh. "In addition, the name 'Bank of Trade' may suggest that we primarily focus on servicing business accounts; while in fact, we offer comprehensive financial services to both commercial and consumer clients."

Bank of Trade/LIPPOBANK, which reported assets of $148 million as of Sep. 30, 1989, has four branch offices in California. Its head office is located in Los Angeles, and its three other branches are in San Francisco, Westminster and San Jose. According to Yeh, the bank plans to continue its expansion program by increasing its branch network in California over the next few years.

Bank of Trade was incorporated in 1961 and became a part of the Lippo Group in late 1984. Since then it has shown sustained growth and expanded from a one-branch operation to the current four-branch network.

Bank of Trade/LIPPOBANK is part of Lippo Group, a multi-billion dollar financial services network with banking operations in Hong Kong, Indonesia New York, and California. It is also involved in numerous joint ventures with leading institutions such as Bankers Trust, Tokai Bank, Daiwa Bank and Banque National de Paris.

Lippo Group, which uses the "Lippo" symbol for infinity as its corporate identification, is an Asian-based unconsolidated group of companies beneficially owned by the Riady family under the chairmanship of Dr. Mochtar Riady.

SAN JOSE, CA (JAN. 10) BUSINESS WIRE - Through an agreement announced Monday, Intel Corp. of Santa Clara will purchase and remarket the VLSI Technology Inc. (NASDAQ: VLSI) COMBO I/O device and TOPCAT line of PC/AT-compatible chip sets. The proprietary TOPCAT products consist of a two-chip solution for the 386 SX microprocessor and a three-chip solution for the 386 DX microprocessor.

TOPCAT chip sets support the Industry Standard Architecture (ISA) Bus

PC/AT market. Dataquest estimates that such products account for 63 percent of today's PC market. The research firm expects ISA market share to grow to 74 percent in 1993.

The non-exclusive agreement enables Intel to offer chip sets supporting the ISA bus in addition to its current Extended Industry Standard Architecture (EISA) and Microchannel Architecture (MCA) products. Financial terms of the agreement were not disclosed.

"We are pleased that we can offer our customers these highly flexible 386 SX and 386 DX chip set solutions for entry-level to high-performance computers," said Young Sohn, PC/AT marketing manager for Intel's Microprocessor Division. "We currently offer the MCA and EISA chip sets for high-performance systems, and the TOPCAT offering is an excellent complement to our bus products portfolio," he continued.

Douglas Bartek, vice president and general manager of the Logic and Government Products Division, said: "This agreement provides customers with an additional sales channel and a leading technical field and support team with strong knowledge of the PC market. Intel's selection of the TOPCAT product line also confirms the superiority of VLSI Technology's design and CAE capabilities."

Samples of the chip sets will be available from both companies in March. Production volumes will be available in the second quarter. Intel 80386 SX and 80386 DX are trademarks of Intel Corp.

SAN JOSE, CA (JAN. 9) BUSINESS WIRE - Conner Peripherals Inc. (NASDAQ: CNNR) has offered to acquire part of the disk sputtering operations formerly owned by Domain Technology, it was announced Tuesday by William J. Almon, Conner president and chief operating officer.

The offer includes hiring some former employees of Domain, purchasing equipment used in disk sputtering operations, and assuming the lease on one of Domain's facilities at 311 Turquoise St., Milpitas, Calif. The financial terms of the offers were not disclosed.

Domain, a supplier of thin-film disks, has been under protection of Chapter 11 of the federal bankruptcy code since June 26, 1989, and recently announced it was abandoning its disk sputting operations.

"Our interest in acquiring these assets is based on our desire to stay abreast of thin film technology developments and to preserve advanced media capability," said Almon. "Our main strategy for materials remains to purchase key components, including disks, from multiple outside sources."

Conner Peripherals designs, manufactures and markets high-performance 3.5 and 2.5-inch Winchester disk drives for the new generation of desktop, portable, laptop and notebook microcomputers and workstations.

These systems are based on 16-bit, 32-bit and RISC-based microprocessors and require greater storage capacity, faster access time, lower power consumption and smaller size than previous disk drive products.

PORTLAND, OR (JAN. 9) BUSINESS WIRE - Effective Jan. 8, 1990, Key Bank of Oregon has lowered its basic lending rate to 10 percent and has lowered its prime lending rate to 10 percent.

Key Bank of Oregon, with assets of over $1.3 billion, has 80 locations throughout the Willamette Valley from Portland to Eugene. Key Bank of Oregon is a subsidiary of KeyCorp. Other Oregon subsidiaries in the KeyCorp network include Key Services Corp., a data processing facility; Key Pacific Mortgage, a full-line, regional mortgage firm; and Key Trust Company of the Northwest, the first regional trust company authorized to conduct business in both Washington and Oregon. In the West, Key Banks are also located in Alaska, Idaho, Utah, Washington and Wyoming.

KeyCorp (NYSE: KEY) is an over $15 billion financial services company headquartered in Albany, N.Y. It has focused its banking expansion activities in the Northeast and Northwest. Following a middle market focus, KeyCorp has concentrated its resources in cities and smaller communities of the northern tier of states, thus avoiding overcrowded market places and single industry loan exposure.

CARLSBAD, CA (JAN. 10) BUSINESS WIRE - GASCARD Inc., of Carlsbad, Tuesday announced that the U.S. Patent Office has issued patent number 4,891,503 to GASCARD for its distributed authorization system (DAS).

DAS is a sophisticated data base management system that automatically maintains in smaller local terminals individualized subsets of the company's national data base. These local data bases permit individual point-of-sale terminals to authorize and process transactions without the need for connection to the central computer at GASCARD's headquarters.

The transactions are authorized nearly instantaneously while telecommunications expenses are reduced dramatically. The company may license DAS to other authorization systems that rely on a central data base and have the appropriate usage characteristics.

The company has already installed DAS in over 500 of the fuel management sites in its 39-state network, thus providing the benefit of reliable, immediate response to the thousands of fleet customers that use the GASCARD fuel management system every day.

Background

GASCARD provides fuel management services to tens of thousands of commercial fleets, which transact over 10 million gallons per month, through more than 1,700 locations operating in 39 states.

GASCARD has developed and markets nationally a comprehensive card-activated fuel management system designed to reduce the costs of fueling commercial and governmental fleets by preventing unauthorized purchases, eliminating or lessening the environmental risks associated with underground fuel storage tank ownership or operation, and lowering accounting, administrative and other costs associated with fleet fueling.

Through the company's franchisees, which are typically independent petroleum marketers, the GASCARD system is marketed primarily for use by operators of local and regional delivery, sales and service vehicle fleets such as fuel and beverage distributors, overnight package delivery services, taxis, public utilities and governmental agencies.

The company was originally organized in May 1981 and went public through an offering of its common stock in March 1987. It is traded on the

over-the-counter market.

     #90009b0237 01/09/1990 ~Business Wire
SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday unveiled its solution for seamlessly linking desktop computers with SQL databases.

With Informix's new Wingz-DataLink interface, non-SQL literate users can create queries through simple point-and-click options, and developers can create custom graphical interfaces for accessing and manipulating data stored in Informix databases.

DataLink is an essential component of Informix's strategy to deliver solutions for enterprise-wide computing from the database through the desktop. Vital corporate data stored in both local and remote SQL servers can be directly imported into a Wingz worksheet, or into a completely customized Executive Information System running on the major graphical desktop platforms Wingz supports.

With DataLink, Informix has realized the goal of its 1988 merger with Innovative Software Inc. -- to integrate advanced office automation software with powerful SQL database technology.

DataLink was created with the Wingz programming language HyperScript, a powerful event-driven command language for developing graphical software applications. HyperScript gives developers the ability to create applications that exploit all of the graphic controls in a graphical user interface together with the advanced graphics, spreadsheet and presentation features found in Wingz.

The additional functionality of Wingz-DataLink gives HyperScript developers the ability to create highly customized Executive Information Systems that will enable senior managers to manipulate SQL data through a point-and-click environment.

Informix Software Inc. is a leading information management software company providing solutions from the database through the desktop.

Informix markets high performance DBMS software for the UNIX environment, along with tools for accessing information on strategic platforms including DOS, OS/2, Macintosh, UNIX and VMS. Informix tools include the Informix-4GL and Informix-SQL products for OLTP and decision support database application development; Wingz, a graphic spreadsheet for

windowing environments; and SmartWare II, high performance integrated office automation software.

Informix has wholly owned subsidiaries in the United Kingdom, France, Germany, The Netherlands, Sweden, Australia, Singapore, Italy and Canada.

#90009b0241 01/09/1990 ~Business Wire

SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday announced plans for Informix-OnLine, its new multimedia/OLTP database server, to support the OS/2 operating environment.

OnLine is the first database engine to combine fault tolerant OLTP performance with support for multimedia database applications. With OnLine, users can integrate information objects such as word processing documents, graphs, spreadsheets, scanned and digitized images, facsimiles and voice into an SLQ-based relational DBMS.

Through its recently introduced DataLink technology, Informix will also enable users to access the OnLine OS/2 database server via the graphical environment of its Wingz spreadsheet. Users will be able to access data directly into the worksheet, or use the HyperScript programming capabilities in Wingz to create a completely customized graphical database application.

Informix's line of application development tools will also work with the OnLine OS/2 server. These tools include the Informix-4GL family of fourth-generation programming languages; Informix-SLQ, a menu-driven relational database management system; and the Informix-ESQL family of development tools for embedding SQL into C and COBOL programs.

Informix-Online is currently scheduled to be available for the OS/2 operating environment during the first quarter of 1991.

Informix Software Inc. is a leading information-management software company providing solutions from the database through the desktop.

Informix markets high-performance DBMS software for the UNIX environment, along with tools for accessing information on strategic platforms including DOS, OS/2, Macintosh, UNIX and VMS. Informix tools include the Informix-4GL and Informix-SLQ products for OLTP and decision support database application development; Wingz, a graphic spreadsheet for windowing environments; and SmartWare II, high performance integrated office automation software.

SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Tuesday that Claris Corp. has acquired the rights to technology in the Wingz graphic spreadsheet to develop and enhance its family of leading productivity software for the Macintosh.

''We're excited to have the opportunity to exploit the advanced technology developed by Informix,'' said Bill Campbell, president of Claris.

Included in the technology agreement is HyperScript, an intuitive, English-like programming language for building graphical software applications. HyperScript is available from Informix as part of Wingz.

Informix will continue to support and enhance the spreadsheet capabilities of Wingz, along with its seamless integration to Informix's SQL database products.

Wingz is currently available for the Apple Macintosh and is scheduled to be available during 1990 for other windowed graphical environments including Motif for UNIX, OS/2 under Presentation Manager, DOS with Microsoft Windows, the Next computer and Sun workstations with the Open Look interface.

Claris is the leading vendor of applications for the Macintosh, with best-selling products in graphics (MacDraw II), word processing (MacWrite II), database management (FileMaker II), project management (MacProject II), computer-aided design (Claris CAD), and electronic forms automation (SmartForm series).

Claris is a subsidiary of Apple Computer Inc.

Informix Software Inc. is a leading information management software company providing solutions from the database through the desktop.

SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Tuesday that it has reached a worldwide agreement with The Santa Cruz Operation Inc. to jointly market and promote Informix's Wingz graphic spreadsheet on Open Desktop. Wingz is the graphic spreadsheet for SCO's Open Desktop.

Informix and SCO have agreed to a coordinated effort to promote the Open Desktop version of Wingz through joint advertising, trade shows and other marketing opportunities, to assure the success of the product through all distribution channels.

Wingz for Open Desktop is expected to be available during the second quarter of 1990. With this announcement, Informix has expanded Wingz' support for standard graphical desktop environments. Informix has previously announced that Wingz will support OSF/Motif, NextStep from Next Computer Inc., OS/2 under Presentation Manager, DOS Windows and Open Look from Sun Microsystems.

Doug Michels, vice president and co-founder of SCO, said, ''We're pleased to support the Wingz graphical spreadsheet application on Open Desktop, the complete graphical operating system for 386 and 486 PCs. Wingz is an advanced graphical application that will appeal to a wide range of businesses.

The Santa Cruz Operation Inc. is a privately-held company recognized internationally as the leading developer and supplier of UNIX System software solutions, training, and support services for standard hardware platforms.

Founded in 1979, SCO fields a worldwide staff of over 800, with major offices in Santa Cruz, Calif., Washington, D.C., and London, including the largest XENIX and UNIX System technical team in the world.

Informix Software Inc. is a leading information management software company providing solutions from the database through the desktop.

Informix markets high performance DBMS software for the UNIX environment, along with tools for accessing information on strategic platforms including DOS, OS/2, Macintosh, UNIX and VMS.

LOS ANGELES, CA (JAN. 10) BUSINESS WIRE - The MacNeal-Schwendler Corp. (ASE:MNS) Tuesday announced the sale of its 35 percent interest in Modular Data Systems Inc. (Modular).

MacNeal Schwendler would be receiving full repayment of all principal advances outstanding ($990,000) and approximately $1.65 per share for the 175,000 shares held by them ($288,750).

The company acquired its 35 percent interest in Modular during fiscal 1985 and due to the continuing losses at Modular, the company elected to completely write-off its investment in Modular during fiscal 1986.

MacNeal Schwendler recently reported that the board approved a regular quarterly dividend of 8 cents ($.08) per share, payable on March 7, 1990 to shareholders of record on Feb. 23, 1990.

With headquarters in Los Angeles, MacNeal Schwendler markets computer software products for computer-aided-engineering (CAE) applications. The company's principal product in MSC/NASTRAN, a sophisticated computer program used by designers and engineers to analyze the strength characteristics and dynamic response of structures and products prior to construction or manufacuture.

GREENWICH, CT (JAN. 9) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLTF), the world's leading owner and operator of specialized chemical parcel tankers, Monday reported its intention to launch a new company on the Oslo Stock Exchange to be called STOLT PARTNER S.A.

The company will be formed as a Luxembourg holding company and through subsidiaries will initially operate six parcel tankers, which will be purchased from Stolt Tankers. All aspects of the new company's marketing, operations and ship management requirements will be provided by Stolt Tankers under contract and its fleet will continue to trade in the Stolt Tankers Joint Service for the account of Stolt Partner.

The ships being sold to Stolt Partner are four 36,000 DWT and two 23,000 DWT parcel tankers built between 1970 and 1980, totaling approximately 190,000 DWT, all capable of carrying commodity chemicals and vegetable oils.

Stolt Tankers will initially take a 33 percent equity interest in the new company through its wholly-owned subsidiary, Parcel Tankers, Inc. It is intended that the balance of the shares will be underwritten by a consortium managed by Fearnley Finans (Fonds) and Svenska International plc.

The shares will be publicly placed primarily in Norway and Sweden by Fearnley Finans (Fonds) and Svenska Handelsbanken. The shares will not be registered with the United States Securities and Exchange Commission and the offering will not be made in the United States or to U.S. investors.

The total equity to be raised from this offering will be $63 million including Stolt Tankers' one-third share. The total capitalization of Stolt Partner, including bank debt, will range between $112 million and $137 million depending on the number of ships eventually acquired. In consequence there will be sufficient funds available for the company to purchase one or two more ships from the open marketplace when suitable ships can be bought attractively.

This transaction is subject to necessary approvals being obtained from the Oslo Stock Echange and the Norwegian Ministry of Finance and Central Bank, as well as to the successful formation of an underwriting syndicate.

#90009b0621 01/09/1990 ~Business Wire

COSTA MESA, CA (JAN. 9) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV) announced Monday that its wholly owned subsidiary, CAC Corp., is filing an amended complaint in its federal court lawsuit against Cipher Data Products Inc., in connection with its all-cash for all-shares tender offer for Cipher ar $7.50 per share.

The amended complaint alleges that Cipher's statement to shareholders advising them to reject the tender offer was false, midleading, and manipulative, in violation of the Williams Act. Among other things, the amended complaint alleges that Cipher failed to disclose that its recent settlement negotiations with Archive resulted in Cipher's offer to settle the patent litigation for a $5.5 million initial payment, plus a 2.5 percent royalty on sales of certain 5-1/4 inch tape drives over a seven-year period, and that Arhive had declined that offer.

The amended complaint also alleges that Cipher failed to disclose that, contrary to Cipher's representation that no decision had been made on the merits in the patent litigation, the court had ruled, in denying Cipher's request for preliminary injunction against Archive, that Cipher had failed to establish that it was likely to prevail on the issue of infringement.

The amended complaint also attacks several additional entrenchment devices adopted by Cipher's board of directors on January 4, 1990, including golden parachute severance agreements to seven top executives (in addition to those previously bestowed upon management) and accelerated vesting of stock options upon a change in control.

The amended complaint does not seek to overturn serverance agreements adopted for Cipher's non-executive employees. The amended complaint also challenges an amendment to Cipher's poison pill whereby the poison pill now discriminates against Archive's offer.

Under the amendment, the poison pill would block an acquisition by Archive even if the holders of more than 85 percent of Cipher's shares desired to tender to Archive, if the patent litigation between Cipher and Archive were still pending.

Archive also announced that, on Friday, Jan. 5, 1990, it received a request for addition information regarding the acquisition from the Federal Trade Commission. Archive intends to respond promptly to the request.

#90009b0627 01/09/1990 ~Business Wire

TUSTIN, CA (JAN. 9) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) announced Tuesday it received approval from the U.S. Food and Drug Administration (FDA) to commence human clinical trials of its new ''cold'' laser for removing blockages from peripheral leg arteries. This new cold laser is able to vaporize obstructions in vessels without creating heat.

Trimedyne's cold laser uses Holmium, a rare metal, to generate extremely rapid, high energy laser pulses of very short duration, as short as a few millionths of a second. This enables the cold laser to vaporize plaque (fatty deposits) blocking blood vessels, including very hard, calcified deposits, at normal tissue temperatures.

Trimedyne's new device is a solid state laser, which the company believes will be more reliable and less costly than other so-called ''cold'' lasers which use toxic gases to generate laser energy at ultraviolet wavelengths reported to cause cancer in humans.

Commenting on the FDA approval, Howard K. Cooper, president of Trimedyne, said, ''This is the first Holmium laser approved for testing in humans by the FDA, and its development is an example of Trimedyne's commitment to remain the technological leader in the use of lasers and laser catheters to treat cardiovascular disease.''

Human clinical trials of the new Holmium laser in leg vessels will initially be conducted at five medical centers in the United States and will be expanded to additional centers in the U.S. and overseas as the program progresses.

At a later date, Trimedyne expects to request FDA approval to begin testing its Holmium laser for removing blockages in the coronary arteries of the heart as an alternative to bypass surgery and balloon angioplasty.

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels.

#90009b0629 01/09/1990 ~Business Wire

AUSTIN, TX (JAN. 9) BUSINESS WIRE - Sematech announced Tuesday it has signed its second contract with Lam Research of Fremont, Calif.

Falling under Sematech's Joint Development Program (JDP), the new initiative centers on bringing important chemical vapor deposition (CVD) manufacturing technology to the U.S. semiconductor industry. This announcement follows on the heels of the Equipment Improvement Program (EIP) contract recently awarded to Lam to address advanced metal etch technology.

Specifically, the newly awarded JDP contract will fuel the domestic production of Electron Cyclotron Resonance (ECR) systems. This vital technology delivers breakthrough CVD capabilities for emerging device issues, such as those mandated by 16- and 64-megabit DRAMs.

Under terms of the contract, Sematech and Lam will combine resources to spur the development of a domestically designed and manufactured 200mm ECR CVD system. The new tool will also address the ''cluster'' process tool concept, conforming to the open interface specifications to be defined by the SEMI Modular Equipment Committee. The program, to be initiated immediately, calls for Lam to design, develop and fabricate an American manufactured ECR CVD tool for installation and evaluation in the Sematech facility.

Through the course of the project, Lam's engineering resources and process expertise will be leveraged with funding, engineering staff, facilities and extensive process testing and data analysis from Sematech.

Sematech, a consortium of 14 U.S. semiconductor manufaturers, has an annual budget of $200 million. Half of its funding is provided by the federal government and the other half by the member companies.

Founded in 1980, Lam Research designs, manufactures and markets technically complex thin film processing equipment used in the primary stages of semiconductor manufacturing. The company's product offerings include a wide range of advanced single wafer dry etch systems, a family of sophisticated epitaxial deposition systems, and specialized chemical vapor deposition (CVD) systems designed to meet next-generation device requirements. NOTE: Due to the proprietary nature of Sematech's mission, contract specifics such as dollar amounts and length are not disclosed.

ST. PETERSBURG, FL (JAN. 10) BUSINESS WIRE - Belmac Corp. (NASDAQ: BEMC)

Tuesday announced that it elected Edward C. Vimond Jr. as chairman of the board at Belmac's Board Meeting held Jan. 4.

Vimond, who became a director of Belmac in December 1986, has headed Edward Vimond Associates, a business development and acquisitions consulting firm for the past six years. He has extensive management and marketing experience in the field of consumer health care products.

His previous positions include president and chief executive officer of Personal Products Co. (a subsidiary of Johnson & Johnson), president of Warner Lambert Products, and president and chief executive officer of R.J. Reynolds Tobacco International. Vimond commented, "I am pleased to be able to work more closely with the staff at Belmac, particularly in the marketing and licensing field."

Belmac Corp., a development stage drug company, has developed Alphanon, which the company believes is the only non-surgical treatment to stop hemorrhoidal bleeding, which may eliminate the need for surgery. Alphanon is a registered trademark.

NEW YORK (JAN. 9) BUSINESS WIRE - Westvaco Corp. (NYSE:W), a major manufacturer of paper, packaging, and chemicals, reported Tuesday on the solid results that have been achieved through late 1989 by the broad range of voluntary programs that are underway to reduce the formation of chloroform in pulp manufacturing at its paper mills in Luke, Md. and Covington, Va.

As announced previously, the company is in the process of eliminating the hypochlorite method of bleaching its pulp. This traditional form of bleaching, which has been used in the paper industry for a long time, produces chloroform as an unwanted by-product.

Hypochlorite is the same chemical used daily throughout the world in swimming pools and household bleach.

The company indicated that the whole series of programs initiated over the past several years, including a $20 million effort announced last year, will reduce the formation of chloroform by approximately 90 percent when completed.

Substantial progress has already been made and completion of the work is expected by the Fall of 1990. By late 1989, the Covington mill had

reduced the formation of chloroform by 76 percent, while the Luke mill had achieved an 81 percent reduction.

John A. Luke, president and chief executive officer of Westvaco, said that the voluntary programs are designed to significantly reduce chloroform from its papermaking operations even though the company does not believe there is any danger in its workplaces or communities.

''Westvaco at Covington and Luke is, and has been in full compliance with existing state regulations, and we provide better performance than state regulations require in a great many instances,'' Luke said.

''Westvaco has already committed more than $330 million as a company for air and water quality enhancement and control,'' Luke said. ''It is our firm belief that all of our products are safe and do not represent any danger to human health and the same is true where our facilities and communities are located.''

WILMINGTON, DE (JAN. 9) BUSINESS WIRE - HIMONT Inc., a subsidiary of Montedison S.p.A. (NYSE: MNT), Tuesday announced that it has signed a license agreement with Sandoz Ltd. of Basel, Switzerland, to produce SANDOSTAB P-EPQ in the United States.

SANDOSTAB P-EPQ is a proprietary diphosphonite antioxidant used in the stabilization of polypropylene, polyethylene and other plastic materials.

The antioxidant, currently produced only in Switzerland by Sandoz, provides superior cost/performance characteristics and is one of the most widely used ingredients for polyolefin stabilization. Himont will supply the product to Sandoz's wholly owned U.S. subsidiary as well as to Himont plants, affiliates and licensees in the United States and Canada.

According to Antonio Ballada, Himont's vice president for functional chemicals, ''The agreement with Sandoz has strategic value to both companies. Himont will be able to produce a widely used ingredient of its polymer stabilization package that has been available only from Switzerland. Sandoz's growing customer base in North America will have a local source of product.''

HIMONT is the leading worldwide producer and marketer of polypropylene and a major producer of a broad range of polymer-based specialty composites and alloys.

LAWRENCEVILLE, NJ (JAN. 9) BUSINESS WIRE - Anthony P. Terracciano has been selected to become chairman, president executive officer of First Fidelity Bancorporation, the regional bank holding company.

Terracciano, 51, has been serving as president and chief operating officer of Mellon Bank Corp.

''I'm excited about the opportunity to run this great banking company,'' Terracciano said. ''And I appreciate the confidence that First Fidelity has placed in me.''

A career banker, Terracciano served with Chase Manhattan for 23 years before joining Mellon as president in 1987. At Chase, he served as vice chairman, global banking; executive vice president and chief financial officer; head of the service products businesses, corporate operations and systems and correspondent banking; treasurer; and head of the

international department.

Earlier in his Chase career, he also headed strategic planning; was a senior vice president of human resources, and served as a lending officer.

Terracciano will assume his new duties on Feb. 1, succeeding Robert R. Ferguson Jr., who will retire on Feb. 28, as previously announced, but who will continue to serve as a director and in an advisory capacity during the transition.

''We have found a strong leader, superb manager and experienced banker to head First Fidelity,'' Ferguson said. ''In Tony Terracciano, we have made an excellent choice.''

First Fidelity Bancorporation is the parent company of the First Fidelity banks and Morris Savings Bank in New Jersey and of Fidelity Bank and the Merchants banks in Pennsylvania. The company, with $29.5 billion in total assets and some 500 offices in New Jersey and eastern Pennsylvania, is among the 25 largest banking companies in the United States.

MURFREESBORO, TN (JAN.9) BUSINESS WIRE - National HealthCorp. L.P. (ASE:NHC) one of the nation's largest long-term health care chains, has purchased, subject to regulatory approval, two centers in Florida from Health Care and Retirement Corp. of Toledo, Ohio.

The centers are located in Stuart and Merritt Island Fla. The Stuart Center will be called National Healthcare Center of Stuart. The 104-bed long-term health care center opened on Sept. 20, 1989, and presently is over 50 percent occupied with private paying patients. The center features an adult day care center with a capacity for 25 people.

The other new center will be called National Healthcare Center of Merritt Island and is under construction. It will have 120 beds when it opens in October this year.

''The centers are both located in excellent markets that merge perfectly with our Southern Florida region,'' NHC President Andy Adams said.

With the addition of NHC of Stuart, NHC presently owns or manages 72 centers with 8,684 beds in 10 states.

SAN DIEGO (JAN. 9) BUSINESS WIRE - Gary E. Liebl, chairman of the board, president and chief executive officer of Cipher Data Products Inc., (NASDAQ/NMS symbol: CIFR), announced Monday that Cipher has agreed with Archive that the depositions and discovery scheduled to start today in the litigation pending between the two companies in federal court in connection with Archive's pending tender offer will be deferred until 5 p.m., California time, on Tues., Jan. 9, 1990.

The purpose of the deferral is to give the parties an opportunity to negotiate the terms of a possible confidentiality and standstill agreement. Cipher indicated to Archive yesterday that it was willing to entertain Archive's request to engage in discussion concerning Archive's Jan. 5, 1990 letter indicating its willingness to consider an $8 per share negotiated transaction but that, as directed by its board, such discussion would be conditioned on such an agreement.

Discussions between the parties' respective representatives concerning such an agreement are in process but there is no assurance that agreement will be reached by Jan. 9 or at all nor as to what the outcome might be if any such agreement is or is not reached.

In suggesting the deferral, Cipher reserved its right to provide information to and negotiate with other parties concerning a possible transaction, to decline to discuss an acquisition by Archive at $8.00 per share, and to determine not to sell Cipher at all.

The First Boston Corp., Cipher's financial advisors, will be proceeding to carry out the board's previously announced direction that they continue to explore possible third-party interest in a business combination or other transaction that would be designed to reflect the long-term value of Cipher's shares.

EAST HARTFORD, CT (JAN. 9) BUSINESS WIRE - For the first time, the cabin atmosphere of the space shuttle Columbia will be continuously monitored for airborne particles by a PDM-3 MINIRAM Personal Dust Monitor manufactured by MIE Inc., a subsidiary of TRC Cos. Inc. (AMEX:TRR).

The MINIRAM is the world's smallest direct reading personal dust monitor, and is part of a special payload designed by the University of Minnesota to monitor and characterize the cabin atmosphere for dust and other particles. Real time data will be evaluated against size distribution information generated after Columbia's return to Earth to ascertain when and what types of pollutants are generated within Columbia's cabin.

The PDM-3 senses the concentration of airborne particulate contamination, such as dust, smoke, fume or mist by measuring the amount of light scattered by particles, and reports results directly in mg/m3.

Data from the MINIRAM is being transferred to an MIE PDL-10 data logger for storage, statistical analysis, and subsequent reporting. Upon Columbia's return, NASA scientists will be able to generate precise time histories of pollutant generation, a key to improving cabin ventilation and filtration for future shuttle flights.

For more information, contact Pedro Lilienfeld, president, MIE Inc., 213 Burlington Road, Bedford, MA 01730, 617/275-5444.

TRC Cos. Inc. and its engineering, laboratory and instrument subsidiaries service clients from offices across the country.

#90009b0657 01/09/1990 ~Business Wire

LONDON (JAN. 9) BUSINESS WIRE - Tomkins PLC (NASDAQ:TOMKY), the international industrial management company, Monday reported record financial results for the fiscal first half ended October 28, 1989, and declared a 35 percent increase in the interim dividend.

Sales for the period increased 54 percent to 290.2 million ($ 457.0 million (a)) versus 188.9 million in last year's first half.

Operating profit rose by more than 21 percent to 20.1 million ($ 31.6 million) from 16.6 million in the comparable six months one year earlier.

Earnings per ordinary share increased 20 percent to 9.37 pence, equal to 37.48 pence ($.59) per ADR, from 7.80 pence per share, or 31.20 pence per ADR, in the corresponding period a year earlier. Each Tomkins ADR represents four underlying shares.

The interim dividend was raised to 2.70 pence per ordinary share over the prior year's interim dividend of 2.00 pence per share. The dollar amount of the dividend per ADR will depend on the exchange rate prevailing on the date of payment.

Tomkins' four business sectors -- Fluid Controls; Services to Industry; Professional, Garden and Leisure Products; and Industrial Products -- each achieved first half increases in operating profit and sales.

Tomkins reported that order books are well ahead of the corresponding period last year. Capital investment continued apace, and strong cash flow was generated during the first half. Although a net borrower for the first half, management of interest rate differentials and hedging enabled Tomkins to achieve net interest income.

The Tomkins group comprises a broad range of low-risk technology companies. Its U.S. interests include Smith & Wesson Corporation of Springfield, Mass., manufacturer of handguns, handcuffs and the Identi-Kit system and The Murray Ohio Manufacturing Company, of Brentwood, TN, one of the leading US producers of power lawnmowers and bicycles. Listed on the London Stock Exchange, Tomkins shares trade on the NASDAQ National Market System under the symbol TOMKY.

#90009b0660 01/09/1990 ~Business Wire

PURCHASE, N.Y. (JAN. 9) BUSINESS WIRE - International Paper Tuesday reported its sixth consecutive year of earnings improvement with release of preliminary 1989 full-year and fourth-quarter results.

Net earnings for 1989 were $864 million, or $7.72 per common share. This represents a 15 percent increase over 1988 net earnings of $754 million and a 18 percent increase over per share earnings of $6.57. Sales in 1989 increased 19 percent to $11.4 billion from $9.6 billion last year.

Fourth-quarter 1989 net earnings were $197 million, down 4 percent from a year ago. Earnings per common share were $1.81, unchanged from the same period in 1988.

Sales in 1989's fourth quarter increased 16 percent to $2.9 billion from $2.5 billion the previous year. The decrease in 1989 fourth-quarter earnings was largely attributable to adverse weather conditions in December and lower profitability in the uncoated white papers business.

During the fourth quarter, the company's annual common stock dividend was increased 13.5 percent from $1.48 to $1.68 per common share.

''Strong performances by most of our businesses through much of the year, combined with the positive impact of acquisitions, produced record sales and earnings,'' said John A. Georges, International Paper's chairman and chief executive officer. ''Average price realizations for our major products -- paper, paperboard, pulp, and wood products -- increased over 1988 levels.

''In addition, we achieved substantially improved earnings despite an effective tax rate that increased to 38.5 percent in 1989 from 37.1 percent in 1988.''

Georges added that the specialty business group continued to bolster the company's performance in 1989, accounting for approximately 35 percent of sales growth and 30 percent of the improvement in earnings. He said much of this growth was fueled by a series of successful acquisitions.

''For example, Ilford, a European manufacturer of black and white and color photographic papers and films, contributed significantly to improved group results throughout its first nine months of ownership.

''Despite some easing in demand and pricing for some major product lines during the second half of 1989,'' Georges continued, ''we are confident that our programs to reduce costs, improve quality, increase production of value-added products, and enter new markets will ensure International Paper's position as a solidly profitable company in 1990.''

International Paper, headquartered in Purchase, manufactures products including business communication papers, commercial and magazine printing papers, corrugated containers, food packaging papers, photographic films and wood products.

TAMPA, FL BUSINESS WIRE - Action Staffing Inc. (NASDAQ: ACTS) reported a 227 percent increase in net income and a 40 percent increase in revenues for the first quarter of fiscal 1990, the three months ending Nov. 30, 1989, over the corresponding period for fiscal 1989.

The company attributes this rise in sales and earning to its recent concentration on employee leasing which presently exceeds the 11,000 mark.

Net income for the first quarter of fiscal 1990 was $198,904, or one cent per share on 39,735,000 weighted average shares outstanding up from $60,895 the previous year which included a loss from discontinued operations of $55,266 on 36,548,000 weighted average shares outstanding. Revenues reached $37,979,778 up 40 percent from $27,086,461 for the like period last year.

''The improvement in revenues and net income reflects our decision to restructure by selling our temporary help division and concentrating on employee leasing. We have now passed the 11,000 leased employee mark,'' stated David Miller, Action's chairman of the board.

ROCHESTER, N.Y. (JAN. 9) BUSINESS WIRE - Eastman Kodak Company announced Monday its plans to sign agreements with Digital Equipment Corporation and IBM for management of Kodak's worldwide telecommunications and data networks.

Under terms of the new agreements, Digital will manage and operate voice and data communications facilities for Kodak. IBM will be responsible for management of Kodak's worldwide Systems Network Architecture (SNA)

data network, in addition to its current project of building and managing a new Kodak data center.

The agreement with Digital covers voice, data, and text telecommunications services for Kodak worldwide. This agreement will provide opportunities for reducing telecommunications expense and enhanced deployment of new technology, while continuing to improve service levels and customer satisfaction.

''We are very pleased to be working with Kodak in an expanded role managing their worldwide telecommunications environment,'' said Russell Gullotti, vice president, Enterprise Integration Services at Digital. ''Digital and Kodak recognize the strategic significance of these systems. Digital's strength in networking, service, support and project management position us well to integrate diverse technologies from diverse vendors. Kodak is using our technology and skill to maximum advantage delivering the solutions needed to maintain its position as an innovative leader in its industry.''

As part of the agreement, Digital will offer employment to approximately 250 Kodak employees and will purchase from Kodak the assets required to support these services.

Under the terms of the IBM agreement, IBM will be responsible for the management and operation of Kodak's worldwide SNA data network, including day-to-day network operations in Rochester, Colorado and Canada, along with Kodak regional and district locations.

''This new telecommunications arrangement, along with the established Kodak/IBM data center agreement, will significantly enhance the ability to deliver custom solutions to Kodak's lines of business,'' said David E. McDowell, IBM vice president and president of the National Service Division.

''In addition, IBM will provide all network connectivity services for the new data center, including IBM Business Recovery Services for disaster recovery.''

Approximately 25 Kodak employees now supporting Kodak data networks will be offered employment with IBM.

RICHARDSON, TX (JAN. 9) BUSINESS WIRE - Ericsson signed an International Master Purchasing Agreement with Polaroid for the acquisition by Polaroid of Ericsson Business Communications products such as PBXs and related services.

The agreement will go into effect immediately and covers sales and services in 25 countries, including the United States.

It establishes the terms and conditions for the procurement of Ericsson products and services throughout the Polaroid telecommunications network.

The product offering includes the Ericsson MD110 Digital PBX, BCS150 Business Communication System and services such as consultation on network design and implementation. Also included is system and network maintenance.

The North American marketplace will be the major link to the strategic agreement. Countries in Eurpoe, Latin America and the Far East also are included in the agreement.

''This is another important step in our Value Added Partnering Program,'' said Rolf Eriksson, vice president, international operations, Ericsson Business Communications, Sweden.

''This is Polaroid's first multi-year, multi-national telecommunications agreement and it underscores our confidence in Ericsson. As Polaroid expands worldwide, our telecommunications network becomes increasingly more important. This network will allow Polaroid to continue to provude a high level of service to our customers,'' said Gerald Pineault, purchasing agent for Polaroid.

Headquartered in Stockholm, Sweden, Ericsson is one of the world's leading manufacturers of telecommunications equipment. Its wholly owned North American subsidiary is based in Richardson.

NYON, Switzerland (JAN. 9) BUSINESS WIRE - Executive TeleCard Ltd. (PHLX:XTL; NASDAQ:EXTL) announced Tuesday that JCB International Co. Ltd., Tokyo, has targeted March 1990 as the implementation date for its

agreement with EXTL to provide JCB cardholders with the ability to make telephone calls to, from and within a growing list of countries serviced by the Executive TeleCard International system.

Special characteristics of this service is that calling procedures are instructed in Japanese. Using the EXTL system, JCB cardholders can make both international and long distance calls from any touch-key telephone - pay phones, hotel phones, private phones.

JCB representative stated that, ''This is the first agreement by which a Japanese credit card company will provide Japanese instruction phone service to its cardholders.''

The calling procedures are:

1. JCB cardholders dial the toll free number of the country they are visiting from a full touch-key telephone, either a coin telephone, a private phone or a hotel phone.
2. Enter JCB card number.
3. Enter the country code, city code and telephone number.
4. Call is processed.
5. Cardholders are able to charge the phone call fees to their JCB cards.

JCB is the biggest credit card issuer in Japan. Its 16 million cardholders represent about 39 percent of Japan's bank credit card market. JCB has found growing use among Japanese visitors to the U.S.A. and has long range plans to double its cardholder base over the next several years.

JCB has concluded a number of agreements with some Bell operating companies, allowing JCB cardholders to make phone calls through card reader (swipe) pay phones in the United States.

#90009b0686 01/09/1990 ~Business Wire

WOODBURY, NY (JAN. 9) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced the signing of an agreement with The Israel-United States Binational Industrial Research and Development Foundation for the financing of the initial phase of a $1.75 million project for the design and development of a large capacity voice and facsimile processing system for use by subscriber service provider organizations in offering message management services to public customers.

The system will be designed to provide massive processing and storage capability for voice, facsimile, and integrated voice and facsimile communications through a network of modules with central administration and billing.

Each module will be designed to support hundreds of telephone ports for simultaneous access and massive storage capacity to satisfy the requirements of telephone companies and other public service carriers. Each module will also be designed to provide complete redundancy in processing, storage and power subsystems and advanced diagnostic and maintenance features.

The project is to be conducted over a two year period by Comverse and its Israeli subsidiary, Efrat Future Technology Ltd. Under the terms of the project funding agreement, the foundation will provide reimbursement of 50 percent, or approximately $500,000, of approved project expenditures under the first year's project budget of approximately $1 million.

The budget for the second year of the project, estimated to be approximately $750,000, will be submitted for foundation approval after the completion of specified project milestones in the latter part of 1990.

Subject to approval by the foundation, expenditures under the budget for the second year of the project will also be reimbursed at the rate of 50 percent. Following the successful completion of the project, the foundation will be entitled to repyament of up to 150 percent of its funding in the form of royalties of between 2 percent and 4 percent of

applicable revenues; if the project is not successfully completed, no repayment is required.

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including integrated multi-media message management systems marketed under the name of TRILOGUE.

During the last two years, Comverse has marketed its products directly to major subscriber services provider organizations in the United States and internationally through leading distributors in Western Europe and the Far East, while developing advanced communications processing systems for defense and other users under government contracts.

Its revenues have grown to approximately $12 million for the four quarters ended Sept. 30, 1989, an increase of more than 90 percent from the preceding four quarters.

NEW YORK (JAN. 9) BUSINESS WIRE - Viacom International Inc. has adopted a new logo designed to reflect the company's recent evolution and growth, effective immediately, it was announced by Sumner M. Redstone, chairman of the board, and Frank J. Biondi, Jr., president and chief executive officer.

''Viacom in 1990 is a far different company than it was two and a half years ago when it was acquired by National Amusements, Inc. in June 1987 '' said Biondi and Redstone in making the announcement. ''We have selected a thoroughly modern and exciting presentation of the Viacom name to portray the changing dynamics of the company and to add recognition value to Viacom on a worldwide basis.

''The new logo also is symbolic of the commitment to excellence on the part of the management team and the company's nearly 5,000 employees.''

They continued, ''The new identity program will help strengthen awareness of Viacom as a vital force in the entertainment and communications industry. It also will help to make the company better understood by its audiences -- the general public, customers, investors, the media and the financial community.''

The logotype, developed by the New York-based graphic design firm, Chermayeff & Geismar Associates, is a distinctive and geometric treatment of the Company's name, used without an additional symbol or graphic

element.

The individual letters are handdrawn with a creative twist. The letter 'A' in the word Viacom imitates the 'V,' only inverted. This technique is carried through to the letter 'M,' thereby unifying the Company signature in a geometric pattern. The 'C' is the exact half of the 'O.'

The logo appears in a variety of two-color combinations from a four-color palette of primary red, purple, blue and green. It also functions in single colors and in black and white.

Viacom International Inc. is a diversified communications and entertainment company with headquarters in New York City.

NASHUA, NH (JAN. 9) BUSINESS WIRE - Ekco Group Inc. (NYSE:EKO) Tuesday said that it has continued the restructuring of its Lititz, Pa., manufacturing facility with the announcement that the company will eliminate approximately 70 jobs.

The plant's employees were notified yesterday.

Ekco Group President Robert Stein stated, ''Product offerings, service levels, and sales volume of the products manufactured from that facility will not be affected by this move. The projected savings associated from this action should produce favorable results by the second half of the year.''

The Lititz plant will continue to manufacture high-volume parts and assemble and ship finished products. Certain component parts currently manufactured in this plant will, as a result of the action, be produced by subcontractors for the company.

Ekco Group Inc. manufactures and markets a variety of consumer products which it broadly markets through leading retail outlets. The company's products include a range of household and recreational products sold under the ''Ekco,'' ''Baker's Secret,'' ''Victor,'' ''Woodstream' and ''Havahart'' brand names.

WHITE PLAINS, N.Y. (JAN. 9) BUSINESS WIRE - Four leading computer technology companies announced Monday they have submitted a proposal to the Open Software Foundation to provide an integrated set of software components for multivendor networked environments.

Responding jointly to the OSF request for technology for a distributed computing environment were the Apollo Systems Division of Hewlett-Packard Co., IBM Corp., Locus Computing Corp. and Transarc Corp. Digital Equipment Corp. and Microsoft Corp. were also joint submitters and endorsers of several components of the submission.

Called ''DEcorum,'' the submission consists of technologies that provide a uniform architecture for distributing computing. DEcorum simplifies and supports the development, execution and use of applications and services. The underlying DEcorum distributed architecture supports integration of the software technologies, each chosen for its unique strengths within the industry and its ability to work across heterogeneous systems.

DEcorum provides software developers with the tools they need for the cost-effective creation of programs for a distributed computing environment. DEcorum also provides UNIX(a) users and system managers with distributed implementations of important UNIX services and facilities. Together, these facilities constitute a full system that is flexible, easy to use and adaptable for the future.

COLLEGE POINT, NY (JAN. 9) BUSINESS WIRE - EDO Corp. (NYSE: EDO) announced Tuesday that its Government Systems Division had received two contracts with an aggregate value of approximately $17 million.

The first award, received from the United States Naval Sea Systems Command is for an initial $10 million in funding for the delivery of two prototypes of major upgrades to EDO's AN/SQR-18 Sonar System. The AN/SQR-18 is installed on FF-1052 anti-submarine warfare (ASW) frigates.

The second award, valued at $7.1 million, is for the production of the company's helicopter-towed MK105 magnetic mine countermeasures system and associated ground support equipment.

This contract represents an additional order from an international customer for this system which has proven to be one of the safest and most effective anti-magnetic mine countermeasure devices.

Ira Kaplan, vice president and general manager of EDO's Government Systems Division, stated that the awards were for products in the company's ASW and mine countermeasure product areas. ''The MK105 award demonstrates EDO's ability to successfully market its products in overseas markets. Such international demand for our products combined with upgrade programs like the AN/SQR-18 will be strong factors in the Division's future results.''

EDO Corp. designs and manufactures advanced electronic and specialized equipment for military and commercial aerospace, marine and industrial markets.

NEW YORK (JAN. 9) BUSINESS WIRE - Lazare Kaplan International Inc. (AMEX:LKI) announced Monday that gross sales for the first six months of fiscal 1990 ended Nov. 30 totaled $47,513,000, an increase of 30 percent when compared to the $36,590,000 in sales during this period last year.

For the second quarter ended Nov. 30, the company reported gross sales of $28,295,000, an increase of 36 percent or $7.6 million when compared to the previous year.

During this period, polished diamond sales increased 44 percent in the first six months and 45 percent in the second quarter of 1990. Rough diamond sales increased 12 percent during the first half and 26 percent in the quarter.

The higher gross sales of polished stones were due primarily to continued success of the company's marketing of the brand name Lazare Diamond, its

growing customer base and expansion in the Far East.

Net income was $1,911,000, or 61 cents per share for the first six months of fiscal 1990, ended Nov. 30. This compares with net income of $340,000 or 11 cents per share during this same period last year.

For the second quarter ended Nov. 30, the company reported net income of $1,056,000 or 34 cents per share compared to $239,000, or 8 cents per share a year ago. The increase in income is due primarily to an increase in overall sales volume.

During the quarter, the company successfully completed negotiations with Hotel Lotte Co. to sell its ideal cut laser inscribed diamonds in their stores in the Republic of Korea.

According to Leon Tempelsman, president of Lazare Kaplan International, ''The agreement with Hotel Lotte, one of the largest trading companies in Korea, extends the distribution of Lazare Diamonds in the Pacific region. Lazare Kaplan is very pleased with this arrangement and is continuing its efforts to expand into additional markets throughout this area.''

Lazare Kaplan International Inc. (AMEX:LKI) is primarily engaged in the cutting and polishing to ideal proportions of Lazare Diamonds which it sells to quality jewelers throughout the United States and abroad.

CHICAGO (JAN. 9) BUSINESS WIRE - AM International Chairman and Chief Executive Officer Merle H. Banta announced Tuesday that the company has completed the realignment of its global operations and named two executives to head the new business units.

Under its growth strategy for the 1990s, AM has structured its four core division's global operations into 10 discrete market-focused business units and repositioned its European operations for the changes to take place in the European Economic Community in 1992.

The new business units and executive appointments announced Tuesday by Banta are part of the company's recently formed AM Graphics Equipment Group. They include:

T. Jeff Elmore becomes general manager of two new business units - the AM

Newspaper Mailroom Products Unit (largest supplier of insertion equipment for newspaper mailrooms in the United States) and the AM Publications Bindery Products Unit (provides a wide range of bindery equipment to major publications printers in the United States and Europe). Elmore who has held a number of key sales and marketing positions joining the company in 1976, most recently served as vice president, sales and marketing for the Bindery & Forms Press Division. He is a graduate of the University of Toledo and received his M.B.A. from the University of Michigan.

Donald A. Leake has benn appointed general manager of the AM Forms Press Unit (provides presses and collators to business forms and promotional graphics global markets). Leake joined the company in 1976 and his most recent position was vice president, manufacturing, Bindery & forms press division. He received his degree from Wright State University.

These three business units, and the Commercial Bindery Products unit comprise the AM Grpahics Equipment Group, which reports to AM Group President William A. Whitescarver.

AM International, with world headquarters in Chicago, sells and services a wide range of design, display, reproduction and finishing products and supplies to the worldwide graphics industry.

The company conducts its business through group and division operations, 16 subsidiaries and a dealer organization located in over 100 countries. AM International's annual revenues are in excess of $850 million. AM International's common and preferred shares are traded on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol ''AM''. The company's warrants are traded on the American Stock Exchange under the ticker symbol ''AML.WS''.

FRAMINGHAM, MA (JAN. 9) BUSINESS WIRE - Aritech Corp. has completed the previously announced acquisition of ITEC Security Products Ltd. for approximately $8.2 million in cash and notes, the company announced Monday.

ITEC, a manufacturer of electronic security products, is headquartered near Dublin, Ireland. It has annual sales of approximately $7.0 million. The 10 year old company manufactures control panels and other protection products.

James A. Synk, chairman and president, said, ''We are enthusiastic about the combination. Aritech's expertise in developing and manufacturing high quality intrusion sensors will be complemented by ITEC's strength as a

producer of quality control panels and communications.

''The combined efforts will result in total security systems designed for the European market in anticipation of the EEC unification targeted for 1992 and beyond.''

Aritech is a leading worldwide manufacturer and a European distributor of electronic security equipment.

OTTAWA (JAN. 9) BUSINESS WIRE - The continental European subsidiary of Gandalf Technologies Inc. and Solvay & Cie., Brussels, have entered into a two-year agreement for Gandalf to provide its comprehensive range of data communications products and information network systems for use at Solvay locations worldwide.

Value of the agreement in the first year to Amsterdam-based Gandalf Europe is approximately $1 million (U.S.).

Solvay, a $6.8 billion (U.S.) multinational chemical manufacturer, will use Gandalf equipment and systems primarily at its continental European locations, as well as at other locations worldwide.

''This agreement satisfies an important objective for Gandalf: to be one of the primary information network suppliers in the specialized field of data communications to a major organization with complex and demanding global communication needs,'' said Gandalf Chairman and Chief Executive Officer Desmond Cunningham.

Gandalf Technologies Inc. provides computer communications solutions to end users. The company is a leading international designer, manufacturer and supplier for a broad range of computer and communications systems which it markets through subsidiaries worldwide.

Shares of Gandalf Technologies Inc. are listed on the Toronto Stock Exchange (GAN), on The Stock Exchange, London, and traded over-the-counter (NASDAQ: GANDF) in the United States.

#90009b0749 01/09/1990 ~Business Wire

WORCESTER, MA (JAN. 9) BUSINESS WIRE - Wyman-Gordon Co. announced Tuesday that its board of directors has directed management to explore the possibility of a sale of the company's crankshaft forging and machining facilities located in Illinois and Michigan.

No sales price for the two facilities, which have combined annual sales of approximately $60 million, has been established. Principal customers are producers of diesel and gasoline engines such as Cummins Engine Co., Detroit Diesel, Caterpillar, Textron-Lycoming and Ford.

James S. Walsh, chairman and chief executive officer of Wyman-Gordon, said ''An extensive analysis of the company's participation in the truck and automotive market through the Danville and Jackson plants has been underway for some time. We have concluded at this juncture that while our crankshaft facilities are unique and modern and hold a strong market share we should focus our energies and assets, in the long-term, on aerospace-related markets. This decision means that Wyman-Gordon will not be investing in the previously proposed joint venture with Sumitomo Metals Industries to manufacture forged automotive crankshafts in the United States''.

The company's forging facilities and research center in Massachusetts, as well as its recent acquisitions in the fields of investment casting and advanced composites, are all focused on aerospace applications.

These include, primarily, advanced turbine engine and airframe components for civilian aircraft as well as military and aerospace applications.

The company's Danville, Ill. facility is dedicated to the production of forged steel crankshafts for diesel engines which are primarily used to power large, over-the-highway trucks, as well as defense equipment, construction and power-generation equipment and off-road vehicles. The Danville plant was completed in the late seventies, features two 16,000 ton screw presses and is an integrated, state of the art crankshaft forging facility. About 240 people are currently employed at the plant.

Jackson Crankshaft Company of Jackson, Mi. was acquired by the company in 1973. Its specialized equipment is dedicated to the high quality, volume machining of crankshafts for both diesel and gasoline engines. This facility currently employs 380 people.

Wyman-Gordon is a leader in the manufacture of high quality, technically advanced forgings, high integrity investment castings and composite aerospace structures for the transportation equipment and defense equipment markets and other commercial applications.

#90009b0765 01/09/1990 ~Business Wire

WALTHAM, MA (JAN. 9) BUSINESS WIRE - COMPASS Inc. (OTC:SOFT) of Wakefield Mass., announces the release of a new COMPASS Fortran compiler for massively parallel Single Instruction Multiple Data (SIMD) computers.

Utilizing new data allocation optimization techniques developed at COMPASS the new compiler speeds up program execution by as much as an order of magnitude.

In SIMD computers, data structures can be spread across multiple processors. Typically, vector operations require that corresponding data elements of the operands be aligned. Alignment of operands requires interprocessor communication, an extremely time-consuming task.

The new COMPASS SIMD Fortran compiler analyzes the data structure alignment requirements of the source program and optimizes the layout of the data across the SIMD processors. This analysis technology, developed by COMPASS and called data optimization, significantly reduces interprocessor communication and thereby speeds up program execution time by an order of magnitude.

The first customer for the COMPASS Fortran SIMD compiler using these data optimization techniques is MasPar Computer Corp. of Sunnyvale, Calif. The new COMPASS Fortran compiler will be used on MasPar's recently announced MP-1 high performance SIMD computer. COMPASS has delivered several other Fortran SIMD compilers and has additional Fortran SIMD compiler clients under contract.

COMPASS Inc., a subsidiary of SofTech Inc., was founded in 1961. COMPASS has an international reputation for providing compiler software and software engineering services in the rapidly growing market for supercomputers and other advanced architecture computers.

NEW YORK (JAN. 9) BUSINESS WIRE - Quantex Development Corp. (OTC), has announced that its subsidiary, Arthotronics Inc., has received a formal proposal from the Arthritis foundation that would allow the use of the foundation's logo and other marketing aids in exchange for a financial

commitment to the Arthritis group.

The proposal is related to Port-O-Heat, an Arthotronics product designed for the portable delivery of therapeutic heat. Port-O-Heat is rechargeable and can be belt worn by the consumer, allowing full mobility.

In New York, Quantex President Kenneth McBride said, ''With a national distribution contract in place, our European manufacturer in production and what appears to be a mutually beneficial proposal from the Arthritis Foundation, Quantex and Arthotronics have clearly broken the development stage and entered an operational mode. Many challenges remain, but Quantex is now positioned for growth.''

Quantex and Arthotronics recently signed a five year distribution agreement with Brigade Quartermasters Ltd. of Kennesaw, Ga., that calls for the purchase of 500,000 Port-O-Heat units by Brigade. The agreement has an estimated gross value of $17 million.

DALLAS (JAN. 9) BUSINESS WIRE - United Medicorp (OTC) announced Monday its eligibility for trading on the Boston Stock Exchange under the trading symbol ''UMI.''

The news from the Dallas-based company follows its Dec. 27, 1989, listing on NASDAQ under the symbol ''UMCI.''

Entrepreneur G. Ray Miller, founder of U.S. Telephone and International Telecharge, formed United Medicorp in March 1989 to offer electronic claims processing, collection and cash management techniques for hospitals and physicians' offices.

Miller, known for spotting niche market potential and starting successful new companies, has brought together service expertise of well-known businesses to electronically process medical insurance claims using proprietary, custom-designed software. Participating with United Medicorp are Andersen Consulting, Sears Business Centers, GTE Health Systems and Provider Capital.

According to Miller, United Medicorp is unique in the market because of its total capabilities concept: electronic claim filing, advance funding commitment, claims management and collection, and the offer of hardware and software.

Through United Medicorp, claims are filed electronically by hospitals and physicians' offices, eliminating paperwork and administrative time now draining resources from providers.

Forty-five percent or greater of the amount of anticipated insurance payments is advanced to the provider within seven business days of processing the claim. Hardware and software are available to the provider as part of the service. United Medicorp earns fees based on a percentage of claims amounts processed.

''United Medicorp's listing in the last 10 days on both NASDAQ and in Boston is evidence of the company's financial strength and acceptance in the marketplace,'' he said.

#90009b0789 01/09/1990 ~Business Wire

EDEN, NC (JAN. 9) BUSINESS WIRE - Fieldcrest Cannon Inc. (NYSE: FLD) Tuesday announced it is considering a major investment in the modernization of its towel manufacturing facilities in the Columbus/Phenix City region and, in that connection, have asked the Georgia Department of Transportation to abandon plans to build a bridge through its 13th Street bleachery.

On March 2, 1989, the board of directors of Fieldcrest Cannon Inc. announced a $250 million, five-year capital improvement program targeted to the modernization of its terry manufacturing plants. Facilities are currently located in Fieldale, Va.; York, S.C.; Kannapolis, N.C. and the Columbus/Ga. and Phenix City, Ala. areas.

Possible expansion and modernization in Phenix City, Ala. and Columbus and an investment of more than $138 million in local plants is currently being evaluated by Fieldcrest.

Towel weaving facilities in Columbus, Ga. cannot physically accommodate the modernization plans. Accordingly, the company is evaluating its 100-acre site in Phenix City, Ala., currently being used for cutting and sewing, warehousing, and shipping operations for a new weaving plant.

The project would include a new 320,000 square foot weave room with new computer controlled slashing supplying ultra wide air jet looms which will be the first in major installation of this technology in the world. In addition to the new weave room, three other additions are being considered including a 99,300 square foot warehouse, a 28,600 square foot open stock addition, and a 29,920 square foot cut and sew addition.

In Columbus, however, other facilities, particularly the Bleachery on Front Street, will be included in the total project. Plans would require increasing the capacity of the present bleachery by as much as 30 percent to support the modernized operation.

Fieldcrest does not believe that this project can be accomplished if city and state authorities continue to pursue efforts to build a bridge over the Chattahoochee River at 13th Street.

As an alternative, Fieldcrest is willing to make available property at 14th Street sufficienct to permit a bridge across the river.

Fieldcrest has communicated its modernization plans to the city and to the Georgia DOT and has asked for assurances that alternatives to a 13th Street Bridge be worked out so the company can proceed to develop its modernization plans. The company cannot commit its resources and time to

this project as long as a bridge through its bleachery remains a possibility.

CONCORD, MA (JAN. 10) (BUSINESS WIRE) - GenRad Inc. Tuesday announced that December orders were weaker than expected, and as a result, fourth quarter orders and sales were in the $45-46 million range.

At this level of sales, the Company expects to post a loss for the quarter of $2-3 million.

Robert Anderson, CEO and President of GenRad commented, ''Orders to the U.S. electronic equipment manufacturing market have been particularly weak continuing a trend begun in June of this year. The weakness which began in the computer and defense electronic segments has spread to other electronic equipment manufacturers who are now delaying capital expenditures.

''Prime Data, the market research firm which follows our industry, recently forecast an 8 percent decline in the printed circuit board test market in 1989 and flat business in 1990. We believe that we have gained marketshare in 1989 since our board test business declined less than the market, but we too are forecasting no growth for 1990.

''In response to this weakness the Company has, during the year, taken a number of actions to reduce the breakeven point, some of which already have begun reducing expenses.''

Anderson noted that the Company's asset management remained strong with good control of inventories and receivables, and cash growing during the quarter to approximately $24 million.

He added, ''At this time I would expect first quarter 1990 orders and sales to be in the range of $43-45 million, resulting in a quarterly loss. I anticipate sequential progress from that point on both sales and earnings.''

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The Company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

LONDON (JAN. 10) BUSINESS WIRE - ADT Ltd., (NASDAQ: ADTLY), the leading international services company, is proposing a significant expansion of its European security services division with its recommended offer for Britannia.

- The offer values Britannia at approximately 110 million pounds.
- The offer values each Britannia share at 140p, a 28.4 percent premium to the market price on Jan. 8.
- ADT has received irrevocable undertakings to accept the offer from Britannia directors.
- Britannia is a major force in the European security services industry. Its markets and customer base fit well with ADT's existing security interests.

Michael Ashcroft, chairman and president of ADT, said,

"The security services markets in which both companies operate are fast growing and should provide significant opportunities in this fragmented sector. The acquisition of Britannia will enhance ADT's position in Europe. We believe that there is considerable scope to improve the overall trading performance of the combined operations."

The boards of ADT and Britannia announce that agreement has been reached for the acquisition by ADT of Britannia, to be implemented by means of a recommended offer. The offer will be made by Barclays de Zoete Wedd Limited ("BZW") on behalf of ADT for the whole of the issued ordinary share capital of Britannia not already owned by ADT and its subsidiaries.

Based upon the market price(a) of ADT shares on Jan. 8 of 203p, the offer values the existing issued ordinary share capital of Britannia at approximately 110 million pounds and each Britannia share at 140p.

ADT has received irrevocable undertakings to accept the offer from directors of Britannia and a company connected with its chairman in respect of an aggregate of 2,003,577 Britannia shares (representing approximately 2.6 percent of Britannia's issued ordinary share capital.) ADT and its subsidiaries owns 535,000 Britannia shares (representing approximately 0.7 percent of Britannia's issued ordinary share capital.)

The board of Britannia, which has been advised by Samuel Montagu & Co. Limited, considers the terms of the offer to be fair and reasonable and unanimously recommends all Britannia shareholders to accept the offer.

The offer will be made on the following basis:

For every 100 Britannia ordinary shares of 10p each	69 new ADT common shares of 1 cent

("Britannia shares") ("new common shares")
and so in proportion for any other number of Britannia shares, except that fractions of new common shares will not be allotted.

HAUPPAUGE, NY (JAN. 9) BUSINESS WIRE - ElectroSound Group Inc. (AMEX:ESG) Monday reported the operating results for the periods ended Nov. 30, 1989.

For the second fiscal quarter of the current fiscal year, the company earned $202,000, 8 cents per share, and a profit of $611,000, 23 cents per share, for the six months ended Nov. 30, 1989. The six month profit included a gain of $418,000 on the June, 1989 sale of the assets of the company's commercial duplicating equipment manufacturing operation.

During the second fiscal quarter and for the six months of the prior fiscal year, the company incurred losses of $1,746,000 and $3,525,000, respectively, as its pro rata share of losses at Memory-Tech, the 40 percent owned compact disc joint venture with Mitsubishi Corp.

As of the end of the last fiscal year, the company disposed of its interest in the joint venture and at Nov. 30, 1988, fully reserved its remaining investment, reflecting a charge of $4,384,000.

Sales for the quarter declined 24 percent to $7,926,000, and for the six month period declined 16 percent. These declines reflect the disposal of duplicating equipment and computer peripheral distribution activities. Revenues for the second fiscal quarter from ongoing duplicating service business were equal to the prior year level, and for the six months increased 6 percent.

MUNDELEIN, IL (JAN. 9) BUSINESS WIRE - Bio-logic Systems Corp. (NASDAQ:BLSC), a designer and marketer of computerized medical electrodiagnostic equipment, Monday announced operating results for the three and nine months ended Nov. 30, 1989.

Total revenues for the 1989 three months increased to $2,570,513 and for the 1989 nine months increased to $7,306,009 compared to $2,320,998 for the 1988 three months and $6,929,971 for the 1988 nine months.

The company had operating income of $104,398 for the 1989 three months compared to operating income of $34,313 for the 1988 three months and $257,858 for the 1989 nine months compared to $517,165 for the 1988 nine months.

The company's net income was $183,454 or 7 cents per share for the 1989 three months compared to $50,343 or 2 cents per share for the 1988 three months. For the 1989 nine months, Bio-logic reported net income of $387,751 or 14 cents per share compared to $433,463 or 16 cents per share for the 1988 nine months.

The weighted average number of shares were 2,724,272 for the 1989 three months, 2,718,611 for the 1988 three months, 2,732,712 for the 1989 nine months and 2,788,288 for the 1988 nine months.

Note: During the 1989 periods, miscellaneous income included $90,000 relating to a grant of rights to a company trademark during November 1989.

EVENDALE, OH (JAN. 9) BUSINESS WIRE - The U.S. Air Force Monday selected the GE F110-GE-129 Increased Performance Engine (IPE) to power 75 percent of its single-engine aircraft purchased for fiscal year 1991, according to GE Aircraft Engines.

The GE F110 was not a candidate for the USAF F-15E aircraft.

Since the annual USAF fighter engine competition between GE Aircraft Engines and Pratt & Whitney began in 1984, GE's F110 engines have been selected to power more than 70 percent of the F-16 aircraft purchased by the USAF.

WASHINGTON (JAN. 9) COMTEX - Investment News Network Inc. filed a registration statement with the NASD in which it proposes to offer 400,000 units. Each unit consists of six shares of common stock, four Class A warrants and one Class B warrant.

Each Class A warrant entitles the holder to purchase one share of common stock at $1.25 per share and each Class B warrant entitles the holder to purchase one share of common stock at $2.00 per share.

The initial public offering price is $6.00 per unit.

MLB Investments Ltd. is underwriting the offering.

Investment News Network is engaged in designing, integrating and marketing a financial information computerized network which will provide investors, companies, professional advisors and investment brokers with access to each other and current information in a quick, easy and inexpensive manner.

INN says it is the company's intent to make available information that will be pertinent, timely and specific to the investor 24 hours a day, seven days a week using a touch tone telephone. The company's INN Network would transform data received via satellite from major world exchanges and convert the information into human speech that can be accessed using a touch-tone telephone.

The company's executive office is located at 5625 Ruffin Road, Suite 200 San Diego, CA 92133 and its telephone number is (619) 279-9950.

#90009c0059 01/09/1990 ~Comtex
WASHINGTON (JAN. 9) COMTEX - Trans-Global Resources NL filed a Form 20-F with the NASD announcing in Dec. 1989 that it entered into an option agreement with Western Mining Corp. Ltd. The agreement is for the purpose of confirming the potential profitability of the Barrambie vanadium, titanium and iron deposit and bringing the deposit to production.

Trans-Global states that Western Mining has been given the exclusive right to undertake an advanced level feasibility study at its cost. The study is expected to be completed during 1990.

Assuming favorable results, Western Mining can within six months exercise its right to proceed to mine the Barrambie deposit as owner and operator for the following consideration:

- the payment to Trans-Global of $5 million in 10 annual installments of $500,000 each, and

- the payment by Western Mining to Trans-Global of a 2.5% royalty from the gross revenue derived from sales of all mineral products contained in the Barrambie deposit.

PARIS (JAN. 9) - Swiss food group Nestle has signed agreements with the Euro Disneyland theme park and Walt Disney's consumer products division enabling it to use Disney characters on its products, the two sides said here Tuesday.

They did not give the value of the deal.

Under the first agreement, Nestle is to provide the food in the various food outlets, including 11 restaurants, at the Magic Kingdom theme park, the first phase of the Euro Disneyland project outside Paris which is due to open in 1992.

Euro Disneyland and Nestle will also develop joint marketing programmes throughout Europe.

The second agreement with Walt Disney Consumer Products, for an initial 11-year period, makes Nestle the sole food group in Europe and the Middle East authorised to use copyright Disney characters in its products.

MEXICO CITY (JAN. 9) - Ford Motor Co. announced Tuesday that it had temporarily closed its plant in the Cuatitlan suburb near here after a union dispute Monday left 12 people injured.

Violence erupted in the automobile plant when about 250 armed assailants entered the facility and some opened fire.

Workers in the plant accused the attackers of being armed thugs contracted by Confederation of Mexican Workers (CTM) union leader Hector Uriarte and said they wanted the union boss to resign.

Ford said it "strongly regretted and condemned the use of force and violence to solve union problems," adding that it would not reopen the plant until security was guaranteed.

Workers accused the company of letting the assailants enter the plant.

Pay disputes prompted the start of the dispute last year but it began to turn ugly over the weekend when police arrested six workers, allegedly at Mr. Uriarte's request.

The arrested men were distributing propaganda for a demonstration and had accused Mr. Uriarte of defending the company's interests to "mutilate our rights and increase productivity."

Employees are due Thursday to vote in a referendum on whether to keep Mr. Uriarte as their leader, union delegates said.

The union also controls Ford plants in Chihuahua and Hermosillo in northern Mexico.

REDWOOD CITY, CA (JAN. 9) PR NEWSWIRE - At a securities industry conference in San Francisco today John H. Williford, chairman and chief executive officer of Advanced Polymer Systems Inc. (NASDAQ: APOS) announced that the company has signed an agreement with Scott Paper Co. (NYSE: SPP) which calls for APS to to supply Scott with a designated active ingredient entrapped in APS' patented polymer-based MICROSPONGE(R) delivery system for use in a product to be marketed by Scott.

Williford indicated that this agreement marks a milestone in the successful joint research and development efforts conducted under a December 1987 agreement between the companies. He confirmed that APS has conducted multiple full-scale manufacturing runs at its plant in Lafayette

La., to demonstrate its ability to consistently reproduce the product to Scott's specifications. The agreement also establishes a royalty rate to be paid by Scott on sales of the products involved.

For competitive reasons, the companies declined to elaborate on the specific nature of the final product, but Williford did note that APS should begin realizing initial supply revenues from Scott during 1990.

Advanced Polymer Systems develops and manufactures a patented polymer-based delivery system in which an active ingredient is entrapped in the pores of a microscopic "sponge" called a "Microsponge." By altering the composition and size of the polymer, Advanced Polymer Systems can pre-program the Microsponge to release the active ingredients over time or in response to one or more "triggers" such as temperature, moisture or diffusion.

Headquartered in Redwood City, Advanced Polymer Systems presently has approximately 20 major product development projects underway in a wide range of pharmaceutical, cosmetic, food and industrial applications for a number of major companies including Rorer Group Inc., Mobil Chemical Company and Wm. Wrigley Jr. Company.

LAS VEGAS (JAN. 9) PR NEWSWIRE - SelecTronics, Inc. (NASDAQ: SELE), a leading developer and marketer of handheld electronic reference products announced today that it is shipping its pocket-size Electronic Bible (EB2000(TM)). The Electronic Bible is one of the first cartridge- based handheld devices that contains a slot for additional ROM (read- only memory) card applications.

Measuring 3-1/2" x 6-1/8" x 15/16", the Electronic Bible allows users to search any book, chapter, verse, or groups of up to four words in both the Old and New Testaments. It features a typewriter-style ("QWERTY") keyboard and contains the entire Old and New Testaments. The Electronic Bible has an 8-line, 320-character dot matrix display screen.

According to Mike Weiner, president and chief executive officer of SelecTronics, "The Electronic Bible also accepts additional ROM cartridges enabling users to access forthcoming applications such as daily devotional guides and Hebrew and Greek language aids."

The Electronic Bible incorporates the full text of the New International

Version (NIV) Bible, the best-selling modern translation in the English-speaking world. SelecTronics has obtained the exclusive handheld rights from the Zondervan Corporation, a division of Harper and Row. The NIV version of the Bible is not only the best-selling Bible, but also is the best-selling book in print, year after year, in North America.

SelecTronics has signed a distribution agreement that allows the Zondervan Corporation to market the Electronic Bible to more than 7,000 Christian bookstores across the United States.

Zondervan is the world's largest publisher of Christian books, Bibles and music. In addition, Harper & Row will distribute the product through trade and chain bookstores. The Electronic Bible is available for a suggested retail price of $299.95.

Unlike the book version, the Electronic Bible contains an automatic spelling correction feature, a clock, alarm and calculator. Users can also write and compare personal notes against passages and can save their place automatically for referencing at a later time. The Electronic Bible also includes a synonym word search feature that lets users find words unique to the King James Version of the Bible.

The Electronic Bible's tiny size and powerful text capability is made possible by dynamic data compression technology developed at the Xerox Palo Alto Research Center (PARC). The technology is licensed exclusively to Microlytics, Inc., a leading developer and marketer of linguistics and reference software products. SelecTronics recently announced an agreement in principle to merge with Microlytics. The merger will be complete in the first quarter of 1990.

SeleTronics, Inc., manufactures and markets electronic publishing devices including the WordFinder(R) series of pocket-size dictionaries, thesauruses and spell checkers; European versions of the WordFinder 220 spell checker and thesaurus in French, German, Italian and Spanish; multi-language translators, the Berlitz(R) EuroTraveller(TM) and the Berlitz(R) Interpreter(TM); the DataStor(TM) 8000 series of databanks; and the recently announced Random House Electronic Encyclopedia, the world's first pocket-size electronic encyclopedia.

Word Finder is a registered trademark of Microlytics, Inc.; EB2000, WF220 EuroTraveller, Interpreter, DataStor 8000 and PC Advantage are all trademarks of SelecTronics, Inc.

NEW YORK (JAN. 9) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) today announced a fourth quarter 1989 charge as a result of its plans to integrate the operations of Bristol-Myers and Squibb and to organize its pharmaceutical, nutritional, medical device, and consumer businesses on a global basis. This charge, which is estimated to be $740 million before taxes, will include the costs of reducing the number of production facilities and employment levels worldwide, employee relocations and other related items. The fourth quarter will also include an additional charge for the costs of professional fees and other expenses related to the merger transaction of $115 million. The after-tax effect of both these charges is estimated to be $690 million.

Richard L. Gelb, chairman, said that the company is well along in developing its plans to realize the benefits afforded by the merger and that, in particular, the coordination of sales and marketing activities and the scope and quality of the combined pharmaceutical research and development effort promise to fulfill the substantial business opportunities that were anticipated. He added that the company will continue to increase its investment in sales, marketing and research in support of its leadership objectives in worldwide markets. He said that significant integration benefits and operating efficiencies will be realized in the administrative and manufacturing areas of the company. These savings will provide additional resources to invest in the company's businesses and to help offset the earnings per share dilution that resulted from the merger.

Gelb said that operating results continued strong during the fourth quarter and will be announced later this month.

#90009p0030 01/09/1990 ~PR Newswire

PHOENIX, AZ (JAN. 9) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) today reported revenue for the fiscal year ended Sept. 30, 1989 of $5,566,000 compared to $5,921,000 in 1988. The company's net loss in fiscal 1989 decreased to $2,710,000 or $.14 per share, compared to a $4,309,000 loss, or $.72 per share in 1988.

W. James Lane, executive vice president and chief operating officer said: "StatesWest had fewer aircraft in fiscal 1989 compared to 1988, with a smaller passenger load capability. Despite this fact, operating revenues decreased by only 6 percent due to our higher 1989 passenger load factor, which increased to 43 percent from 35 percent in 1988. Our revenues were negatively impacted by downward pressure on fares in certain markets caused by lower introductory rates of competitors in the first half of the fiscal year. We made significant progress in cutting operating expenses by over $2.4 million through the reduction of our excess passenger load capability and related costs due to the realignment of the Company's aircraft fleet and related operations."

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States.

CONTACT: Rudy R. Miller or Mary A. Nance, both of The Miller Group, 602-225-0504, for StatesWest Airlines Inc.

#90009p0031 01/09/1990 ~PR Newswire

AUSTIN, TX (JAN. 9) PR NEWSWIRE - SEMATECH announced today it has signed its second contract with Lam Research (NASDAQ: LRCX) of Fremont, Calif. Falling under SEMATECH's Joint Development Program (JDP), the new initiative centers on bringing important chemical vapor deposition (CVD) manufacturing technology to the U.S. semiconductor industry. This announcement follows on the heels of the Equipment Improvement Program (EIP) contract recently awarded to Lam to address advanced metal etch technology.

Specifically, the newly awarded JDP contract will fuel the domestic production of Electron Cyclotron Resonance (ECR) systems. This vital technology delivers breakthrough CVD capabilities for emerging device issues, such as those mandated by 16- and 64-megabit DRAMs.

Under terms of the contract, SEMATECH and Lam will combine resources to spur the development of a domestically designed and manufactured 200mm ECR CVD system. The new tool will also address the "cluster" process tool concept, conforming to the open interface specifications to be defined by the SEMI Modular Equipment Committee. The program, to be initiated immediately, calls for Lam to design, develop and fabricate an American manufactured ECR CVD tool for installation and evaluation in the SEMATECH

facility.

Through the course of the project, Lam's engineering resources and process expertise will be leveraged with funding, engineering staff, facilities and extensive process testing and data analysis from SEMATECH.

SEMATECH, a consortium of 14 U.S. semiconductor manufacturers, has an annual budget of $200 million. Half of its funding is provided by the federal government and the other half by the member companies.

Founded in 1980, Lam Research designs, manufactures and markets technically complex thin film processing equipment used in the primary stages of semiconductor manufacturing. The company's product offerings include a wide range of advanced single wafer dry etch systems, a family of sophisticated epitaxial deposition systems, and specialized chemical vapor deposition (CVD) systems designed to meet next-generation device requirements.

CONTACT: Ann Marrett of SEMATECH, 512-356-3327, or Debbie McGowan of Lam, 415-659-6848

#90009p0036 01/09/1990 ~PR Newswire

KIRKLAND, WA (JAN. 9) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ: MCAWA) announced that it expects to file today with the Securities and Exchange Commission a registration statement relating to new shares of its Class A stock to be sold to LIN Broadcasting Corporation (NASDAQ: LINB) and distributed by LIN as a stockholder dividend as contemplated by the acquisition agreement between the parties. That agreement, which was signed in December 1989, provides for completion of McCaw Cellular's pending tender offer for 21.9 million LIN shares at a price of $154.11 per share in cash and for LIN to purchase $425 million of McCaw Cellular's Class A stock and distribute it as a dividend in respect of LIN shares not purchased in the tender offer (other than those held by McCaw Cellular and its affiliates).

McCaw Cellular's tender offer for LIN shares is subject to the condition that it shall have received sufficient funds pursuant to its previously disclosed Oct. 20, 1989, bank commitment to purchase the 21.9 million LIN shares and pay related fees and expenses. McCaw Cellular said it has substantially completed negotiation of the definitive documentation with the agent banks with respect to such bank facility. In light of the financial covenants which are set forth in the bank commitment and are to be contained in the definitive bank facility agreement, McCaw Cellular will not be permitted to draw funds under the bank facility for the tender offer until it has received the proceeds of the stock sale to LIN referred to above, in addition to the satisfaction of certain other customary conditions. Such sale of stock to LIN cannot be completed before the related registration statement has been declared effective by the SEC, which is not expected to happen until sometime in mid- to late February.

In addition, McCaw Cellular said that under the bank facility, the banks will have the right to require that all governmental consents shall have become final and unappealable before the banks are obligated to advance funds. With respect to the order of the California Public Utilities Commission dated Dec. 20, 1989, authorizing McCaw Cellular's acquisition of LIN's interest in the Los Angeles cellular telephone market, the period for filing applications for rehearing will expire on Jan. 22, 1990. As to

the order of the New York Public Service Commission issued and effective on Oct. 25, 1989, confirming its decision that lacked jurisdiction over the LIN acquisition, under New York procedural law the last day on which an interested party may bring a court proceeding challenging the order is Feb. 26, 1990.

McCaw Cellular also noted that on Dec. 28, 1989, the U.S. Court of Appeals for the D.C. Circuit dismissed BellSouth Corporation's (NYSE: BLS) appeal of the order previously released by the Federal Communications Commission authorizing McCaw Cellular's acquisition of LIN.

McCaw Cellular said it has extended its tender offer so as to expire at noon on Tuesday, Feb. 27, 1990, subject to its right to extend the offer further if all conditions to the offer have not been satisfied by such date. Approximately 13.8 million LIN shares have been tendered in the offer, McCaw Cellular said.

CONTACT: Donald Guthrie of McCaw Cellular, 206-827-4500; or (analyst) J. Garrett Blowers of Abernathy/MacGregor, 212-371-5999; or Jonathan Rinehart or Michael Geczi of Adams & Rinehart, 212-557-0100, for McCaw Cellular

#90009p0038 01/09/1990 ~PR Newswire

TROY, MI (JAN. 9) PR NEWSWIRE - The appointment of Gerald L. Elson as general manager of Harrison Radiator Division was announced today by W. Blair Thompson, vice president of General Motors and group executive in charge of the Automotive Components Group (ACG).

Elson succeeds Thomas P. Stokes who continues on disability leave pending his retirement.

Elson joined General Motors as a design engineer with Saginaw Division in 1965. After serving in a number of engineering assignments, he was named chief assembly engineer in 1970, general supervisor, manufacturing development in 1972, assistant superintendent, manufacturing in 1974, and superintendent of manufacturing in 1978.

In 1980, Elson was named plant manager, General Motors Limited, London, England. He returned to the U.S. in 1982 and was named director, manufacturing systems, GM Advanced Engineering Staff. From 1984 until 1987, he served as executive director, artificial intelligence, until being named executive director, advanced manufacturing engineering.

Elson, a native of Merrill, Mich., received a bachelor of science degree in mechanical engineering in 1964 and a master of science in mechanical engineering in 1965 from Michigan State University. He is a 1986 graduate of the Stanford University executive management program.

Stokes joined GM as a University of Cincinnati engineering cooperative student at Frigidaire Division, Dayton, Ohio, in May 1955. A native of Rochester, N.Y., he received a bachelor of science degree in industrial management from the University of Cincinnati in 1958 and an M.B.A. from Xavier University, Cincinnati, in 1962.

After graduation, Stokes held various positions in the quality control department until his appointment as manager, divisional quality control in 1965.

He was named manager of the newly created product assurance department in 1968, and two years later, he became general superintendent of production.

In 1975, Stokes was assigned to the then newly established Delco Air Conditioning Division as general manufacturing manager. Shortly after the merger of Harrison Radiator Division and Delco Air Conditioning Division in July of 1981, Stokes was named general manufacturing manager of Harrison Radiator Division.

Stokes was named general manager of Delco Moraine Division, Dayton, in September 1982 and served in that capacity until being named general manager of Harrison Radiator Division in May 1985.

ATLANTA (JAN. 9) PR NEWSWIRE - T2 Medical Inc. (NASDAQ: TSQM) announced the recent consummation of acquisitions of four previously managed home infusion therapy centers, one previously managed home nursing center and a weight reduction center.

The five T2 managed-companies, Knoxville Home Therapeutics Inc. of Knoxville, Tenn.; Delaware Valley Home Therapeutics Inc. of Philadelphia; New York Home Therapeutics Inc. of Syracuse, N.Y.; Georgia Home Therapeutics II Inc. of Atlanta; and Alabama Home Nursing Inc. of Birmingham, Ala. were all acquired in late December 1989, through pooling of interest transactions involving the issuance of an aggregate of 370,434 shares of T2 Medical Inc. common stock and payment of an aggregate of $391,400 in cash for these companies.

T2 also acquired 84 percent of the outstanding capital stock of Northside Optifast Inc., a corporation offering weight reduction services in the Atlanta metropolitan area, for a purchase price of approximately $1.2 million paid in cash, promissory notes and T2 common stock. Northside was acquired on Jan. 2 and was accounted for by the purchase method of

accountin g.

With these recent acquisitions, T2 Medical Inc. now owns or manages a total of 49 home infusion therapy centers, of which 30 are owned by T2 and 19 are managed by T2. T2 Medical Inc.'s goal is to have a combined total of 65 managed and owned home infusion therapy centers in place by the end of fiscal year 1990. T2 also has two weight reduction centers with plans to start-up or acquire 20-25 similar centers over the next 12-month period.

"With these recent acquisitions, T2 has successfully put into motion its 1990's strategy of becoming a major ambulatory health-care company with an infusion therapy emphasis. T2 should exceed analysts' FY 1990 first quarter consensus EPS estimate of 23.5 cents per share," said Thomas E. Haire, chairman of T2 Medical Inc.

T2 Medical Inc. is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients, antibiotics, and other drugs and fluids, either intravenously or through a feeding tube. T2 Medical Inc.'s headquarters are in Roswell, Ga.

SPOKANE, WA (JAN. 9) PR NEWSWIRE - Gold Reserve Corp. (NASDAQ: GLDR) today announced that it has sold 1,040,000 common shares of Pegasus Gold Inc. (AMEX, Toronto: PGU) for $14.23 per share for a pre-tax gain of approximately $11.7 million. The shares were transferred to Northgate Exploration Limited (NYSE, Toronto: NGX) in full payment of all debt and interest amounting to $14.8 million. The company retains a minority share interest in Pegasus. As part of the satisfaction of this debt, Northgate has relinquished all rights to convert the debt and interest into common shares of the company.

Rockne Timm, president, stated, "The Company has repaid all commercial bank loans and the debt and interest due Northgate and as a result is now debt-free."

Gold Reserve owns approximately 5.3 percent or 1.9 million Class A common shares of ABM Gold Corp. (AMEX: AGO) and has options to purchase an additional 642,857 Class A common shares at $4.89 per share.

ABM owns 100 percent of the Colomac mine, the largest gold mine under construction in Canada. When complete, Colomac will be the largest gold milling facility in Canada and the third largest in North America.

Construction of the 10,000 tons per day conventional mill is 95 percent complete and production start-up is scheduled in the first quarter of 1990. The open-pit mine is expected to produce 200,000 ounces of gold per year at full capacity and operating costs will be approximately $250 per ounce. The Colomac gold mine has ore reserves of approximately 28 million tons grading 0.056 ounces of gold per ton, which are sufficient for eight years of operation. It is anticipated that the mine life will be extended beyond this period.

ABM is the parent company of Sonora Gold Corp. (NASDAQ: SONNF) which has a 70 percent direct ownership of the Jamestown gold mine in California, producing approximately 100,000 ounces of gold per year with cash operating costs of $256 per ounce. Reserves at Jamestown are sufficient for at least 10 years of operation at current production rates. ABM owns 42 percent of the outstanding common shares of Sonora and has a 15 percent net profits interest in the mine.

ABM is financially strong and for the nine month period ended Sept. 30, 1989 reported net earnings of $2.86 million. Upon commencement of production at the Colomac gold mine, ABM will become a major North American gold producer with interests in over 280,000 ounces of annual gold production.

WEST CHESTER, PA (JAN. 9) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) announced today that A. Frederick Thompson, Ph.D., P.E., has assumed the position of vice chairman of Weston's 12- member board of directors effective Dec. 4, 1989.

In addition to this new position, Thompson will continue his present duties as executive vice president-Quality Assurance/Finance Division.

As vice chairman, Thompson will serve as chairman and chief executive officer and/or chief operating officer in the absence of the officers who hold those positions.

Thompson joined Weston in 1967 and, having held vice presidential positions of engineering design, design and construction management, and quality assurance/finance, was promoted to executive vice president-quality assurance/finance in 1987. He is a member of Weston's board of directors, executive committee and operations committee.

Thompson received a B.S. in engineering science from the Pennsylvania State University and M.S. and Ph.D. degrees in civil engineering from the

California Institute of Technology. Thompson is a member of the American Water Works Association, the American Society of Civil Engineers, the Water Pollution Control Federation, the Pennsylvania Economy League's board of governors, and is a registered professional engineer in 12 states.

Weston is a recognized leader in the environmental engineering, design and consulting industry. As a full-service environmental and health and safety firm, Weston provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

Weston's clients include many Fortune 500 companies and most major cities in the country. The company is a principal provider of services to the U.S. Department of Defense and the Department of Energy.

Weston is headquartered in West Chester, and operates a network of four analytical laboratories and 42 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington.

CAMBRIDGE, MA (JAN. 9) PR NEWSWIRE - Repligen Corporation (NASDAQ: RGEN) announced today that it realized a profit of $128,000, or 2 cents a share, for the company's third quarter ended Dec. 31, 1989. In addition, the completion of a $9 million private financing in the United Kingdom boosted the company's cash reserves for the quarter to $26 million compared to $20 million cash in reserve at the end of the same period last year.

Losses for the comparable quarter in 1989 were $857,000, or 11 cents a share. The year-to-date loss of $916,000 marks a significant decrease from last year's loss of $2,665,000 for the comparable nine-month period.

Revenues for the quarter increased 80 percent to $4,062,000 from $2,256,000 for the same period last year. The increase in revenues was due primarily to a project milestone payment received from Merck & Co., Inc., Repligen's collaborator in developing an AIDS vaccine. Nine-month revenues increased 55 percent to $9,744,000 from $6,286,000 for the comparable period in fiscal 1989.

"Repligen's results for the third quarter reflect the substantial progress being made by the company in its healthcare programs, particularly in the collaborative AIDS vaccine development project with Merck," said Sandford D. Smith, president and CEO. "Our combination of strong commercial partners and strengthened cash reserves provides an adequate base to

support Repligen's product development and clinical plans for the medium term."

Repligen Corporation develops and manufactures biochemical products for the healthcare market. The company's corporate headquarters and research and production facilities are in Cambridge, Mass.

#90009p0055 01/09/1990 ~PR Newswire

MEMPHIS (JAN. 9) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) today announced that it increased the consent payments in the consent solicitations with respect to the 10-1/2 percent Senior Notes due 1994 and the 11 percent Subordinated Debentures due 1999 of its Holiday Inns, Inc. subsidiary. Holiday said that the Consent-Only Payment for the 10-1/2 percent Notes has been increased from $30 to $40 per $1,000 principal amount and the Consent-Tender Payment for such Notes has been increased from $10 to $40 per $1,000 principal amount.

The Consent-Tender Payment for the 11 percent Debentures has been increased from $20 to $50 per $1,000 principal amount. No increase is being made to the Consent-Only Payment with respect to the 11 percent Subordinated Debentures or to any of the tender offer payments.

The increased Consent Payments will be paid to all holders of the 10-1/2 percent Senior Notes and the 11 percent Subordinated Debentures, including to holders who have previously delivered their consents. Holders of 10-1/2

percent Senior Notes or 11 percent Subordinated Debentures who have delivered Consents for Consent-Only Payments and who now wish to receive the Consent-Tender Payments should simply tender their 10-1/2 percent Senior Notes or 11 percent Subordinated Debentures prior to the tender offer expiration date. Such holders should not attempt to revoke or redeliver their consents.

In addition, Holiday announced today that it extended to 5:00 p.m., New York City time, on Tuesday, January 16, 1990, the consent solicitation period for the 10-1/2 percent Senior Notes, 11 percent Subordinated Debentures and the 8-3/8 percent Notes due 1996. It also extended to Midnight, New York City time, on Wednesday, January 23, 1990 the tender offers for its 10-1/2 percent Senior Notes, 11 percent Subordinated Debentures, 15 percent Notes due 1992, 9-3/8 percent Notes due 1993 and 8-3/8 percent Notes.

Holiday announced earlier that it had received requisite consents from holders of the 9-3/8 percent Notes and 15 percent Notes and that it had executed supplemental indentures effectuating the proposed amendments to such issues.

Holiday Inns is soliciting consents in connection with its offers to purchase such securities for cash. The consent solicitations and tender offers were mailed to holders on December 15, 1989. Except for the increases in consent payments and the extension of the consent solicitation and tender offer periods reflected herein, all other terms of the consent solicitations and tender offers remain the same.

HAUPPAUGE, NY (JAN. 9) PR NEWSWIRE - Orbit Instrument Corp. (NASDAQ: ORBT) today announced that it has settled the lawsuit brought against it by the former president of the company's now inactive Computer Integration Associates subsidiary, and by certain members of his family. Under the terms of the Settlement, the company paid the plaintiffs the sum of $1,250,000 and issued five-year warrants to purchase 35,000 shares of common stock at an exercise price of $3.50 a share. In return, the plaintiffs transferred to the company 250,831 shares of the company's common stock owned by them and released the company from all claims arising out of their prior business relationship. The settlement payments do not exceed the amounts previously reserved and are not expected to have any affect on Orbit's earnings for the quarter ending March 31, 1990.

The company also announced that its president, Max Reissman, had exercised options previously granted to him to purchase 576,380 shares of common

stock at an aggregate cash exercise price of $1,440,950.

Orbit is a Long Island-based manufacturer of customized electronic components and subsystems for military and non-military governmental applications. Its subsidiaries are Orbit Semiconductor servicing the high-reliability and quick-turn-around markets and USA Classic, which sells men's and children's apparel under the Everlast and Nautica trademarks as a licensee of the owners of the marks.

BATTLE CREEK, MI (JAN. 9) PR NEWSWIRE - Kellogg Company (NYSE: K) Chairman of the Board and Chief Executive Officer William E. LaMothe today announced the appointment of Carlos M. Gutierrez to corporate vice president - product development.

This is a new position that will report to the chairman and be responsible for coordinating the company's worldwide new product efforts.

LaMothe said, "Establishing this position in the Office of the Chairman, I believe, will strengthen our emphasis on new product development. Scientific research continues to affirm the positive health benefits of ready-to-eat cereals, and consumer demand for these products is expected to increase. Value-added products will be critical to the company's continued worldwide leadership during the 1990s."

Gutierrez has served as general manager of Kellogg de Mexico and, since January 1989, as president and chief executive officer of Kellogg Canada, Inc. He joined Kellogg de Mexico in 1975. Following assignments in sales and marketing, he moved to corporate headquarters in Battle Creek in 1982 as Latin American marketing supervisor. He was promoted to international marketing services manager in 1983 and to general manager of Kellogg de Mexico in 1984.

#90009p0062 01/09/1990 ~PR Newswire

ATLANTA (JAN. 9) PR NEWSWIRE - SunTrust Banks Inc. (NYSE: STI) today reported that net income of the regional banking company for the 1989 fourth quarter was $84.6 million, compared with $79.1 million for the same period in 1988.

Per common share, this was 66 cents in 1989, an increase of 8.2 percent

over 61 cents in the 1988 fourth quarter.

For the full year 1989, net income totaled $337.3 million compared with $308.7 million the previous year. Per common share, this was $2.61 in 1989, an increase of 9.7 percent over $2.38 for the full year 1988. SunTrust owns and operates 53 full service commercial banks with more than 600 banking locations in Florida, Georgia and Tennessee.

Based on net income, the return on average assets for 1989 was 1.16 percent, compared with 1.13 percent in 1988. The return on average common shareholders' equity in 1989 was 16.88 percent, compared with 17.36 percent the previous year.

Earnings for each of SunTrust's three state banking holding companies in 1989 showed improvement over the previous year. The increase in Florida was 10.6 percent, in Georgia 10.8 percent and in Tennessee 5.9 percent.

As of Dec. 31, 1989, the reserve for loan losses was $342.3 million or 1.62 percent of loans, compared with $335.6 million or 1. 63 percent of loans at Sept. 30, 1989. At year-end 1988, the reserve was $301.6 million or 1.50 percent of loans. At the end of 1989, nonperforming assets consisting of $276.6 million of nonperforming loans and $73.8 million of other real estate owned (OREO) were $350.4 million or 1.65 percent of loans plus OREO, compared with $348.0 million or 1.68 percent of loans plus OREO three months earlier and $195.7 million or .97 percent of loans plus OREO at the end of 1988. At year-end 1989, the reserve was 123.8 percent of nonperforming loans, compared with 197.5 percent a year earlier.

For the year 1989, net domestic charge-offs were $133.1 million or .65 percent of average loans, compared with $128.6 million or .67 percent of average loans during the prior year.

#90009p0064 01/09/1990 ~PR Newswire

DURHAM, NC (JAN. 9) PR NEWSWIRE - Home Savings and Loan Association, Inc. (NASDAQ-NMS: HSLD) of Durham, North Carolina today reported that net income for the quarter ended December 31, 1989 was $460,537 or $.27 per share compared with $811,867 or $.48 per share for the comparable 1988 period.

The decrease in earnings resulted mainly from a $500,000 increase in the loss reserve on bonds owned by the Association that are secured by pools of mobile home loans issued by a Conner Coporation subsidiary. Reserves on the "Conner Bonds" now total $800,000 or 51.6 percent of the remaining

principal balance of the bonds at December 31, 1989. The Association is pursuing collection of the bonds and other sums as a co-plaintiff against the bond issuer and other parties in currently pending litigation, alleging misrepresentations, violations of securities laws and other claims relatings to the bonds.

C. Darrell DeLoatche, President and CEO of Home Savings, commented, "Excluding the loss provision on the Conner bonds and the write-off of certain expenses related to the recent termination of the merger agreement between Home Savings and Old Stone Coporation (NASDAQ: OSTN), pre-tax net income for the quarter would have been only $5,000 below last year. Considering the sluggishness of the real estate market and the environment under which we have been operating, we are pleased with the operating results of the Association and are encouraged with the prospects for the remainder of the fiscal year."

Home Savings and Loan Association, Inc. is headquartered in Durham, N.C. with offices in Roxboro and Chapel Hill. The approximately 1.66 million shares of common stock outstanding are traded in the NASDAQ National Market System under the symbol HSLD.

CONTACT: C. Darrell DeLoatche or Rex D. Williams, both of Home Savings and Loan Association, Inc., 919-682-9161.

#90009p0065 01/09/1990 ~PR Newswire

LOWELL, MA (JAN. 9) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) and the University of Southern California (USC) today announced USC's office of admissions has implemented a Wang Integrated Image System (WIIS) to manage student admissions information.

USC, located in Los Angeles, Calif., is the first university in the U.S. to automate its admissions process with Wang's document imaging technology.

USC selected WIIS based on a successful pilot that prototyped the application and tested integration with USC's existing Prime computer network. Wang's Business Services Group in Los Angeles and Trident Systems Inc., of Landover, Md., co-authored the design of the admissions pilot.

Admissions counselors and file room personnel were the first to use WIIS in the pilot and enthusiastically approved the new technology. Trident and Wang have just completed implementation of the full production system.

WIIS will allow admissions counselors to view, on image-capable computer workstations, electronic images of student applications, transcripts, essays, letters of recommendation, and other documents together with data

records accessed from a Prime host computer. Wang's Freestyle(tm) personal computing system will permit counselors to electronically add handwritten annotations on applicants' transcripts while the images are being viewed on the workstation.

In addition to the productivity gains, WIIS will add value by reducing space requirements for file cabinets and file archives.

The system purchased by USC, valued at $1.2 million, includes a VS 7150 mid-range computer; 30 image workstations, of which 25 have Freestyle document annotation capabilities; one laser printer; five endorsers; and five document scanners. Initial storage for document images is eight gigabytes of magnetic disk storage. After quality assurance is completed, documents are archived to laser optical disk.

Wang Laboratories Inc., headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems, including data, text, image, and voice processing, as well as telecommunications and networking products.

#90009p0070 01/09/1990 ~PR Newswire

MINNEAPOLIS (JAN. 9) PR NEWSWIRE - Control Data Corporation (NYSE: CDA) announced today that it expects to take fourth quarter restructuring

charges totaling approximately $210 million.

"With the restructuring charges, Control Data will incur a loss in the fourth quarter. However, we expect higher operating profits in the fourth quarter than those achieved in the third quarter, which included results from Imprimis (the disk drive subsidiary that was sold in September 1989) " said Lawrence Perlman, Control Data's president and chief executive officer.

VTC, the company's semiconductor subsidiary, will account for approximately half of the fourth quarter charges. The reserves will ensure that future operating losses and expenses associated with the sale of VTC will have no further impact on Control Data's profitability. Control Data is actively discussing the sale of VTC with interested parties and expects that it will be sold during 1990.

The balance of the fourth quarter charges stem from a wide range of actions. The largest of these is the result of foreign currency translation adjustments resulting from the sale or discontinuance of certain international operations and facilities. Control Data is also writing down certain intangible assets and leasehold improvements acquired when SAMI/Burke Inc. was purchased in 1987. The remainder of the charges relate primarily to the sale or discontinuance of operations and facilities.

Control Data's banks have agreed to waive the effect of charges related to VTC and the foreign currency translation adjustments for purposes of the net worth test specified in the company's credit agreement. None of the fourth quarter charges will affect Control Data's ability to meet the operating earnings test in that agreement, which defines specific quarterly operating earnings the company must meet.

For the first nine months of 1989, Control Data posted a net loss of $484.0 million, due largely to second quarter actions that included the discontinuance of the ETA Systems supercomputer operations and the streamlining of the CYBER mainframe business. Year-end 1989 results will be announced at the end of January.

Control Data provides solutions for customers' complex data collection, processing and communications needs by integrating hardware, software and services.

CONTACT: Frank J. Ryan, 612-853-5342, or Nancy Foltz, 612-853-5229, both of Control Data.

MIAMI (JAN. 9) PR NEWSWIRE - Aero Systems, Inc. (NASDAQ: AESM) today announced results for the nine months and the third quarter ended Nov. 30, 1989.

For the nine month period, sales were a record $30,800,189 versus $29,756,685 for last year's period. Net income for the nine months was $429,217 versus $489,332 for last year's period, equal to $.05 and $.06 per share, respectively.

Sales for the third quarter, also a new record, were $11,476,227, up 20 percent over the $9,561,364 for last year's period. Net income for the quarter was $312,634 versus a loss $47,683 for the prior year's period, equal to $.04 and ($.01) per share, respectively.

Robert G. Holmes, Jr., Aero's president, stated, "We are beginning to see the fruits of our effort to improve the bottom line. The current quarter's net income of $312,634 is up sharply over the $53,412 for the first quarter and $63,171 for the second quarter. In developing our business plan for the new fiscal year, we have identified several additional areas where material improvement may be achieved. These items are being addressed and implemented as rapidly as possible, with the primary goal of significantly improving net income. For the full year ending Feb. 28, 1990, we are confident that both sales and net income will be well ahead of last year's results."

#90009p0075 01/09/1990 ~PR Newswire

CALGARY, Alberta (JAN. 9) PR NEWSWIRE - Ranger Oil Limited (Toronto: RGO) announces that Chevron U.K. Limited, operator, has completed a

comprehensive reservoir study of the Ninian oil field (Ranger interest 11.5 percent). Estimated remaining reserves at Jan. 1, 1990, have been increased by between 28 and 80 percent. This results in a net increase in reserves to Ranger of between 6.3 million and 17.8 million barrels of oil. Following is the text of a press release issued by Chevron U.K. Limited:

NINIAN FIELD STUDY REVEALS SIGNIFICANT INCREASE IN RESERVES

Chevron U.K. Limited, operator of the Ninian oil field, today announces an upgrading of the field's recoverable reserves of between 55 to 155 million barrels of oil.

Ultimate recovery from Ninian, the third largest oil field in the UK sector of the North Sea, is now forecast to be in the range 1.1 to 1.2 billion barrels depending on future operating and economic conditions. Previous estimated recoverable reserves were 1.045 billion barrels.

The upgrading is the result of a recent major geological and engineering study of Ninian which revealed a 9 percent increase in oil in place to 2.92 billion barrels from the previous estimate of 2.68 billion barrels.

The study was designed to recalculate the original oil in place in the field, and forecast the future production under a range of foreseeable operating conditions. The performance of 71 production wells and 33 water injectors was analysed together with the projected performance of potential new wells.

The Ninian field, located in blocks 3/3 and 3/8 100 miles east of the Shetland Islands, started production in December 1978 and to date has produced in excess of 850 million barrels of oil to the Sullom Voe terminal in Shetland. Field production is currently averaging 140,000 barrels of oil per day.

The Ninian partners are:

Chevron U.K. Limited (operator)	17.1 percent
Enterprise Petroleum Limited	18.5 percent
Lasmo North Sea PLC	17.3 percent
Murphy Petroleum Limited	7.1 percent
Ocean Exploration Co. Limited	7.1 percent
Oryx UK Energy Company	21.4 percent
Ranger Oil (U.K.) Limited	11.5 percent

EXETER, NH (JAN. 9) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC) announced today that net income for its second quarter ended Nov. 30, 1989 rose to an all-time high $29.1 million compared to $22.9 million earned in the year earlier period. Second quarter earnings per fully diluted share were a record 70 cents versus 56 cents reported for the same period last year.

Grinnell's Fire Protection and Flow Control operations made a substantial contribution to the record results. This segment benefited from continued strong demand for its fire protection and flow control products. There were also substantial sales and earnings increases of Allied's pipe products and higher profit contributions at Mueller's water works operations. These results were accomplished while the non-residential construction, new housing and certain other Grinnell markets continue to soften.

Tyco's Packaging Materials group recorded its highest ever level of earnings. Ludlow's industrial packaging, technical papers, and woven fabrics divisions each achieved excellent results which, combined with Armin's strong performance in its polyethylene film products, produced a record second quarter.

The company's electrical and electronic components group also contributed to Tyco's record performance. Simplex Wire and Cable Company recorded excellent results as sales of its transoceanic fiber optic cable reached record levels. Tyco's Printed Circuit Group was able to maintain sales and profits which were substantially the same as last year's results in spite of continued weakness in the computer industry.

Sales for the second quarter were $518.2 million versus $505.9 million a year ago. Included in last year's results were $32 million of sales related to operations which were divested in fiscal 1989.

Sales for the six month period reached $1.07 billion while net income rose to $57.6 million or $1.40 per fully diluted share compared to $44.2 million or $1.11 per fully diluted share for the six months last year.

Tyco is a nation-wide manufacturer of fire protection/flow control products, electrical and electronic components and packaging materials.

DALLAS (JAN. 9) PR NEWSWIRE - J.C. Penney Company, Inc. (NYSE: JCP) announced today that it has awarded major, long-term contracts for telecommunications services to both AT&T and MCI. The services are

designed to enhance JCPenney's telecommunications capabilities, improve customer service, and reduce costs.

These multi-year contracts are expected to result in savings to JCPenney of more than $75 million over the life of the contracts.

Under these contracts, the two carriers will provide domestic long distance voice and data transmission services for JCPenney's department stores, catalog, Thrift drug stores, and credit services. JCPenney Telemarketing, Inc., which markets services to outside clients, will also benefit from these more cost effective services.

Al Ladwig, manager of telecommunications for JCPenney, said "Our telecommunications needs are very complex, and AT&T and MCI have good track records providing appropriate products to service those needs."

AT&T's Virtual Telecommunications Network Services (VTNS) offering will be used in an integrated manner to satisfy JCPenney's diverse needs.

The basis of the MCI offering is a cost effective, sophisticated service called V-NET. This virtual private network service will be extensively used to satisfy JCPenney's internal private voice network needs as well as its credit customer service application.

"The implementation of these MCI services, which employ state-of- the-art technology, will permit JCPenney to streamline operations, increase efficiency, and improve customer handling while reducing telecommunications costs," said Dan Crawford, president of MCI's southwest division.

Ladwig added, "Using two vendors to satisfy our long distance communications needs gives us maximum flexibility while providing us access to the latest technology from two very large, very aggressive competitors. This should lead to significant cost reductions and operational efficiencies, enabling JCPenney to incorporate new technology as it is developed. This will support JCPenney's strategy in maintaining its competitive edge in the retailing industry."

CONTACT: Duncan Muir of JCPenney, 214-591-1329, or Jim Van Orden of AT&T, 214-851-4936; or Steve McGregor of MCI, 214-701-1301.

EAST MILLSTONE, NJ (JAN. 9) PR NEWSWIRE - Dr. Kenneth H. Harper, president and chief executive officer of Applied Bioscience International Inc. (NASDAQ: APBI), and Grover Wrenn, president of Environ Corporation, today announced that their respective companies had entered into a letter

of intent providing for the merger of Environ into a wholly owned subsidiary of Applied Bioscience International. The proposed merger is subject to the negotiation of a definitive merger agreement and to a number of other conditions, including approval of the proposed merger by the stockholders of Applied Bioscience International.

The letter of intent provides that the shareholders of Environ, which is privately held, would receive, in a pooling-of-interests transaction, shares of Applied Bioscience International Common Stock which would result in such shareholders holding approximately one-third of the then outstanding shares of Applied Bioscience International.

Wrenn stated that, in its fiscal year ended Feb. 28, 1989, Environ recorded revenues of $18.9 million compared with $13.8 million in fiscal 1988, and net income of $1.7 compared with $1.2 million in fiscal 1988. Wrenn added that, for the first nine months of fiscal 1990, Environ recorded revenues of $19.1 million and net income of $1.8 million.

Dr. Harper stated that Environ's revenues and net income have been growing over the past four years at an average compound rate of approximately 40 percent and 60 percent, respectively, per year and that Applied Bioscience International's management expected that the proposed merger, after excluding the effect of transaction-related fees and expenses, would not dilute APBI's 1990 earnings per share. Dr. Harper further noted that management expected that any negative impact on 1990 earnings per share arising from one-time expenses and fees would be effectively offset by the favorable impact on earnings per share arising from Applied Bioscience's planned adoption in 1990 of changes affecting the accounting for deferred tax reserves pursuant to FAS 96.

Environ, which is headquartered in Arlington, Va., and has offices in Princeton, N.J., and Emeryville, Calif. (San Francisco area), is a multidisciplinary environmental and health sciences consulting firm which provides a broad range of risk assessment and environmental management services to clients concerned with human exposure to potentially hazardous substances in the environment. Environ offers expert counsel and technical assistance in chemical risk assessment and environmental risk management; toxicology; the safety of food, drugs and medical devices; environmental liability assessments, remedial investigations and remediation programs; and litigation and regulatory proceedings.

Applied Bioscience is an independent research and development company, with major laboratories in the United States and the United Kingdom. The company conducts safety studies designed to evaluate the risks to humans and the environment resulting from the manufacture or use of pharmaceutical products, chemical compounds and other substances, and provides research and development management services to agrochemical companies.

In announcing the proposed transaction, Dr. Harper stated that "the proposed addition of Environ to Applied Bioscience International is consistent with our strategic plan for the development of our company. In our opinion, the combination of Environ's environmental consulting services with the existing testing and research and development capabilities of Applied Bioscience International will create significant new opportunities for APBI."

DALLAS (JAN. 9) PR NEWSWIRE - Halliburton Company (NYSE: HAL) announced today that it has merged its 2W Taylor subsidiary with Smit Offshore Contractors, a division of Smit International Group, to form Rockwater Offshore Contractors.

Rockwater is owned equally by Halliburton and Smit. The new organization becomes one of the world's largest providers of underwater construction and maintenance services.

Worldwide operations will be coordinated from Rockwater's facilities in Belle Chase, La.; Aberdeen, Scotland; Bombay, India; Mexico City, Mexico; Rotterdam, Holland; Sharjah, U.A.E; Stavanger, Norway; and Singapore.

These facilities employ a worldwide skilled workforce of 1,000 and assets totalling about $150 million. Major offshore assets which will be used in providing services are four of the industry's most advanced, dynamically positioned, support vessels.

Thomas H. Cruikshank, chairman of the board and chief executive officer of Halliburton, said, "Rockwater provides a wide range of services for offshore oil and gas fields, beginning with drilling support and construction, and continuing through the lifecycle needs for underwater inspection, maintenance, repair and salvage.

"These services are becoming technically more sophisticated and Rockwater's combined resources will be better able to meet these changing market demands. We expect revenues for Rockwater in 1990 to approximate $200 million."

Halliburton Company is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and

marine engineering and construction services, and property and casualty insurance services.

ST. LOUIS (JAN. 9) PR NEWSWIRE - Jones Medical Industries, Inc. (NASDAQ: JMED) has begun building a dedicated hospital sales force to promote the sales of its hospital products, including Thrombinar(R), Liqui-Char(TM) and Therevac(TM), with the appointment of key sales executives, it was announced today by Dennis Jones, president.

Mr. Jones said Gerald Rose, who has over 25 years of hospital sales and sales management, has been appointed vice president of hospital marketing and sales. He also named Marvin Marth as manager, hospital contracts and administration, and Thomas Strickler as director, national accounts.

Rose previously was national hospital sales manager for Schein Pharmaceutical, Inc., Port Washington, N.Y. He also served as national sales manager for Armour Pharmaceutical Company from 1978 to 1981.

Marth served 30 years in similar positions with Armour Pharmaceutical prior to early retirement in 1989, while Strickler served five years in similar positions with Rorer Pharmaceuticals Corporation and previously with Armour Pharmaceutical.

Mr. Jones added that 12 major metropolitan areas are scheduled for coverage by the end of 1990. Executives for these key hospital sales positions currently are being interviewed in New York, Chicago, St. Louis, Dallas, Los Angeles and San Francisco.

CHARLOTTE, NC (JAN. 9) PR NEWSWIRE - First Union Corporation (NYSE: FTU) has launched a new program to increase its business with minority contractors.

By the end of 1990, the corporation expects to allocate at least 8.5 percent of its general vendor services to minority-owned businesses and is currently developing a computer tracking system to monitor the success of

the program.

"We have excellent working relationships with minority contractors who provide First Union with a wide range of services," said Austin A. Adams, First Union executive vice president and director of the Automation and Operation Division. "Our purchasing policies aren't changing. We will work through our existing system to seek out additional minority vendors."

By working with a network of minority and women business owners, the corporation will seek bids on services ranging from architectural and landscaping consultation to the purchase of forms and supplies. First Union will continue its participation in minority trade shows and consult with established minority recruiting offices such as those used by city government.

"As is true with other companies, First Union is looking for the contractor who can provide us with quality work at the lowest bid," Adams explained. "But we want to be more active than ever in seeking out minority contractors who haven't offered us bids before. We want their success to be part of our success, and the 8.5 percent floor on this program ensures we will do that consistently."

First Union Corporation (NYSE: FTU) reported assets of $32.2 billion as of September 30, 1989.

DAYTON, OH (JAN. 9) PR NEWSWIRE - The Duriron Company, Inc. (NASDAQ: DURI), today announced the sale of its Janssens subsidiary operations in Belgium and France to Performance Plastic Products, a subsidiary of Compagnie Plastic Omnium, a French corporation.

Janssens revenues for 1989 were approximately $13 million. The Company indicated that this divestiture will have favorable impact on its 1989 fourth quarter earnings but will not have a signficant effect on its projected net earnings in 1990 and thereafter.

According to Mr. C.E. Daily, Director of International Operations, this divestiture was undertaken "because the Janssens operation does not fit our corporate strategy of focusing upon the fluid handling needs of the chemical process industries." He indicated that Plastic Omnium is a manufacturer of industrial plastic products of broad application which are similar to those made by Janssens.

The Company stated that the divestiture was accomplished on December 27, 1989.

The Duriron Company, Inc., is primarily engaged in the design, manufacture and marketing of fluid movement and control equipment and systems for the worldwide process industries. Its principal products include pumps, valves, controls, metering pumps, filtration and waste treatment systems.

#90009p0095 01/09/1990 ~PR Newswire
ANDOVER, MA (JAN. 9) PR NEWSWIRE - Andover Bancorp, Inc. (NASDAQ: ANDB), the parent company of Andover Savings Bank, announced today that it has provided an additional $5.2 million for possible loan losses in the fourth quarter. After the effect of net charge-offs in 1989 amounting to $2.1 million, the Reserve for Possible Loan Losses amounted to $8.4 million at Dec. 31, 1989. Although earnings are not expected to be finalized and released until the week of Jan. 22, 1990, Andover Bancorp expects to announce a fourth quarter loss and a net profit for the year.

Non-performing loans amount to $19.4 million, while other real estate owned totaled $8.2 million at Dec. 31, 1989, vs. $14.5 million and $1.1 million, respectively, at Sept. 30, 1989. After the addition and the charge-offs previously mentioned, the reserve amounts to 43.6 percent of non-performing loans and 1.72 percent of loans outstanding.

Robert M. Henderson, chairman and chief executive officer, stated that,

"The decision to increase the loan loss reserve and make these charge-offs in the fourth quarter is primarily the result of the deteriorating economy in New England and the increasing level of non-performing loans in our portfolio. These actions should be seen as an appropriate move to account for problems that are affecting not only Andover Bancorp, but the New England banking industry generally. While we believe that the resulting level of reserves is adequate, the continued appropriateness of these reserves is of course dependent on future conditions."

Andover Bancorp, Inc. is the parent bank holding company of Andover Savings Bank, a Massachusetts chartered savings bank organized in 1834 and headquartered in Andover, approximately 25 miles north of downtown Boston. The bank, with total assets of approximately $689 million at Dec. 31, 1989, operates branch banking offices in West Andover, Lawrence, Methuen, North Andover and Tewksbury, Mass.

PITTSBURGH (JAN. 9) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVB) announced today that commissioners from Amelia County, Va., have approved an agreement with the company for the development and operation of a municipal solid waste sanitary landfill.

Under the terms of the agreement, Chambers and the county will jointly select a site and the landfill will be capable of receiving up to 5,000 tons of municipal solid waste per day. The proposed landfill will not be operational before 1991 and will not accept any hazardous waste.

"This is another example of the company's continuing public/private partnership initiative on developing environmentally safe and economically sound sanitary landfills for the community," said John G. Rangos Sr., president and CEO of Chambers.

"The Amelia County commissioners and Chambers are cooperating on providing the highest level of environmental integrity on the facility for the county and the most economically advantageous package possible.

"We have learned that protecting the environment makes good business sense and we are responding to the commissioners' requests and to provide what they require on behalf of the citizens of Amelia County.

"We are proud of our environmental record and we look forward to providing environmentally safe and economically sound waste disposal for Amelia County," Rangos said.

Once a site has been selected, Chambers will begin working on a permit application to be submitted to the state of Virginia.

The company reported that the landfill would be constructed using the latest technology for protecting the environment, including a composite liner system and a leachate collection system.

In addition, Chambers will build, permit and operate a recycling dropoff center at the landfill which can handle newspapers, aluminum cans, steel and tin cans, glass, metals, used oil, car batteries and cardboard. Mini-dropoff stations will be constructed at the collection stations to handle newspapers, cans and glass.

The Chambers Waste Systems of Virginia family includes Bay Disposal, based in Norfolk and Richmond, which has operated in Virginia for the past 15 years and Shenandoah Refuse Services Inc., also of Richmond. Other operations will soon include a 289-acre regional landfill in Charles City County, Va. Construction is under way on the state-of-the-art facility with operation beginning this spring.

Chambers Development Co., headquartered in Pittsburgh, with regional offices in Richmond, South Carolina and Georgia, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development. The company also provides security through a wholly owned subsidiary, Security Bureau Inc.

BUFFALO, NY (JAN. 9) PR NEWSWIRE - The board of directors of Cellular Products, Inc. (NASDAQ: CELP) today announced that it intends to retain the services of an investment banking firm. The company wishes to explore all of its options relating to the possibility of locating a marketing and/or merger partner or a sale of its blood screening product line and/or its biomedical research product line. The company is currently in discussions with several parties with potential interest in establishing a marketing arrangement for the blood screening product line.

Presently the company is not current with respect to its debt obligations; including those owed to Eastman Kodak Co. and its Series B convertible subordinated note holders and payments due under a patent licensing agreement. The company is attempting to restructure its payments under these obligations; however, there can be no assurances that these negotiations will be successful.

The company possesses one of only three licenses granted to date by the U.S. Food and Drug Administration (FDA) for the manufacture and sale of an HTLV-I blood-screening test for the detection of antibodies to a leukemia virus. In addition, the company also possesses an FDA license to manufacture and sell an HIV-1 blood-screening test for the detection of antibodies to the AIDS Virus. The company also possesses an FDA Establishment License required to manufacture these blood screening products.

The company has filed patent applications in all strategic areas of the world for its HIV-1/HTLV-I Combination test which will permit the simultaneous detection of antibodies to either the HIV-1 or HTLV-I viruses. As previously announced, the company has also filed patent applications to cover its discovery of several biological molecules that have the ability to protect normally susceptible cells from infection by the AIDS Virus.

BEDMINSTER, NJ (JAN. 9) PR NEWSWIRE - Bell Atlantic Mobile Systems, the largest cellular carrier in the mid-Atlantic region, is launching its first major television advertisement campaign.

"This is the first time we've committed our resources to a full- scale, region-wide TV campaign," says Melanie vanderValk, Bell Atlantic Mobile's director of advertising.

Previously, the company used radio and print as its primary ad media, and used TV only in isolated instances.

"In the early days of cellular when the price of a mobile phone started at $3,000," says vanderValk, "our target market was strictly the top echelon of the business community. We reached them through radio and print ads.

"Now that you can buy a basic mobile phone for $699 and a top-of- the-line model for only $1,695, cellular service is developing a mass appeal. We're broadening our target market to 25-54 year olds with a household income of $35,000 and up."

The TV campaign is comprised of two 30-second ads which spotlight the dependability of Bell Atlantic's cellular network, and three 10- second spots that emphasize the affordability of cellular telephone service.

The first flight of the ads will run through April, and the second flight

will break in the summer. "Our TV buys will appear regionally in early-morning and nighttime news programs, sporting events, and prime-time entertainment shows such as "thirtysomething" and "LA Law," says vanderValk.

The company will continue the radio advertising campaign it initiated in 1989.

Bedminster, N.J.,-based Bell Atlantic Mobile Systems, a subsidiary of Philadelphia-based Bell Atlantic Corp., provides cellular equipment and service in Washington, D.C., Maryland, Virginia, New Jersey, Delaware and Pennsylvania.

NEW HYDE PARK, N.Y. (JAN. 9) PR NEWSWIRE - Uniforce Temporary Personnel, Inc. (NASDAQ: UNFR) has converted to the Uniforce system six independent temporary personnel services operations, it was announced today by John Fanning, president of Uniforce Temporary Personnel, Inc. The involved companies are: Action Temporary Services in Corpus Christi, Texas; Getty Personnel, Inc. in East Windsor and Moorestown, N.J.; Arlin Personnel Services, Inc. in Fremont, Calif.; Lakeville Temporaries, Inc. in Lakeville, Minnesota; Tempeople, Inc. in Sacramento, Calif.; and Tempsource Personnel, Inc. in Fort Lauderdale, Fla.

Combined annual volume for the six offices reached $6.2 million in 1989. These offices provide skilled temporary personnel in all office and light industrial job categories.

Fanning stated, "Beginning 1990 with the conversion of six independent temporary services to the Uniforce franchise system, signals the beginning of a dynamic growth surge for our company. These new acquisitions, in addition to our strong support program for our existing national franchise network, help shape our aggressive expansion strategy for the coming year."

Uniforce Temporary Personnel, Inc. is the parent company of Uniforce Temporary Services, a national network of predominately licensed offices providing temporary personnel for the general and automated office, light industrial, marketing, accounting and technical service categories.

#90009p0109 01/09/1990 ~PR Newswire

TULSA, OK (JAN. 9) PR NEWSWIRE - Apco Argentina Inc. announces that on Dec. 28, 1989, Yacimientos Petroliferos Fiscales (YPF), the Argentine National Oil Company and Petrolera Perez Companc, the operator of the Entre Lomas joint venture, executed a letter of understanding stating the intent of the parties to enter into an agreement to place the Entre Lomas area under the provisions of Article 3 of Decree Number 1212/89 issued by the Argentine government on Nov. 14, 1989. The company owns direct and indirect interests aggregating 47.6 percent of the net profits from the Entre Lomas joint venture.

Decree 1212/89 is one in a series of Argentine government decrees, aimed at deregulating the energy industry in Argentina. Article 3 of the decree provides, among other things, that YPF and existing producers may convert current production contracts into association contracts and that YPF may be paid a settlement value, in return for which contractors will be able to dispose of produced hydrocarbons at world market prices.

The company expects that the new Entre Lomas contract will provide for a transition period, until a truly competitive hydrocarbon market emerges in Argentina, during which YPF would continue to purchase some or all of the production based in part on world market prices. Besides satisfying the decree's objectives of expanding the free marketability of hydrocarbons, the company also expects that the new contract will extend the term significantly beyond the expiration date of the existing contract.

Decree 1212/89 establishes a six-month time frame for conversion of

existing contracts. However, at this time, Apco Argentina Inc. cannot state with certainty the actual timing and terms of the new agreement or its full impact on the Company's holdings in Argentina. Furthermore, the contract will not take effect unless and until it is approved by the appropriate Argentine ministries and signed by President Menem and there is no assurance that these events will occur.

Apco Argentina Inc. is engaged in joint ventures in oil and gas exploration, production and development in Argentina.

BOSTON (JAN. 9) PR NEWSWIRE - Stone & Webster Engineering Corporation has been awarded a contract to perform conceptual engineering for a new type of production reactor planned by the Department of Energy. The project's prime contractor is CEGA Corporation, a company formed by Combustion Engineering, Inc. (NYSE: CSP) and General Atomics Company. The reactor would produce tritium.

Stone & Webster has begun conceptual balance-of-plant design work for the Modular High Temperature Gas-Cooled Reactor, which would use helium as a coolant. An inert gas, helium remains unaffected by the action of either chemicals or neutrons. The use of advanced coated nuclear fuel particles coupled with the use of helium and a graphite reactor core structure offer significant safety advantages.

Stone & Webster's contract covers the initial conceptual design phase; subsequent phases will include services for preliminary and detailed engineering and design, and inspection during construction.

In addition to this defense work, Stone & Webster since 1985 has been active in developing an MHTCR design for commercial development to generate electric power. In 1988, DOE awarded the company a five-year, $57 million contract to design the electric power generation and other non-nuclear elements of the plant.

Stone & Webster Engineering Corporation, a subsidiary of Stone & Webster, Incorporated (NYSE: SW) of New York, engineers and constructs oil/gas processing, petrochemical, chemical, electric power, industrial and civil works facilities around the world. With headquarters in Boston, the company has full-service offices in New York, Houston, Denver, Fort Lauderdale, and Cherry Hill, N.J., and affiliates in Canada and the United Kingdom.

BILLERICA, MA (JAN. 9) PR NEWSWIRE - Memtek Corporation (NASDAQ: METK) of Billerica, Mass. announced today that Phillip C. Henderson has resigned as president and CEO to pursue other interests. The company also announced that Robert F. Birch has been appointed as chairman of the board of directors and president. Werner Kaim will remain as vice chairman of the board, J. Thomas Selldorff, executive vice president, will be responsible for marketing and sales, and Joseph A. Lander is newly appointed as executive vice president in charge of engineering and manufacturing. Selldorff has been with the company since 1985 and Lander since 1982. Birch has been a director of the company since 1981 and previously served as president and chief executive officer of Gardner and Preston Moss, Inc. from 1969 through 1987. Gardner and Preston Moss is an investment advisor which had funds under management in excess of $3 billion at the time of Birch's departure.

Memtek has experienced some difficulties in the introduction of certain ion exchange technology which it acquired from Ecology Protection Systems in San Jose in the middle of 1988. This ion exchange technology performed satisfatorily in some cases, but when introduced more widely, some additional problems surfaced which required engineering changes. In several instances, this needed to be performed on units which had already been installed and which therefore involved considerable expense.

Henderson stated that his resignation had been delayed until he was satisfied in his belief that all necessary technical and financial provisions have been made to permit the ion exchange systems in the field to operate successfully before the end of the financial year, March 31, 1990. Although the cost to the corporation of this technological introduction will have been over $1.25 million, the company believes that the successful implementation of this technology will open substantial markets for the company. While this development has placed substantial pressure on the company's financial resources and liquidity, Memtek's new management stated that it is well on the way to resolving these problems.

DES PLAINES, IL (JAN. 9) PR NEWSWIRE - United Stationers Inc. (NASDAQ-NMS: USTR) reported sales of $245 million in its first quarter ended Nov. 30, 1989, an increase of 2.2 percent over the $240 million in the comparable year ago quarter. Net income was $3.7 million, down 49 percent from $7.2 million in the year-ago quarter. Earnings per share were $.24 on 15,487,704 weighted average shares outstanding, compared to $.47 on 15,446,877 shares for the year-ago quarter.

"Our market environment continues to be highly competitive as reflected in our current rate of sales growth. The decline in gross margin reflects an increase in the sale of lower-margin computer related products, increased promotional activity and the impact of our new sales growth incentive programs. Our higher operating expenses include costs associated with two new Regional Distribution Centers, which were not in last year's numbers," said Joel D. Spungin, chairman of the board, president and chief executive officer.

"The current environment requires aggressive actions in both pricing and marketing programs. These actions, which have been implemented over the last four months, are necessary to ensure our continuing growth and to strengthen our leadership position in a very competitive marketplace," Spungin added.

United Stationers Inc. is the nation's largest wholesaler of office products to resellers. Through its computer-based physical distribution system, it makes more than 25,000 items available substantially within 24 hours through distribution points in 55 major hub cities.

NEEDHAM, MA (JAN. 9) PR NEWSWIRE - LoJack Corporation (NASDAQ: LOJN) and (BOSTON: LOJB) announced today that at a Summary Judgment Hearing held on Jan. 8, 1990 Judge Harry L. Hupp of the United States District Court Central District of California dismissed all claims brought by Clifford Electronics, Inc. in its antitrust lawsuit against LoJack. Clifford, a manufacturer of automotive security systems, had commenced suit in April, 1989 alleging antitrust violations and seeking declaratory and injunctive relief and unspecified damages. LoJack denied all claims and asserted counterclaims against Clifford. Subsequently, in response to LoJack's Motion for Summary Judgment the Court directed that judgment be entered for LoJack, dismissing Clifford's Complaint in its entirety.

LoJack's Counterclaim against Clifford alleged that Clifford, an industry association and certain other suppliers of theft- prevention devices, had violated federal and state antitrust law by conspiring to exclude LoJack's system from the vehicle security market. The Counterclaim seeks injunctive relief and damages.

In making the announcement, C. Michael Daley, president, said that LoJack's Counterclaim against Clifford was undiminished by the Court's ruling yesterday and LoJack intends to prosecute its Counterclaim against Clifford vigorously.

NEW YORK (JAN. 8) PR NEWSWIRE - Integrated Resources, Inc. (NYSE: IRE), announced today that its Board of Directors had elected two new directors, James Sargent and H. Clifton Whiteman.

Sargent, who is a partner at the law firm of Whitman & Ransom, spent more than five years with the Securities and Exchange Commission, first as New York Regional Administrator and then as a member.

Whiteman is a consultant and former executive vice president of The Bank of Tokyo Trust Company in New York. He has, in the past, served as president of the Bowery Savings Bank, and he has held officer- level positions at Investors Diversified Services, Inc. and Morgan Guaranty Trust Company.

"The addition of Mr. Sargent and Mr. Whiteman to our board of directors clearly enhances its capabilities," according to Stephen D. Weinroth, chairman and co-chief executive officer of Integrated Resources. "Their securities and banking backgrounds will contribute to the development of our restructuring plan."

SHAWNEE, OK (JAN. 9) PR NEWSWIRE - Barton Industries (NASDAQ: BART) announced today first quarter fiscal year 1990 revenues of $4.25 million vs. revenues of $2.3 million for the same period of the 1989 fiscal year. Earnings for the current period were $681,524, or $.07 per share compared to a loss of $471,000, or $.07 per share, in the first quarter of fiscal year 1989, representing a 183 percent increase in revenues. Approximately 80 percent of the revenues generated were from the corporation's traditional valve related business units. An additional 10 percent of revenues were the direct result of Barton's new Integrated Technology Systems division. The remaining 10 percent was attributed to Barton's other operating subsidiaries.

C. W. Earl Johnson, chairman of the board and chief executive officer of Barton Industries stated that..."The results of the first quarter indicate the strengths that Barton has developed through its diversification program. The almost doubling of revenues over the same period last year is in itself exciting; however, when you consider that 80 percent of these revenues came from our 'traditional' businesses, the results are even more encouraging.

"The two newest divisions in the company, the Service Center Division and Integrated Technology Systems Division, performed to plan in the first quarter. Revenues attribute to these two divisions are expected to increase substantially in fiscal year 1990 and should account for between 40 percent to 50 percent of the gross revenues for the corporation. In taking advantage of the growing service market and the service needs of our customers, we have restructured Barton to provide for their total requirements. Our Service Center Division and Integrated Technology Systems Division are both positioned to meet the requirements of the growing service industry and drive Barton Industries into the 1990s."

ST. LOUIS (JAN. 9) PR NEWSWIRE - Ralston Purina Company (NYSE: RAL) has launched a new division designed exclusively to serve the growing specialty pet food segment and provide a greater push for its premium Pro Plan pet food products, the company announced today.

The new division, Pro-Visions Pet Specialty Enterprises, is responsible for marketing to pet shops, feed stores and veterinary offices.

"Pro-Visions positions us better than ever to compete in and serve the expanding pet specialty outlets, where we have been active for decades," said Scott R. Harris, managing director for the new division.

"It is a strong signal that we are in the pet specialty segment to stay, and to compete," he said.

In its first major move, Pro-Visions announced it would unveil a new line of pet food products for special dietary uses that will be distributed through veterinarians as part of the Pro Plan line. Pro Plan will serve as Pro-Visions' flagship brand.

The new product line, called CNM (Clinical Nutrition Management) is expected to be available mid-year. CNM is the result of a multimillion dollar research and development effort over several years that includes research at leading veterinary universities. The products are formulated to provide nutrition for the special dietary needs of dogs and cats with specific health conditions and are fed under the guidance of veterinarians.

Pro Plan will continue to be sold in veterinary offices, pet shops and feed stores. Pro Plan is a full line of premium dog and cat food products in growth, maintenance, performance and "lite" formulas in dry form for dogs, and growth and maintenance formulas in dry and canned form for cats.

The new division will be at a location separate from Purina headquarters at Checkerboard Square. Marketing and promotional spending behind Pro Plan will be significantly increased from that used for Pro Plan in recent years, Harris said.

Harris announced several key personnel appointments: Thomas J. Blair as Pro-Visions' marketing manager for Pro Plan products; Steve T. Remspecher, national sales director; Jesse J. Barash, group director, professional marketing; Russell J. Patterson, DVM, director of technical support.

THOROFARE, N.J. (JAN. 9) PR NEWSWIRE - Checkpoint Systems Inc. (NASDAQ: CHEK), announced today it has filed suit in Switzerland against Actron Security AG for infringement of a Swiss patent and for unfair competition.

Actron markets electronic anti-shoplifting products in Switzerland, including deactivatable security tags containing hidden circuitry. The tags, which are attached to merchandise and can be deactivated automatically by placing them in proximity to an electronic deactivation unit, are directly competitive with those produced and marketed by Checkpoint.

The lawsuit alleges that Actron's deactivatable tags infringe Swiss Patent No. 669,858, under which Checkpoint is the exclusive licensee. It further alleges that Actron is guilty of unfair competition by making false and misleading statements about their own products and those of Checkpoint. The lawsuit demands that Actron cease the sale of infringing tags and the making of false and misleading statements, and also demands damages.

Checkpoint Systems Inc., is the leading developer and manufacturer of advanced microprocessor and radio frequency-based security systems. Using detectable, paper-thin, disposable circuits that can be deactivated remotely, Checkpoint's Electronic Signatures(R) systems identify items or people in retail, institutional, industrial and commercial applications.

NORTH ANDOVER, MA (JAN. 9) PR NEWSWIRE - Software Services of America, (NASDAQ: SSOA), announced today that it will be releasing a complete branch automation system using IBM's Consumer Transaction "CT" product. Robert J. Landry, vice president of marketing at SSOA, stated that the company has been working with IBM on this project for over a year. These new products represent a major application release for IBM's strategic Consumer Transaction product which was specifically designed to support the unique transaction processing requirements of financial institutions' branch offices using Personal Computers.

IBM's Statement of Direction Announcement on Sept. 22, 1989, clearly places the Consumer Transaction product as IBM's strategic personal computer solution for all future IBM Branch Automation development. Landry noted that CT is the only branch automation product that IBM has officially come out and stated that they will be enhancing to operate under IBM's Operating System/2 Extended Edition (OS/2EE) and that the

system will conform to IBM Systems Application Architecture (SAA). Further, IBM stated that it will provide a migration path for current Disk Operating System (DOS) system users to the OS/2EE environment which will allow DOS and OS/2EE applications to co-exist on a single local-area network (LAN). Currently, SSOA is the only IBM Business Partner who has developed and announced the availability of a Consumer Transaction-based application system for branch automation. The company expects to make additional press releases over the next few months concerning this new system that will be in keeping with IBM's strategic direction for their Consumer Transaction product.

Software Services is a developer of electronic banking software supporting branch automation and retail funds transfer systems utilizing IBM mainframe computers and financial terminal systems. Software Services is also a remarketer of IBM computer hardware used in conjunction with its software products. The company's securities are traded on both the NASDAQ and Boston Stock Exchange.

NEW YORK (JAN. 9) PR NEWSWIRE - American Sports Advisors, Inc. (the "company"), an inactive corporation the shares of which are traded over-the-counter, announced that on Friday, Jan. 5, 1990, there was a private sale of shares by two of its principal shareholders resulting in a changeover of control of management. The new board of directors consists of Charles Aronson (age 47), a special project educator with the City of New York in money and banking, real estate and investment education programs for the city school system and a real estate and securities investor; Fabio Berkowitz (age 39), CPA and partner in Edward Isaacs & Co. a New York accounting firm; and Theodore Wexler (age 40), guidance counselor with the City of New York, an accountant and investor with extensive expertise in merchandising baseball cards and sports- related memorabilia.

Effective at the close of business, Jan. 8, 1990, management declared a 1 for 10 reverse stock split recapitalization, thereby, reducing the outstanding common stock of the company from 8,511,967 to 851,197. As a result of the recapitalization, the par value of the outstanding shares will remain the same, stated capital will be reduced but capital surplus will be commensurately increased and the result renders shareholder equity unchanged.

Subsequent to the recapitalization the board announced an agreement to acquire all of the outstanding shares of common stock of Great American Pastime, Inc., a closely held corporation, in exchange for 4.3 million

shares of the company's common stock as recapitalized.

Great American Pastime Inc. is in its first year of operations and is engaged in the business of merchandising baseball cards and intends to market other sports-related memorabilia. Aronson, the company's new chief executive and director is also an officer, director and principal shareholder of Great American Pastime, Inc.

The company is in the process of changing its principal executive offices to 459 West 15th Street, New York.

DALLAS (JAN. 9) PR NEWSWIRE - Dallas-based United Medicorp, Inc. (NASDAQ: UMCI) announced today the successful completion of its private placement offering of 10 percent cumulative convertible preferred stock (preferred stock). UMC originally had planned to offer only $3 million of its preferred stock. Due to investor demand, UMC increased the amount of preferred stock to be offered, concluding the private placement after having received more than $4.3 million from investors.

Formed in March 1989 by entrepreneur G. Ray Miller, founder of U.S. Tel and International Telecharge, United Medicorp brings together service expertise of well-known businesses to offer the latest in electronic

claims processing, collection and cash management techniques for hospitals and physicians' offices.

Participating with United Medicorp are Andersen Consulting, Sears Business Centers, GTE Health Systems and Provider Capital.

United Medicorp processes medical insurance claims for hospitals and physicians using proprietary, custom-designed software. For hospitals and physicians' offices with existing computer capabilities, UMC will install software to connect the existing computer system with UMC's system.

In addition, United Medicorp advances 45 percent or greater of the amount of anticipated insurance payments to the health care provider within seven business days of processing the claim, dramatically improving cash flow for the hospital and physician.

United Medicorp also advances funds on submitted but unpaid claims that have been previously filed with the insurance carriers. The benefits of the United Medicorp system include lower administrative overhead, reduction of accounts receivable and improved cash management.

United Medicorp earns revenues by charging clients a fee based on the percentage of claim amounts processed. Software is provided at no additional cost to the customer along with computer hardware and software installation, training and maintenance.

Miller, United Medicorp chairman and chief executive officer, said, "United Medicorp's successful completion of its expanded private placement offering increases UMC's financial strength and demonstrates strong investment community interest in UMC's business."

ATLANTA (JAN. 9) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today filed a motion in Federal District Court in Maine seeking partial summary judgment declaring invalid under Maine law certain provisions in Great Northern Nekoosa Corp's (NYSE: GNN) Articles of Incorporation and Bylaws relating to the removal and replacement of Great Northern's board of directors.

The motion seeks to establish that two-thirds, not three-quarters, is the percentage of outstanding shares required to remove Great Northern Nekoosa's board of directors. The motion also seeks to establish that Great Northern shareholders, not the directors being removed, have the right to fill board vacancies created at the March 2 meeting, and to invalidate the requirement of 90 days advance notice of nominees for election to replace removed directors.

The motion was filed in relation to Georgia-Pacific's solicitation of proxies to replace Great Northern's board at a special meeting of Great Northern shareholders on March 2, 1990.

"Beyond directly contradicting Maine statutes, Great Northern's provisions for the removal and replacement of its board are, in our opinion, manifestly designed to insulate incumbent directors from the wishes of the company's shareholders," said T. Marshall Hahn Jr., chairman and chief executive officer of Georgia-Pacific.

NILES, MI (JAN. 9) PR NEWSWIRE - National-Standard Company (NYSE: NSD) announced the completion of agreements regarding the sale of its ARCHON(R) II Weld Monitoring System business and the COPPERPLY(R) wire product line, according to Michael B. Savitske, president and chief executive officer.

ARCHON II, a computer hardware and software system which senses key welding parameters and statistically profiles weld quality, was sold to Jetline Engineering, Inc. of Irvine, Calif.

COPPERPLY wire is a copper-plated carbon steel wire designed to conduct

electricity while utilizing its carbon steel inner core for increased strength. It is used in computer network cables and as cable television and telephone drop wire. The COPPERPLY wire product line was sold to Copperweld Corporation of Pittsburgh.

As previously announced, National-Standard also sold its Strandflex operation and plant facilities in Oriskany, N.Y. Strandflex manufactured fine diameter wire strand and cable for marine, recreational, and outdoor power equipment. The business was sold to Maryland Specialty Wire Company, Inc., a wholly owned subsidiary of Handy & Harman corporation of New York.

The sale of these businesses will have no significant effect on company earnings. The proceeds will be used to reduce National- Standard's level of borrowing. The terms of the sales were not disclosed.

Founded in 1907, National-Standard is a Niles-based company manufacturing a broad range of wire, wire-related products and specialized machinery systems in 19 facilities throughout the world.

#90009p0172 01/09/1990 ~PR Newswire

NEW YORK (JAN. 9) PR NEWSWIRE - Paramount Communications Inc. (NYSE: PCI) today reported net earnings for the fiscal ended Oct. 31, 1989, of $1.47 billion, or $12.21 per share. Included in net earnings are a $1.2 billion gain from the sale of The Associates and $279.4 million of earnings from that unit's operations. Earnings of $11.5 million from continuing operations were adversely affected, as previously reported, by a $48.3 million after-tax charge in the third quarter for costs incurred in the company's bid to acquire Time Inc. and an $84.3 million after-tax charge to earnings from publishing operations in the fourth quarter, and benefited from an after-tax gain of $7.4 million from the sale of two small Prentice Hall units. Net earnings were reduced by an after-tax increase of $30.8 million in reserves for prior dispositions.

In fiscal 1988, Paramount reported net earnings of $384.7 million, or $3.21 per share, including earnings of $231.9 million from The Associates' operations.

Revenues for fiscal 1989, excluding The Associates, totaled $3.4 billion, versus, on a comparable basis, $3.1 billion in fiscal 1988.

Net earnings for the fourth quarter of fiscal 1989, including the gain from the sale of The Associates, were $1.23 billion, equal to $10.28 per share. This compared with net earnings in the corresponding fiscal 1988

period of $144.0 million, or 1.21 cents per share. Revenues for the last quarter of fiscal 1989, excluding The Associates, increased to $968.8 million from $935.6 million in the corresponding year-earlier period.

"Fiscal 1989," said Martin S. Davis, Paramount's chairman and chief executive officer, "was a transition year in which we completed the restructuring we launched in 1983 and emerged as a strong communications company with operations solely in entertainment and publishing. We entered the new fiscal year with leadership positions in virtually every segment of our core operations and a worldwide strategic operating focus. Armed with substantial cash and significant borrowing capacity as a result of a 17 percent debt to capital ratio, we have the financial strength to fuel the global growth of our businesses."

In fiscal 1989, Davis noted, Paramount's entertainment operations recorded their second best operating income total ever, paced by strong overall results from motion pictures. Television operations, he pointed out, narrowed an expected decline of $50 million in syndication income and came close to equaling the substantial year-earlier contribution. "Despite a break-even performance in publishing in fiscal 1989, largely as a result of the charge against earnings in the fourth quarter," Davis said, "we are confident that these operations will improve significantly in fiscal 1990. Our publishing business is fundamentally strong and we expect it to provide substantial future earnings and cash flow," he added.

DALLAS (JAN. 9) PR NEWSWIRE - Herbert D. Kelleher, chairman of the board and president of Southwest Airlines Co. (NYSE: LUV), announced today that the company flew 704.1 million revenue passenger miles (RPMs) in December 1989, a slight increase over the 703.3 million RPMs flown in December of last year. Available seat miles (ASMs) increased 7.9 percent to 1,211.6 million from the December 1988 level of 1,122.9 million ASMs. The load factor for the month was 58.1 percent compared to 62.6 percent for the like period of a year ago.

For the fourth quarter 1989, Southwest flew 2,218.3 million RPMs, a 5.5 percent increase compared with the 2,102.0 million RPMs recorded for the like period of 1988. Available seat miles increased 10.6 percent to 3,780.1 million from the fourth quarter 1988 level of 3,418.3 million. The fourth quarter load factor was 58.7 percent compared to 61.5 percent for the like period last year.

For the year ended Dec. 31, 1989, Southwest flew 9,282.0 million RPMs, compared with the 7,676.3 million RPMs recorded for the like period in 1988, an increase of 20.9 percent. Available seat miles increased 11.2 percent to 14,796.7 million from the annual 1988 level of 13,309.0 million. The annual load factor was 62.7 percent compared to 57.7 percent for the like period in 1988.

FAIR LAWN, NJ (JAN. 9) PR NEWSWIRE - Warner Computer Systems, Inc. (NYSE: WCP) announced today that it has reorganized its microcomputer sales and service business as a new wholly owned subsidiary, MicroCorp, Inc. Simultaneously, MicroCorp has entered into a strategic alliance with MicroAge Computer Centers, Inc. of Tempe, Ariz., which will supply MicroCorp with its product needs.

The affiliation takes advantage of Warner/MicroCorp's longstanding experience in microcomputer technology and excellent service reputation with major clients in the greater New York Metropolitan area. It also provides MicroCorp with the potential of offering national service contracts to clients with multiple geographic locations. The affiliation follows the recent industry trend of strong regional companies entering into alliances with national distributors in order to reduce their investments in manpower and inventory.

Harvey Krieger, Warner's chairman, also announced the appointment of Paul N. DeSesso as president of MicroCorp. DeSesso indicated that MicroCorp's prospects for 1990 were strong and that the microcomputer industry offered strong sales potential.

Warner provides administrative and data processing services to insurance companies; data bases to the financial community and investors; and sales and maintenance of microcomputers to business and professional users.

HOUSTON (JAN. 9) PR NEWSWIRE - The Tenneco Inc. (NYSE: TGT) board of directors has declared a regular first quarter dividend of 76 cents per share on the company's common stock.

The dividend is payable on March 13 to stockholders who are owners of record at the close of business on Feb. 9. This will be the 170th consecutive quarterly common stock dividend payment made by Tenneco or its predecessor companies.

The board also declared a dividend of $1.85 per share on Tenneco's issue of $7.40 cumulative preferred stock. The preferred stock dividend is payable on March 31 to those who are holders of record at the close of business on Feb. 23.

In other action, the board set the date for the company's 1990 annual meeting of stockholders.

The meeting will be held Tuesday, May 8, at 10:30 a.m. in the Imperial Ballroom of the Hyatt Regency Hotel, 1200 Louisiana Street, in Houston.

The record date for stockholders to be eligible to vote at the meeting is March 12, 1990.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

BALTIMORE (JAN. 9) PR NEWSWIRE - Jiffy Lube International, Inc. (NASDAQ: JLUBC) has announced the election of a new board of directors. The election was held following the consummation of a restructuring plan with Pennzoil Company (NYSE: PZL) and Jiffy Lube's senior lenders.

The new board of directors is composed of J. Anthony Aldrich, J. Ronald Calabrese, Randal B. McDonald, James L. Pate and Robert N. Thurston.

J. Anthony Aldrich, 51, is vice president and partner of Talesis, a division of Towers Perrin. Previously, he was vice president and director of the Boston Consulting Group.

J. Ronald Calabrese, 54, has been named president and chief executive officer of Jiffy Lube International. Since October 1989, he has served as group vice president of Pennzoil Company's quick lube division. Prior to that, Calabrese was executive vice president of Western Auto Supply Company's wholesale operations. He has more than 30 years of experience in the franchise field.

Randal B. McDonald, 59, is president and director of Pennzoil Company. Previously, he served as managing partner-chief financial officer at the Chicago world headquarters of Arthur Anderson & Co.

James L. Pate, 54, is a director and executive vice president of Pennzoil Company. He previously served Pennzoil as senior vice president, finance and treasurer.

Robert N. Thurston, 57, has been a business consultant since July 1985. Prior to that time, he was executive vice president and a director of Quaker Oats Company.

SANTA BARBARA, CA (JAN. 9) PR NEWSWIRE - Circon Corporation (NASDAQ: CCON) Richard A. Auhll, president and chairman, today announced that Circon's preliminary 1989 figures show record setting results for sales, gross profit and operating income over any year in the company's history. Also, this year's net income is the highest since the ACMI merger, and all four quarters had positive net income.

Fourth quarter 1989 sales rose to $13.0 million, up $2.3 million or 21 percent over the fourth quarter 1988. Gross profit grew 28 percent to $6.4 million. Gross profit as a percentage as a percentage of sales is 49.7 percent, up from 47.0 percent of the fourth quarter 1988, continuing the long-term improvement. Fourth quarter operating income is $702,000, up $528,000 over the same 1988 period. The fourth quarter 1989 is Circon's sixth consecutive quarter of operating income and positive cash flow.

1989 sales increased $8.2 million or 20 percent over 1988 to a total of

$49.6 million. New and revamped products were the primary factors in the sales increase.

Gross profit for the year is up $5.2 million, or 27 percent to $24.2 million. The basic profitability of the company's products has been steadily rising due to increasing sales of the higher profit new products coupled with improving manufacturing margins on continuing products.

Annual operating expenses for 1989 are up 8 percent over 1988. However, as a percentage of sales, operating expenses have dropped from 48.8 percent in 1988 to 44.1 percent in 1989.

Operating income increased $3.5 million to $2.3 million, a dramatic improvement over 1988. This $3.5 million increase in operating income represents 43 percent of the $8.2 million increase in annual sales.

Net income in 1989 increased $2.7 million over 1988 to a positive $302,000. Earnings per share are up to $0.51 year to year.

Circon develops, manufactures and markets endoscope systems and ultraminiature color video systems for medical and industrial applications and is the largest USA producer of medical endoscopes and video systems.

LOWELL, MA (JAN. 9) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) and the University of Southern California (USC) today announced USC's office of admissions has implemented a Wang Integrated Image System (WIIS) to manage student admissions information.

USC, located in Los Angeles, Calif., is the first university in the U.S.

to automate its admissions process with Wang's document imaging technology.

USC selected WIIS based on a successful pilot that prototyped the application and tested integration with USC's existing Prime computer network. Wang's Business Services Group in Los Angeles and Trident Systems Inc., of Landover, Md., co-authored the design of the admissions pilot.

The system purchased by USC, valued at $1.2 million, includes a VS 7150 mid-range computer; 30 image workstations, of which 25 have Freestyle document annotation capabilities; one laser printer; five endorsers; and five document scanners. Initial storage for document images is eight gigabytes of magnetic disk storage. After quality assurance is completed, documents are archived to laser optical disk.

Wang Laboratories Inc., headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems, including data, text, image, and voice processing, as well as telecommunications and networking products.

#90009p0199 01/09/1990 ~PR Newswire

HOUSTON (JAN. 9) PR NEWSWIRE - Wyoming-California Pipeline Company (WYCAL) announced today that it has received firm long-term commitments for sufficient volumes to proceed with construction of a 30-inch natural gas pipeline from Wyoming to California. Construction is scheduled to start in 1990 and the pipeline will begin moving gas to California markets by late 1991.

WYCAL now has firm capacity commitments totaling 530 million cubic feet of gas a day (MMCF/D), which is in excess of the volume from Wyoming to California presently certificated by the Federal Energy Regulatory Commission (FERC).

Natural gas shippers that have signed agreements for firm transportation with WYCAL include:

Southern California Edison Company (50 MMCF/D); Pacific Gas and Electric Company (50 MMCF/D); Southwest Gas Corporation (200 MMCF/D); Union Pacific Resources Company (100 MMCF/D); Natural Gas Clearinghouse (50 MMCF/D); LFC Gas Company (50 MMCF/D); and Coastal Oil & Gas Corporation (30 MMCF/D).

In addition, WYCAL has a pending commitment from the city of Long Beach for 100 MMCF/D and an option by Southern California Gas Company for 75

MMCF/D.

Since WYCAL was originally conceived, the natural gas requirements of the California market have changed from solely enhanced oil recovery demand to also include incremental growth and supply diversification for the existing gas users, said D. Lamar Smith, president of WYCAL. As a result, WYCAL filed with FERC in October for approval of alternative pipeline configurations within California that are in addition to the company's presently certificated route which ends near Bakersfield.

WYCAL is a subsidiary of the Coastal Corporation (NYSE: CGP), a Houston-based diversified energy corporation. Together with its subsidiaries, Coastal has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

WAUKEGAN, IL (JAN. 9) PR NEWSWIRE - Outboard Marine Corporation (NYSE:

OM) announced today that due to a continued low level of industry demand for boats and motors, a net loss for its first quarter or three months ended Dec. 31, 1989 is expected. The loss is expected to be in the range of $15 million to $19 million or $.75 to $.95 per share as compared to net earnings from continuing operations of $1.2 million or $.06 per share for the same period last year.

Based upon preliminary reports for the first quarter, total OMC sales are expected to be down approximately 12 percent from last year's first quarter sales from continuing operations of $264 million. Shipments of domestic outboard motors were about 30 percent below last year in the quarter whereas retail sales of domestic outboard motors were down considerably less or approximately 10 percent below last year. As a result dealer inventories of outboard motors are below last year and should not restrict shipments once retail demand improves. Sales by the boat group and international group continued to increase.

BILLERICA, MA (JAN. 9) PR NEWSWIRE - Memtek Corporation (NASDAQ: METK) of Billerica, Mass. announced today that Phillip C. Henderson has resigned as president and CEO to pursue other interests. The company also announced that Robert F. Birch has been appointed as chairman of the board of directors and president. Werner Kaim will remain as vice chairman of the board, J. Thomas Selldorff, executive vice president, will be responsible for marketing and sales, and Joseph A. Lander is newly appointed as executive vice president in charge of engineering and manufacturing. Selldorff has been with the company since 1985 and Lander since 1982. Birch has been a director of the company since 1981 and previously served as president and chief executive officer of Gardner and Preston Moss, Inc. from 1969 through 1987. Gardner and Preston Moss is an investment advisor which had funds under management in excess of $3 billion at the time of Birch's departure.

Memtek has experienced some difficulties in the introduction of certain ion exchange technology which it acquired from Ecology Protection Systems in San Jose in the middle of 1988. This ion exchange technology performed satisfatorily in some cases, but when introduced more widely, some additional problems surfaced which required engineering changes. In several instances, this needed to be performed on units which had already been installed and which therefore involved considerable expense.

Henderson stated that his resignation had been delayed until he was satisfied in his belief that all necessary technical and financial provisions have been made to permit the ion exchange systems in the field to operate successfully before the end of the financial year, March 31, 1990. Although the cost to the corporation of this technological introduction will have been over $1.25 million, the company believes that the successful implementation of this technology will open substantial markets for the company. While this development has placed substantial pressure on the company's financial resources and liquidity, Memtek's new management stated that it is well on the way to resolving these problems.

HIGH POINT, NC (JAN. 9) PR NEWSWIRE - LADD Furniture, Inc. (NASDAQ-NMS: LADF) chairman and chief executive officer Don A. Hunziker announced today that LADD has restructured its senior management organization, promoting Richard R. Allen and O.W. Fenn, Jr. to the newly created positions of vice chairman of LADD, reporting to Hunziker. Allen was formerly executive vice president and chief financial officer of LADD, while Fenn previously served as LADD's president.

Commenting on the move, Hunziker said, "This new organizational structure strengthens LADD's senior management tean and initiates the orderly management succession program we feel will be essential for LADD's continued growth and success as our newly expanded company moves into the 1990's."

Hunziker said responsibility for the management of LADD's 15 operating companies will now be divided between Allen and Fenn, effective immediately. He added that the position of chief financial officer (CFO) will be filled "as soon as practical," and said Allen will remain acting CFO of LADD until such time.

Richard R. Allen, 49, was one of the co-founders of LADD Furniture, Inc. in 1981, and was named executive vice president and chief financial officer at that time. Mr. Allen joined the Sperry & Hutchinson Furniture Group, out of which LADD was originally formed, in 1980.

O.W. (Bill) Fenn, Jr., 62, joined the LADD organization in 1982 as president of the company's American Drew operating unit and was named president and chief operating officer of LADD Furniture, Inc. in 1983.

Headquartered in High Point, N.C., LADD is one of the largest U.S. manufacturers of residential furniture, marketing its broad range of wood, upholstered and metal furniture to both residential and contract customers under the major brand names American Drew, American of Martinsville, Barclay, Brown Jordan, Clayton Marcus, Daystrom, Design Horizons, Kittinger, Lea Industries and Pennsylvania House.

LADD also owns and operates Lea Lumber & Plywood Co. and LADD Transportation, Inc., and its stock is traded on the over-the-counter National Market System under the NASDAQ symbol LADF.

ERIE, PA (JAN. 9) PR NEWSWIRE - Zurn Industries, Inc. (NYSE: ZRN) a leading designer and manufacturer of environmental waste-to-energy systems and water control products and systems announced today that the company has received an order estimated to be worth up to $70 million from the Oxford Energy Company (AMEX: OEN) headquartered in Santa Rosa, Calif.

Zurn subsidiary, the National Energy Production Corporation (NEPCO) will design, engineer, supply components and construct a 288 tons-per- day, 30-megawatt (net) waste tire-to-energy plant to dispose of almost 23,000 tires per day at Sterling, Conn. This will be the largest electrical power plant in the world fueled exclusively by whole tires. Electricity produced by the plant will be sold to Connecticut Light & Power Company.

Included in the contract are two 119,000 pounds-of-steam per hour steam generators which will be provided by Zurn Energy division (Erie, Pa.) with Standard-Kessel-Gesellschaft Gmbh of Duisburg, West Germany, providing the Lambion Stoker technology used to combust the tires. In addition to the boiler island, Zurn/NEPCO will engineer and construct the tire handling fuel system, all air and water quality controls, and a sophisticated computer-based plant control system.

Zurn/NEPCO began construction of the Oxford facility in December 1989, and start-up of the plant is scheduled for April 1991. The Oxford Exeter Energy Plant at Sterling, Conn. is the second Oxford project for Zurn/NEPCO. In May 1989, Zurn/NEPCO put into service and is now operating the Oxford Energy Floyd Myers Marsh Power Plant, The 28- megawatt facility located in Williams, Calif., is the world's largest rice waste-to-energy plant.

BLUE BELL, PA (JAN. 9) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) has announced that its Government Systems Division has received a $36.3 million systems integration contract for services and hardware to update the Air Force's Global Weather Central Facility at Offutt Air Force Base, Nebraska, near Omaha.

The contract includes a major two-year software development effort, three top-of-the-line Unisys 2200/600 mainframe processors and 10 years of software support and other services. Deployment of the system has already begun.

"This contract further expands the Unisys role as a major systems integrator to the federal government," said James McGuirk, vice president and general manager, Aerospace Operations. "It emphasizes services that will help the Air Force fulfill its worldwide weather forecasting mission to the Army, the Air Force and selected DoD agencies." The contract also includes a "back-end" relational data base processor from Teradata.

The award follows the $700 million Desktop III contract for desktop computers running POSIX-compliant and the MS-DOS operating systems, awarded to Unisys in November. The two contracts were awarded independently.

Unisys Corp. is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

MS-DOS is a trademark of Microsoft Corp.

TULSA, OK (JAN. 9) PR NEWSWIRE - ONEOK Inc., (NYSE: OKE) a Tulsa-based energy company, today reported earnings of 49 cents per share of common stock for the fiscal year's first quarter ended Nov. 30, 1989. This compares with 37 cents per share reported a year ago.

J. D. Scott, chairman, president, and chief executive officer, said that the increase in net income was due primarily to increased gas sales and decreased interest expense, partially offset by increased operating expenses.

Consolidated net income for ONEOK Inc. during the 1990 fiscal year's first quarter was $6.8 million, vs. $5.3 million for the first quarter last year. For the 12 months ended Nov. 30, 1989, consolidated net income was $38.2 million, compared with $11 million a year earlier. Total operating revenues were $141.4 million in the 1990 first quarter and $632.4 million for the 12 months ended Nov. 30, 1989. This compares with $128.2 million and $588.6 million, respectively, for the like periods a year ago.

Scott said that revenues increased during the quarter because of increased gas usage and because certain large-volume customers were purchasing gas from the company rather than from the spot market and then leasing capacity in the Oklahoma Natural pipeline system to transport it to their businesses or plants.

ONEOK Inc. is a diversified energy company engaged in natural gas transmission and distribution, oil and gas exploration and production, contract well drilling, and the sale of natural gas liquids.

The company's stock is traded on the New York and Midwest Stock Exchanges under the trading symbol of OKE. ONEOK has outstanding 13.4 million shares of common stock.

DALLAS-FORT WORTH AIRPORT, TX (JAN. 9) PR NEWSWIRE - American Airlines Inc., flew 5.95 billion passenger miles in December, an increase of 8.9 percent over the 5.47 billion RPMs flown in December 1988, the airline announced today.

During 1989, carrier flew a record 73.48 billion RPMs, 13.5 percent more than the 64.75 billion flown in 1988. Two of American's top 10 passenger traffic days occurred on December 21 and 22 as holiday travel peaked.

"December's traffic results were encouraging, although the increases were due in part to the traditional holiday travel period," said Michael W. Gunn, American's senior vice president-marketing.

The airline's available seat miles rose 6.9 percent in December, to a record 9.98 billion, from 9.33 billion for December 1988. For the year, capacity grew 12.9 percent to 115.17 billion ASMs from 102.02 billion.

Passenger boardings increased 5.7 percent last month to 5,830,994 from 5,517,045 and the system load factor rose 1.1 points to 59.7 percent from 58.6. During 1989, American boarded 72,074,159, a 12.5 percent jump from the 64,063,349 boarded in 1988. The load factor increased year-over-year, to 63.8 percent from 63.5 percent.

Freight ton miles rose 13.7 percent in December to 49.8 million from 43.8 million. Mail ton miles jumped 22.1 percent to 34.6 million from 28.4 million.

During the 12 months ended Dec. 31, freight ton miles increased 29.9 percent to 636.2 million from 489.7 million. Mail ton miles rose 38.8 percent to 250.1 million from 180.2 million.

FAIR LAWN, N.J. (JAN. 9) PR NEWSWIRE - Warner Computer Systems, Inc. (NYSE: WCP) announced today that it has reorganized its microcomputer sales and service business as a new wholly owned subsidiary, MicroCorp, Inc. Simultaneously, MicroCorp has entered into a strategic alliance with MicroAge Computer Centers, Inc. of Tempe, Ariz., which will supply MicroCorp with its product needs.

The affiliation takes advantage of Warner/MicroCorp's longstanding

experience in microcomputer technology and excellent service reputation with major clients in the greater New York Metropolitan area. It also provides MicroCorp with the potential of offering national service contracts to clients with multiple geographic locations. The affiliation follows the recent industry trend of strong regional companies entering into alliances with national distributors in order to reduce their investments in manpower and inventory.

Harvey Krieger, Warner's chairman, also announced the appointment of Paul N. DeSesso as president of MicroCorp. DeSesso indicated that MicroCorp's prospects for 1990 were strong and that the microcomputer industry offered strong sales potential.

Warner provides administrative and data processing services to insurance companies; data bases to the financial community and investors; and sales and maintenance of microcomputers to business and professional users.

CHICAGO (JAN. 9) PR NEWSWIRE - Midway Airlines (NYSE: MDW) today announced the appointment of Clyde R. Kizer, 51, to the newly established position of senior vice president-airline operations, according to David R. Hinson, Midway Airlines chairman and chief executive officer.

In the post, effective Jan. 15, Kizer will oversee the day-to-day operations of Midway Airlines, with responsibility for aircraft maintenance and flight operations.

Kizer brings to Midway Airlines a distinguished 29-year background in aviation. He spent 15 years with United Airlines, serving as vice president of technical services from 1984-1988. In that capacity, Kizer developed maintenance, repair and operating specifications for the airline's fleet; provided engineering assistance for the maintenance operations center; conducted quality assurance audits on the maintenance center; and performed equipment inspections, among other responsibilities. Kizer also held the posts of director of engineering and flight test captain during his tenure with United.

Most recently, Kizer has been vice president-engineering and maintenance for the Air Transport Association of America (ATA). He has coordinated action on the technical and engineering issues facing the U.S. airline industry and chaired the Federal Aviation Administration/Industry Task Force on Aging Aircraft. Kizer and the task force were cited by Aviation Week & Space Technology for "promptly tackling a critical problem --

ensuring the structural integrity of the world airline fleet."

"Mr. Kizer's expertise in airline operations and his experience make him exactly the person for Midway Airlines as we manage our rapid growth from our Midway Airport and Philadelphia International Airport hubs," Hinson said. "We look forward to his solid contributions."

After earning a bachelor of science degree in chemistry from Eastern Michigan University in 1960, Kizer served 14 years of active duty in the U.S. Navy as a naval aviator and engineering test pilot.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, U.S. Virgin Islands and the Bahamas.

#90009p0269 01/09/1990 ~PR Newswire

LINDEN, NJ (JAN. 9) PR NEWSWIRE - Exxon officials today met with Federal, state and local regulatory agencies to review the current status of Exxon's investigation of the Bayway oil leak and to discuss what additional work is needed.

The source of the leak was a crack in a pipeline from Exxon's Bayway, N.J. refinery to the Bayonne, N.J. terminal. Preliminary conclusions indicate a mechanical malfunction occurred in the instrument system that controls shut down of the pipeline. Signals were received that automatically shut down the pipeline. Restart of the line failed to confirm that there was a problem. Work is still underway to determine the source of the erratic signals.

Calculations indicate that the oil lost was approximately 13,500 barrels. Prompt notification was provided to appropriate agencies once the lead was confirmed as coming from the Exxon facility. The reason for the pipe failure cannot be determined until the line is removed from the water, probably next week. Exxon will continue to work with the involved agencies to complete the investigation.

The following is a summary of Exxon's investigation to date regarding the sequence of events surrounding the recent spill.

A pipeline transfer of heating oil from Bayway to Bayonne was begun at 4:10 p.m. on Monday, January 1. A barge of heating oil was loaded from the same system at the Bayway dock between 7:38 p.m. and 9:13 p.m. that evening.

At 10:30 p.m., the leak detection system activated, and the operator at Bayway reset the signal to see if the signal would repeat. It did not.

At midnight, the transfer to Bayonne was shut down for a routine inventory check and was resumed 40 minutes later.

At 2:28 a.m., the operator noted a higher-than-expected flow rate and stopped the transfer to Bayonne to investigate the system. The computer check indicated that all valves were correctly set, and the transfer was resumed at 2:32 a.m.

At 3:00 a.m., the leak detection system shut down the transfer by closing motor-operated valves. At 3:40 a.m., the Bayway operator restarted the transfer to observe the system to see if the shut-down signal would be repeated. It was not.

Between 3:50 and 4:05 a.m. the Linden Fire Department and the New Jersey Marine Police inquired regarding a report of an oil spill in the barge dock area. The State Police and Bayway personnel investigated the dock area until 4:30 a.m., but no oil was observed.

During the interval of that visual search for oil, the pipeline leak detection system signal repeated a closure of the motor-operated valves on the transfer to Bayonne. The operator at Bayway concluded that there was an instrumentation problem and called the Bayonne operator by telephone, informing him of the shutdown until the instrumentation system was checked out.

Also, at about the same time (4:20 a.m.), another Bayway operator responded to a Coast Guard report of a spill near the barge docks. This operator entered the Arthur Kill in a boat. During his search on the water, he observed floating oil surrounding a ship moored at a terminal on the Staten Island side of the Arthur Kill, as well as oil near the Staten Island shore. On recrossing to the Bayway side, the operator detected only slight amounts of oil near the Exxon docks. This boat search lasted until about 5:45 a.m. and it was concluded that Exxon was not the source of the spill.

At 7:20 a.m., a team from Bayonne was dispatched to investigate the inter-refinery pipeline in the vicinity of the Arthur Kill, and during the operators' meeting at Bayway, which commenced at 7:45 a.m., the operations manager at Bayway requested Bayway personnel to check out the inter-refinery pipeline. Bayway and Bayonne personnel began arrangements to pressure-test the six-mile-long pipeline at 8:15 a.m. The test physically began at 10:15 a.m.. After several minutes, indications of a leak near the Bayway docks were observed. Exxon personnel called the Coast Guard at 10:25 a.m. to report a spill.

At 10:58 a.m., calls were made to the National Response Center and to the EPA. At 11:02 a.m., the New Jersey Department of Environmental Protection and the Linden Fire Department were notified, and a duplicate report was made to the National Response Center. At 11:05 a.m., the U.S. Environmental Protection Agency was notified. Concurrently the cleanup was initiated by Exxon personnel with support from the Clean Harbors Cooperative and contractors.

#90009p0273 01/09/1990 ~PR Newswire

PARSIPPANY, NJ (JAN. 9) PR NEWSWIRE - Machine Technology, Inc. (NASDAQ: MTEC) today reported a net profit of $56,718 or $.01 per share for its first quarter ended Nov. 30, 1989, as compared to a net profit of $140,426 or $.03 per share in the same period a year ago.

First quarter sales of $4,579,901 were 23 percent less than sales of $5,979,087 in last year's first quarter, with the decline primarily attributed to the company's retreat from the physical vapor deposition equipment business. When compared to the immediately preceding quarter, however, sales increased 14 percent as continued concentration of effort on FlexiFab, the company's most advanced photolithographic processing equipment, began to show positive results. While net income declined 60 percent for the first quarter of fiscal 1990 as compared to the same quarter a year ago, this year's net income was earned on significantly lower sales. This operating performance was made possible as the company has significantly decreased its break-even point by improving gross profit margins to 39 percent from 37 percent and reducing all operating expenses and interest expense by $302,195 for the quarter. There were no income taxes due to utilization of an available net loss carryforward.

Gary Hillman, president of Machine Technology, Inc., stated, "We have now achieved profitable operations for five consecutive quarters. These positive results have enabled us to internally generate sufficient cash flow to discharge our obligations and enhance our products' quality. As a result, we have begun to improve our market share and have experienced noticeable sales gains for our FlexiFab product line. With backlogs increasing and cost reduction programs succeeding, we are hopeful of building the company's profitability."

Machine Technology, Inc., designs, manufactures and markets automated production systems used in the manufacture of semiconductor devices.

MACHINE TECHNOLOGY, INC.

Quarter Ended Nov. 30	1989	1988

Sales	$4,579,901	$5,979,087

WASHINGTON (JAN. 9) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) announced today that Richard F. Hohlt, senior vice president for government affairs, U.S. League of Savings Institutions has been appointed by President Bush to serve on the Sallie Mae board of directors.

Hohlt replaces Donald E. Roch, West Warwick, R.I., who had served on the Sallie Mae board for nine years.

Prior to joining the U.S. League in 1980, Hohlt was executive assistant to U.S. Sen. Richard G. Lugar (R-Ind.) for whom he previously worked as administrative assistant while Lugar was mayor of Indianapolis. Hohlt also served as assistant to the treasurer of Marion County, Ind., and was the city controller's internal auditor/systems analyst.

With more than $34 billion in assets, Sallie Mae is the major financial

intermediary to the higher education market and the nation's largest single source of funds for education loans

Sallie Mae's 21-member board of directors consists of seven directors appointed by the president of the United States; seven directors elected by financial institutions which own the corporation's voting common stock; and seven directors elected by educational institutions which own voting common stock. The president also appoints the chairman of the board from among the 21 members.

Sallie Mae's other presidentially-appointed directors, all of whom were appointed in 1981 or 1982, are: Edward A. McCabe (chairman), Washington; James E. Brandon, Amarillo, Texas; Judith M. Chambers, Stockton, Calif.; Richard D. Shelby, Washington; Irby Clifford Simpkins Jr., Nashville, Tenn.; and Earl S. Smittcamp, Clovis, Calif.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. Thus, the corporation has funded about four in 10 of all guaranteed student loans outstanding today.

MILWAUKEE (JAN. 9) PR NEWSWIRE - Wisconsin Toy Company, Inc. (NASDAQ: WTOY), a Milwaukee-based toy wholesaler and operator of Toy Liquidators and Toys Unlimited retail outlets across the United States, announced today that it has completed the acquisition of Everything's A Dollar, Inc. a privately held specialty retailer with headquarters in Virginia Beach, Va. Everything's A Dollar is now an 80-percent-owned subsidiary of Wisconsin Toy.

In connection with the transaction in which the former securities holders of Everything's A Dollar received 354,563 shares of Wisconsin Toy Company common stock, Arthur Borie purchased a 20 percent interest in Everything's A Dollar and will be its chairman and chief executive officer, as well as a member of Wisconsin Toy Company's board of directors. Boden Perry was named vice chairman of Everything's A Dollar, and Michael Porter was named president of that company.

In making the announcement, Steven J. Appel, president of Wisconsin Toy Company, said he was pleased to have Everything's A Dollar join the Wisconsin Toy family. "I am confident that Everything's A Dollar will play a significant role in the growth of Wisconsin Toy," Appel said.

Wisconsin Toy currently operates 75 retail stores, primarily in manufacturers outlet malls throughout the United States. The firm also operates a national wholesale toy division.

Everything's A Dollar operates 61 stores in enclosed regional malls located primarily in the southeastern region of the United States.

GAINESVILLE, GA (JAN. 9) PR NEWSWIRE - First National Bancorp, (NASDAQ: FBAC) a Gainesville, Ga.-based holding company with 11 affiliate banks in North Georgia, has reported record results for 1989.

First National Bancorp Chairman and CEO Ray McRae reported preliminary fourth quarter 1989 earnings of $5,232,000 for the three month period ended Dec. 31, 1989, an increase of 10.43 percent over the same period last year. Earnings per share of 58 cents for the fourth quarter of 1989 compared to 53 cents in 1988, a 9.43 percent increase.

For the twelve months ended Dec. 31, Bancorp's net income was $21,093,000, up 17.78 percent over 1988 results. Record earnings per share of $2.36 for the year compared to $2.01 in 1988, a 17.41 percent increase.

Originally reported 1988 earnings per share of $2.11 have been restated to $2.01 to reflect the 1989 acquisitions of The Peoples Bank of Forsyth County and the Pickens County Bank, both of which were accounted for as poolings of interests.

Bancorp's year-end assets were at $1.463 billion, up 10.92 percent over year end 1988. For the fourth quarter of 1989, Bancorp reported a 1.43 percent return on average assets and a 15.90 percent return on average equity. For the 12 month period ended Dec. 31, the return on average assets was 1.53 percent, and the return on average equity was 16.93 percent which should continue to place the company's results well into the upper tier of its banking peer group.

BOSTON (JAN. 9) PR NEWSWIRE - Staples, The Office Superstore, announced today that Robert Voss will join the company as executive vice president, sales and merchandising.

Voss will oversee Staples' entire procurement, merchandising and marketing effort, and will report to Henry Nasella, the company's president and chief operating officer.

Voss, 40, was most recently senior vice president and member of the executive committee at Wal-Mart. He joined the retailer in 1975, and by 1984 rose to become vice president and general merchandise manager of Sam's Wholesale Club, the Wal-Mart division that has beome the nation's largest wholesale club chain.

Tom Stemberg, Staples chairman and chief executive officer, said "We pledged to ourselves when we started out that as we grew, we would build the best and most experienced management team in retailing. Rob led the development of Sam's Wholesale Club from a single store to a five billion dollar enterprise. He's one of the most talented powerful retail executives in business today."

Added President Nasella, "We're thrilled to have Rob aboard. He's a proven leader with tremendous people development and team building skills. He brings to Staples some of the culture of Wal-Mart -- the country's leading retailer, and a company we have always emulated."

The announcement represents Staples' second major management addition in recent months. In August, the company named Joe Vassalluzzo as exeuctive vice president, growth and development. Vassalluzzo, a recognized

authority in commercial real estate, had most recently served as president of American Superstores Development Company, where his span of control encompassed more than 550 stores and significant shopping center holdings.

Boston-based Staples pioneered the deep discount office supply industry with the opening of its first store in May, 1986. The company currently operates 37 stores in nine states, and plans to operate as many as 139 stores by early 1993.

Staples common stock is traded on the NASDAQ National Market System under the symbol "SPLS."

NEW YORK (JAN. 9) PR NEWSWIRE - The Prospect Group, Inc. (NASDAQ: PROSZ) announced today that it plans to distribute its remaining common stock interest in the Illinois Central Corporation to Prospect's shareholders. After the distribution, to be made on Jan. 10 to shareholders of record as of the opening of business on that date, Prospect will retain no Illinois Central common stock except for shares retained for issuance pursuant to a stock purchase plan, options and warrants.

The shares of Illinois Central will be stapled to the related Prospect shares and initially will trade as a single unit following the distribution.

Last week Prospect announced that it was distributing a total of 5,550,513 common shares of Series A common stock of Illinois Central on the basis of one share of Series A common for four Prospect shares held of record as of the opening of business on Jan. 5.

A total of an additional 5,550,513 common shares of Series A common stock of Illinois Central will now be distributed on the basis of one share of Series A common for four Prospect shares held.

Prospect will retain voting control of Illinois Central through its preferred stock holding in the company. When the preferred issue, which represents the bulk of Prospect's equity investment in Illinois Central, is redeemed, the voting power will revert to the common shares. Such redemption is not expected to occur for several years.

Prospect stated that its decision to distribute the additional Illinois Central common stock was based in part on the positive reaction from Prospect's shareholders to last week's distribution announcement. Prospect also announced last week that it would distribute all of its common stock

in Sylvan Foods, Inc., another Prospect affiliate.

Prospect said that its decision to distribute the additional Illinois Central common stock was also based on an ongoing internal study of financial steps intended to result in higher values for Prospect shareholders. Such steps could include possible future distributions of stock interests in affiliated companies, sales of assets, and the downsizing of Prospect's operations as a whole.

EL SEGUNDO, CA (JAN. 9) PR NEWSWIRE - Valsan Partners of New York has contracted with Rockwell North American Aircraft to carry out re-engining installation of fourteen 727 aircraft during calendar year 1990 at Rockwell's Palmdale, Calif., aircraft assembly complex.

The task is another step in North American Aircraft's transition to a more balanced base of defense and commercial business. The Palmdale facility was fully dedicated to the B-1B bomber production program from 1982 to 1988, and is now used for a variety of military modification and demonstration programs.

Thirteen of the 727s are Federal Express aircraft. The fourteenth is privately owned. The 727s will receive new engines from Pratt & Whitney's JT8D-200 series.

North American Aircraft is expanding its modification business to include commercial aircraft in order to complement its continuing role as a military aircraft prime contractor. Aviation Week & Space Technology magazine reported in July 1989 that airframe maintenance requirements for aging aircraft in the worldwide jet transport fleet will require 23-30 million manhours of labor annually through the year 2000.

Rockwell's commercial modification business will utilize the majority of two large hangars at the company's Palmdale aircraft assembly complex, where total square footage is approximately 1 million square feet. The new mod center will capitalize on existing facilities and an experienced workforce to provide high-quality, fast-turnaround service for aging aircraft, fleet mods and other heavy modification/main tenance. The center's location near the major aviation hub of Los Angeles is convenient for both domestic and international aircraft operators.

Five 747-size aircraft can be handled simultaneously in fully enclosed hangars, and a large mix of other aircraft can also be accommodated both inside and outside. The initial 747 station with full nose dock for

Section 41 modifications will be available on March 1.

HOUSTON (JAN. 9) PR NEWSWIRE - Dow B. Hickam, Inc. (NASDAQ-NMS: DBHI) today announced that the company had decided to expense all start-up and product introduction costs for its newest product, Sorbsan, in 1989.

Approximately $700,000 of market research, start-up and product introduction costs will be charged to the fourth quarter of 1989, which will cause a quarterly loss for the company of about $175,000, or $.08 per share.

For the previous nine months of 1989, ended on Sept. 30, Dow B. Hickam, Inc. reported net earnings of $614,000 ($.28 per share) on sales of $8,554,000.

"Although this decision to incur all start-up costs at once will deplete 1989's last quarter and reduce annual net earnings substantially," president and chief executive Dow B. Hickam said, "we are certain that there will be direct benefits from it as soon as the first quarter of 1990."

"During the first two months of the Sorbsan introduction, clinical wound-care specialists have shown great interest in evaluating our new product," Hickam commented. "As evaluations are completed, we anticipate

product sales to develop strong forward momentum."

Hickam also noted, "With only normal operating expenses expected to be incurred against Sorbsan revenues in future quarters, we anticipate a rapid and positive impact on bottom-line results."

Dow B. Hickam, Inc. will release complete fourth-quarter and annual results for 1989 by the end of this month. The company's president also said, "In every other respect, the company will report strong results for 1989. Existing product lines continue to provide a good base from which to grow our specialty businesses."

Dow B. Hickam, Inc. is a manufacturer and nationwide marketer of health care and pharmaceutical products. The company's stock is listed on the NASDAQ National Market System. It is listed in alphabetical quotations as "Dow B. Hickam," or "Hickam."

OTTAWA (JAN. 9) PR NEWSWIRE - Cognos Incorporated, Canada's largest independent software company, today announced the formation of an independent company, to be called Multiview Inc. The new company will assume responsibility for the development and marketing of financial software applications built using Cognos' fourth-generation language, PowerHouse(R).

Multiview Inc., which is owned jointly by Multiview Inc.'s management team and by Cognos, has acquired two products from Cognos. These are MULTIVIEW(R) (with General Ledger, Accounts Receivable, Accounts Payable and Commitment Accounting modules), and PowerPlan(R), a financial planning and analysis tool.

"The creation of Multiview Inc. underlines a continued commitment to focus resources on the expansion of our core business, the PowerHouse family of application development and data management products," said Mike Potter, Cognos president and CEO. "It allows us to continue to develop our PowerHouse value-added reseller program, without the perception that we are competing directly with our own business partners. As well, an independently managed Multiview Inc. enables us to participate in the

rapidly growing financial software market in an aggressive, entrepreneurial way."

Multiview Inc. is headed up by two former Cognos employees, Richard Langevin, as president, and John Leslie, as senior vice-president, operations, Duncan Campbell has joined the company as vice-president, finance and administration. Langevin and Campbell are based in the corporate headquarters in Ottawa, while Leslie is based in the U.S. headquarters in Boston.

"This new organization means MULTIVIEW and PowerPlan will benefit from dedicated management, said Langevin. "New and existing customers will be ensured a commitment to support, maintenance and ongoing product enhancement. Since both products are PowerHouse-based, they will continue to be technological leaders."

Available on Hewlett-Packard 3000 computers, there are currently more than 1,300 installations of MULTIVIEW and PowerPlan in North America, the U.K., the Far East and Australia.

Cognos, whose 1989 fiscal year sales were $108 million (Canadian), now distributes products in close to 70 countries. It is the largest independent software company in Canada, and one of the 30 largest in the world. Its PowerHouse fourth-generation programming language has over 13,600 installations on Digital Equipment, Hewlett-Packard and Data General mid-range computers. PowerHouse will be available on the IBM AS/400 and additional UNIX platforms in early 1990.

PowerHouse is a registered trademark of Cognos Incorporated. MULTIVIEW and PowerPlan are registered trademarks of Multiview Inc. Other products mentioned herein are trademarks and/or registered trademarks of their respective companies.

ST. PAUL, MN (JAN. 9) PR NEWSQWIRE - H.B. Fuller Co. (NASDAQ: FULL) today reported that net sales for the fourth quarter ended Nov. 30, 1989, were $189,622,000, up 5 percent from $180,909,000 for the same period in 1988. Net earnings for the fourth quarter were $5,051,000, up 5 percent from $4,805,000 in 1988. Earnings per share increased 5 percent to 53 cents, compared to last year's 51 cents per share.

Net sales for fiscal year 1989, were a record $753,374,000, up 10 percent from $685,034,000 for fiscal 1988. Net earnings were $15,671,000, down 26 percent from $21,081,000. Earnings per share were $1.64, down 26 percent from $2.20 per share for fiscal 1988.

In the fourth quarter, Latin American operations achieved a significant increase in sales and a substantial improvement in operating earnings.

In the immediate aftermath of the U.S. military action to oust dictator Gen. Manuel Noriega, widespread looting of commercial properties occurred, including several of Fuller's properties, and caused substantial loss, in the first quarter of 1990. Negotiations are underway with insurance companies and the U.S. government for a settlement on these losses.

European sales were up moderately in spite of being adversely affected by a strong dollar. Operating earnings were up substantially from the fourth quarter 1988. Gross margin improved from the previous year's fourth quarter.

Asia/Pacific and Canada both experienced a moderate increase in sales with operating earnings being down substantially from last year's fourth quarter.

In the U.S., the Adhesives Sealants and Coatings Division's sales were approximately equal to the sales of fourth quarter 1988, with operating earnings up moderately from fourth quarter last year. Gross margins, when compared to the previous year, were approximately equal to the same quarter in 1988.

Specialty Divisions, as a whole, experienced a significant increase in sales, with operating earnings being up substantially when compared to the same quarter of the previous year. Sales for TEC Incorporated, a wholly owned subsidiary, were down although operating earnings were up substantially due to an improvement of gross margins and control of operating expenses. The Industrial Coatings Division generated substantial sales and earnings increases. Sales growth for Monarch Division, and Foster Products, a subsidiary company, was Moderate, while operating earnings for each were up substantially from one year ago. The Linear Division had a significant increase in sales with operating

earnings up substantially from the fourth quarter of 1988.

The lagging performance of acquisitions made in 1988, start-up expenses of new plants, and a lack of growth in some U.S. markets all contributed to the 12-month earnings short fall.

The effective tax rate for the fourth quarter and year-to-date are 11.5 percent and 6.1 percent higher, respectively, than for comparable periods in 1988. The related earnings affects are 11 cents and 19 cents, respectively. The primary reason for the increased effective tax rate was that 1989 had a greater proportion of non-U.S. earnings, when compared to 1988.

President Tony Andersen said, "At H.B. Fuller Company we manage our business for the long run. While we are not pleased with this year's financial performance, we are confident that investments made in the 1980s will result in benefits for the 90s."

#90009p0366 01/09/1990 ~PR Newswire

HIGHLAND PARK, MI (JAN. 9) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today expanded the "Guaranteed Rebate" program to include 1990 Plymouth Sundance and Acclaim, Dodge Dynasty, Shadow and Spirit and Chrysler New Yorker Landau and Salon models.

The program provides retail purchasers or leasees taking delivery of these vehicles from Jan. 9 through Jan. 31, 1990, a rebate of $1,000. If a higher rebate is offered on these models by Chrysler from Feb. 1, 1990, through Sept. 30, 1990, the customer will receive the difference.

Special low annual percentage (APR) financing is available as an alternative to the "Guaranteed Rebates." And Chrysler guarantees buyers who elect low APR that if the cash incentive increases, it will pay the difference in the cash incentive amounts.

The low APRs are: 6.9 percent for one to 24 months, 7.9 percent for 25 to 36 months and 9.9 percent for 37 to 60 months.

Other changes to Chrysler's incentive program include an increase in the rebate on 1989 Dodge Shadow, Spirit and Dynasty, Chrysler New Yorker and Plymouth Acclaim and Sundance models to $1,000.

WASHINGTON (JAN. 9) PR NEWSWIRE - U.S. Sen. Arlen Specter (R-Pa.) today announced that the Navy awarded a $117,900,000 contract modification to the Bell Boeing Corp. for research and development of the V-22 aircraft.

The contract was awarded to Bell Boeing's Joint Program Office in Arlington, Va. Forty-five percent of the work on the V-22 will be done in Philadelphia. The remaining work will be done in Fort Worth, Texas. Specter said the expected date of completion is June 1992. The contract combines purchases for the Navy, Marine Corps and Air Force.

Specter also announced that Bell Boeing was the recipient of a Navy contract worth more than $5 million for the full-scale development of one V-22 operational flight trainer. Forty-five percent of the development and construction will be done in Philadelphia; the remaining work will be done in Fort Worth. The expected completion date for this project is February 1992.

Also announced today, the General Electric Corp. (NYSE: GE) in Philadelphia was the recipient of a $9 million contract increase from the Air Force. The money will fund improvements and modifications for the power supply of GE's B-10 Communications Satellite. Completion of the project is expected at the end of 1994. This increase raises GE's existing contract for the Satcom project to more than $600 million.

BOSTON (JAN. 10) PR NEWSWIRE - The First National Bank of Boston, in its capacity as trustee for holders of notes issued by Bond Brewing Holdings Limited, announced today that it has received payment on a sight draft submitted to National Australian Bank Limited to permit payment on Bond Brewing's zero coupon notes due on Jan. 22, 1991.

The action taken by Bank of Boston's (NYSE: BKB) Corporate Trust Department is the result of an automatic acceleration of the notes because of appointment of receivers for Bond Brewing Holdings Limited in Australia on Dec. 29, 1989.

The zero coupon notes can be presented for payment of the accreted value as of the acceleration date at Bankers Trust Company in New York, the only U.S.-based paying agent for this Eurobond issue. Other non-U.S. paying agents are listed below.

Bond Brewing Holdings Limited is the principal Australian brewing subsidiary of Bond Corporation Holdings Limited. Bond Corporation

Holdings Limited is also the parent corporation for G. Heileman Breweries based in Pittsburg.

CALGARY, ALBERTA (JAN. 10) PR NEWSWIRE - Interhome Energy Inc. announced today that it plans to issue Canadian $125 million of Series J Debentures. The non-redeemable debentures will bear interest of 11.0 percent, mature on Feb. 28, 1995, and are being underwritten on a bought deal basis by Nesbitt Thomson Deacon Inc., Wood Gundy Inc. and Burns Fry Limited. The net proceeds of the issue will be used for general corporate purposes, including the reduction of floating rate indebtedness.

Interhome Energy separately entered into agreements which effectively convert the Series J Debenture obligations, to pay interest and repay principal, into U.S. dollars.

The company also announced that its board of directors today declared a quarterly dividend of $0.50 per share payable March 1, 1990 to shareholders of record on Feb. 15, 1990.

BRUSSELS, BELGIUM (JAN. 9) UPI - The European Community's executive Commission said Tuesday it had terminated unfair trading proceedings against the Coca-Cola Export Corporation which undertook to terminate

exclusivity provisions and fidelity rebates.

"The undertaking will have the effect of ensuring that competition in the soft drinks markets of the European Community will be strengthened to the advantage of both competitors of Coca-Cola Export and consumers in general " the Commission said.

The Commission statement said it had started the proceedings against the Coca-Cola subsidiary in 1987 on basis of EC rules against abuse of a dominant position by any company operating in the Community.

The Commission had said that Coca-Cola Export held a dominant position in the Italian cola drinks market and abused this position by granting fidelity rebates to large distribution chains as a reward for selling only Coca-Cola. The Commission also said that by these actions Coca-Cola Export impeded the access of competitors to this market.

While denying any dominant position or abuse of it, Coca-Cola Export agreed to modify its agreements with those distributors, canceling any fidelity or other rebates as of Jan. 1, 1988, the commission said.

The Commission found the modifications compatible with EC competition rules, but continued the proceedings relating to Coca-Cola Export's behavior before 1988, the statement said.

Coca-Cola Export then offered an undertaking, committing it to complying with specific obligations regarding its commercial practices concerning cola-flavored soft drinks, the commission said.

The Commission accepted the undertaking as satisfactory and terminated its proceedings. The undertaking provides that Coca-Cola Export will not include in agreements with large distributors in any EC member state:

- Exclusivity provisions, granting rebates or other advantages on condition
  the customer does not purchase other cola-flavored drinks.
- Target rebates, conditioning rebates on the attainment of purchasing
  targets of Coca-Cola set for the customer for periods exceeding three
  consecutive months.
- Combined target rebates, for reaching aggregate purchasing targets of both
  Coca-Cola and other beverages produced by Coca-Cola Export.
- Tying provisions, conditioning rebates on the purchase of other beverages
  produced by Coca-Cola Export along with Coca-Cola.

Coca-Cola also undertook to abstain from unilateral restrictive practices having an equivalent effect, the Commission said.

LONDON (JAN. 9) UPI - Stock prices were mostly unchanged in light trading at midday Monday on the London International stock exchange.

The key Financial Times 100-stock index, which was off 13.5 points to 2,431.0 points Monday, was down 0.1 point at 2,431.2 points. The narrower top 30 industrial average was up 2.9 points, at 1947.9 points.

Volume was a moderate 313 million shares, up from 210 million shares traded during the same period Friday.

The market opened lower following the sharp drop on the Tokyo Stock Exchange, but a strong trend on the FT-100 futures market helped stage a recovery.

At midday, the FT March futures stood at 2,480 points, up from 2,474 points at the opening. Blue-chip stocks led the market.

Reuters was up 43 cents at $17.50, reflecting a strong demand late Monday in New York, and STC stock rose 15 cents to $4.55, following a report of takeover of its ICL computer subsidiary.

Oil group Burmah staged a recovery from its last week's losses and rose seven cents to $11.04.

British Telecom was up two cents at $4.98. But Cable & Wireless was down 23 cents to $9.39, following rumors that a leading brokerage firm was about to lower the company's debt rating.

Eurotunnel was up eight cents to $11.02, with investors awaiting news from the talks between the company and its bank lenders.

#90009u1629 01/09/1990 ~United Press International
NEW YORK (JAN. 9) UPI - NBC won the battle of the bowl games and the ratings race, CBS made an end run around football and came in No. 2, while ABC found the Sugar Bowl a bitter ratings disappointment, it was reported Tuesday.

CBS News also broke the 13-week winning streak of ABC's ''World News Tonight'' with Peter Jennings, edging into first place by a tenth of a rating point in the tight race.

On New Year's Day, a Monday, NBC pre-empted its usual movie to bring viewers the Orange Bowl, Colorado vs. Notre Dame. The game wound up in a tie for 13th place, allowing NBC to edge out CBS for the night.

Compare that to ABC's Sugar Bowl, Miami vs. Alabama, which ranked 76th on a list of 84 shows and gave ABC single-digit ratings for the night.

CBS, meanwhile, appealed to the football-phobes with its regular schedule of comedies, except for ''The Famous Teddy Z,'' which was pre-empted for the night and goes on hiatus after Jan. 15. The extra half-hour went to a special one-hour ''Designing Women,'' on which Charlene had her baby, making Monday even more female-oriented than usual.

The strategy worked and CBS had its highest-rated Monday night of the season, just two-tenths of a rating point below NBC.

''Designing Women'' came in 10th for the week, winning its time period against the Orange Bowl. ''Murphy Brown'' (18th place), ''Newhart'' (tied for 23rd), ''Major Dad'' (27th) and ''Doctor, Doctor'' (33rd) had their highest ratings and came in solid No. 2 in their time periods, just a tad below the Orange Bowl.

Monday night will be up for grabs now in the ratings race, with ABC's top-rated AFL football season at an end. The ratings next week will show how ABC's ''Rock Hudson'' biopic fared against CBS comedies and the second installment of NBC's ''Drug Wars: The Camarena Story.''

The Sunday movie battle went to CBS with ''Murder in Black and White,'' in 21st place. The opening episode of NBC's ''Drug Wars: The Camarena Story'' tied for 35th, while ABC's theatrical flick, ''Heartbreak Ridge,'' ranked 41st.

There were two new series on the schedule - ''Father Dowling Mysteries,'' an NBC hand-me-down that ABC picked up - came in 47th, while Shadoe Stevens in ''Max Monroe'' was 59th.

In the news ratings, ''CBS Evening News'' with Dan Rather was No. 1 with a 12.0 rating and a 21 share. ABC's ''World News Tonight'' with Peter Jennings was a very close second with an 11.9 rating and a 21 share. ''NBC Nightly News'' with Tom Brokaw was third with an 11.0 rating and a 20 share.

NBC won the ratings race for the week ending Jan. 7, according to the A.C. Nielsen Co., with a 15.8 rating and a 25 share. CBS took over second place with a 13.4 rating and a 21 share while ABC was third with a 12.1 rating and a 19 share.

The 16-week-old season-to-date ratings show NBC with a 14.8 rating and a 25 share, ABC with a 12.9 rating and a 22 share, and CBS with a 12.2 rating and a 20 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Jan. 7, according to the A.C. Nielsen Co., were:

1. (tie) The Cosby Show (NBC)
2. Cheers (NBC)
3. Roseanne (ABC)
4. Golden Girls (NBC)
5. 60 Minutes (CBS)
6. Different World (NBC)
7. Murder, She Wrote (CBS)
8. (tie) Empty Nest (NBC)
9. Wonder Years (ABC)
10. Designing Women (CBS)

#90009u1784 01/09/1990 ~United Press International

NEW YORK (JAN. 9) UPI - The grocery checkout is a good starting place for social responsibility, according to "Shopping for a Better World," a guidebook for supermarket shopping released Tuesday.

Published under the premise that "consumers' small change can add up to big change in corporate America," the 1990 edition of "Shopping for a Better World" rates 168 consumer-products companies and more than 1,800 brands in 11 areas of social and environmental responsibility.

It is nearly twice the size of last year's guide - the first published by a New York consumer group called the Council on Economic Priorities - and has been expanded to include a section that rates consumer-products makers in the area of family benefits given to employees. New this year as well, supermarket chains were rated.

This year's most socially responsible companies include New York-based Avon Products Inc., which announced an end to all laboratory animal testing in 1989, Ben & Jerry's Homemade Inc., a Waterbury, Vt.-based company that gives ten percent of its pre-tax profits to charities, and Celestial Seasonings of Boulder, Colo., which runs a program that makes Teddy Bears available for police officers to give to children at the scenes of traumatic incidents.

Only 15 companies out of 168 were recognized by the publishers for earning top grades in at least nine out of the 11 categories evaluated. The others were health-food maker Dolefam of Washington, Eastman Kodak Co. of Rochester, N.Y., General Mills of Minneapolis, Minn., Johnson & Johnson Co. of New Brunswick, N.J., and Kellogg Co. of Battle Creek, Mich.

Rounding out the list: Minnesota Mining and Manufacturing Co. of St. Paul, Minn., Newman's Own Inc. of Westport, Conn., Polaroid Corp. of Cambridge, Mass., Procter & Gamble Co. of Cincinnati, Quaker Oats Co. of Chicago, Sara Lee Corp. of Chicago and Tom's of Maine.

By contrast, four major companies were blasted by the guide for receiving the lowest grades in at least four of the 11 categories evaluated. They

included New York-based American Home Products Corp., the maker of Chef Boyardee, Easy Off, Dristan, and Woolite, which gives a Scrooge-like 0.4 percent of pre-tax earnings to charity. The corporate average for charitable donations is 1.6 percent of pre-tax earnings, the guide said.

Castle & Cooke Inc., the Los Angeles-based maker of Dole products, and Reynolds Metals Co. of Richmond, Va., both were given thumbs down for not having women in upper management or on their boards of directors.

Rounding out the list of biggest offenders was Kimberly-Clark Corp. of Dallas, whose disposable diapers are a bane to waste disposal systems, the guide said.

Alice Tepper Marlin, one of the guide's four co-authors, said if every consumer changed just one out of ten products he or she buys, that would send a strong message to corporate America.

"Nobody should feel guilty because they don't switch from the only peanut butter their child will eat or because they don't want to give up a favorite cereal," she said. "We've evaluated so many products we know people will be able to take action on at least one."

A recent Council on Economic Priorities poll of 968 buyers showed that 78 percent of the respondents switched brands because of the guide's ratings, Marlin said.

The 1989 guide sold 350,000 copies and the publishers said they have already taken orders for over 55,000 copies of the pocket-sized 1990 edition. This year's guide was also published in paperback size by Ballantine Books, which plans to distribute "Shopping for a Better World" in bookstores and supermarkets.

#90009u1868 01/09/1990 ~United Press International

DALLAS (JAN. 9) UPI - Stonehouse & Co., a supplier of telecommunications network management software, Tuesday filed a lawsuit against International Business Machines Corp., accusing the giant corporation of unfair trade competition and deceptive advertising.

The complaint, filed in a state district court, asked for an injunction to prohibit IBM from interfering with Stonehouse's customer contracts and a declaration that IBM's new "best solution" advertisements are false and misleading. The suit sought an unspecified amount of damages.

"Our complaint charges IBM with commercial blackmail," said Marshall Roberts, Stonehouse founder and president. "It charges that IBM has used its immense size and power to muscle us out of a group bidding for a

multimillion dollar contract from Chevron Industries."

The complaint alleged that MCI Communications Corp. had selected Stonehouse's MONIES software package for a telecommunication network it was developing for Chevron Industries.

It said MCI needed essential IBM data processing products for the project which IBM initially agreed to provide. But, the suit said, about four days before the complex bid was due, IBM threatened MCI with "walking" from the bid unless MCI agreed to buy IBM's own software package.

The complaint alleged MCI was forced to give in to IBM's "bullying" and substitute the IBM product, resulting in a substantial loss to Stonehouse. Additionally, Stonehouse's complaint said IBM was marketing a product that was not yet available.

Roberts said it was a big step for Stonehouse to go after a company the size of IBM. "We believe that it's un-American to use commercial blackmail to drive out a small business like Stonehouse- especially when we can offer a better product for less cost," he said.

An IBM spokeswoman in Armonk, N.Y. declined to comment on the allegations, saying her company had not seen the complaint.

#90009u1903 01/09/1990 ~United Press International

CHICAGO (JAN. 9) UPI - A standoff between two powerful unions foiled efforts to draft a new employee-led buyout of United Airlines, prompting parent UAL Corp., to explore a recapitalization to put cash in shareholders pockets, company and union spokesmen said Tuesday.

UAL stock soared on news of the restructuring effort. In the afternoon, UAL was trading at $164 on the New York Stock Exchange, a gain of $7.375 on volume of more than 900,000 shares.

The United councils of the Airline Pilots Association and the Association of Flight Attendants, however, reiterated their support for an employee buyout and said they opposed restructuring moves.

Efforts to draft a new bid were stalled by wrangling with the International Association of Machinists, United's biggest union, whose opposition helped scuttle the $6.75 billion, $300 a share employee-led buyout that collapsed for lack of financing in October.

Condor Partners, a major UAL stockholder, moved in following the collapse of that deal and threatened to mount a campaign to seize control of the UAL board of directors.

The New York investment group, which holds 11.8 percent of UAL stock, demanded that the present board find a buyer buy Monday or begin pursuing a recapitalization plan.

With no bid on the table Monday, UAL directors held a telephone conference and agreed to instruct the company's financial advisers to draft a recapitalization plan for consideration at a Jan. 25 board meeting.

"Among the proposals to be studies is a plan which would involve an exchange offer of UAL debt securities for a significant portion of UAL's outstanding stock," UAL said in a statement released following the Monday night phone conference.

"If approved by the Board, the recapitalization plan would be implemented as promptly as practicable thereafter," it said. The statement also noted that the board would remain open to buyout bids from employees or other parties.

The flight attendants and pilots unions Tuesday issued statements repeating their interest in a buyout that would give United employees a majority stake in the airline. Union officials said they planned further meetings in hope of putting together another bid before the Jan. 25 UAL board meeting.

Kathy Hardin, a spokeswoman for the pilots union, said longstanding disagreements between the pilots union and the machinists continued to be the major obstacle to efforts to mount a new bid. She noted that non-union employees also have balked at joining a buyout deal.

But F.C. Dubinsky, head of the United council of the pilots' union, warned that the union would fight any recapitalization effort involving substantial new debt with little or no employee ownership. "Were such a transaction proposed, the pilots will do everything in their power to assure that it is not consummated," he said.

A debt-laden restructuring also could lead to a rebellion by top UAL management officials, including Chairman Stephen Wolf, who were participants in the $6.75 billion buyout bid that collapsed in October.

Rumors surfaced last week that Wolf and John Pope, executive vice president and chief financial officer, planned to resign. While neither has made any such threat public, a source close to the UAL board said both men are concerned about debt restructuring and may choose to leave if their fellow directors adopt a plan "they don't feel they can live with."

PARIS (JAN. 9) UPI - A disgruntled former employee shot and critically wounded the chief of Xerox's French subsidiary Tuesday while holding him and four other employees hostage at gunpoint for several hours, police said.

Oliver Groues, president and chief executive officer of Rank Xerox France, was reported in critical condition after the other hostages were released and Daniel Vielle, the former employee, was taken into custody, police said.

Vielle, brandishing a gun, took the employees hostage after entering the executive suite of the company's headquarters in La Defense business district on the western outskirts of Paris at about noon, officials said.

Witnesses told police that Vielle burst into the office of Groues' deputy, Bernard Reibell, forced him at gunpoint to the president's office and took three other employees hostage.

Three of the hostages were released unharmed at about 6 p.m. and Reibell, also unharmed, was freed at the time of Vielle's arrest, police said.

Police said Vielle was taken into custody at about 7:10 p.m. and Groues was taken by ambulance to a nearby hospital suffering from a gunshot wound.

A policeman at the scene said Vielle appeared to be armed with a sawed-off ''riot gun.''

Officials said Vielle, born in 1945 and the father of three children, had been laid off by Rank Xerox several years ago and was demanding compensation.

Police surrounded the building Tuesday afternoon and evacuated all the other employees of the company from their offices on the top four floors of the 19-story skyscraper. Members of the elite security force RAID were called in during the afternoon along with Vielle's lawyer, officials said.

HONOLULU (JAN. 9) UPI - Bancorp Hawaii Inc. has signed a definitive agreement to acquire the parent company of First Federal Savings and Loan Association, bank officials announced Tuesday. In November, the parent company of the state's largest bank, Bank of Hawaii, signed a non-binding agreement to purchase FirstFed America Inc.

Federal regulations prohibited FirstFed from striking a firm agreement until three years had elapsed after its conversion from a mutual to a stock association in late December 1986.

"The joining of two successful and extremely strong financial institutions will be good for the community and provide great opportunities for our employees. We are proud that FirstFed has been able to maximize our shareholders' vlue over the relatively short period of time since our conversion to a stock company three years ago," said Wayne E. Jack, chairman, president, and chief executive officer of the thrift.

"We believe the proposed acquisition offers an excellent growth opportunity for both Bancorp and FirstFed," said H. Howard Stephenson, board chairman and chief executive officer of Bancorp.

The agreement calls for a cash payment of $38.50 per share of FirstFed stock or $141 million for all shares currently outstanding. The boards of directors for both financial institutions have approved the agreement, but it must still be approved by FirstFed shareholders, the bank said. The acquisition also needs approval by regulatory officials, including the Federal Reserve Board and the Office of Thrift Supervision.

#90009u2378 01/09/1990 ~United Press International

(JAN. 9) UPI - Led by a gasoline jump of more than 2 cents a gallon, U.S.

oil prices bounced back smartly Tuesday from three days of steep declines on a technical correction and anticipation of an industry report showing lower domestic stocks.

It was partly ''a technical correction bounce'' from the losses in the last three sessions on the New York Mercantile Exchange of 13.93 cents for heating oil and 8.75 cents for unleaded gasoline, said John Hill of Merrill Lynch Energy Futures in New York.

The analyst also said, ''There was a feeling among traders that we're going to see good heating oil and gasoline product drawdowns'' in the American Petroleum Institute's weekly report slated for release later Tuesday.

Hill said gasoline prices rebounded more because gasoline supplies were expected to show a greater decline.

The inventory decline is linked to some larger refineries in the normally warm southern part of the country still being at reduced production as a result of the Christmas weekend freeze of cooling and control systems, he said.

On average, about 50 percent of a refinery's output is gasoline and 22-26 percent is heating oil, with the remainder divided among other products such as jet fuel.

On the Merc, unleaded gasoline gained 2.40 cents to end the day at 60.88 cents a gallon. On the New York Harbor cash market, it rose 2.50 cents to 62.75 cents a gallon.

Home-heating oil, which has been driving the oil market for the last six weeks, climbed 0.72 cent on the Merc to 65.05 cents a gallon in a day of wild trading that saw a high of 66.80 cents and a low of 64 cents.

''Given the tremendous volatility and the low level of inventories, any news tends to move the market,'' said Robert Baker, senior energy analyst with Prudential Bache Securities Inc. in New York.

He said heating oil had moved higher on reports that temperatures in the Northeast, where most of the product is used, would drop this weekend to more normal levels.

Following the products, West Texas Intermediate, the benchmark U.S. crude, gained 45 cents to finish the day on the Merc at $22.07 a barrel.

On the U.S. Gulf Coast spot market, where crude is traded for cash and often follows the Merc by a day, WTI fell 40 cents to $22.20 a barrel.

Last week the API said U.S. refinery production had fallen 11 percent, or 800,000 barrels a day, as a result of the Christmas freeze that hit Exxon' Baton Rouge, La., facility with its daily output of 455,000 barrels and three Shell refineries with a combined daily production of 733,000 barrels.

Exxon said its refinery was back to 50 percent of output. But the company said it would not know for another week when the facility would return to full production.

Shell spokesman Norm Altstedter said one of his company's three refineries is operating at normal capacity. The other two have resumed production and are expected to be operating at full capacity next week.

Marathon Oil Co., the Findlay Ohio unit of USX Corp., raised the posted price it will pay for crude as it comes out of the ground by 25 cents to $21 a barrel for WTI. It had lowered the price by $1.25 a barrel Monday.

On the European spot market, Britain's widely traded North Sea Brent crude was quoted at $20.27 a barrel, up 22 cents. The United Arab Emirates' Dubai Light, the key Middle East crude, gained 20 cents to $17.15 a barrel.

On London's International Petroleum Exchange, which often follows previous day trading on the Merc, North Sea Brent finished the day at $20.14 a barrel, down 38 cents.

Gas oil - European heating oil - for January delivery finished the day at $190 a ton, or 60.70 cents a gallon, a drop of 5.91 cents.

But Peter Gignoux of Shearson Lehman Hutton's London office said he expected prices to rebound this week partly because of a further anticipated drop in Soviet gas oil exports. ''The Russians are acting a little funny.''

He explained, ''The Russians haven't announced there are any problems in their (export) program. They just haven't given us any loading dates (for 1990).''

Soviet exports, which normally run 105,000 barrels to 140,000 barrels a day of gas oil, or European heating oil, already have been reduced by 25 percent to 30 percent this year, the analyst said.

#90009u2386 01/09/1990 ~United Press International

NEW YORK (JAN. 10) UPI - Profits of companies in the S&P 500 will increase about 17 percent in 1990, an improvement over 1989's gain of about 2 percent, Standard & Poor's said Tuesday in its 1990 Corporate Profit Study.

Much of the gain will reflect the absence of massive writeoffs in the banking sector, said S&P chief economist David M. Blitzer.

Among the industrial companies in the index, the gain is expected to be 11 percent, compared to 6.5 percent in 1989, S&P said.

Banks, retailers and computer software and hardware companies are expected to be among the most profitable in 1990. Computer software manufacturers will outpace hardware manufacturers, S&P said.

The losers are expected to be automobiles and chemicals.

Money center banks' profits are expected to soar, while the outlook for regional banks is ''spotty,'' S&P said.

The semiconductor is expected to see slow profit growth and oil profits are expected to suffer from low crude prices, the study said.

The economy should get off to a slow start, putting pressure on earnings until about mid-year, the study predicted.

By mid-1990, ''we should seee the beginnings of a turnaround,'' Blitzer said. ''By then a combination of more moderate cost increases, lower interest rates, and a pickup in the economy will put profits back on a growth track.''

#90009u2473 01/09/1990 ~United Press International

NEW YORK (JAN. 9) UPI - Merrill Lynch & Co. laid off 10 employees in its 130-member equity research department, part of a company-wide review designed to increase profitability, a spokesman said Tuesday.

The brokerage informed employees in November that it was reviewing all its operations in an effort to trim costs and there were likely to be staff reductions, said spokesman Kirk Petersen.

''The layoffs are part of the result of that review and the review is ongoing,'' he said.

Dismissed from the equity research department were eight stock analysts and two administrative employees, the company said.

Last month Merrill Lynch transferred clearing accounts from its subsidiary Broadcort Capital Corp. to the Pershing Division of Donaldson, Lufkin & Jenrette Securities Corp. in a move that reduced staff by about 300 employees.

Merrill Lynch has reduced its worldwide staff to 40,000 from 46,000 just prior to the October 1987 stock market crash.

#90009u2564 01/09/1990 ~United Press International

NEW YORK (JAN. 10) UPI - The nation's gasoline supplies plunged 6.4 million barrels last week as a result of damaged refineries on the U.S. Gulf Coast, but a sharp rise in imports prevented a similar drop in heating oil, the American Petroleum Institute reported Tuesday.

For the week ended Dec. 5, the oil industry group's weekly survey showed gasoline supplies declined to 210.5 million barrels from 216.9 million barrels in the prior week and were well below year-ago levels of 228.8 million barrels.

Anticipation of the drop drove gasoline prices up 2.4 cents a gallon on the New York Mercantile Exchange Tuesday.

Stocks of unleaded gasoline, which accounts for nearly 90 percent of the domestic market, also fell to 157.6 million barrels from 161.8 million barrels a week earlier but remained higher than year-ago levels of 149.6 million barrels.

Production of both gasoline and heating oil increased last week as damaged refineries returned to partial production.

Gasoline production rose slightly to 6.3 million barrels daily from 6.1 million barrels a day in the previous week but remained lower than year-ago output of 7.1 million barrels daily.

Gasoline imports dropped off to 261,000 barrels daily from 351,000 barrels daily in the previous week and were well below year-ago imports of 350,000 barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - fell slightly to 107.8 million barrels from 108.2 million barrels a week earlier and remained below year-ago levels of 126.9 million barrels.

Distillate production edged up to 3.2 million barrels daily from 3.1 million barrels daily in the preceding week, which was the same level as a year ago.

Distillate imports zoomed to 429,000 barrels a day from 361,000 barrels a day in the previous week but were much higher than year-ago imports of 363,000 barrels a day.

The decline in product inventories, especially in gasoline, was linked to

some larger refineries still being at reduced production in the normally warm southern part of the country as a result of the Christmas weekend freeze of cooling and control systems.

On average, about 50 percent of a refinery's output is gasoline and 22-26 percent is heating oil, with the remainder divided among other products such as jet fuel.

Last week the API said U.S. refinery production had fallen as a result of the Christmas freeze that hit Exxon' Baton Rouge, La., facility with daily output of 455,000 barrels and three Shell refineries with a combined daily production of 733,000 barrels.

The API said Tuesday that U.S. refineries operated at 81.1 percent of $apacity last week as refineries returned to production, compared with 79.3 percent a week earlier and 85.3 percent a year ago.

Exxon said its Baton Rouge refinery this week was back to 50 percent of output. But the company said it would not know for another week when the facility would return to full production.

Shell spokesman Norm Altstedter said one of his company's three refineries is operating at normal capacity. The other two have resumed partial production and are expected to be operating at full capacity next week.

API said crude oil imports declined marginally to 5.7 million barrels a day from 5.5 million barrels a day in the previous week but were substantially higher than year ago imports of 5.1 million barrels a day.

Imports of refined products edged up to 2.4 million barrels daily from 2.3 million barrels daily in the preceding week and were lower than year-ago imports of 2.5 million barrels daily.

Crude oil inventories rose to 342.2 million barrels from 341.8 million barrels in the prior week and were higher than year-ago levels of 329.0 million barrels.

#90009u2582 01/09/1990 ~United Press International

NEW YORK (JAN. 10) UPI - Merck weighed in for the fourth year in a row as America's most admired large corporation, according to Fortune magazine's annual ranking of corporate reputations released Tuesday.

Placing second was Philip Morris, which won top place in two of the survey's eight categories, the magazine said in its Jan. 29 issue.

At the bottom of the survey was Gibralter Financial Corp. of California,

the magazine said.

Rubbermaid dropped from its second-place ranking last year to finish third while Procter & Gamble jumped nine places to finish fourth, the survey said.

The 3M Co. dropped from third place last year to fifth place this year, and PepsiCo and Wal-Mart tied for sixth position.

At the losing end after Gibralter were Wang Laboratories, Control Data, Meritor Financial Group, Texas Air, LTV, National Steel, United Merchants & Manufacturers, K-H Corp. and Unisys. Wang, United Merchants, Unisys and K-H are making their debuts on the bottom ten, the magazine said.

In compiling its eighth annual survey, Fortune polled more than 8,000 top executives, outside directors and financial analysts on 305 companies in 32 industry groups.

The corporations were judged on the ability to attract, develop and keep talented people; innovativeness; financial soundness; community and environmental responsiblity; use of corporate assets; values as a long-term investment; quality of management and quality of products or services.

#90009u2671 01/09/1990 ~United Press International

DETROIT (JAN. 10) UPI - The sensuality and emotion of design have superseded the cold realities of value and fuel efficiency as market determinants of the 1990s auto market, a senior General Motors Corp. executive said Tuesday.

Charles M. Jordan, vice president of the No. l automaker's design staff, said automotive design has been in a slump in recent years, but this ''era of bland'' is coming to an end.

Jordan made his remarks in an evening address to the Automotive News World Congress, meeting in Detroit.

''The '90s will be a decade of bold, more sensual, more emotional design '' he said. ''Suddenly design is a lot more important to the business of selling cars.''

In the '70s and '80s, Jordan said, manufacturers shifted priorities away from design to things like quality, value and fuel efficiency and they were the great differentiators between products during the era, the reasons many customers selected one brand over another.

''Today quality, value and fuel efficiency aren't important differentiators any more. They're minimum standards.''

Jordan said there currently is no company that has asserted itself as the undisputed design leader but he expected GM to fill the void.

''We're committed to being the design leader,'' he said.

To create the more emotional designs that sell cars, Jordan said designers will have to approach their jobs differently. They will have to know their customers better, be more sensitive to shifts in social currents and forge stronger alliances with their partners in engineering and manufacturing. Otherwise, he said, truly emotional design will be impossible to achieve.

He predicted that, above all, the successful designs of the '90s would be distinctive.

''The bottom line today,'' Jordan said, ''is that our designs have got to move the customer and cause him or her to fall in love.''

#90009u2951 01/09/1990 ~United Press International
(JAN. 10)

Baseball

John Kibler, a 25-year umpiring veteran in the National League, has retired. Kibler, 61, worked his first game Sept. 13, 1963, and was named a crew chief in 1977.

Football

Former New England Patriots General Manager Jim Alek has joined Barcelona of Spain as head coach for the opening season of the European International League of American Football. Previously signed as coaches in the ILAF were Jack Elway for the London team and Walt Michaels for Helsinki. ... Ray Willsey has been named coach of the International League of American Football team in in Birmingham, England.

Harness Racing

The 1990 Breeders Crown year-end divisional championship series of harness races will be conducted in entirety at Pompano Park in Pompano Beach, Fla. The series will carry $4.5 million in purses, and the initial eight-race set of races will be Nov. 2.

Hockey

The Minnesota North Stars demoted goalie Kari Takko to their farm club in Kalamazoo for conditioning purposes. Takko, who didn't dress for the last six games, played in 13 games for the Stars this season, posting a 2-8 record with a 4.01 goals-allowed average. ... Czechoslovakian ice hockey players have agreed to get back on the ice after ending a strike called over the weekend, announced the official state news agency, CTK. The players called a general strike Saturday after learning that the near death injury of TJ Zlin player Ludek Cajka was inadequately insured by the Czechoslovak Ice Hockey Union.

Honors

Ozell Jones of the Tulsa Fast Breakers was named CBA player of the week after averaging 16 points and 16 rebounds in two games.

Olympics

An advisor to the International Olympic Committee's apartheid commission said he doesn't foresee an immediate readmission of South Africa to the Olympic Games. Fekrou Kidane, who met in Paris with that country's sports officials, said the South African delegation accepted advice offered in a positive spirit.

Skiing

Defending World Cup champion Vreni Schneider, feeling no pain from last month's successful knee surgery, won her second World Cup race in four days, capturing a slalom at Hinterstoder, Austria. Austrian Anita Wachter was the runner-up for the second day in a row and Christine Von Gruenigen of Switzerland was third.

Sumo

Hawaiian Ozeki (champion) Salevaa Atisanoe, hoping for promotion to the highest rank, easily gained his third straight victory in the New Year Grand Sumo Tournament at Tokyo. Yokozuna (grand champion) Chiyonofuji, Ozeki Asahifuji and two other low-ranked wrestlers also scored their third victories to tie for the lead.

Tennis

Rain washed out the second day of play at the $175,000 New South Wales Open and weather forecasters were predicting more rain for Sydney. ... Ivan Lendl signed a six-year merchandising contract with Japan's Mizuno Corporation reportedly worth $20 million plus special bonuses. ... Stanford was the unanimous choice for the No. 1 spot for both men and women's teams in the Volvo Collegiate Rankings. Sandra Birch of Stanford

was ranked first among individual women and Al Parker of Georgia was top among the men. ... Wimbledon's Centre Court won't have standing room this year, for the first time since it moved to its present site in 1922. The All England Club confirmed that the court's standing room for 2,000 is to be replaced by seats to comply with fire and safety regulations. ... Boris Becker will head the 32-man field for the first European ATP Tour event for 1990 in Belgium next February, organizers said Tuesday. The Belgian Indoor Championship will also feature Stefan Edberg, Miloslav Mecir and Jimmy Connors.

Track and Field

The British 60-meter record of 6.52 seconds by Olympic silver medalist Linford Christie has been disallowed because the track camera wasn't in line with the finishing line. Christie still keeps the record, however, with a time of 6:55, also clocked last winter. ... Romanian track and field athletes have been invited to join their Yugoslav counterparts and train at Split, Yugoslavia where the next European Championships are to be held, said Tanjung, the official Yugoslav news agency. ... Romanian Paula Ivan, the fastest woman to run the mile, has accepted an invitation to run at a Los Angeles event next week, reported Rompres, the official Romanian news agency.

Volleyball

The Soviet Union's 1988 Olympic gold medal volleyball team defeated Bulgaria in four sets in the opening match of the G-mex tournament, a three-day event in Manchester, England.

#90010b0011 01/10/1990 ~Business Wire

CARMEL, IN (JAN. 10) BUSINESS WIRE - Temple-Inland Inc. and Conseco Inc. Wednesday announced that they have signed an agreement in principle for the sale of Great American Reserve Insurance Co. (GARCO) to Conseco for approximately $145 million.

Conseco said it intends to consummate the acquisition of GARCO through Conseco Capital Partners L.P., a previously-announced Delaware limited partnership which Conseco is organizing in cooperation with institutional investors.

Temple-Inland estimates that its after-tax gain on the sale will be about $10 million, or 36 cents per share. With the closing of the transaction, expected during the first quarter, Temple-Inland will have completely withdrawn from the life insurance business, which it entered in 1983 with the purchase of GARCO.

W. Wayne McDonald, Temple-Inland executive vice president and chief financial officer, said, ''The sale of our life insurance companies will allow our financial services group to concentrate on its mortgage banking and savings and loan operations. Temple-Inland owns Lumbermen's Investment Corp., a mortgage banking company based in Austin, Texas, with a mortgage loan servicing portfolio totaling over $3.1 billion, and two Texas thrifts with assets over $4 billion.''

Stephen C. Hilbert, chairman and chief executive officer of Conseco, said, ''GARCO's field sales force has an excellent reputation for its ability to market and distribute products. We plan to capitalize on those strengths.''

Temple-Inland Inc. (TIN), based in Diboll, Texas, is a major manufacturer of paper, packaging and building products, in addition to its financial services. The company's stock is listed on the New York and Pacific Stock Exchanges.

Conseco Inc. (CNC), is a life insurance holding company based in Carmel, Ind., whose stock is listed on the New York Stock Exchange.

#90010b0012 01/10/1990 ~Business Wire

SEATTLE (JAN. 10) BUSINESS WIRE - Aldus Corp. Wednesday announced that the company's installed base has exceeded one-half million customers. This figure represents the entire line of Aldus products.

"We're pleased to recognize this milestone for Aldus products," said Aldus president Paul Brainerd. "This figure is an indication of how readily our products have been accepted in a short period of time."

Aldus Corp. was founded in 1984 to develop a new generation of software that would allow business and creative professionals to design and lay out publications on a PC or Macintosh computer.

Since that time, the company has expanded its line with three other products - Aldus FreeHand, a PostScript-language graphics program for the Macintosh; Aldus Persuasion, a desktop presentations program for the Macintosh; and Aldus PrePrint, a program for quickly and easily producing quality color separations from the desktop. The company also shipped an OS/2 version of PageMaker last September.

Aldus is the world's leading supplier of desktop publishing software. The company's flagship product, Aldus PageMaker, is available in 11 languages and sold in over 40 countries.

Aldus Corp. (NASDAQ: ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. Aldus distributes its products through a worldwide network of more than 12,000 authorized dealers and distributors.

#90010b0013 01/10/1990 ~Business Wire

RICHARDSON, TX (JAN. 10) BUSINESS WIRE - CONVEX Computer Corp. announced Wednesday the installation of a C220 supercomputer at Woods Hole Oceanographic Institution (WHOI), Falmouth, Mass., for use in a variety of signal processing applications.

The Woods Hole Oceanographic Institution, established in 1930, is an independent research organization dedicated to the pursuit of knowledge about the oceans. The institution is organized into five scientific departments and a policy group to pursue this knowledge. The organization uses theoretical and experimental approaches and employs research vessels, computers and laboratory instruments, satelites, and a host of free-floating and moored sensors on buoys. With the installation of the CONVEX C220 system, the WHOI is able to computationally study the ocean floor and obtain information using a number of different applications.

Daniel R. Burns, assistant scientist, Department of Geology and Geophysics is using the CONVEX system to model acoustic and seismic wave propagation in the ocean. By imaging the geology of the earth's crust, geologists try to understand the motion of the crustal rock plates which shape the earth's surface and ultimately are responsible for most of the earthquakes in the world. Imaging of the earth's interior is also important in the exploration of natural resources.

The CONVEX system is also being used by John Spiesberger, associate scientist, Applied Ocean Physics and Engineering Department, to map the temperature and currents of the ocean in three dimensions, based on measurements of sound waves which travel thousands of kilometers. Such information could help provide accurate weather forecasts in the future.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a

wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology. CONVEX, which is listed on the NYSE with the symbol CNX, has sold more than 550 systems in 33 countries. The installed base now represents more than a quarter of a billion dollars of cumulative revenues from nearly 350 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

#90010b0017 01/10/1990 ~Business Wire

CONCORD, NH (JAN. 10) BUSINESS WIRE - Community Bankshares Inc. (NASDAQ: CBNH), holding company for Concord Savings Bank, Wednesday announced its intention to make a provision of $10,000,000 into its allowance for possible loan losses for the quarter ending Dec. 31, 1989.

This action will bring the total allowance after charge-offs to approximately $10,300,000, representing 4.0 percent of total loans and 59.5 percent of non-performing assets which will total approximately $17,300,000 at Dec. 31, 1989.

As a result of making the provision, the company expects to report a loss of approximately $8,600,000, or $5.16 per share, for the quarter and approximately $8,500,000, or $5.05 per share, for the first six months of the fiscal year. The company's capital ratios will continue to exceed all applicable regulatory requirements. At Dec. 31, 1989, the company's common equity to total asset ratio will approximate 6.6 percent.

In making the announcement, Joseph Harrison III, president and chief exevcutive officer, stated that ''This extraordinary provision to the allowance for possible loan losses is being made in response to increased levels of non-performing loans and the substantial decline in real estate values that has taken place during recent months.

This unprecedented deflation of values in certain segments of the real estate market has led to depreciation in the value of the real estate securing our non-performing loans and has raised the possibility of further deterioration in our loan portfolios should the New Hampshire economy worsen appreciably in coming months.

This uncertainty over future events and the fact that we see no significant improvement in the market in the near future, has led us to designate approximately $4,200,000 of this $10,000,000 provision as

unallocated to any specific loans or loan portfolio.

This amount was reserved over and above the amount we now deem necessary and prudent to cover current non-performing loans. It is therefore available to handle unforeseen events and will be used against loans that may become troubled in the future.''

CONTACT: Community Bankshares, Concord

#90010b0021 01/10/1990 ~Business Wire

WHITE PLAINS, NY (JAN. 10) BUSINESS WIRE - IBM Corporation and Rational Wednesday announced that IBM has acquired an equity interest in Rational, a leading provider of computer-aided software engineering products and technology used to design, build and maintain complex software applications written in the Ada programming language. Rational is headquartered in Santa Clara, Calif.

Under the terms of the equity agreement, IBM has made an investment in Rational in the form of newly issued voting convertible preferred stock. Additional details of the equity agreement were not disclosed.

The two companies also announced marketing and development agreements that will focus on providing a high-function, comprehensive Ada solution for customers in the federal and aerospace marketplaces. Ada is a software language that originated with the U.S. Department of Defense and has evolved for use throughout the information processing industry.

Rational provides an integrated, interactive software development environment based on and supporting modern software engineering practices. This highly automated system supports the major tasks within the development life cycle such as requirements analysis, design and code generation.

Rational's products run on its proprietary system and, in conjunction with IBM Ada compilers, produce software applications that run on IBM System/370 platforms and the IBM RT PC. Rational also provides integrated capabilities to develop and debug Ada applications for embedded computers.

IBM and Rational intend to enhance Rational's Ada products to run with IBM's Advanced Interactive Executive (AIX)(a) reduced instruction set computer platforms.

IBM has been using Rational's software engineering tools and technical consulting services on a number of Ada-based complex systems projects it is handling for federal and aerospace customers. One example is the

Advanced Automation System (AAS), a program for modernizing the nation's Air Traffic Control System which IBM will develop, deploy and service.

Rational, formed in 1980, has field locations in Calverton, Md., Newport Beach, Calif., St. Louis, Paris and Stockholm. (a) AIX is a trademark of International Business Machines Corporation.

MELBOURNE (JAN. 10) BUSINESS WIRE - January 10, 1989, The Broken Hill Proprietary Company Limited (NYSE:BHP) Wednesday announced that its wholly owned subsidiary, BHP Petroleum (North West Shelf) Pty. Ltd., is evaluating its options for the sale or retention of its direct and indirect shareholdings in Woodside Petroleum Ltd., and has appointed J.P. Morgan as its financial advisor.

Woodside is incorporated in Victoria, Australia and listed on the Australian Stock Exchange. It is operator of, and through wholly-owned subsidiaries is a participant in, the North West Shelf Project. The Project is Australia's largest commercial development. It produces natural gas from the North Rankin A offshore platform and supplies the gas, via submarine pipeline, to the Withnell Bay processing and liquefaction facilities. From these facilities, pipeline gas is sold to the Western Australian market and LNG is exported under long term contract to eight electricity and gas utilities in Japan.

In 1976, BHP relied entirely on production from the Bass Strait oil and gas fields off south-eastern Australia for its petroleum income. Subsequent diversification has added substantial production interest offshore north and west Australia, onshore and offshore North America and in the North Sea. The Company has also built up exploration interests in some 20 countries, and has established a refining and marketing operation in the rapidly growing Pacific Basin market.

BHP Petroleum's direct and indirect shareholdings in Woodside amount to 40.03 percent of Woodside's shares. These comprise approximately 228.46 million shares in Woodside (34.27 percent) held directly and 8.51 million shares in North West Shelf Development Pty. Ltd. (50 percent), which in turn owns approximately 76.83 million shares in Woodside (11.53 percent). The closing price of Woodside shares on the Melbourne Stock Exchange on January 9, 1990 was A$3.32 per share.

Woodside's interest in the Project include 50 percent of the domestic gas phase, 16-2/3 percent of the LNG phase, and 16-2/3 percent of five of the seven LNG tankers planned for the Project. In addition, Woodside currently has a 25 percent interest in the condensate yield from the Project's gas recycling facility.

The Broken Hill Proprietary Company Limited is an international resources company with three principal lines of business: oil and natural gas, minerals, and steel. Headquartered in Melbourne, it operates on six continents. U.S. operations are headquartered in San Francisco, California.

#90010b0032 01/10/1990 ~Business Wire

SPARTANBURG, SC (JAN. 10) BUSINESS WIRE - Synalloy Corp. (ASE: SYO) announced Wednesday that it responded to Chariot Group's $12 per cash offer.

Following is the letter from Synalloy's Special Committee of the Board of Directors to Chariot Group Inc.:

The Special Committee of the Board of Directors of Synalloy Corporation has reviewed your letter dated December 13, 1989.

Over the past year since Chariot Holdings' initial $6.50 per share proposal, the Board of Directors and the Special Committee has on at least four occasions advised you and your affiliates that it will not consider any proposal to acquire Synalloy which does not contain firm evidence of financing. Despite repeated statements by you to the press and others that such evidence is forthcoming, Chariot Group's letter of December 13, 1989, with the attached letter from Security Pacific Business Credit Inc. is the first attempt to provide written support.

However, the Security Pacific proposal falls far short of what the Special Committee considers to be acceptable evidence of financing.

Security Pacific's proposal is just that, a proposal to consider, not a commitment to finance. As stated in the letter:

Please be advised that this letter is not to be construed as a formal commitment on Lender's part, but merely a proposal to you which is subject to, among other things, approval of the transaction by Lender.

Conditions for approval include the receipt of appraisals satisfactory to the Lender of Synalloy's fixed assets, completion of due diligence by the Lender, and 'the Lender's full satisfaction with the assets and properties the books and records, and the financial and business conditions of Borrower, following Lender's appraisal and evaluation thereof.' Your offer of $500,000 is payable only in the event a merger agreement is entered into and the aforementioned conditions, among others, are satisfied.

ROSEMONT, IL (JAN. 10) BUSINESS WIRE - Condo Netowrk Inc. and Covia have signed a contract for Covia to provide Condo Network with a new worldwide reservation system offering unprecedented marketing and management capabilities for hotels and condominium properties, it was announced Wednesday.

''Covia Reserve will enhance our system's capability to provide guest services,'' said John Wagner, Condo Network president and owner. ''We have ambitious growth plans for 1990 and beyond. We expect to lead the condominium representation services business in North America. Covia Reserve will help us achieve our business objectives.''

Under the agreement Covia will install Covia Reserve at Condo Network's central reservations center in Mission, Kan., and provide communications services to the more than 1,000 condominium properties Condo Network represents.

''We are excited to provide automation for Condo Network,'' said Barry Kotar, Covia president and chief executive officer. ''Condo Network is known for its leadership role in the condominium representation industry, providing efficient reservations and outstanding customer service.''

Condo Network is the nation's oldest, largest and most complete condominium rental source. Founded in 1983, it achieved 1988 sales of $13 million in bookings to affiliated resorts. Condo Network also provides air and car reservations for clients.

Covia Reserve, launched earlier this year, capitalizes on Covia's global communications network and state-of-the-art hotel/condominium software to process and store reservations. A key feature is rapid confirmation of guest reservations through all computerized travel agency reservation systems, including Covia's Apollo.

As part of the contract, Covia will install its Focalpoint workstations at Condo Network's reservation center. Focalpoint is a highly advanced customer service and reservations workstation. Covia also will train Condo Network staff in the use of Covia Reserve and provide support services.

Covia Reserve provides hotel or condominium companies of any size with worldwide automation support and consistent, accurate and prompt reservation information at all points of sale.

Covia is a leading worldwide travel distribution company owned by United Airlines, USAir, British Airways, KLM Royal Dutch Airlines, Swissair, Alitalia and Air Canada. Its Apollo electronic distribution system contains information from 700 airlines, 33 car rental companies and 19,000 hotels and serves more than 10,000 travel agency locations in 40 nations.

NATICK, MA (JAN. 10) BUSINESS WIRE - Prime Computer Inc. Wednesday reported that it will hold a special meeting of shareholders to approve the proposed merger between Prime and a subsidiary of DR Holdings Inc. of Delaware (''Holdings'') on Jan. 30, 1990 at 10 a.m. at Prime Computer Inc. 500 Old Connecticut Path, Framingham, Mass.

The company also reported that it received Securities and Exchange Commission clearance to distribute the proxy statement/prospectus describing the proposed merger.

Prime President and Chief Executive Officer James F. McDonald stated: ''The proposed merger creates the business structure for Prime Computer to meet the needs of its customers by offering excellent products and service capabilities.

Specifically, as a result of its new business plan, Prime will be able to focus its resources strategically on those business markets in which it can be a leading competitor: in the worldwide marketplace for computer-aided-design and -manufacturing, mincomputers and customer service.''

As a result of the merger, each outstanding share of Common Stock (other than shares held by Holdings or its affiliates) will be converted into the right to receive $22.00 principal amount of 15-1/2 percent Senior

Subordinated Debentures due 2002 of Holdings. Upon consummation of the merger, Prime will become a wholly owned subsidiary of Holdings and certain of its subsidiaries.

Prime said the proxy materials have been mailed.

Prime Computer Inc., with its headquarters in Natick, Mass., supplies integrated solutions to the international manufacturing, financial services, government, education and scientific marketplaces. The company is the second largest worldwide supplier of integrate CAE/CAD/CAM systems.

CHINO, CA (JAN. 10) BUSINESS WIRE - The Majestic Spectrum, a 405-acre business park located in the city of Chino, has signed an agreement with GTE California to become a GTE SmartPark.

The master-planned business community with a projected 6.5 million square feet of buildings becomes the largest GTE SmartPark in California. GTE will assist Majestic Realty Co., the developer, in jointly marketing the park to prospective tenants.

A GTE SmartPark is a business office complex which provides the latest telecommunications infrastructure. Through its preplanned and flexible environment, including fiber optic capability, GTE can quickly and easily handle tenants' current and future voice, data and video requirements. With this technology in place, tenants can readily subscribe to such advanced services as video conferencing, high-speed data transmission and GTE CentraNet, a fully featured business telephone system.

The Majestic Spectrum SmartPark, which is designed to be constructed in phases, includes 183 acres of commercial land, 150 acres of rail-served light industrial and 105 acres of rail-served general industrial zoned land. Facilities include a health fitness club, day care center, automobile center, medical and banking operations, numerous restaurants and a regional shopping center.

The Majestic Spectrum SmartPark borders four counties: Los Angeles, Orange, San Bernardino and Riverside, and is one of California's fastest growing industrial and residential areas. Construction of the park began about a year ago and will continue in phases over the next several years. The complex will be valued at over half a billion dollars at completion.

GTE Telephone Operations provides service to 14 million customers through

14.6 million access lines in portions of 31 states and two foreign countries. Revenues in 1988 totaled $11.6 billion. GTE Telephone Operations has 104,000 domestic and international employees.

GTE is a multinational corporation operating in 46 states and 41 countries with combined revenues and sales of $16.5 billion and net income of $1.2 billion in 1988. It is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing quality products and services worldwide.

BURBANK, CA (JAN. 10) BUSINESS WIRE - Shamrock Broadcasting Inc. Wednesday announced its intention to sell KMGC-FM, Dallas, to Cook Inlet Radio Partners L.P. and four other stations - two radio and two TV - to undisclosed buyers.

"We decided that the near-term economic outlook as well as the changing needs of our ownership make it prudent to raise capital and pay down debt " said Shamrock President Bill Clark. "Although ours is not a highly leveraged company, our five-year expansion program has consistently involved the acquisition of startups and turnarounds that drained cash flow and all profits have been plowed back into the company.

"The increasing maturity of our stations operating in a more intense competitive environment together with some uncertainty on the economic front influenced our decision to reduce debt. We believe this will put us in the strongest and most flexible position to deal with those conditions. Our commitment to making Shamrock the best and most competitive broadcast organization possible remains intact.

"We regret that this change in our strategy makes it necessary to sell some of our fine stations, but we are confident we will be able to put them in the hands of outstanding broadcast companies. Certainly this is the case as far as KMGC and Cook Inlet are concerned."

Shamrock identified the other prospects for disposition as KUDL-FM/WHB-AM, Kansas City, KXXV-TV, Waco, Texas, and KTAB-TV, Abilene, Texas. The company presently owns a total of 15 radio and three television stations and is owned by the Roy E. Disney family.

Cook Inlet Radio Partners L.P. is a Maryland-based company that owns 11 radio and two television stations. KMGC has an adult-contemporary format and operates at 102.9 megahertz with 100,000 watts of power. Cook Inlet Radio's president, Dan Mason, has indicated his company will retain the present call letters and format.

Mason said: "Dallas is a target market for us and KMGC fits our future perfectly. KMGC has, over the years, been a great radio station. Speaking on behalf of our company, we are excited about the possibilities of having this station in our group."

The sale price is approximately $22 million plus a minority tax certificate. The parties expect to file a transfer application with the FCC within the next few weeks. No brokers are involved in the KMGC transaction, but Shamrock said broker Ted Hepburn will handle the sale of the two Texas television stations while Blackburn and Co. will be involved with the Kansas City radio properties.

PALO ALTO, CA (JAN. 10) BUSINESS WIRE - Hewlett-Packard Co. Wednesday introduced 24 computer systems for a range of commercial and technical applications, including two multiprocessing systems that increase the product line's high-end performance three to four times.

This is the largest introduction of computer systems in HP's history. It includes new entry-level, midrange and high-performance models in the company's HP 3000 and HP 9000 product lines.

The systems feature HP's Precision Architecture reduced- instruction-set computing (RISC) design, thus extending the industry's broadest line of computer systems based on a single RISC architecture. RISC designs typically offer greater processing speed, higher reliability and lower ownership costs than conventional designs.

The new high-end systems in the HP 3000 and HP 9000 families are based on HP's recent breakthrough advance in CMOS (complementary metal-oxide semiconductor) chip technology. The breakthrough gives these high-end systems the processing speed of mainframes at a much lower cost.

DENVER (JAN. 10) BUSINESS WIRE - Bennett Petroleum Corp. Wednesday said that drilling has started at three wells operated by the company in Australia and the United States.

Bennett is joint operator of a 1.8 million-acre concession in the Northwest Territories of central Australia. A remote exploratory well being drilled on the concession will evaluate a large, structural anomaly to a depth of 3,500 feet.

Bennett has a 21 percent working interest, reducing to 14 percent after casing has been set.

In the United States, Bennett is drilling a 7,000-foot wildcat in Humboldt County, Northern California. The company has a 25 percent working interest, which increases to 51 percent if production is established.

In Garza County, West Texas, the firm is drilling a third 4,900-foot well in a new field discovered by the company last year. A second well, just completed, flowed at an allowable rate of 130 barrels of oil per day through an 11/64-inch choke, tubing pressure 340 psi. Bennett has a 12.92 working interest in the wells. More development is planned.

Bennett Petroleum's stock is traded over-the-counter.

DENVER (JAN. 9) BUSINESS WIRE - Ports of Call Inc., the Denver-based travel company announced Wednesday that the company has completed the sale of its fleet of Boeing 707's with the delivery of the final aircraft to Lebanon-based Middle East Airlines.

This concludes a more than year long effort to sell the fleet, associated spare parts and equipment. Proceeds of these sales exceed $30 millon.

Negotiations for the sale of the company's leisure travel business to CharterWest Capital Co. and a group of local Denver businessmen are continuing. Earlier the company announced that the parties had entered into a non-binding letter of intent and anticipated that the sale would be completed by year-end.

The parties have not reached a definitive agreement on the terms of the proposed sale and negotiations concerning the lease from the City & County

of Denver covering the company's private terminals at Stapleton International Airport have also delayed the transaction.

With the completion of this restructuring, the company announced the election of Dorsey R. Gardner as president, replacing W.W. Boisture Jr., who resigned to pursue other business interests. Gardner, who is a member of the company's board of directors is president of Kelso Management Co. Inc., an organization which represents shareholders who own approximately 59 percent of the voting stock of the company.

LOS ANGELES (JAN. 10) BUSINESS WIRE - Richard T. Schlosberg, president and chief operating officer of the Los Angeles Times, has announced that Victor A. (Chip) Perry III will join the newspaper as assistant to the president, effective Feb. 1.

In his new position, Perry will work on a wide variety of projects related to strategic planning, marketing, financial and operational issues.

Perry, 36, comes to The Times from Times Mirror, the newspaper's parent company, where he has served as director of corporate planning since joining the company in 1988. Perry has been responsible for Times Mirror's long-range planning in addition to providing support to operating units and corporate management on strategic and financial issues.

Before joining Times Mirror, Perry spent four years with McKinsey & Co. Inc., a management consulting firm in Los Angeles, where he worked on a wide range of strategic and operational projects.

He previously served as a marketing representative with the Bechtel Group Inc. in San Francisco.

Perry earned a master's degree from Harvard University's Graduate School of Business Administration and his bachelor's and master's of science degrees from the University of Virginia in Charlottesville.

BATTLE MOUNTAIN, NE. (JAN. 10) BUSINESS WIRE - Alta Gold Co. and NERCO

Minerals Co. dedicated the opening of a new gold mine Tuesday near Battle Mountain, Nev.

The Elder Creek Mine is a 50-50 joint venture between the two companies with Alta Gold the operator.

The mine originated from an exploration joint venture formed in 1988 between NERCO Exploration Co. and Alta Gold. NERCO had conducted an exploration program in the Shoshone Range and made the initial discovery in 1985. NERCO is continuing exploration activities in the surrounding area as operator of a related joint venture with Alta Gold.

At the mine dedication, Alta Gold President and Chief Operating Officer Stuart R. Havenstrite said, ''We certainly want to recognize NERCO for making the discovery and to also express our appreciation to local and state officials who worked with us during development of the project.''

NERCO Minerals Co. Chief Operating Officer Thomas Albanese added, ''We are impressed with Alta Gold for bringing the project into production within one year of approving the final feasibility study, and within five months of permitting.''

The Elder Creek Mine has current reserves of 1.8 million tons with an average ore grade of .046 ounces of gold per ton. The mine is expected to produce approximately 35,000 ounces of gold in 1990, at a mining and processing rate of 4,000 tons of ore per day. Metal production began this month.

Alta Gold Co. (NASDAQ:ALTA) is a diversified mining company headquartered in Salt Lake City, with precious and base metal operations in Nevada, Idaho and Colorado.

NERCO Minerals Co. is a wholly owned subsidiary of NERCO Inc. (NYSE:NER) a major North American mining and resource development company with interests in coal, gold, silver, oil and natural gas.

FRESNO, CA. (JAN. 10) BUSINESS WIRE - Mark W. Peterson, 35, has been named vice president of corporate communications for Fresno-based WestAir Holding Inc. (ASE:WAH) and its subsidiaries.

The announcement was made jointly by Timothy P. Flynn, chairman of WestAir Holding, and Maurice J. Gallagher, president.

In his new position, Peterson is responsible for investor relations, press relations, internal communications and government and community affairs for WestAir Holding.

Peterson joined the company is May, 1988 as director, corporate communications and has been responsible for the development of various internal and external company communication programs.

Prior to joining WestAir, Peterson served in various posts in the communications field including director of public communications with AirCal Airlines in Newport Beach, and senior manager of marketing public relations at Bank of America in San Francisco. He was also an instructor in business communications at California State University, Chico.

A graduate of California State University, Chico, Peterson earned a bachelor of arts in Political Science.

WestAir Holding Inc., which operates through two wholly owned subsidiaries and one operating division -- WestAir/United Express, NPA/United Express, and Atlantic Coast Airlines/United Express -- is the largest regional airline company in the United States.

The company operates over 780 daily flights and serves 50 cities in 12 states and Washington D.C. utilizing both jet and turbo-prop aircraft.

SEATTLE (JAN. 9) BUSINESS WIRE - Horizon Air, the largest regional airline in the Northwest, announced Wednesday that it will serve Bozeman, Mont., starting Feb. 25, 1990.

Horizon will offer five daily flights, providing direct service to Billings and Missoula, Mont., and Spokane, Wash. Eastbound connections will be available via Billings in conjunction with Horizon's marketing partner Northwest Airlines.

Service to Seattle, Portland, Ore., Boise, Idaho, and other cities throughout the West will be available via connections in Spokane to other Horizon flights and to flights of Horizon's sister company, Alaska Airlines. Reservations for the new flights may be made starting Jan. 27.

An 18-seat Metro III jet prop will be used on the new routes. Horizon's fleet also includes 37-seat Boeing-de Havilland Dash 8 jet props and 65-seat Fokker F-28 jets.

Bozeman will be Horizon's seventh Montana city and 34th city overall. The carrier started service to Montana in March 1986, with flights to Kalispell and later added Missoula, Great Falls, Helena, Billings, and most recently, Butte. Horizon Air serves cities throughout five Northwest states and British Columbia and is a wholly owned subsidiary of Alaska Air Group Inc., which also is the holding company for Alaska Airlines.

SAN RAFAEL, CA. (JAN. 10) BUSINESS WIRE - Where in Time is Carmen Sandiego?, the newest program in Broderbund Software's award-winning Carmen Sandiego software series, was the best-selling disk-based entertainment software during the 1989 holiday season, according to key software distributors and specialty retailers nationwide.

Since the introduction of Where in Time is Carmen Sandiego? in August 1989 resellers have reported sales of more than 100,000 copies of the program.

Designed as an exciting detective chase, the game brings history to life by highlighting leading people, events and inventions of the past 1,500 years.

The other programs in the series are Where in the World is Carmen Sandiego?, Where in the USA is Carmen Sandiego? and Where in Europe is Carmen Sandiego? In all four programs, Carmen and her gang of international thieves roam the globe, heisting the world's priceless treasures and landmarks.

Gary Kusin, president of Babbages, a Dallas-based chain of 160 consumer software stores nationwide, cited the popularity of the previous Carmen Sandiego programs as one of the main reasons for the rapid sales of Where in Time is Carmen Sandiego?

''When Where in Time is Carmen Sandiego? was introduced last fall, most customers were already impressed by the way other Carmen Sandiego programs combined valuable educational lessons with entertainment,'' Kusin said. ''So when the holidays came, it made an excellent gift choice for both adults and children.''

Bernie Sloan, president of ABCO Distributors in Monsey, N.Y., said the program's ''playability'' is the primary reason for its success.

''Besides making history fun, Where in Time is Carmen Sandiego? comes through with colorful special effects and a very high level of interaction '' Sloan said.

He added that of the hundreds of different entertainment software programs ABCO distributes to 3,000 dealers nationwide, Where in Time is Carmen Sandiego? was by far the best seller this holiday season.

Record sales for Where in Time is Carmen Sandiego? come at a time when the Carmen Sandiego series popularity is transcending the world of computer software. Doug Carlston, Broderbund co-founder, said several major television and movie studios have showed an interest in bringing Carmen and her gang members to stardom on film.

Carlston also said the company has designed the ''Carmen Sandiego Collection,'' a line of quality merchandise that can now be ordered by catalog. Items in the catalog, include sweat shirts, t-shirts, watches, folders and stickers, ranging in price from $1.25 to $24.95.

''What began in 1985 as a desire to entertain computer users while presenting valuable information has really taken off to become one of Broderbund's biggest success stories,'' Carlston said. ''Sales of all four Carmen Sandiego programs have topped more than one million units and we're always getting customer inquiries to find out what Carmen will do next,'' he added.

Carmen Sandiego programs have also won many of the software industry's top awards, including the Software Publisher's Association Best Home Learning Program and the Parents' Choice Foundation Award for Excellence.

Where in Time is Carmen Sandiego? is available for IBM PC/Tandy and compatible, and Apple II. Where in the World is Carmen Sandiego? and Where in the USA is Carmen Sandiego? are available in IBM PC/Tandy and compatible, Apple II, Macintosh, Amiga and Commodore. Where in Europe is Carmen Sandiego? is available for IBM PC/Tandy and compatible, Apple II, and Macintosh versions. Suggested retail prices for the programs range from $34.95 - $44.95.

Broderbund Software Inc., a personal computer software publisher based in San Rafael, was founded in 1980. SAN RAFAEL, CA. (JAN. 10) BUSINESS WIRE - Broderbund Software Inc. Wednesday annunced enhanced IBM versions of the best-selling Where in the World is Carmen Sandiego? and Where in the U.S.A. is Carmen Sandiego? detective games.

The enhancements include: A new, updated interface featuring pull-down menus; completely redone graphics able to support VGA, EGA, CGA, 16-color Tandy, and Hercules; digitized sound and music that now supports most popular add-on cards and Tandy 3-voice and digital sound.

Other graphic enhancements include: color mug shots of the villains, clues presented by a person instead of appearing as simply text, and improved on-screen maps.

Broderbund offers a free upgrade for customers who have purchased the product within 90 days. To receive an upgrade consumers should return the disks with a copy of a dated sales receipt. If the product was purchased more than 90 days ago, the disks should be returned with a check or money order for $7.50 which includes postage and handling.

Send requests for upgrades to: Broderbund Software Inc., 17 Paul Drive, San Rafael, Calif. 94903, attn: Carmen IBM upgrade.

Please note that new memory requirements are necessary to run the upgrades: 512K is now needed for both Where in the World is Carmen Sandiego? and Where in the U.S.A. is Carmen Sandiego?

The Carmen Sandiego series is one of Broderbund Software's best-selling products. Players must track down Carmen and her notorious gang of international thieves as they heist priceless treasures from around the world. In the form of an exciting detective chase, the game is designed to bring geography, history and culture to life.

Due to the new versions, some price changes are now in effect. Please refer to the fact sheet below for new prices and additional information.

TORONTO (JAN. 10) BUSINESS WIRE - The restructuring committee of the Campeau Corp. board of directors Wednesday announced the appointment of Chance Bahadur as executive vice president and chief financial officer of Campeau Corp. (U.S.) Inc.

Bahadur, 47, will be responsible for directing and helping to implement the financial restructuring of Campeau U.S., as well as of its Federated Department Stores, Inc. and Allied Stores Corp. retail subsidiaries. He will assume these responsibilities immediately.

In a related action, the board of directors of Campeau Corp. accepted with regret the resignation of Russell S. Davis as executive vice president and chief financial officer of Campeau, Federated and Allied.

Davis, 54, had joined Federated in 1984 as senior vice president for planning and control. He was promoted to executive vice president and chief financial officer of Federated and Allied in May 1988, and assumed

those responsibilities at the Campeau corporate level in April 1989.

''The contributions Russell Davis has made in every area of our business, including the company's ongoing restructuring efforts, are incalculable,'' James M. Zimmerman, president and chief operating officer of Federated and Allied, said of Davis's resignation. ''We regret the fact that he will be leaving us, but we respect his decision and we fully appreciate his desire to relinquish a range of responsibilities within Campeau, Federated and Allied that has become increasingly demanding and unrelenting in recent months. We wish Russ nothing but the best in whatever future pursuits he may choose to follow.''

Bahadur joins the company from Marriott Corp., where he has served as senior vice president, finance and treasurer, since October 1988. Prior to that, he was a vice president and treasurer of E-II Holdings Inc. and Beatrice Co. from 1984 to 1988, having previously been with Esmark from 1976 until its acquisition by Beatrice in 1984. At Esmark, Bahadur rose from director of treasury operations to treasurer in the years between 1976 and 1984.

A certified public accountant, Bahadur is an engineering graduate of Kansas State University who holds a graduate degree in business administration from the University of Chicago.

He is a member of the American Institute of Chemical Engineers, the American Institute of Certified Public Accountants, the Economic Club of Chicago, the Graduate School of Business Advisory Council at Kansas State University, and the board of advisors of Centennial Funds. He also is a trustee of the KSU Foundation.

Bahadur and his wife, Donna, have two children. They currently reside in Barrington, Ill.

#90010b0138 01/10/1990 ~Business Wire

SCOTTS VALLEY, CA (JAN. 10) BUSINESS WIRE - Meridian Data Inc. Wednesday announced the availability of a network license for Microsoft CD ROM Extensions.

Microsoft Extensions is a software package that enable MS-DOS to overcome the 32 megabyte file-size limitation and access the entire 600 megabyte capacity of a CD ROM.

''For the first time, organizations that place one or more CD ROM databases on a network can purchase a license that addresses this specific use,'' said Frederick Meyer, president of Meridian Data. ''Much like a software site license, the network license for Microsoft Extensions dramatically lowers the cost per user.''

While market research firms estimate that 470,000 CD ROM drives have been shipped to date, this number hardly represents the total number of CD ROM users. Since the introduction of the industry's first CD ROM networking system for standard LANs (Meridian Data's CD Net) in 1987, a multitude of organizations have installed CD ROM networking systems.

These systems enable several or even hundreds of users to retrieve CD ROM-based information from the same CD ROM drive over a network.

''To Microsoft's credit, they recognized this emerging trend and created a pricing strategy that reflects the growing use of CD ROMs on a network,'' explained Meyer.

He added that more than 30 CD ROM publishers including Dialog, NYNEX and Ziff-Davis are now offering network versions of their CD ROM products.

The Microsoft CD ROM Extensions adheres to the ISO 9660 file structure format, a standard that ensures that an operating system, CD ROM drive, and disc will be compatible, regardless of the manufacturer.

Meridian Data plans to start shipping the network version of Microsoft Extensions on Feb. 1.

SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Wells Fargo Bank announced that it has completed the acquisition of Imperial Corporation of America's $290 million credit card portfolio for a premium of approximately 22 percent.

"We welcome Imperial's 320,000 cardholders and are confident they'll be pleased with our many credit card services," said Michael Sczuka, executive vice president at Wells Fargo Bank.

Imperial's portfolio of VISA and Mastercard accounts was made available for sale in August when the company announced that it would reduce asset size by $2 billion to meet tougher capital to asset ratios required by

recent thrift legislation.

Wells Fargo, the nation's ninth largest bank and seventh largest provider of bank credit cards, serves 3.3 million cardholders with credit card loans totaling $2.5 billion, as of Dec. 31, 1989.

SUN VALLEY, CA (JAN. 10) BUSINESS WIRE - Flamemaster Corp. (NASDAQ/NMS:FAME) reported net after-tax earnings of $288,634 on revenues of $3,827,871 for the year ended Sept. 30, 1989, compared with $438,384 in net earnings on revenues of $3,581,621 in the year- earlier period.

Per-share results were 14 cents vs. 25 cents in 1988.

For the fourth quarter net income was $78,151 compared with $134,837 in the fourth quarter of 1988. Per-share results were 4 cents for the quarter ended Sept. 30, 1989, compared with 8 cents in the prior year.

Earnings were down due to gross increase in development costs and rapid escalation of raw material costs in the latter part of the fiscal year. Selling price increases were not reflected in gross profit margins overall due to contractual obligations based on old prices. Margins are expected to improve as old contracts are worked off.

#90010b0151 01/10/1990 ~Business Wire

HOUSTON (JAN. 10) BUSINESS WIRE - Northern Border Pipeline Co. Wednesday announced that effective Dec. 29, 1989, it accepted the Federal Energy Regulatory Commission (FERC) authorization to terminate gas transportation service to United Gas Pipeline Co. and commence service for Natgas, U.S. Inc.

In addition, a restructuring of the Northern Border partnership resulted in the transfer of a 12-1/4-percent interest in Northern Border from United Mid-Continent Pipeline Co. to Northern Plains Natural Gas Co., an Enron Corp. subsidiary. With the additional ownership, Northern Plains now holds a 35 percent interest in the partnership.

Other Northern Border owners and their respective interests are: TransCanada Pipe Line, Ltd., 30 percent; Panhandle Eastern Pipe Line Co.,

22 3/4 percent; and The Williams Companies, 12-1/4-percent.

Under a new transportation agreement, 450-million cubic feet (MMcf) of the more than 1.2-billion cubic feet (Bcf) of natural gas that moves through the Northern Border Pipeline on a daily basis will be transported for Natgas U.S. Inc., a subsidiary of Pan-Alberta Gas Ltd.

The new transportation arrangement results from the FERC's approval for Northern Border to terminate its firm transportation of 450 MMcf of natural gas per day for United Gas Pipe Line Co. and the authorization to transport the same volumes for Natgas U.S. Inc.

''The regulatory approvals and resolution of the Northern Border, Pan-Alberta and United negotiations paves the way for Northern Border to complete resolution of its rate case,'' said Larry L. DeRoin, president of Northern Plains Natural Gas Co. ''The resolution of these issues also will allow us to proceed with plans to move additional Canadian gas into the lower 48 states.''

The 822-mile Northern Border Pipeline transports Canadian gas from the Canada-U.S. border at Monchy, Saskatchewan, to Ventura, Iowa. During 1989, approximately 389 Bcf of natural gas was transported through the Northern Border system.

SCOTTS VALLEY, CA (JAN. 10) BUSINESS WIRE - Seagate Technology (NASDAQ/NMS:SGAT) announced that James R. Steger will be joining the company as vice president, Singapore Drive Operations.

Steger will be based in Singapore and report to Cal Reed, vice president, Scotts Valley and Singapore Operations.

Steger, most recently senior vice president, Worldwide Manufacturing for Miniscribe Corp., comes to Seagate with nearly 20 years experience in the mass storage field. His extensive knowledge of manufacturing process controls, specifically product transitioning from pre-production to high-volume manufacturing and production transfer to alternate site locations, will be invaluable to Seagate.

Steger's career with Miniscribe also included a three-year assignment in Southeast Asia, during which time he planned, designed and developed the company's 300,000 square-foot manufacturing facility in Singapore.

Prior to his work with Miniscribe, Steger contributed his technical and managerial expertise to Storage Technology Corp. as manager, Manufacturing Engineering. During his nine years with Storage Technology, Steger held a variety of assignments in manufacturing and engineering, including product design, automation process design and process engineering.

In 1979 Steger designed and developed the company's manufacturing facility in Ponce, Puerto Rico.

Steger began his career in 1972 with Memorex Corp. as a member of their technical staff.

Steger holds bachelor's degree in Electrical Engineering from Iowa State University, 1969.

Seagate Technology is the world's leading supplier of disc storage devices and components to original equipment manufacturers and remarketers.

#90010b0166 01/10/1990 ~Business Wire

MILPITAS, CA (JAN. 10) BUSINESS WIRE - Octel Communications Wednesday announced a 216-port Aspen Maxum Super-System with 912 hours of message storage capable of supporting up to 30,000 subscribers for the Customer Premise Equipment (CPE) market.

The Maxum Super-System is designed to provide CPE customers with a large-capacity system that easily expands to meet increases in subscribers and applications.

A 216-port Maxum Super-System will link three standard 72-port Maxum with a high-speed fiber distributed data interfaces (FDDI) backbone which passes information real-time between systems.

To accomplish this, Octel utilizes an advanced high-speed backbone which surpasses any other voice-processing clustering scheme.

The 100-Mbps fiber optic backbone operates in real-time, supporting all existing voice processing features (telephone answering, voice mail, etc.) with the same high Octel standard of performance.

Slower, more conventional large-capacity systems will, for example, struggle to accommodate distribution lists of more than 2,000 people or large amounts of voice mail.

The Maxum Super-System can satisfy these heavy traffic conditions without experiencing unacceptably slow response times.

When a customer has a number of smaller systems in a campus environment, each system has a different access telephone number. The high-speed backbone allows the customer to have one phone number for voice processing access, improving system traffic capacity as well as dialing convenience for all users.

The Maxum Super-System provides a migration path so that additional ports can be purchased as the customer's needs increase -- providing a cost-effective solution to the corporate customer's expanding voice processing needs.

''A customer's initial investment in a Maxum is being extended into the 1990s with the Maxum Super-System by building upon a proven and existing product,'' Cohn said. Delivery Dates, Prices

Both the 144-port and 216-port Maxum Super-Systems are expected to be available for shipment in early 1991. The fiber optic backbone interface card used to connect the systems will not exceed a price of $20,000 per system.

Octel Communications Corp., based in Milpitas, designs, manufactures and markets voice-processing systems, including the four-product Aspen family, Sierra product line and the VPC 100. The company sells its products through major U.S. and international distributors and direct sales offices in San Francisco, Los Angeles, Sacramento, Milpitas and Orange, Calif.; New York; Chicago; St. Louis; Kansas City, Kan.; Milwaukee; Dallas; Houston; San Antonio, Texas; Detroit; and Grand Rapids, Mich.

The company has an OEM agreement with Hewlett-Packard, which distributes Octel's full product line in Europe.

LONG BEACH, CA. (JAN. 10) BUSINESS WIRE - Leo's Industries Inc. (ASE:LI) Wednesday announced that the initial public offering of its cellular subsidiary, Twentieth Century Cellular Inc., is being withdrawn.

Despite the fact that PaineWebber, the sole manager of the offering, had provided the company a written ''firm underwriting commitment'' for the proposed offering, PaineWebber informed the company that it cannot complete the transaction, citing primarily the lack of operating history of Twentieth Century Cellular, a fact obviously known to them from

inception.

''I am very disappointed at the failure of PaineWebber to honor its obligations and consummate this transaction,'' said Paul M. Cohen, chief executive officer of Leo's.

In response to this unexpected event and based on the company's record third quarter performance in both its retail and cellular business to be released early next week, the company has reembarked on its initial strategy of pursuing a private transaction. It has also reopened discussions with major investment banking firms of noted cellular industry expertise relative to a private transaction.

''This is a setback to the company,'' Cohen said, ''but we believe it to be of a temporary nature. The company's fundamentals remain strong and we do not expect this problem to adversely affect the company operations or its overall long-term value.''

The company also announced that it intends to explore its options relative to PaineWebber's inability to perform on its written commitment to the company.

SEATTLE (JAN. 10) BUSINESS WIRE - Judson S. Shorett, president and chief executive officer of Metropolitan Federal Savings and Loan Association of Seattle, announced Wednesday that Metropolitan Federal Savings has completed its stock offering in connection with the Association's conversion from mutual to stock form.

1,875,000 shares were sold at $8 per share.

The net proceeds will be used for general corporate purposes permitted by applicable law and regulations, including primarily the origination of residential real estate loans and other investments, and pending such use, the purchase of short-term investment securities. With the additional capital raised in the offering, the Association exceeds all capital requirements under FIRREA.

On Dec. 20, 1989, the Association's Plan of Conversion was approved by the Association's depositor and borrower members at the special meeting that

was held at the main office of the Association.

The common stock is listed on the NASDAQ system and began trading on Jan. 10, 1990, on the OTC market, Shorett announced. Metropolitan Federal Savings' trading symbol is MSEA.

Shorett indicated that the officers and board of directors of Metropolitan Federal Savings wanted to express their thanks for the response to the stock offering and that Metropolitan Federal Savings looks forward to serving the needs of its customers as a stock institution.

PORTLAND, OR (JAN. 10) BUSINESS WIRE - PacifiCorp offered Wednesday to meet with Arizona Public Service Co. officials at their earliest convenience to explore possibilities of a seasonal power exchange agreement between the two companies.

APS President Mark DeMichele proposed the exploratory session late last month.

In responding, PacifiCorp President and Chief Executive Officer A.M. Gleason said the company is prepared to begin immediate discussion on the power exchange proposal or any other proposal of mutual benefit to customers and shareholders of both companies.

However, PacifiCorp continues to believe that a full and frank discussion

of underlying values and merger benefits is the best way for APS' parent, Pinnacle West Capital Corp., to realize the maximum advantage for its shareholders and APS customers.

Gleason also noted that the benefits associated with a seasonal power exchange represent only a small fraction of total potential benefits should the two companies merge.

Since November, PacifiCorp has sought to merge its electric operations with those of Pinnacle West while committing to limit price increases for APS customers to 2 percent per year for the next four years. APS recently revealed its intent to seek a 26 percent increase for residential customers over the next three years.

#90010b0196 01/10/1990 ~Business Wire

LOS ANGELES (JAN. 10) BUSINESS WIRE - Commercial construction levels will slow and vacancies will remain healthy in the South Bay region of Los Angeles County in 1990, according to a forecast study released Wednesday by Grubb & Ellis Commercial Real Estate Services.

Speaking before an audience of approximately 1,200 at the Sheraton Grande Hotel in downtown Los Angeles during its annual Los Angeles Basin commercial real estate forecast seminar, the firm reported that the vacancy rate for industrial properties stood at 8 percent at year-end and should range from 8 to 8.5 percent in 1990. Office vacancy rates stood at 20 percent at year-end and should fall to 19 percent in 1990, the firm predicted.

''The South Bay office market's dependence on aerospace and defense firms has made it very vulnerable in the past to economic downturns in those industries,'' said Joe Vargas, an office properties specialist with Grubb & Ellis' South Bay office.

''The market has become stronger as its tenant base has broadened to include other sectors of the economy.''

Vargas added, ''The improving health of the market is reflected by the fact that there are currently over 4 million square feet of new office space planned for the South Bay.''

However, most new construction will be delayed through the second and third quarters of 1990 as landlords attempt to generate demand for

existing space as well as the 1.8 million square feet of space currently under construction, the report noted.

According to the study, there were 1.6 million square feet of new office space added to the existing base of 48.3 million square feet in 1989.

Of the six submarkets that make up the South Bay, the largest amount of office construction activity is in downtown Long Beach with 700,000 square feet currently under construction, the report said.

''Downtown Long Beach is having one of the strongest office-building cycles in its history and is attracting a new mix of service and professional tenants from outside the South Bay with projects like the newly completed World Trade Center and the Long Beach Pike Project, which combines office, retail, lodging and residential space,'' said Vargas.

Net absorption, or the amount of office space occupied minus the amount of space vacated, stood at a healthy 2.1 million square feet at the end of 1989 and will remain stable in 1990, the report noted.

In the South Bay industrial market, meantime, leasing activity should continue to be strong, matching the healthy pace of the previous three years, the report noted.

''With its close proximity to the ports of Long Beach and Los Angeles as well as Los Angeles International Airport, the South Bay industrial market should continue to benefit from Los Angeles' emergence as a center for world trade,'' Vargas said.

New construction, meantime, should continue to decline in 1990, the report said. Construction of new industrial space was down to 1.9 million square feet in 1989 from 2.9 million square feet in 1988. Some 846,000 square feet is currently under construction.

The Carson/Compton submarket led the South Bay in terms of industrial construction activity as well as in sales and leasing activity, the report noted. Over 1 million square feet of space was added to its inventory in 1989 with another 200,000 square feet of space currently under construction and 743,000 square feet planned for development.

#90010b0198 01/10/1990 ~Business Wire

LOS ANGELES (JAN. 10) BUSINESS WIRE - Even as growth controls change the face of the West Los Angeles office market, it continues to be a highly desirable location for tenants and should maintain its steady rate of absorption and low vacancy rates for the next several years, according to a forecast study released Wednesday by Grubb & Ellis Commercial Real Estate Services.

During the company's annual forecast seminar before an audience of 1,200 at the Sheraton Grande Hotel in downtown Los Angeles, Grubb & Ellis reported that West Los Angeles' 13.5 percent vacancy factor was among the lowest in the nation.

However, the report cautioned, vacancies will increase to as high as 15 percent during the first nine months of 1990 as large amounts of new space enter the market. But vacancies will then decrease to 14 percent by year-end 1990 as absorption outpaces construction during the latter part of the year.

''Construction activity will be strong in 1990 despite the implementation of slow-growth measures,'' said Stuart Cowan, a senior marketing consultant in Grubb & Ellis' West Los Angeles office.

Approximately 3.1 million square feet of office space is currently under construction and an additional 10.4 million square feet is in the planning stages, the report noted.

''What is significant about the new construction is that because of the slow-growth measures it is mostly low-rise and mid-rise product,'' said Cowan. ''Of the 53 projects either under construction or in various stages of the approval process, only four have more than 12 floors.''

Of the nine submarkets that make up the West Los Angeles region, Santa Monica will see the largest amount of new construction and the character of the new projects will be ''decidely'' mid-rise as developers comply with growth restrictions, the report added.

''In the Central Business District, all of the projects planned or already under construction are mid-rise buildings of less than 100,000 square feet '' said Cowan. ''We're also seeing more mixed-use projects, buildings that combine office and retail space and sometimes even residential.''

Cowan continued, ''The Special Office District also continues to develop, evolving from a largely industrial area into a high-amenity office environment with projects such as the Water Garden and Colorado Place.''

In the Beverly Hills submarket, developers have responded to growth restrictions with mid-rises that attempt to incorporate the ambience of

high-rises with marble, glass and granite construction and luxurious amenities, such as concierge services, the report said.

Absorption levels, meantime, or the net result of leasing activity, will remain consistent for the next several years, the report said, within a range of 1.5 million square feet to 2 million square feet per year.

The Miracle Mile/Park Mile submarket posted a large net absorption in 1989 attracting a wide range of tenants, the report said.

''We're seeing tenants from Century City and Beverly Hills looking to Miracle Mile/Park Mile for quality space at lower rents and tenants from Hollywood and Mid-Wilshire who are looking to upgrade their office environments,'' said Cowan.

Space available for sub-lease continued to play a significant role in the marketplace, according to the study. Eight hundred thousand square feet of space was available for sub-lease, down from 1.4 million square feet a year ago, raising the region's vacancy rate two percentage points.

#90010b0205 01/10/1990 ~Business Wire

LOS ANGELES (JAN. 10) BUSINESS EDITORS - Strong growth will continue in 1990 throughout the two-county Inland Empire region with the industrial market leading the charge as the fastest growing sector of the commercial real estate market, according to a forecast study released Wednesday by Grubb & Ellis Commercial Real Estate Services.

Speaking before an audience of 1,200 at the Sheraton Grande Hotel in downtown Los Angeles during its annual Los Angeles Basin commercial real estate forecast seminar, the firm reported that the industrial vacancy rate stood at 12 percent in the Inland Empire at the end of 1989, the same as year-end 1988 and a low rate considering the high level of construction.

Approximately 8.6 million square feet of new industrial space was completed in the Inland Empire in 1989 with another 7.9 million square feet currently under construction and yet another 8 million square feet in the planning stages, the report said.

''The Inland Empire is in the middle of a construction boom,'' said Tim Hawke, an industrial properties specialist in Grubb & Ellis' Riverside

office. ''Factors such as attractive rents and land prices, a large labor pool, proximity to Los Angeles and Orange counties, an expanding international airport and local governments that are pro-growth have combined to create strong demand for industrial space in the Inland Empire.''

According to the study, the west end of San Bernardino County, which includes the cities of Ontario and Rancho Cucamonga, led the region in terms of construction with 6.8 million square feet of industrial space completed in 1989 and 5.9 million square feet currently under construction.

''Because it's the closest to the Los Angeles Basin, the west end was the first region of the Inland Empire to be developed,'' said Hawke. ''However, as the supply of available land decreases in the west end, development is moving eastward to Corona, San Bernardino, Colton, Riverside, Rancho California and Temecula.

''The east end should experience record levels of growth in 1990, especially with the completion of the I-15 extension.''

Meantime, the Inland Empire's young office market continues to grow with occupied space increasing by 17 percent in 1989, the highest growth rate of any market in the greater Los Angeles Basin, the report said.

Approximately 716,000 square feet of office space were completed in 1989 in the Inland Empire with 818,000 currently under construction, the study noted.

Net absorption, or the net amount of leasing activity, for 1989 was 880,000 square feet, while vacancies at year-end stood at 23 percent, partly due to the high level of construction, the report said.

The west end submarket led the Inland Empire office market in terms of net absorption in 1989 with 453,000 square feet, but the east end was not far behind with net absorption of 427,000 square feet, the study said.

''Most of the demand in the west end was generated by the cities of Ontario and Rancho Cucamonga, both popular locations because they're adjacent to Ontario Airport,'' said Hawke. ''While in the east end the strongest areas were Corona, Riverside and San Bernardino.''

In terms of construction, the east end submarket was the leader in 1989 with 382,000 square feet of office space, much of that Class A product, and has 259,000 square feet under construction.

Future office development is expected in the rapidly growing Temecula and Moreno valleys as companies seek to take advantage of lower costs and the large pool of potential employees available there, the report predicted.

#90010b0209 01/10/1990 ~Business Wire

LOS ANGELES (JAN. 10) BUSINESS WIRE - An unprecedented amount of new office space will enter the downtown Los Angeles office market during the next two years, but increasing levels of governmental restrictions, regulations and fees may put a damper on future development, according to a forecast study released Wednesday by Grubb & Ellis Commercial Real Estate Services.

During the company's annual forecast seminar before an audience of 1,200 at the Sheraton Grande Hotel in downtown Los Angeles, Grubb & Ellis reported that the downtown Los Angeles office market added 1.3 million square feet of new space in 1989 with over 3 million square feet slated to come on the market in 1990 and another 3 million square feet in 1991.

There are currently 6 million square feet of office space under construction in downtown Los Angeles.

''Developers want to get their projects completed as soon as they can,'' said Kirby Greenlee, an office properties specialist in Grubb & Ellis' Los Angeles office. ''They don't know what new fee or regulation will go into effect next.''

Demand is strong for the space that is coming on the market, particularly Class A space, the study said.

''There has been a tremendous amount of pre-leasing activity in the new high-rises that will be available for occupancy in 1990,'' said Greenlee. 'Because of this strong demand, the office market should remain strong even with the large amount of space scheduled to come on line.''

Office vacancy rates in the downtown region stood at 16.5 percent at the end of 1989 but should increase in 1990 with the influx of new space, the report said.

Meantime, absorption, or the net amount of leasing activity, was at its lowest level in recent years with 418,264 square feet of office space absorbed in downtown Los Angeles in 1989, but that total is expected to increase this year as new buildings are completed, the study said.

Meantime, in the Mid-Wilshire area, a lack of new construction has created

a tight office market, the report noted. The office vacancy rate for 1989 was the lowest of all Los Angeles area office markets at 9.3 percent, while net absorption stood at 577,590 square feet at year-end, twice the total posted in 1988.

The Pasadena office market had a high level of construction activity in 1989, adding 800,000 square feet of space to its inventory, an increase of almost 25 percent, the report said. However, a recently enacted slow-growth ordinance will severely curtail future development.

''The new ordinance limits commercial development to 250,000 square feet per year,'' said Greenlee. ''We should see high levels of leasing activity and increasing rental rates as tenants compete for the decreasing amounts of space available.''

The Glendale office market will expand by almost 30 percent in 1990 with the completion of two large projects, the report said. Approximately 937,000 square feet of office space is currently under construction. New absorption of 1989 was relatively low at 48,770 square feet, due to the fact that much of the leasing activity in the Glendale office market was in pre-leasing of projects under construction, the study noted.

Meantime, in the Los Angeles industrial market, the 1989 vacancy rate of 7 percent was the lowest in the Los Angeles Basin as speculative construction of for-lease space declined and construction of for-sale product increased, the report said.

''Construction of speculative space for-lease will remain low until land prices level off and lease rates increase,'' said Tim Howard, a senior marketing consultant in Grubb & Ellis' San Gabriel Valley office. ''Land prices really took off in 1989, increasing as much as 35 percent in some areas of the market.

''In the meantime,'' Howard continued, ''sales activity should remain strong.''

Almost 9 million square feet of new industrial space was completed in 1989 with an additional 6.3 million square feet currently under construction, the study said.

The most active regions in the Los Angeles industrial market in 1989 were the San Gabriel Valley and the Santa Ana Freeway Corridor, the report noted.

#90010b0217 01/10/1990 ~Business Wire

DALLAS (DEC. 10) BUSINESS WIRE - Amtech Corp. (NASDAQ:AMTC) Wednesday announced that the City of Los Angeles Board of Airport Commissioners had approved award of a contract to Amtech for a turnkey automatic vehicle identification (AVI) system for the Los Angeles International Airport.

The initial contract value to Amtech is approximately $1.2 million.

The AVI system, based on Amtech's patented radio frequency identification technology and Amtech's proprietary software, will be installed to provide coverage for all 40 lanes of traffic at 10 Airport locations to track some 5,000 taxis, hotel and rental car courtesy vans, limousines, and buses in all four major categories of commercial ground transportation vehicles using the Airport. The system will enable the Airport to accurately record vehicle entry and exit for purposes of user fee collection.

In addition, the system will track each vehicle as circuits are made on the Airport's roadways as well as determine the ''dwell time'' of each of these vehicles to impose fee variations when appropriate to keep traffic moving through the Airport.

Thomas L. McDaniel, vice president of Amtech, said: ''LAX is among the first of the major airports to recognize the benefits of using Amtech's leading edge AVI technology for high-traffic volume revenue collection systems in the airport environment.

Also, by focusing on ''dwell time,'' the Airport is able to use the system to encourage rapid transit time of these commercial vehicles through the Airport to help maximize the Airport's passenger handling capabilities without major roadway expansion.''

Los Angeles International Airport, otherwise known as LAX to millions of travelers, handles approximately 620,000 aircraft operations each year involving nearly 45 million passengers. LAX is the busiest airport on the West Coast and ranks third in the nation in passenger volume.

Dallas-based Amtech has operating electronic revenue collection systems for non-stop electronic toll collection on several major toll facilities, including the Greater New Orleans Bridge, the Lincoln Tunnel, and the Dallas North Tollway, and a system for commercial vehicle airport access control similar inscope to the LAX system is presently in installation at Dallas/Fort Worth International Airport.

The company also offers systems for electronic identification of other

transportation equipment, and the company's AVI technology was the basis for the mid-1989 approval by both the International Standards Organization and the American Association of Railroads of proposed standards for electronic identification of intermodal freight containers worldwide and railcars in the United States and Canada.

The Amtech radio frequency AVI system is the only electronic identification system which is freqency agile, operating in all major RF bands approved for AVI use internationally (850-950 MHz and 2400-2500 MHz).

With high speed and extreme range capabilities, the Amtech system has proven to be highly accurate, providing superior overall system reliability. Amtech products are available through a worldwide distribution network.

#90010b0249 01/10/1990 ~Business Wire
NEW YORK (JAN. 10) BUSINESS WIRE - In accordance with the amended and restated cash merger agreement among Southern Union Co. (''Southern Union''), Metro Mobile CTS Inc. (''Metro Mobile'') and SU Acquisition Inc. (''Newco'') dated Aug. 10, 1989 (the ''merger agreement''), Metro Mobile declared a dividend (the ''distribution'') on its Class A common stock and Class B common stock (AMEX:MMZ.A, MMZ.B).

The distribution shall be paid in the amount of one share of Newco common stock for every four shares of any combination of Metro Mobile's Class A common stock and/or Class B common stock, provided that no fractional shares will be distributed but rather rounded to the nearest whole share.

Immediately following the distribution, Newco will be merged into Southern Union and the Newco common stock distributed will be converted into an equal number of shares of Southern Union common stock. No certificates for Newco common stock will be distributed but, following the merger, certificates for Southern Union common stock will be distributed.

The distribution is subject to (i) the merger agreement having not been terminated, (ii) the satisfaction or waiver of all conditions to the merger, as set forth in the merger agreement, as heretofore or hereafter amended; and (iii) the satisfaction or waiver of all conditions to borrowing under Metro Mobile's amended and restated credit agreement, dated as of Nov. 17, 1989 for purposes of obtaining funds with which to capitalize Newco in accordance with the merger agreement.

The distribution will be made on Jan. 31, 1990, or the first business day thereafter on which the above conditions have been satisfied or waiver (the ''Distribution date'') to holders of record on Jan. 22, 1990 (the ''record date''). Continental Stock Transfer and Trust Co. (212/406-2740) will serve as Metro Mobile's agent for effecting the distribution and the related delivery of certificates for Southern Union common stock.

Newco filed a registation statement on Form S-1 with the Securities and Exchange Commission on Dec. 21, 1989, with respect to the distribution and the merger. The registration statement is expected to become effective and a prospectus mailed to the Metro Mobile stockholders receiving the distribution on or before the distribution date.

LONG BEACH, CA. (JAN. 10) BUSINESS WIRE - The first McDonnell Douglas MD-11 tri-jet completed its maiden flight Wednesday, Jan. 10, at 3:24 p.m. PST.

Touching down in Yuma, Ariz., the flight duration was approximately two hours and 56 minutes. Takeoff was from Long Beach Airport, adjacent to the Douglas Aircraft Co. plant. The flight crew completed maneuvers to check handling qualities, speed envelope expansion, airborne confirmation of projected base aircraft performance, and tested the aircraft's various sytems, such as avionics.

The flight route took the aircraft and its crew over the Pacific Ocean and on to Arizona for a successful landing.

BERKELEY, CA (JAN. 10) BUSINESS WIRE - Scholars at five leading American universities will tackle a research and teaching agenda on international competitiveness and declining relative U.S. performance in the international economy.

Several large American companies will cooperate. Ralph E. Gomory, president of the Alfred P. Sloan Foundation, Wednesday announced a $2.97 million grant to fund the work.

It is the Sloan Foundation's largest university grant in 25 years.

A consortium of faculty at the University of California at Berkeley, Columbia, Harvard, MIT and Stanford will do research on the competitiveness and economic performance of the U.S. vis-a-vis other industrialized nations. The consortium has assembled leading scholars from a variety of disciplines especially economics, management and engineering.

The funds will be channeled through and managed by the Consortium on Competitiveness and Cooperation at Berkeley's Walter A. Haas School of Business.

Gomory said the chief executive officers of General Electric, General Motors, Hewlett-Packard, IBM and Xerox have already agreed to cooperate with the consortium's research. ''They share my conviction that this a worthwhile enterprise,'' he said.

Gomory said the Sloan Foundation is deeply committed to the support of research on all factors -- production, manufacturing, economics, technology -- related to U.S. competitiveness problems.

The Consortium on Competitiveness and Cooperation is headed by Professor David J. Teece at Berkeley's Haas School.

Professor Richard R. Nelson of Columbia, a member of the consortium's executive committee, said the Sloan grant will support fundamental research on such issues as the factors influencing productivity growth at the level of the firm, the industry and the nation, and the relationships between science and technology.

The Sloan grant will be expended over a three- to five-year period and managed by the executive committee of the Consortium on Competitiveness

and Cooperation.

NOTE TO EDITORS: Ralph E. Gomory can be reached for interviews at the Sloan Foundation at 212/649-1649. David J. Teece is available at the Haas School of Business, U.C.-Berkeley, 415/642-1075.

LOS ANGELES (JAN. 10) BUSINESS WIRE - Maxicare Health Plans Inc. Wednesday announced the appointment of Vicki F. Perry as executive vice president of plan operations, a new position created as part of the company's restructuring efforts.

She reports to the company's chairman and all managers of Maxicare's local health plans report to her.

For the past four years, she has served as executive director of Maxicare Indiana, the company's Indianapolis-based health maintenance organization (HMO).

''Vicki brings to this position a wealth of experience and insight into the day-to-day management of our operations,'' said Peter J. Ratican, chairman and chief executive officer. ''She has managed one of our most stable and financially successful health plans, has built a talented and cohesive staff and has the insights and skills needed to guide our local managers' continuing efforts to provide better service to our customers while more effectively building a new Maxicare.''

Perry, 37, a native of Indianapolis, joined Maxicare eight years ago in Indiana and has also supervised Maxicare's quality-assurance and utilization-management functions in the Midwest. She is a graduate of Indiana University.

Tom Klages, 37, formerly assistant executive director of Maxicare Indiana, succeeds Perry, becoming vice president and general manager of Maxicare's Indiana health plan. He joined Maxicare in 1987 after holding a variety of HMO management positions in Illinois and Indiana. He is a graduate of the University of Illinois and holds a master's in public health from the University of Tennessee.

Maxicare Health Plans operates health maintenance organizations in California, Illinois, Indiana, Louisiana, North Carolina, South Carolina and Wisconsin.

Maxicare's common stock is traded over the counter.

BELMONT, CA (JAN. 10) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, and Keith-Stevens Inc. of Eden Prairie, Minn., today announced the signing of a strategic agreement to develop and market computer-integrated manufacturing (CIM) software for major industrial plants and facilities.

The agreement is part of Oracle's CIM Alliance program, in which more than 20 vendors of manufacturing and engineering-related hardware and software are developing products around the ORACLE relational database management system (RDBMS). Keith-Stevens is one of the leading vendors in the field of maintenance management software.

Under the terms of the three-year, $2.1 million agreement, Keith-Stevens will modify its MCS-II maintenance management software package using Oracle's application development tools to create a ''common look and feel'' user interface for all MCS-II modules. Keith-Stevens will also create seamless integration between MCS-II and Oracle's manufacturing and financial applications packages. Oracle will provide both product and technical staff support to Keith-Stevens. The agreement also calls for joint marketing and promotional efforts between the two firms. Currently, Keith-Stevens is participating in Oracle's CIM seminar series, with additional joint marketing activities planned for the first calendar quarter of 1990.

The first versions of MCS-II using the ORACLE interface are expected to be available in 90 days. Pricing has not been announced.

Oracle Corporation, headquartered in Belmont, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial, manufacturing and government applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

Keith-Stevens Inc. is a privately-held management consulting firm specializing in helping large companies improve maintenance operations in plants and facilities. Keith-Stevens also provides software products and

consulting services to implement world-class maintenance as an integral part of world-class manufacturing.

LOS ANGELES (JAN. 10) BUSINESS WIRE - The International Movie Group Inc. (NASDAQ: IMGRF) Wednesday announced its wholly owned subsidiary, The Movie Group has received distribution agreements for film sales totaling $7.5 million, while attending MIFED, 1989 (Milan Film Festival), nearly triple the sales it had received during the show last year.

In commenting, Mr. Daniel Marquet, executive vice-president of The Movie Group said, ''With the increased selectivity on the part of foreign distributors, MIFED 1989 served to establish those independent sales companies capable of supplying quality product. Demand for A-quality pictures in Europe is so high that those companies offering such product were extremely popular at MIFED.

''Movie Group titles bringing a rush of foreign buyers to its doors included ''CADENCE,'' starring Charlie Sheen and Martin Sheen; ''BED AND BREAKFAST,'' starring Roger Moore and Talia Shire; ''PERFUME OF THE CYCLONE,'' starring Kris Kristofferson and ''ODD BALL HALL,'' with Don Ameche and Burgess Meredith; and our box office hit ''KICKBOXER,'' starring Jean Claude Van Damme.''

Marquet also announced a signed agreement for a joint venture with CHRYSALIDE for ''SWEET REVENGE,'' the first of six feature films slated for production under this joint venture between France's Chrysalide Films and the International Movie Group which has commenced principal photography in Paris on Nov. 10, 1989 with Rosanna Arquette and Carrie Fisher.

Under the terms of the biggest Franco-American endeavour yet, Chrysalide Films and the French Pay-Channel Canal Plus will assume 50 percent of the total financing together with 50 percent from the International Movie Group. The deal represents the start of Canal Plus' long-stated ambition to become involved in international English-language produtions.

The six films are English-language comedies which Chrysalide will produce and which The Movie Group will distribute world-wide, outside of France. Like ''SWEET REVENGE,'' the remaining films, currently in development,

will draw on American talent and European technicians.

The Movie Group has already assumed a leading role in the foreign sales arena, dedicated to fulfilling its clients' needs for top quality product and is poised to continue its growth into the 1990's and beyond.

The Movie Group, a wholly owned subsidiary of INTERNATIONAL MOVIE GROUP, is in the business of foreign distribution of English-language films. The Movie Group distributes independently produced North American and English language films to a total of 52 countries in Europe, Asia and Australia.

#90010b0619 01/10/1990 ~Business Wire

SANTA CLARA, CA (JAN. 10) BUSINESS WIRE - The TOPS Division of Sun Microsystems Wednesday introduced the Network Bundle for DOS and Network Bundle for Macintosh -- products that combine new versions of the TOPS file sharing system with the powerful new InBox 3.0 electronic mail system and other network tools and services -- at a media conference in Santa Clara.

The Network Bundle for Macintosh includes an improved, AFP-applications-compatible TOPS 3.0 filing sharing software, InBox 3.0 with Macintosh administration software and printing services. It is available now for a suggested retail price of $299.

The TOPS Network Bundle for DOS is comprised of TOPS 3.0 -- which can now be configured in 65K, which supports the Hierarchical File System (HFS) and which includes improved printing services -- and InBox 3.0. The Network Bundle for DOS will be available in mid-Februrary for a suggested retail price of $249.

''The largest number of new network users are asking for a networking system that is easy to buy, easy to use and easy to install, and that provides the essential services for an entire organization, from workgroups to global enterprises,'' said Rich Shapero, vice president and general manager of the TOPS Division.

Both Network Bundles feature InBox 3.0, a powerful but easy-to-use electronic mail system offering sophisticated electronic messaging for up to 20 users. InBox is the only electronic mail software enabling both PCs and Macintosh computers to act as non-dedicated servers or

The Network Bundle for DOS is the first sharing system to support extended memory. DOS extender technology has been incorporated into the TOPS/DOS file sharing software to dramatically reduce the amount of standard DOS RAM it occupies, thereby increasing the memory available for applications.

In addition, the file sharing system has been rewritten in an optimized, modular fashion, giving users the ability to select only those network services they actually need. This flexibility in configuration further reduces memory requirements.

TOPS Network Bundle for DOS also lets PCs act as fully functional file servers for Macintosh computers on the network by supporting HFS and the Apple Filing Protocol (AFP). With HFS, multi-user Macintosh applications such as data bases and accounting packages can be stored and used from a DOS-based server on the network even though the program is actually running on a Macintosh.

Improved print services offered by TOPS Network Bundle for DOS allow PCs to print to networked Apple LaserWriter printers, with simple PostScript translators provided for PC printer output. Local or network spooling is available, and PCs can print on a local printer or transparently access any other serial or parallel printers made available by other TOPS/DOS users on the network.

PURCHASE, NY (JAN. 10) BUSINESS WIRE - Micro Financial Inc., a major computer reseller based in San Francisco, has been acquired by JWP Inc. (NYSE:JWP) of Purchase, the world's premier technical services company.

Terms of the transaction were not disclosed.

The acquisition of Micro Financial significantly expands JWP Information Systems' national presence. With locations in San Francisco and Sunnyvale Calif., as well as Portland and Seattle, Micro Financial is one of the region's largest reseller and local area network providers. The company expects 1990 sales of approximately $40 million, up from $30 million in 1989.

According to Andrew T. Dwyer, JWP's chairman of the board and president, ''Micro Financial represents an excellent strategic fit, expanding JWP's

west coast operations and providing insight and expertise in the Northern California and Pacific Northwest markets.''

''Micro Financial will continue to provide a high level of value-added services,'' said Jack Dane, president of Micro Financial, ''The combined skills and resources of JWP Information Systems and Micro Financial will create an organization capable of providing the technology and services our customers will require in the 1990s.''

JWP Information Systems is one of the nation's largest providers of high quality, sophisticated information systems and services to corporations, institutions and government, through the design, installation and maintenance of communications, computer and networking systems for thousands of customers throughout the United States.

JWP Inc., which for the 12-month period ending Sept. 30, 1989 had revenues of $1.5 billion and net income of $35 million, is the leading technical services company specializing in electrical, mechanical, computer, security and communications systems and services.

Capitalizing on the strengths of its core businesses, the company has established itself in several emerging markets for energy and environmental systems.

#90010b0624 01/10/1990 ~Business Wire

JERICHO, NY (JAN. 10) BUSINESS WIRE - Metro Bancshares Inc. (NASDAQ:MTBS) holding company for Bayside Federal Savings Bank, Wednesday reported net income of $1,558,000, or 66 cents per share, for the first quarter of fiscal 1990, ended Dec. 31, 1989.

The company earned $1,513,000 in the first quarter of fiscal 1989. Per share figures for the year-ago period are not meaningful as Metro Bancshares converted to stock form on Nov. 10, 1988.

The company attributed its continued earnings performance to growth in net interest income and control of operating expenses, partly offset by a planned increase in the non-specific reserve for possible loan losses. Exclusive of the provision for possible loan losses, net income for the fiscal 1990 first quarter rose by $295,000, or 19.5 percent, over the comparable figure for fiscal 1989.

''The recent results are a further improvement over the consistent earnings performance the company has shown in the four full quarters since our conversion to stock form,'' stated David G. Herold, president and chief executive officer.

Net interest income before provision for possible loan losses for the three months ended Dec. 31, 1989 was $5,744,000, a 12.7 percent increase over the comparable fiscal 1989 figure.

Metro Bancshares' net yield on interest earning assets was 2.97 percent for the current quarter compared with 2.85 percent for the first quarter of fiscal 1989. These results continue to reflect the impact of the company's positive asset/liability gap position.

Operating expenses were $3,405,000 for the first quarter of 1990 compared to $3,218,000 for the year ago period. Expressed as a percent of average assets, operating expenses decreased from 1.71 percent in the first quarter of fiscal 1989 to 1.69 percent for the current quarter.

In reference to the new capital standards established by the Office of Thrift Supervision, Herold indicated that the company's existing capital level comfortably exceeds all current requirements. On Jan. 4, 1990, in response to the continued strong financial performance, the board of directors of Metro Bancshares declared a regular 10 cents a share dividend payable on Jan. 24, to shareholders of record as of Jan. 15.

Metro Bancshares Inc. is the holding company for Bayside Federal Savings Bank, which conducts retail banking activities through 11 offices located in Queens County, Nassau County and Manhattan.

SALT LAKE CITY (JAN. 10) BUSINESS WIRE - Intermountain Energy Corp., a publicly traded company located in Salt Lake City, Wednesday announced that it intends to reacquire prime, oil lease acreage in exchange for newly issued, restricted shares of Intermountain Energy Corp.'s stock.

Intermountain Energy Corp. will offer to repurchase leases which it had previously sold to qualified investors throughout the United States.

The exchange of these leases for restricted stock has been approved by Intermountain's board of directors and is expected to be completed by Jan. 31, 1990.

Final terms and conditions of the exchange of leaseholder interests for restricted shares of Intermountain Energy Corp. were not disclosed. Management expects that approximately 300 people will exchange their lease interests for Intermountain stock and be added to the company's shareholder list.

Upon completion of the exchange, management expects that the company's net assets will increase by approximately $3 million. Management of Intermountain Energy expects to file an application with the National Association of Securities Dealers (NASD) in the near future, seeking approval for listing of the company's securities on the NASD Automated Quotation System (NASDAQ).

Intermountain is also considering filing applications for listing on other regional stock exchanges. The company's stock is currently traded OTC ''pink sheets.''

Intermountain Energy also announced that the company has hired Carlton Stowe as vice president of land acquisitions. Stowe has spent 34 years in the oil industry and is the author of 100 publications on energy, mineral economics, natural resources and industrial marketing.

Upon appointment by the secretary of interior, Stowe served three terms on the U.S. Bureau of Land Management's Multiple Advisory Board. Currently Stowe is serving his second term on the board of directors of the American Association of Petroleum Landmen.

Intermountain Energy has recently retained the services of Comvest Corp., a Denver-based public relations firm, to assist the company with its investor and shareholder relations program.

LEXINGTON, NC (JAN. 10) BUSINESS WIRE - Directors of Lexington State Bank and its parent corporation, LSB Bancshares Inc. (NASDAQ: LXBK), both meeting Jan. 9, 1990, have elected David A. Smith and Samuel R. Harris to fill the unexpired terms of retired directors L. Klynt Ripple and Clifford A. Erickson.

LSB President and Chief Executive Officer Robert F. Lowe said: ''We're very pleased that David Smith and Sam Harris have been elected directors. Both will bring outstanding business and professional perspectives to our board as they continue their service to the community.''

Smith, owner of Red Acres Farm, is a dairyman who graduated from Linwood High School and earned a bachelor of science degree in animal science from North Carolina State University. He is a captain in the North Carolina National Guard, a trustee of Lexington Memorial Hospital and a deacon and trustee of Jersey Baptist Church.

Smith is a director of Coble Dairy Products Cooperative Inc., and president of the board of directors of Davidson Farmers Cooperative. He's also a producer member of the North Carolina Milk Commission and supervisor chairman of the Davidson Soil and Water Conservation District.

Smith and his wife, the former Peggy Swain, have three children, Margaret, Sally and Reid.

Dr. Sam Harris, born in Thomasville, is an obstetrician and gynecologist associated since 1974 with Lexington Clinic for Women, P.A. He graduated from Thomasville High School and received a bachelor of arts degree and his doctor of medicine degree from the University of North Carolina at Chapel Hill.

Harris currently is a member of the American Medical Society, the American College of Obstetricians and Gynecologists, the North Carolina Medical Society, the ''Daddy'' Ross Society and the Davidson County Medical Society.

Harris, the son of Mary Edna Harris of Thomasville, is married to the former Evelyn Long and they have three children, Samuel Ranchor Harris III Joshua Thomas Harris and Mary Maria Kirstin Harris.

Lexington State Bank has six offices in Lexington and one office each in Arcadia, Midway, Thomasville and Welcome. LSB Bancshares Inc. common stock is traded in the over-the-counter National Market System and is quoted electronically under the NASDAQ symbol LXBK.

BRUSSELS, BELGIUM (JAN. 10) BUSINESS WIRE - DTI Medical Corp. (DTIM) announced Wednesday that it has signed a distribution agreement with Biomet A/S of Horsens, Denmark.

Biomet will distribute the company's synthetic bone, Biocompatible Osteoconductive Polymer (BOP) products, in Denmark for use in orthopedic and neurosurgical procedures.

Biomet, a Danish company, is partially owned (25 percent) by Biomet Inc. (NYSE:BMET) of Warsaw, Indiana, according to Biomet spokesman Jens Creamer. With this new agreement, DTI now has distribution arrangements in eleven countries, including the U.S. veterinary market.

The BOP technology originated in the Soviet Union and is based on a biocompatible copolymer. BOP is currently being marketed for use in a broad range of surgical procedures including spinal fusions, total hip revision surgery and as a substitute for allografts and autografts.

In addition to its BOP technology, DTI Medical Corp. holds the right of first refusal to develop, manufacture, license and market several other Soviet Medical technologies in the Western World.

SEATTLE, WA (JAN. 10) BUSINESS WIRE - Washington Federal Savings and Loan Association (OTC: WFSL) Wednesday announced earnings for its first fiscal quarter ended Dec. 31, 1989, of $15,295,000, or $1.05 per share.

This represents an 11 percent increase over the prior year's earnings for the same period which were $13,822,000, or 95 cents per share.

Elliot K. Knutson, chairman and chief executive officer, said, ''We are very pleased with these results and the future looks good, especially with the recent decline in interest rates.''

At the end of the quarter, assets were $2.5 billion and stockholders' equity was $288 million for a ratio of 11.5 percent. The quarter produced an annualized return on stockholders' equity of 22.1 percent and a return on average assets of 2.47 percent.

The Association recently increased its quarterly cash dividend to 33 cents per share from 30 cents per share, a 10 percent increase payable Jan. 26, 1990.

Washington Federal Savings and Loan Association, with headquarters in Seattle, has 57 branch offices in Washington, Idaho and Oregon. The Oregon branches are doing business as Freedom Federal Savings and Loan Association.

SAN DIEGO (JAN. 10) BUSINESS WIRE - Gensia Pharmaceuticals Inc. has completed four Phase 1 clinical trials in West Germany and the United Kingdom to assess the safety and tolerance of its ESA Drug in healthy subjects. About 50 volunteers participated in the studies, according to David F. Hale, president and chief executive officer.

"The proprietary ESA Drug is part of a novel computer-controlled drug delivery system, called the ESA System, which is being designed to enhance the diagnosis, prognosis, and monitoring of cardiovascular disease when used in conjunction with current cardiac diagnostic methods," Hale said.

In most cases, to diagnose coronary artery disease - the major cause of cardiovascular disease - it is necessary to stress the heart, usually by a physical exercise stress test.

"The ESA Drug has been designed to pharmacologically cause the cardiovascular effects of physical exercise, allowing a physician to perform traditional cardiac diagnostic tests on patients who are unable to exercise or achieve a heart rate high enough to be diagnostically meaningful," Hale said.

"In addition to use with the electrocardiogram (EKG), the ESA System appears to be ideally suited for use with imaging techniques such as echocardiography (ultrasound imaging of the heart) and radionuclide imaging."

"The Phase 1 data are currently being analyzed and plans are in place to begin Phase 2 clinical trials with the ESA System in cardiac patients in the first quarter of this year," said Walter Singleton, M.D., Gensia's vice president of medical and pharmaceutical development.

"The established safety and tolerance of the ESA Drug in healthy subjects forms the basis for Phase 2 testing in patients with known or suspected cardiovascular disease."

Hale said: "The completion of these first clinical studies on the ESA System is a major milestone for Gensia. More than a year ago, Gensia announced plans to begin Phase 1 clinical trials on the ESA System in the third quarter of 1989 and this schedule has been strictly adhered to. We hope to continue to rapidly move this novel cardiac diagnostic product toward regulatory submissions for U.S. and European marketing approvals."

Gensia Pharmaceuticals Inc. is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel drugs for the diagnosis and treatment of human diseases.

#90010b0650 01/10/1990 ~Business Wire

SAN DIEGO, (JAN. 10) BUSINESS WIRE - Synbiotics Corp. (NASDAQ/NMS:SBIO) Wednesday released projections for the balance of its fiscal year 1990, which ends March 31.

Dr. Edward T. Maggio, president and chief executive officer, in a prepared presentation before the Hambrecht & Quist Eighth Annual Life Science Conference in San Francisco, said Synbiotics is close to achieving its goal of profitability in its core business, advanced ethical veterinary products.

Maggio told the audience that the company has dramatically increased product sales, doubled the size of its distribution network and aggressively reduced expenses.

In support of these comments, Maggio projected that product sales for the company's third quarter ended Dec. 31 are expected to be over $1.9 million a 140 percent increase over the prior quarter and a 160 percent increase over last year's third quarter.

The loss for the quarter was projected to be approximately $550,000, a 64 percent reduction from the previous quarter and a 70 percent reduction from the third quarter last year. Maggio expects the fiscal year to end with product sales in excess of $6.3 million, a 160 percent increase over the prior year, and a total loss below that incurred last year.

Maggio further said: ''The company's core veterinary business activities should attain profitability by the last quarter of fiscal year 1990...,'' ending March 31, ''...or the first quarter of 1991...'' if the company succeeds in separately financing its subsidiaries.

Synbiotics is currently pursuing separate financing for UniSyn Fibertec Corp. (the company's high-density cell-culturing subsidiary) and ImmunoPharmaceutics Corp. (the company's subsidiary focused on exploitation of the company's proprietary anti-idiotypic antibody technology in human pharmaceuticals) through private placement and corporate partnership mechanisms.

In addition, Maggio announced two major in-licensing activities that will significantly impact Synbiotics' planned product stream. The company has secured an exclusive license from The Wistar Institute for all anti-tumor monoclonal antibodies for animal health applications.

The Wistar Institute, a leader in oncology and immunology research, is the United States' oldest private research foundation and an affiliate of the University of Pennsylvania. The first product planned for introduction by Synbiotics in the next fiscal year is a monoclonal antibody therapeutic treatment for canine lymphoma.

Maggio also disclosed that earlier this week, the company reached an agreement with Telios Pharmaceuticals of La Jolla providing Synbiotics with worldwide veterinary marketing rights for an advanced treatment for dry eye syndrome. Over 2 million dogs are afflicted with this syndrome on an annual basis. The total market size is estimated to be between $8 million and $10 million.

Synbiotics Corp. of San Diego is a leading developer and manufacturer of antibody-based products that diagnose, treat and prevent animal and human diseases.

PHILADELPHIA (JAN. 10) BUSINESS WIRE - BAKER VIDEOACTIVE CORPORATION (OTC) Wednesday announced that the Company is beginning 1990 with a backlog exceeding $1 million, the highest in its history. The Company is currently working on major projects for Bell Atlantic, Wyeth Laboratories, The United States Navy Memorial, The Franklin Institute, The Private Industry Council of Philadelphia among others.

Alan Baker, CEO, commented ''We believe the Company's rapid growth is attributable to the spread of BAKER'S reputation as a top-quality producer of state-of-the-art, interactive video programs. We are continuing to expand our capabilities so that we can accomodate our growth without sacrificing our reputation for quality.''

BAKER VIDEOACTIVE CORPORATION, based in Philadelphia, is one of the leading producers in interactive video programs in the country.

SAN DIEGO (JAN. 10) BUSINESS WIRE - Synbiotics Corp. (NASDAQ/NMS:SBIO) Wednesday announced it has concluded a broad licensing agreement with The Wistar Institute of Philadelphia.

Wistar is the oldest, independent non-profit biomedical research institution in the United States. Approximately 60 percent of its research effort is devoted to cancer. Much of the knowledge and many of the specific developments emerging from Wistar apply to cancers affecting both humans and animals.

Synbiotics markets a line of 12 veterinary products and in the license agreement announced Wednesday has secured exclusive worldwide marketing rights to animal health applications of Wistar developments.

Edward T. Maggio, Ph.D., chief executive officer of Synbiotics, said: ''Synbiotics is most pleased to announce this exclusive relationship with such an internationally prestigious institution. We believe that in time

several products could eventuate from this agreement.''

He noted that the two organizations are quite complementary in that Synbiotics has historically emphasized research and development into detection and treatment of infectious disease, while the major focus of Wistar's research is in cancer and diseases of the central nervous system.

''This agreement considerably broadens our technical reach and product profile,'' he said. Veterinary oncology is widely viewed as an area of business that will grow dramatically in the coming decade.

The first product emerging from the relationship will be a treatment for lymphoma in dogs, which disease is invariably fatal with current treatments. The canine lymphoma product will be launched in 1990.

Synbiotics Corp. of San Diego is a leading developer and manufacturer of products that prevent, diagnose and treat animal and human diseases.

TEMPE, AZ (JAN. 10) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Wednesday reported record 1989 sales, closings and backlog.

Sales for the year ended Dec. 31 were a record $410 million, a 19 percent increase over 1988 sales of $345 million. Gary A. Rosenberg, chairman and chief executive officer of the Tempe-based homebuilder, said closings of homes sold grew 24 percent to a record $391 million, compared with $316 million last year.

''Fourth quarter closings also were records,'' Richard C. Kraemer, president and chief operating officer, said. ''Closings increased 23 percent to $147 million, compared with the prior fourth quarter's $119

million.''

''Fourth quarter sales set records in the Phoenix and Southeast regions, however this performance was offset by the softness in the California market, which resulted in lower overall fourth quarter sales,'' Kraemer added. Sales totaled $57 million, a 12 percent decrease from the prior year's record fourth quarter $65 million.

UDC's backlog of homes ordered but not yet closed was a year-end record $125 million, an increase of 18 percent over last year's $106 million.

Rosenberg said, ''Based on our excellent 1989 performance, the board of directors is scheduled in mid-February to consider increases in UDC's regular and special common distributions.''

UDC will announce year-end and fourth quarter revenues and earnings in early February.

UDC builds quality family and adult residential communities in the Sun Belt, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina.

Its common and preferred shares are traded on the New York Stock Exchange.

WAUKESHA, WI (JAN. 10) BUSINESS WIRE - Criticare Systems Inc. (NASDAQ: CXIM), a manufacturer and marketer of medical monitoring equipment, announced Wednesday that net income for the second quarter of fiscal 1990 ended Dec. 31, 1989 rose 30 percent to $100,520, or two cents per share, from $76,994, or one cent per share, as revenues grew 24 percent to $4,260,897 from $3,422,522 a year earlier.

Income from operations more than doubled for the second period to $166,586 from $81,871 for last year's second quarter, while the loss from the company's investment in the rehabilitation of an historic structure in Milwaukee was $148,350 for this year's second quarter versus $178,650 for the first quarter and $54,000 for the second quarter of the prior fiscal year.

President Gerhard Von der Ruhr said that bookings remained strong in the second quarter at more than $4,800,000. "We expect to report higher sales

and earnings in the third and fourth quarters, continuing the trends established in the first half," Von der Ruhr said.

He said that revenues from domestic sales were ahead of plan for the second period and that "our direct sales force has begun to make a real difference to Criticare's sales momentum and is a key factor behind the rapid acceptance of our new anesthetic agent and combination monitors."

Von der Ruhr added the investment in the historic structure in Milwaukee (Blatz Building) still is expected to begin making a positive contribution to the company's results later this year.

For the six months ended Dec. 31, 1989, Criticare reported a net loss of $68,631, or one cent per share, compared to net income of $85,726, or one cent per share, for the first half of fiscal 1989. Revenues were $7,734,768, 22 percent ahead of the $6,300,000 posted for the same period a year earlier.

Criticare Systems Inc. is involved in the research, development and marketing of diagnostic and therapeutic products which address two major concerns in health care: The need to improve patient management and the pressure to contain costs in all aspects of medical practice. The company's products include pulse oximeters and other blood chemistry and sleep disorder monitors.

HARRISON, NY (JAN. 10) BUSINESS WIRE - The board of directors of Melville

Corp., specialty retailer of apparel, footware, drugs, toys and household furnishings, Wednesday voted to increase the quarterly dividend from 32.5 cents to 35.5 cents per share on common stock payable Feb. 1, 1990 to holders of record on Jan. 22, 1990.

The increased dividend places Melville common stock on a $1.42 annual basis as compared to the $1.30 paid during 1989 and represents the 26th consecutive year in which the dividend has been increased.

Melville also announced that in connection with its incentive stock plans its board of directors has authorized the company to repurchase from time to time in the open market or otherwise, up to 1 percent of its currently outstanding common stock over the next three years, at price levels that the company deems desirable.

Melville Specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the young men's apparel chain; Wilsons, in leather apparel; Accessory Lady, the quality fashion accessory stores; CVS, the drug, health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn, Fan Club and the Meldisco Leased Department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestics chain; This End Up, the casual furniture stores; and Prints Plus the prints and wall decor stores.

SAN FRANCISCO (JAN. 10) BUSINESS WIRE - Bank of America announced Wednesday it has been named a member of the discount note selling group for Sallie Mae, the Student Loan Marketing Association.

Sallie Mae -- a federally chartered, stockholder owned corporation whose short term debt trades in the U.S. agency market -- has established a six-member selling group to handle its multibillion dollar short-term funding needs. The group is responsible for selling the corporation's short-term discount notes in the public capital markets.

''We're pleased to bring our placement capacity to bear on meeting Sallie Mae's funding needs,'' said Bank Investment Securities Division Senior Vice President Robert T. Slaymaker.

''We sold more than $95 million worth of these notes during our first day in the program,'' said the banker. ''Institutional and individual investors are finding their yield and flexibility attractive, and we're happy with the appointment.''

That appointment also makes Bank of America one of only two financial institutions worldwide authorized to sell the whole range of standard short-term primary issues which trade in the U.S. government agency sector.

The bank is also a member of the short term note selling groups for the Federal Home Loan Banks, Farm Credit Bank Funding Corporation, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) as well as the selling group for Fannie Mae residential securities.

Bank of America sells these agencies' short-term notes on a daily basis and has developed a large investor base for them in the U.S., Asian and European markets.

MIAMI (JAN. 10) BUSINESS WIRE - Advanced Viral Research Corp. announced Wednesday that its drug RETICULOSE has been shown to be partially active in ''in vitro'' tests against the HIV virus in two separately conducted independent laboratory screenings.

In both tests, RETICULOSE was shown to be partially active against HIV at specific dilutions and were non-cytotoxic.

The tests were conducted by Southern Research Institute, Birmingham, Ala., and Dr. Lionel Resnick of Vironic Testing Laboratory, Miami.

As a result of the tests which Advanced Viral Research Corp. described as ''promising,'' Advanced Viral Research Corp. will continue its efforts to obtain FDA approval of an investigational new drug application for testing of RETICULOSE on human subjects with AIDS.

EMERYVILLE, CA (JAN. 10) BUSINESS WIRE - Adjustco Inc. announced Wednesday a corporate reorganization designed to focus the company for growth and improved client services.

Frank B. Hall & Co. Inc. will acquire ownership of Adjustco, which includes Leonard J. Russo Insurance Services, in exchange for the obligations of Adjustco to Hall related to the sale of Adjustco by Hall in November 1987.

Adjustco has agreed to sell its adjusting division and Hawaii operations to Leonard J. Russo, in exchange for all of Russo's stock of Adjustco. The restructuing and sale are expected to be completed by the end of January.

Adjustco will continue to be a major provider of comprehensive risk management, third-party claims administration and rehabilitation management services in the United States.

Adjustco also announced that, upon Russo's departure, John Addeo, currently a member of the Adjustco board of directors, will be named chief executive offer and Arthur M. Yoss, currently Adjustco's executive vice president of operations, will be named president and chief operating officer. All other members of senior management will remain in place.

Commenting on the changes, Addeo stated, ''For the last six months Adjustco has been profitable. The restructuring will significantly strengthen Adjustco's financial condition and improve its cash flow. We are highly confident about the future of Adjustco. We will continue to focus our efforts on providing the highest quality service to our existing and new clients.''

Yoss added, ''Adjustco has carefully developed the senior management team along product lines that will enable Adjustco to better serve and be responsive to our clients needs. Operationally, we have been positioning ourselves for dramatic new growth.''

Adjustco provides services to a wide range of clients including Fortune 1000 companies, municipalities, public entities and other self-insured corporations and associations through a work force of 600 professionals located in 34 offices.

FAIRFIELD, NJ (JAN. 10) BUSINESS WIRE - Cellcom Corp. (NASDAQ:CLCM) announced that it has opened a new reselling subsidiary in San Diego.

The new subsidiary, Cellular Dynamics Telephone Company of San Diego Inc., will offer the cellular services of both U.S. West Cellular and PacTel Cellular to the San Diego area.

In addition, Cellular Dynamics Telephone Company of San Diego Inc. will sell and install a wide variety of cellular telephone equipment and accessories.

''With the commencement of our reselling operation in San Diego, we now service the entire Southern California area from the Mexican border to Ventura, California,'' said Jay Brown, president of Cellcom Corp.

Cellcom's other Southern California subsidiary, Cellular Dynamics Telephone Company of Los Angeles, Inc. currently offers the services of PacTel and L.A. Cellular to the Los Angeles and surrounding areas.

Brown noted, ''Our move into the San Diego market not only gives us access to one of the largest population centers in the country, but it also allows us to better serve our subscribers who commute between Los Angeles and San Diego.''

Cellcom Corp., through its subsidiaries Cellcom Telephone Co. Inc., Cellular Dynamics Telephone Company of Connecticut, Los Angeles, San Francisco and San Diego, is a leading reseller of cellular mobile radio telephone services.

NEW YORK (JAN. 10) BUSINESS WIRE - The board of directors of General American Investors Co. Inc. (NYSE: GAM), a publicly-traded investment fund Wednesday declared spill-over dividends on the common stock for 1989 as follows:

- An income dividend of 1 cents per share representing a distribution for 1989 from undistributed income, bringing to 23 cents per share the aggregate amount of dividends paid from ordinary income for 1989. This compares with income dividends in the aggregate amount of 29 cents per share for 1988.

- A capital gain dividend of 10 cents per share representing a distribution from long-term profit on securities sold during the period Nov. 1, 1989, through Dec. 31, 1989, bring to $1.56 per share the aggregate amount of distributions paid from long-term capital gains for 1989. This compares with long-term capital gain distributions in the aggregate amount of $1.69 per share for 1988.

The dividends are payable in cash on Feb. 6, 1990 to stockholders of record Jan. 25, 1990 and are to be included in stockholders' federal income tax returns for 1990.

#90010b0758 01/10/1990 ~Business Wire
FAIRLAWN, OH (JAN. 9) BUSINESS WIRE - GenCorp Wednesday reported that net sales from continuing operations in fiscal year 1989 increased 2.5 percent to $1.94 billion, compared to $1.89 billion in 1988.

Sales increased significantly at GenCorp Automotive, while Aerojet and GenCorp Polymer Products experienced modest decreases.

Segment operating profit of $89 million in fiscal 1989 was 40 percent below 1988's $148 million. A $43 million provision for the estimated cost to dispose of the Toledo, Ohio, soft interiors plant was the major cause of the decline. The company recorded a provision at year-end of $9 million for future environmental costs. Shortfalls at Aerojet, due to unanticipated overhead costs in the ordnance business, and at GenCorp Automotive, due to higher manufacturing costs, also contributed to the decline in profits.

Income from continuing operations in fiscal 1989 was $8 million, down from $55 million in 1988. Lower segment operating profit and higher interest expense contributed to the decrease.

Net income in 1989 was $210 million, or $6.61 per share, compared to $70 million, or $2.19 per share in 1988. In 1989, net income includes gains

of $209 million, or $6.58 per share, from the sale of discontinued operations. These gains resulted from the transfer of RKO broadcast properties.

Aerojet's sales during fiscal year 1989 totaled $1,034 million, down slightly from $1,056 million in 1988. Segment operating profit for fiscal 1989 was $92 million, compared to $93 million in 1988.

The sales decline at Aerojet was caused primarily by a reduction in deliveries of Combined Effects Munitions systems. However, this decline was partially offset by improvements in other business units. Propulsion sales increased moderately in fiscal 1989, principally due to deliveries of Titan IV first and second stage engine sets and Delta II second stage engines. Work also resumed on the Small Intercontinental Ballistic Missile advanced engineering development contract. Defense electronics sales increased modestly in fiscal 1989.

Unanticipated overhead costs in the ordnance business were the chief contributor to the decline in Aerojet's profits. These were partially offset by gains from the sale of assets.

GenCorp Automotive's sales increased significantly in fiscal 1989 to $433 million, up from $358 million in 1988. Segment operating profit for fiscal 1989 was $10 million, down from $28 million in 1988.

GenCorp is a technology-based company with strong positions in aerospace, automotive and related polymer products.

WILLOUGHBY, OH (JAN. 10) BUSINESS WIRE - Figgie International Inc. has announced the acquisition of CRK Industries, Traverse City, Michigan.

CRK Industries comprises Sheffer Collet Company, a manufacturer of specialty chucks and collets for the machine tool industry; Subco, Inc., a maker of close tolerance cutting tool holders; and Suburban Tool Sales, a sales organization for Sheffer Collet, Subco and several other manufacturers.

Terms of the acquisition were not disclosed.

Carl R. Kutzli, president of CRK Industries, has been named president of Figgie International's S-P Manufacturing division, Solon, Ohio. S-P manufactures chucks and other workholding devices for the machine tool

industry. S-P also makes pneumatic and hydraulic cylinders for a broad range of industrial applications.

Mr. Kutzli, who was principal owner of CRK Industries at the time of Figgie International's acquisition, will retain supervisory responsibilities for CRK. He has 34 years of experience in machine tools and related products.

Mr. Kutzli previously served as principal owner of Michigan Gear and Engineering Co., Detroit, a custom manufacturer of commercial gears, and as president of a Detroit-based company that designed and built automated transfer machines. He has also served in a sales capacity with several other Detroit area machine tool builders.

Figgie International Inc. is a diversified Fortune 500 corporation serving consumer, industrial, technical and service markets worldwide.

DOUGLASTON, NY (JAN. 10) BUSINESS WIRE - (NASDAQ:NYBC) New York Bancorp Inc., a $1.1 billion thrift holding company, held its annual meeting of shareholders on Jan. 9 at the Adria Conference Center in Bayside, Queens.

The meeting was held for the purpose of electing three directors to the company's board and the ratification of Peat Marwick Main & Co. as the company's independent accountants.

The results of the shareholders' vote will be publicly disclosed at a later date pending the outcome of a previously announced litigation involving New York Bancorp and a dissident group of shareholders.

Addressing shareholders, Martin D. Dehler, chairman of the board and chief executive officer, in his report to shareholders said, ''...the bright side of the (thrift) picture is New York Bancorp and its subsidary Home Federal Savings Bank.

''In the midst of the thrift crisis, your company has managed to maintain its profitability, maintain a quality loan portfolio and maintain its market share value as our stock price continued to appreciate.''

Dehler also stated that the company will continue its successful ''conservatively aggressive'' business strategy and look to take advantage of opportunities in the industry created by new banking regulations.

New York Bancorp Inc. is the holding company for Home Federal Savings Bank which conducts retail banking and lending activities through nine offices located throughout Queens, Nassau, Suffolk and Westchester counties.

#90010b0764 01/10/1990 ~Business Wire

WHITE PLAINS, NY (JAN. 10) BUSINESS WIRE - IBM Corporation and Valisys Corporation Wednesday announced that IBM has acquired a minority equity interest in Valisys, a leading developer and provider of computer-integrated manufacturing (CIM) software tools based in Santa Clara, Calif.

Under the terms of the equity agreement, IBM made an investment in Valisys in the form of newly issued voting convertible preferred stock. Additional details of the equity agreement were not disclosed.

Valisys and IBM have a development agreement that resulted in the October 1989 announcement that Valisys' products are part of the IBM CIM Advantage solution. The two firms today announced a new development agreement related to future enhancements to Valisys CIM products marketed by IBM. These products provide automated quality assurance and inspection functions to discrete parts manufacturers.

In addition, IBM intends to use Valisys' application software in the design and manufacturing of its own products. IBM has already installed the Valisys software at several manufacturing locations worldwide.

"Our agreement with Valisys is a further indication of our resolve to support emerging technology companies and provide our customers with superior solutions," said Edward J. Kfoury, IBM vice president and president, Industrial Sector Division.

"Our combined efforts will contribute to enhanced computer-integrated manufacturing systems that will help our customers achieve competitive, high-quality manufacturing operations."

"We are pleased to have IBM's support as a strategic partner as we continue to refine and broaden our software tool set for the CIM marketplace," said John J. Clancy, president and chief executive officer, Valisys. "This new relationship will allow us to more quickly respond to the growing need for efficient and cost-effective manufacturing systems."

Valisys, formed in 1987 as a subsidiary of the FMC Corporation, develops, markets and supports a line of CIM software products. This line features a

set of tools for use in design engineering, manufacturing engineering, quality assurance, production and inspection.

Valisys software solves a series of manufacturing problems by providing manufacturers with the ability to accurately specify, communicate and adhere to tolerance specifications. Valisys is a trademark of Valisys Corporation.

#90010b0775 01/10/1990 ~Business Wire

SOUTHPORT, CT (JAN. 10) BUSINESS WIRE - Crystal Brands Inc. (NYSE) announced Wednesday estimated 1989 earnings of approximately $3.00 per share from its continuing businesses as well as the planned divestiture of its Ship 'n Shore and William Barry operations. William Barry was acquired with Palm Beach in December 1988. The divestiture of Ship 'n Shore will be treated as a discontinued operation. The divestiture of William Barry will have no adverse impact on 1989 results.

Expected 1989 income from continuing operations will be approximately $27,000,000, or $3.00 per share. The loss from discontinued operations is expected to result in a one-time charge of approximately $8,900,000, or $0.98 per share. For 1988, proforma income from continuing operations (assuming results of Palm Beach and Trifari included for 12 months but excluding non-recurring purchase accounting charges) would have been approximately $23,200,000, or $2.57 per share.

The charge associated with the divestiture of Ship 'n Shore includes the write-down of goodwill and intangibles which were generated when Ship 'n Shore was acquired by General Mills and which were transferred to Crystal Brands at the time of its spin-off of General Mills. This divestiture will positively affect the Company's cash flow.

In commenting on the announcements, Richard F. Kral, Chairman of the Board and Chief Executive Offcier, said: ''We have completed a thorough review of the strategic direction of each of our businesses and we have determined that the Ship 'n Shore and William Barry businesses do not fit within Crystal Brands' overall future strategic direction.''

Crystal Brands produces tailored clothing, dress furnishings and sportswear for men, women and boys under the brand names Eagle Shirtmakers Evan-Picone, Gant, Haspel, Izod, Izod Lacoste, Palm Beach, John Weitz, Polo by Ralph Lauren for Boys, Pierre Cardin for Boys, Hunter Haig, Turnbury, Brannoch, Fulcrum, Firenza, Milano, and Austin Hill. The company also produces costume jewelry and accessories under the brand

names Monet, Trifari and Marvella.

#90010b0783 01/10/1990 ~Business Wire

NEW HAVEN, CT (JAN. 10) BUSINESS WIRE - Southern New England Telecommunications (SNET) announced Wednesday that its board of directors has approved the establishment later this month of Employee Stock Ownership Plans (ESOPs) that will become part of SNET's existing employee savings plans.

SNET will loan a total of $120 million to the new ESOPs that will be used to purchase from the company up to 2.9 million shares of its common stock, as adjusted for the two-for-one stock split payable Jan. 16, 1990.

The board of directors also approved a common stock repurchase program that will allow SNET to buy back an equal number of shares in the open market and through privately negotiated purchases over the next 12 months. The company expects to complete the repurchase program as soon as practicable. This repurchase program is in addition to the company's on-going stock repurchase program, which was announced last April.

In making the announcement, SNET Chairman and Chief Executive Officer Walter H. Monteith, Jr. said, ''These Plans give us the opportunity to provide our employees with an improved savings plan benefit in a cost effective manner. This action will also give employees a greater stake in the company.''

Headquartered in New Haven, SNET is an independent telecommunications company offering network services, communications equipment and information management systems to business and residence customers.

LONG BEACH, CA (JAN. 10) BUSINESS WIRE - The world's newest long-range wide-body jetliner -- the McDonnell Douglas MD-11 -- took off into the southern California skies Wednesday on its first flight.

The MD-11 is an advanced technology aircraft that has been ordered by 29 customers. There are 312 commitments in all for the big transport. First delivery of the MD-11 will be in late 1990.

After takeoff from Douglas Aircraft Co. (NYSE:MD) facilities here, the tri-jet began initial flight over the Pacific Ocean and then headed northeast for further testing over Edwards Air Force Base in the California high desert.

During Wednesday's flight, the MD-11, which was powered by General Electric CF6-80C2 high bypass turbofan engines, reached altitudes of 25,000 feet (7,620 m) and speeds of up to 300 knots. The MD-11 is designed for a maximum level flight speed of 588 miles per hour (945 km per hour) at altitudes of up to 43,000 feet (13,106 m).

Other power plants offered on the MD-11 are the Pratt & Whitney PW4460 and Rolls-Royce Trent 650.

John Miller, chief of Flight Operations for the MD-11 program and project pilot for the first flight, said, ''A first flight is always an exciting, newsworthy event. It is also the kickoff of a 1,600-hour, four aircraft MD-11 flight test program.''

A fifth MD-11 will be flown for certification of the Pratt & Whitney engine, bringing total test program hours to 2,000.

Other flight crew members included Tom Melody, co-pilot; Fred Schreiner, group leader for MD-11 Ship 1 test coordination; and Jack Boman, senior technical specialist.

Objectives of today's first flight included basic evaluation of the MD-11's handling qualities, speed envelope expansion, airborne confirmation of projected base aircraft performance, and check out of the aircraft's various systems, including functional tests of the avionics system. Flight and ground test crews also were able to check out the flight test instrumentation systems.

OAK BROOK, IL. (JAN. 10) BUSINESS WIRE - McDonald's Corporation announced Wednesday that it filed a shelf registration for up to $400 million of debt securities with the Securities and Exchange Commission on January 10, 1990.

The Company said it intends to issue these securities from time to time on terms to be specified prior to each issuance. The securities issued may be denominated in U.S. Dollars, or at the option of the Company, in any currency, including European Currency Units. Proceeds may be used for

debt refinancings, capital expenditures and other general corporate purposes.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

A copy of the prospectus may be obtained by written request to Mr. Donald P. Horwitz, Secretary, McDonald's Corporation, McDonald's Plaza, Oak Brook, IL 60521.

McDonald's is the world's leading foodservice organization, serving 22 million people each day in more than 11,000 restaurants in 51 countries. Seventy-five percent of McDonald's restaurant businesses are locally owned and operated by independent entrepreneurs.

NORWALK, CT (JAN. 10) BUSINESS WIRE - Great Northern Nekoosa Corp. said Wednesday that it has filed a supplemental memorandum of law in Maine federal court in support of its motion for a preliminary injunction against Georgia-Pacific Corp.'s tender offer and proxy solicitation.

The memorandum was filed to bring to the Court's attention newly discovered documents that Great Northern Nekoosa described as the most powerful evidence produced to date showing Georgia-Pacific's intentions with respect to asset divestitures should its takeover effort succeed.

The new documents, consisting of memoranda and notes of conversations between Georgia-Pacific officers and one of Georgia- Pacific's financinq banks, show that Georgia-Pacific officers assured the bank that they intended to divest assets if they succeeded in taking over Great Northern Nekoosa, but that ''they did not want to commit to any 1/8asset sales3/8 as part of their tender strategy.''

COLUMBUS, OH (JAN. 10) BUSINESS WIRE - W.S. White Jr., chairman and chief executive officer, American Electric Power Service Corp., announced Wednesday the appointment of Luke M. Feck as senior vice president-public affairs, AEP Service Corp., effective Jan. 15.

Feck succeeds Donald L. Macke, vice president and director-public affairs,

who is transferring to Indiana Michigan Power Co., an AEP operating subsidiary.

Macke will become Marion (Indiana) division manager when the incumbent retires later this year.

White also announced the appointment of Marshall O. Julien as vice president-communications, AEP Service Corp., effective Feb. 1.

Julien will be transferring to the Service Corp. from AEP's operating subsidiary, Columbus Southern Power, where he is public affairs director.

White said all appointments are subject to approval by the AEP Service Corp. board of directors at its Jan. 25 meeting.

AEP Serivce Corp. is AEP's management and technology arm, providing professional services to the eight operating companies and their coal mining subsidiaries and to the parent American Electric Power Co. Inc.

White said that Feck brings to AEP Service Corp. over 32 years experience in the communications and public affairs field. As senior vice president-public affairs, Feck will have overall responsiblity for the public affairs and communications programs of the AEP System.

For the past nine years Feck was editor of The Columbus Dispatch. Other significant assigments include more than 16 years with The Cincinnati Enquirer, where Feck held several responsible positions including editor and vice president. Feck also brings experience in the radio and television medium. While at The Enquirer, Feck was radio/tv editor, and at one time, he was a newswriter for WKRC-TV in Cincinnati.

White said Feck has been a member of numerous professional organizations including: Associated Press Managing Editors Association (of which he was director), American Society of Newspaper Editors, Associated Press Society of Ohio, and Central Ohio Chapter of the Society of Professional Journalists (director). Feck has also served as a juror for the Pulitzer Prize.

Feck is active in many civic organizations. Among them are The Thurber House, Columbus Area Leadership Program, Ohio Center of Science and Industry, Columbus Convention and Visitors Bureau, and past chairman of the United Way of Franklin County Communications Committee.

Feck is a graduate of the University of Cincinnati with a bachelor of arts degree in english. Feck and his wife, Gail, have three children.

Julien brings more than 23 years of experience with the AEP System. He has worked in public affairs at four AEP System operating subsidiaries.

Julien's experience in public affairs and communications within the AEP System will provide valuable insight and experience for his new assignment at the Service Corp., according to White.

Julien is a member of the Public Relations Society of America and has served as chairman of the Ohio Electric Utility Institute's (OEUI) Public Information Committee. OEUI is an association of the seven investor-owned electric utilities in Ohio.

Julien also serves on the board of directors of Cystic Fibrosis and Employment for Seniors Inc.

He is a graduate of Bowling Green State University with a bachelor of arts degree in journalism. Julien and his wife, Nancy, reside in the Westerville, Ohio, area.

WASHINGTON (JAN. 10) COMTEX - Revotek Inc. filed a Form 8-K with the NASD stating on Dec. 20, 1989, it entered into an agreement with SICOMMERCE AG. As part of this transaction, Revotek sold to SICOMMERCE AG all of its inventory of Dial-A-Tool products and related assets. The total amount for such sale was $291,481.

Revotek reports the agreement means that it will cease to manufacture and distribute the Dial-A-Tool products and will rely on SICOMMERCE AG to do this in the future. Revotek will receive a per unit fee for all sales of Dial-A-Tool products and is guaranteed a minimum annual fee.

Revotek also reported in the 8-K filing that Merrill C. Moore resigned as a director of the company effective Dec. 31, 1989 to pursue other business interests. Revotek reports the resignation was not the result of any disagreement with Revotek.

STAMFORD, CT (JAN. 10) COMTEX - I.C.H. Corp., the Louisville, KY, financial services concern, sold its Great Southern Life Insurance Co. unit to Financial Holding Corp. on Dec. 29 for $145 million.

However, I.C.H. moved a large block of Southern's assets to its Modern American Life Insurance Co. unit before the sale.

The assets included all the common stock of Southwestern Life Insurance Co.; all common stock of First Executive Corp. owned by Southern; all of Southern's real estate; and all of Southern's group life, accident and health insurance policies.

Financial Holding paid $105 million of the purchase price in cash and $40 million in a 15.5 percent subordinated note, according to a Securities and Exchange Commission.

Immediately before the sale was closed, Southwestern Life, a unit of Southern, paid Southern $133.5 million in cash dividends and $33.6 million under a debenture agreement.

Great Southern, in turn, paid Southern $521.3 million under a 1986 debenture agreement.

STAMFORD, CT (JAN. 10) COMTEX - Banc One Corp. of Columbus, OH, will acquire a 7.5 percent stake in Banc One Texas N.A. from the Federal Deposit Insurance Corp. on Jan. 17 for $37.5 million.

Banc One has agreed to purchase all of Banc One Texas's shares over the next five years, according to a Securities and Exchange Commission filing.

The FDIC will control the selection of Bank One Texas board members, however, until it has sold it entire stake in the bank.

The FDIC created Banc One Texas with the assets and liabilities of 20 MCorp. affiliates.

Before Banc One acquires Banc One Texas, the FDIC is expected to contribute assets so that the bank's assets equal its liabilities.

The FDIC will also capitalize the Banc One Texas with $500 million.

Banc One is obligated to acquire all of Banc One Texas' class B stock over the next three years.

It expects to spend about $337 million for those shares.

The remaining class C stock, which is valued at about $125 million, must be purchased from the FDIC within five years.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 9, 1990

STAMFORD, CT (JAN. 10) COMTEX - Baroid Corp., a Houston-based oil and gas well drilling equipment services and products concern, said it has agreed to buy Allegheny International Inc.'s interest in Titanium Metals of America.

In a Securities and Exchange Commission filing, Baroid said it agreed to pay about $50 million for Allegheny's 30 percent stake in Titanium.

Following the purchase, Baroid will hold all of Titanium's common stock outstanding.

Baroid also bought a $3.25 million note payable to Titanium.

The purchase must be approved by the bankruptcy court overseeing Allegheny's proceedings under Chapter 11 of the U.S. bankruptcy code and by both companies' boards.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 9, 1990

#90010c0043 01/10/1990 ~Comtex
WASHINGTON (JAN. 10) COMTEX - First Capitol Financial Corp. filed a Form 8-K with the NASD stating it lost $6 million, or $1.93 per share, for the quarter ended Sept. 30, 1989.

This compare with a loss of $822,000, or $0.27 per share, for the same period in 1988.

First Capitol also reports that the Office of Thrift Supervision has directed that First Capitol's subsidiary, Capitol Federal Savings of Denver, classify $86.9 million of assets as loss and to establish specific loss reserves in that amount.

First Capitol states that the further effects of the $86.9 million OTS-directed write-downs and loss provisions would place First Capitol in a negative net worth position as calculated under Regulatory Accounting Principles of $43.7 million. First Capitol states it does not agree with the OTS assessment and plans to file in the near future for arbitration challenging the OTS findings, a process which could take several months.

SEC - AMENDMENT NUMBER: 1

ROBERT F SHERMAN OF DALLAS, TX OWNS 433,209 SHARES (11.50%) OF SOUTHWEST REALTY LTD (TICKER: SWL) OF DALLAS, TX.

ANNOUNCEMENT:

Each of the preferred depositary receipts purchased on Dec. 29, 1989, was

issued with four detachable warrants (each of which entitles its holder to purchase one depositary receipt for $1.25).

An aggregate of 7,900 warrants was acquired by the beneficial interest in 1,975 preferred depositary receipts. Family trusts and members of Sherman's family own 47,420 depositary receipts, 16,669 preferred depositary receipts, and 14,020 warrants.

LATEST TRANSACTION:

On Dec. 29, 1989, Sherman acquired 1,975 preferred depositary receipts at a price of $17.10 each, pursuant to the company's prospectus dated Nov. 18, 1988.

PURPOSE:

Investment.

SEC - AMENDMENT NUMBER: 5

ANNOUNCEMENT:

On Jan. 3, 1990, WestMarc (TICKER: WSMC) was the surviving entity in a merger with a wholly owned subsidiary of Tele-Communications Inc., under which TCI became owner of all the common stock of WestMarc.

WestMarc is no longer a public company.

-30- 478
#90010c0104 01/10/1990 ~Comtex
WASHINGTON (JAN. 10) COMTEX - FBX Corp. filed a Form 8-K with the NASD

stating on Dec. 28, 1989, it appointed Lazar Levine & Co. as its independent accountants, replacing Deloitte & Touche.

In connection with the audits for the two most recent fiscal years and the subsequent interim period, there were no disagreements with Deloitte & Touche on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

The former accountant's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion and was not qualified or modified as to uncertainty, audit scope or accounting principles.

-30- 846

#90010c0106 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - Sierra Capital Realty Trust VIII Co. filed a Form 8-K with the NASD stating on Dec. 21, 1989, it purchased two warehouse buildings in the Jackson, MS metropolitan area.

Each of the Mississippi properties was purchased from a separate seller.

-30- 442

#90010c0107 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - The 10-K report filed at the NASD shows Lafayette Enterprises Ltd. lost $279,066, or $0.00 per share, on no revenues for the fiscal year ended Sept. 30, 1989.

This compares with a loss of $14,364 on no revenues for the period from April 8, 1988, (inception) through Sept. 30, 1988.

Lafayette states on Sept. 25, 1989, it obtained a confession of judgment in the amount of $360,000 against Colorado Select Potato Chips Inc. This judgment related to a bridge loan made by Lafayette to Colorado Select, which is now in default.

Lafayette reports that based upon a review of unaudited financial information relating to Colorado Select, it now appears unlikely that Lafayette will collect the entire amount of the judgment. Counsel for Lafayette is currently attempting to locate the assets and execute on the judgment. Recently, Colorado Select filed a motion to set aside the judgment. Lafayette is vigorously opposing such motion.

Lafayette's units are traded in the over-the-counter market. Lafayette reports an active market has not developed, primarily due to the problems surrounding the bridge loan of substantially all of the net proceeds of Lafayette's initial public offering to Colorado Select and Colorado

Select's subsequent default on said loan.

Lafayette's executive office is located at 3200 Cherry Creek South Drive, Suite 230, Denver, CO 80209 and its telephone number is (303) 789-0235.

-30- 1637

#90010c0108 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - Coast Savings Financial Inc. filed a Form S-3, amendment No. 1 registration statement with the SEC in which it proposes to offer 3 million shares of noncumulative convertible preferred stock, Series A.

Merrill Lynch Capital Markets, Goldman Sachs & Co. and Montgomery Securities are managing the offering.

-30- 500

#90010c0109 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - ONBANCorp Inc. filed a registration statement with the SEC in which it proposes to offer 2 million shares of common stock. The company's common stock is traded on the NASDAQ National Market System.

Dean Witter Reynolds and Merrill Lynch Capital Markets are managing the offering.

-30- 455

#90010c0110 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - Presidio Oil Co. filed a Form S-3 registration statement with the SEC in which it proposes to offer $50 million principal amount of convertible subordinated debentures due 2015. The debentures are convertible into shares of the company's Class A common stock.

The prospectus relates to resales of the debentures by the initial holders thereof (selling security holders). Presidio will not receive any of the proceeds from the sale of the debentures by the selling security holders.

-30- 662

#90010c0111 01/10/1990 ~Comtex

WASHINGTON (JAN. 10) COMTEX - Benedict Nuclear Pharmaceuticals Inc. filed a Form S-1 registration statement with the NASD in which it is registering for sale 8,917,379 shares of the company's common stock on behalf of selling stockholders. The shares of common stock will be sold by the selling stockholders through broker-dealers in ordinary brokerage

transactions.

Benedict's executive office is located at 1313 Washington Ave., Golden, CO 80401 and its telephone number is (303) 279-9375.

-30- 660
#90010c0112 01/10/1990 ~Comtex

SEC - AMENDMENT NUMBER: 2

GROUP LED BY INFOTECHNOLOGY INC OF NEW YORK, NY OWNS 1,262,397 SHARES (8.80%) OF HADRON INC (TICKER: HDRN) OF FAIRFAX, VA.

ANNOUNCEMENT:

Infotechnology's principal activity has changed from investing in emerging growth companies to operating an integrated information technology and communications company.

Given the changing focus of Infotechnology, the management of Infotech has determined it to be in Infotech's best interest to increase their ownership interest in Hadron.

LATEST TRANSACTION:

From Dec. 26 to Dec. 29, 1989, Infotechnology purchased 105,000 shares for about $.41 per share.

-30- 813
#90010c0119 01/10/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 37

ANNOUNCEMENT:

A letter sent on Jan. 8, 1990, by the board of Sea Containers (TICKER: SCR) to Temple contended that the reason for delay in holding an annual meeting was the fault of Temple and not, as alleged by Temple, Sea Containers's fault.

Sea Containers's board is concerned that their shareholders not be denied the right to choose between their recapitalization plan and what they consider to be Temple's inferior offer.

STAMFORD, CT (JAN. 11) COMTEX - Deans Foods Co., the Franklin Park, IL, food manufacturer, lowered the ''trigger'' on its defensive shareholders' rights plan.

Under the revised plan, the company's ''poison pill'' will be triggered if an unwanted bidder acquires at least 15 percent of its common stock outstanding, according to a Securities and Exchange Commission filing.

Once triggered, each purchase right allows stockholders to buy a common share for half price.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 10, 1990

TOKYO (JAN. 10) - Sales of imported cars in Japan in 1989 rose 35.2 per cent from a year earlier to a record 182,168 units, the Japan Automobile Importers Association said on Wednesday.

Association officials attributed the record sales to increased purchases of luxury vehicles and the replacement of excise taxes by a lower consumption tax introduced on April 1.

West German cars led the way with sales totaling 120,527 units, up 31.3 per cent over 1988 while U.S. car sales rose 32.2 percent to 20,536 units.

Sales of British cars came to 14,550 units, up 48.4 percent, and those of French cars soared 70.4 percent to 10,499 units.

Swedish cars accounted for 9,768 units, up 44.8 percent, and Italian cars sales increased 8.3 percent to 4,564 units.

Australian car sales more than tripled to 259 units from 1988's 84 units, and sales of cars imported from other countries also enjoyed a 3.2-fold increase to 1,465 units, compared to 445 units the previous year.

NEW DELHI (JAN. 10) - A police officer and two constables were killed instantly when a powerful bomb exploded in a police complex in the northern Indian state of Punjab Wednesday.

The Press Trust of India (PTI) said the blast occurred in the Punjab Armed Police (PAP) complex at Jalandhar, killing commandant Gobin Ram and two others, and injuring at least 12 more.

The attack came a day before an all-party meeting was scheduled to take place in Punjab's Ludhiana city to discuss measures to end the Sikh separatist campaign for a homeland called Khalistan (land of the pure) in Punjab.

Thursday's meeting is to be attended by Prime Minister Vishwanath Pratap Singh.

FRANKFURT, West Germany (JAN. 10) - The West German central Bundesbank has injected 17 billion Deutsche marks (10 billion dollars) into the banking system by means of a repurchase arrangement at rates between 7.70 percent and 8.10 percent, the bank said on Wednesday.

-30- 441
#90010d0930 01/10/1990 ~French/German News Agency
HONG KONG (JAN. 10) - The Hang Seng Index surged a handsome 45.84 points points to 2,868.00 Wednesday on the calmer outlook across the border in China.

The latest hike followed a rise of 5.92 points on Tuesday

Turnover however thinned to 681 million Hong Kong dollars (87.3 million U.S.) from Tuesday's 1.06 billion dollars (136 million U.S.)

Dealers said speculation that the Chinese authorities were about to lift martial law in Beijing, indicating a more stable situation in the capital, boosted trading sentiment locally.

The key index gained nearly 40 points during the morning session, and follow through buying support kept share prices largely on the up side for the rest of Friday's trading.

The local money scene is hypersensitive to political events in China, which resumes sovereignty over this British colony in 1997.

-30- 1028
#90010d1020 01/10/1990 ~French/German News Agency
TOKYO (JAN. 10) - Bank of Japan Governor Yasushi Mieno denied rumors Wednesday that the central bank was considering another hike in its official discount rate to help shore up the falling yen.

"We raised the official discount rate a few weeks ago and we are now in the process of monitoring the effects," Mr. Mieno told a regular press conference.

He was referring to the 0.5 percentage point hike to 4.25 percent per year on December 25.

The governor said the dollar's recent surge against the yen was mostly "speculative," triggered largely by rumors.

Rumors of political unrest in the Soviet Union and of an insider stock trading scandal involving a powerful ruling Liberal Democratic Party lawmaker have forced the yen down to around the 145-yen level against the dollar.

The yen fell 0.33 yen Wednesday to close at 145.30 yen, down from 144.97 yen Tuesday, although the central bank sold 600-700 million dollars to prop up the ailing currency.

The central banker, however, said he believed the yen would stabilize soon and would settle at a level that would reflect Japan's economic fundamentals.

Mr. Mieno, who became the head of the Bank of Japan in December after Satoshi Sumita, said he would cooperate with other central banks to stablize the foreign exchange market.

He stressed that cooperation between the central banks of major industrial nations was intact and said there was no need for a meeting of the Group of Seven (G-7) at present. Speculation is rife that a G-7 meeting comprising Japan, the United States, Britain, West Germany, Italy, France and Canada will be held later this month.

Finance Minister Ryutaro Hashimoto also said Wednesday that "cooperation among the countries was solid and would seek stabilization (of the foreign exchange market) by maintainig a close cooperation."

Mr. Mieno attributed the recent sharp fall in the bond market and the stock market to the falling yen and to the rumors but said the markets were not in a state of panic.

"Share prices are still at the level of mid-December," he said, adding that the recent fall was a reaction to precariously high prices that rapidly shot up at the end of the year.

#90010d1220 01/10/1990 ~French/German News Agency

JERUSALEM (JAN. 10) - A record 51,300 Israelis were paid unemployment benefits last month, official statistics disclosed Wednesday, amid fears that joblessness could intensify with the arrival of thousands of Soviet emigres.

The National Statistics Institute meanwhile reported that 88,000 Israelis were seeking employment, or more than eight per cent of the work force.

The Labour ministry said the number of unemployed workers receiving benefits rose to 51,300 in December 1989 from only 30,000 in December 1988.

Deputy Foreign Minister Benyamin Nethanyahou Tuesday called for an "emergency plan" to integrate Soviet Jews.

"Israel is this year expecting 100,000 to 200,000 Soviet Jews and at least 700,000 others over the next three years," said Mr. Nethanyahou.

Addis Ababa (JAN. 10) - Rebels of the Ethiopian People's Revolutionary Democratic Front (Eprdf) said Wednesday 100 government troops were killed in an unsuccessful attempt to recapture Mariye in northeastern Ethiopia.

The Voice of Tigray Revolution radio said a government force of four battalions and one brigade which advanced on Mariye from Hayk, about 25 kilometres north of Dese in Welo region, were ''crushed and dispersed'' by Eprdf forces and local people.

''During the defensive engagement which took place on the 6th of January 1990, the enemy lost 100 troops killed, 115 wounded and 11 captured'', the radio said. Mariye was described as a ''strategic place''.

#90010d1550 01/10/1990 ~French/German News Agency

MOSCOW (JAN. 10) - Three Armenians were wounded Tuesday when soldiers opened fire in clashes with civilians in Stepanakert, the chief town of the disputed region of Nagorny Karabakh, Interfax, a Moscow Radio publication reported here Wednesday.

The clashes occurred during demonstrations in the mainly Armenian-populated

town coinciding with the arrival of a Soviet parliamentary delegation, headed by Rafik Nishanov, chairman of the Council of Nationalities in the Supreme Soviet.

The delegation, which also included Andrei Girenko, a Central Committee secretary and a Mr. Gusseinov, head of the KGB in Azerbaijan, was to have met with local officials to discuss the dispute which has pitted Azerbaijan's Moslem population against Christian ethnic Armenians living in the autonomous enclave.

Television ran footage showing the representatives waiting at the airfield as distant shots from automatic firearms could be heard. The representatives later left by air without attempting to reach town.

Meanwhile, a general strike was called in the town, according to Wednesday's edition of the Sovietskaya Rossia newspaper.

Giving an example of rising tension in the autonomous enclave, which is claimed by neighbouring Armenia, the paper said that a group of Armenians had recently taken hostage an army lieutenant in Stepanakert and exchanged him for one of their own jailed activists.

#90010d1570 01/10/1990 ~French/German News Agency

PARIS (JAN. 10) - Japanese businessmen are out to conquer the world, and their investments threaten to destroy European jobs and industry, the French Minister for European Affairs, Edith Cresson, said before Japanese Prime Minister Toshiki Kaifu arrived here Wednesday.

In a front-page interview with the Paris business daily La Tribune de l'Expansion, Mrs. Cresson said: "Today it is clear that Japan is an opponent which does not play the game and is absolutely determined to conquer the world."

Only "the completely naive or the willfully blind" could fail to see that, she added.

Denying that she was in any way protectionist, Mrs. Cresson said the 12 members of the European Community must forge "a European industrial policy even if the English have little stomach for such a thing."

Without going into details, she went on, "we must develop a joint industrial policy involving the large European companies." Otherwise, "the success of the EEC is unthinkable."

Mr. Kaifu was due to arrive in Paris from Brussels late Wednesday on the fourth leg of a European tour.

While she reserved her harshest words for the Japanese, Mrs. Cresson was far from tender towards Britain or the United States.

"Liberal ideology, especially when promoted by Britain, has had a devastating impact," she said, while "the policy of the United States towards the Japanese has been much too weak."

LE MANS, France (JAN. 10) - A woman pregnant with test tube triplets has caused havoc among French bureaucrats trying to register the babies who were born naturally -- but 11 days apart, it was learned here Wednesday.

The extremely rare phenomenon occurred when Raymonde Pommier, 37, who was treated for sterility for 10 years, went into a maternity clinic in this western city November 5.

A son, Damien, was born prematurely at 710 grams (1.5 pounds), but labor suddenly stopped and did not start again until November 16 when Guillaume and Alexandre were born.

All three are doing well, but perplexed officials for the moment have registered the infants as twin boys with an older brother.

-30- 869

#90010d1900 01/10/1990 ~French/German News Agency

TOKYO (JAN. 10) - North Korean Prime Minister Yon Hyong-Muk urged farmers Wednesday to arm themselves with socialism and push annual grain output to 15 million tons, a goal seen by outside analysts as difficult.

He told a national agricultural conference in Pyongyang the target should be reached "in a few years" and announced a "bumper harvest" for last year though he gave no figures, according to the Korean Central News Agency (KCNA) monitored here.

"The ideological and cultural revolutions should be actively stepped up in the countryside to bring up all the agricultural working people to be fully developed men of communist type," he was quoted as saying.

"The green revolution should be strictly carried out so as to quickly complete researches into new strains of paddy rice and maize which can lift the per hectare (2.47 acres) yield from 10 to over 15 tons," Mr. Yon said.

He said that "many cooperative farms harvested eight, nine and 10 tons" of grain from each hectare (2.47 acres) last year.

North Korea's vice minister for joint venture industry, Kim Song-Hwan, told western journalists visiting Pyongyang for a world youth festival in July that the country's grain output totaled 10 million tons in 1988, unchanged from 1984.

In 1980, President Kim Il-Sung set the goal of grain production at 15 million tons by the end of the 1980's.

In 1984, North Korea declared that its grain output had reached 10 million tons but gave no figures for 1985 and 1986.

The U.N. Food and Agriculture Organization (FAO) estimated that the 1984 output included 5.6 million tons of rice and 2.6 million tons of maize.

The nation's seven-year plan, due to end in 1993, set the grain target at 15 million tons, unchanged from the earlier goal that should have been attained by 1990.

Analysts attributed possible agriculture shortcomings in North Korea to high density farming that can boost productivity in the short-term but lessens soil fertility in the long run.

#90010d1920 01/10/1990 ~French/German News Agency

MOSCOW (JAN. 10) - The Soviet finance ministry has floated a 16-year government bond with a five percent annual interest rate, Tass news agency reported Wednesday.

The bonds, worth a total 15 billion rubles (24 billion dollars at the official rate), will be issued through savings banks which currently offer three per cent interest on deposits.

Interest on the bonds will be paid yearly and the bonds themselves will be redeemed by lot, starting on January 1, 2001.

First vice-premier Leonid Abalkin said in September that the government would float a 60 billion ruble (96 billion dollars) state loan to cut this year's budget deficit of about 100 billion rubles by half.

Savings here are estimated at about 314 billion rubles (502 billion dollars), according to official statistics.

TOKYO (JAN. 10) - A Japanese consortium said Wednesday it had signed an 18 billion yen (128 million dollar) contract to export a plant for manufacturing refrigerator compressors to the Soviet republic of Lithuania.

The consortium is made up of Sanyo Electric Co., Nissho Iwai Corp. and Toyo Engineering Corp.

The plant will be supplied to a factory in Mazhekijai, Lithuania, which will begin production in 1992 at an annual rate of two million units, a Sanyo official said.

Under the contract, Sanyo will provide equipment and production know-how. Toyo Engineering will design the plant and the trading house Nissho will handle payment, the official said.

Monrovia (JAN. 10) - The Abidjan-based African Development Bank (Adb) has loaned Liberia 2.96 million dollars for Monrovia to ''create a data base covering all aspects of public investments and financing'', finance ministry officials said Wednesday.

Deputy Liberian Finance Minister Arthur Gedeo and Adb vice President for Operations, Gilbert Avika, signed the agreement.

The loan follows Liberia's promise to streamline the economy in a fresh recovery program, the officials said.

BUCHAREST (JAN. 10) - The chief bodyguard of the late Romanian president Nicolae Ceausescu, General Marin Neagoe, will go on trial soon, reliable sources said here Wednesday.

Gen. Neagoe's arrest had not previously been announced, but the sources

said he would be put on trial "within days".

The same sources said that the new authorities in Romania would wait, however, before opening political trials where Mr. Ceausescu's son Nicu is to appear.

Nicu Ceausescu was arrested soon after his father and his mother, Elena, number two in the former regime, fled on December 22 amid protests in Bucharest against the bloody suppression of anti-government demonstrations in Timisoara, western Romania. After his arrest, he was wounded by a man wielding a knife.

His parents were summarily tried by secret court martial and executed by firing squad on Christmas Day.

The National Salvation Front which seized power in the revolution abolished the death penalty in Romania on December 31.

Gen. Neagoe would be the highest-ranking member of the Securitate secret police force put on trial so far.

Three lower-ranking Securitate officers were sentenced earlier this week to terms ranging up to 12 and a half years for acts of "terrorism".

They were sentenced in Sibiu, central Romania, the city where Nicu Ceausescu held sway until his parents' downfall.

Observers here said the trials of Securitate men were apparently designed to encourage other members of the force to surrender, while the authorities wanted more time to prepare political trials.

BUENOS AIRES (JAN. 10) - The Argentine economy is on the brink of recession because of the government's harsh monetary policy, economists and businessmen say.

The continuing weakness of the austral - the nation's currency - has led the country to virtual bankruptcy and threatens to shut down the country's industrial production, the Argentine Industrial Union (UIA) warned.

Gilberto Montagna, president of the UIA - which includes the country's most powerful businesses, said several companies were in "serious danger" of collapse.

He said the government's monetary policy was making it difficult for firms to pay employee salaries, suppliers of parts and services, and taxes.

President Carlos Menem's administration decided January 1 to convert several billion dollars worth of short-term certificates of deposit into 10-year bonds. The conversion was aimed at postponing the government's foreign-debt payments,
which total some 600 million dollars per month.

Mr. Menem's government also announced it would slash the supply of australs in circulation to boost the currency's value.

The monetary plan was aimed at Argentina's hyperinflation, which hit a record 4,923 percent in 1989.

One indication of the crisis occurred this week, when the country's largest auto-assembly plants laid off some 6,000 workers and suspended operations because their suppliers had failed to deliver needed components.

But Tuesday, financial markets here stabilized somewhat, with the index of leading stocks gaining 23 points, recuperating part of the 50-per-cent losses they sustained Monday.

Analysts said the stability would be short-lived because it was related to the government's decision to limit the printing of new australes.

Economists feared the current economic trend might lead to renewed social unrest. Last May and June, food riots in several Argentine cities forced then-president Raul Alfonsin to hand over the government to president-elect Menem six months ahead of schedule.

MOSCOW (JAN. 10) - The first Indonesian-Soviet joint venture, Mosalim, which is to produce foodstuffs and detergents from Indonesian palm oil, was officially set up here Wednesday, Tass news agency reported.

The venture involves the Moscow fat-products plant, the Soviet association of exporters and the Indonesian Salim group.

Part of the Moscow plant production will go to Indonesia and third countries.

Plant director Aslancheri Khagurov said the venture's charter capital was 9.2 million rubles (14.7 million dollars at the official rate) with equal Soviet and Indonesian shares.

The deal was negotiated during the visit here last year of Indonesian President Suharto.

PARIS (JAN. 10) - The Paris Club of creditor governments is to hold an informal working meeting shortly to discuss Poland's financial needs, informed sources said here Wednesday.

The session would be a preparatory meeting and was not part of the Club's regular calendar, the source said.

The British daily the Financial Times said Wednesday that the Club of Paris was to hold talks Friday with leading western commercial creditor banks on Poland's financial needs for the next two years.

Poland is the most heavily-endebted of the eastern European nations, including the Soviet Union, with borrowing totalling 40 billion dollars.

Warsaw recently concluded an agreement with the International Monetary Fund under which the organisation will lend Poland up to 710 million dollars over 13 months to support its efforts to turn the economy around.

GENEVA (JAN. 10) - World raw steel production rose 0.4 percent in 1989 over the 1988 level to 781.8 million tons, according to figures compiled by the steel committee of the U.N. economic commission for Europe.

The steepest increases came from Middle East producers, up 3.4 percent or 7.5 million tons and from the European Economic Community, up 1.8 percent or 2.5 million tons.

North American production was down 1.8 percent, or 1.9 million tons, while

that of Eastern Europe, including the Soviet Union, fell 2.7 percent or six million tons.

But the Soviet Union remained the world's leading producer despite a 1.5 per cent fall in production to 160.7 million tons, followed by Japan, up two per cent at 107.8 million tons, the United States at 88.3 million tons (down 2.6 percent) and China, up 3.7 percent at 61.3 million tons.

GENEVA (JAN. 10) - World air traffic is expected to double to more than two billion passengers a year by the year 2000, and special measures are needed to ensure that airports will be able to cope, the International Air Transport Association (IATA) said Wednesday.

The 1980's began with a severe recession. The year 1980, when 750 million passengers were recorded, was the first since World War II in which the volume of air traffic fell, IATA director general Gunter Eser said in a statement.

The trend was reversed with the economic expansion of the industrialised countries from 1984-85, and in 1989 some one billion air passengers were recorded.

Moves to liberalise air traffic by North American and Western European governments "offered airlines wonderful opportunities to profit from a more liberal market," Mr. Eser said, but this had also led to demand outstripping the air network's capacity.

"Air transport infrastructure is simply not able to absorb the growth in demand for flights, particularly in Europe and North America, but also in key regions such as Asia and the Pacific," Mr. Eser said.

During the 1980's, the number of jets in the world rose from 6,000 to 8,000 and the growth is likely to continue.

Mr. Eser predicted that by the end of the 1990's, the annual number of air passengers would reach 2.2 to 2.5 billion, requiring more than 4,000 more jet airliners.

He called for governments to exercise the "political will to undertake the necessary investment" to ensure that airspace and airports were not overwhelmed.

It was also vital to set up "a coherent development plan for each region," and "constructive communication between all concerned parties".

#90010d4270 01/10/1990 ~French/German News Agency

LONDON (JAN. 10) - British Aerospace said Wednesday it would not pay any indemnities to other members of the four-nation European Airbus consortium over a strike by BAe workers that has already seriously disrupted Airbus production.

A BAe spokesman said an article in the consortium's statutes which could be invoked to ask the British group to make compensation payments for revenue lost because of the labour dispute "does not apply in the case of strikes."

The statement came after Airbus Managing Director Jean Pierson on Tuesday threatened to invoke article seven of the statues, which he said "allows for demanding an indemnity from a partner incapable of facing its obligations."

Mr. Pierson said that because of the nine-week-old strike at three BAe plants in Britain, Airbus was "on the verge of a break in production."

The Airbus Industrie consortium groups companies from France, West Germany, Britain and Spain.

The striking workers in Britain, like their counterparts in other British industries, have asked for a shorter working week. BAe has so far refused to talk to unions representing the workers until the strike is called off.

Production of Airbus planes has been cut back sharply since October as a result of the BAe strike, but the spokesman said that this would not affect BAe management's stand on the strike.

The strike has already led to the full lay-off of 80 workers and the partial lay-off of some 500 others at a BAe plant at Filton, near Bristol in southwest England.

GUATEMALA CITY (JAN. 10) - A U.S. citizen jailed here on drug charges was stabbed to death by other inmates, police said Wednesday.

The American was attacked Tuesday in the suburban Pavon prison and died on the operating table in a Guatemala City hospital, authorities said.

In Washington, State Department consular officials identified the victim as Gordon Krekow. They said he also went by the name of Gary Kent.

Guatemalan police said they did not know the motive of the attack.

Police said Mr. Krekow, whose age was not known, was wanted on drug charges in the United States.

Prison officials said the facility was thoroughly searched after the stabbing and that a large amount of weapons were seized.

The Pavon jail, Guatemala's largest, was the scene of a riot last year that left eight people dead and dozens injured.

BUCHAREST (JAN. 10) - French Foreign Minister Roland Dumas arrived here

Wednesday at the start of a two-day official visit, becoming the first senior western diplomat to travel to Romania since the downfall of Nicolae Ceausescu.

On his arrival, Dumas paid tribute to the Romanian people who "rose up to win freedom" and who "brought to an end the evil forces oppressing" them.

Dumas hosted a dinner for his Romanian counterpart, Sergiu Celac, and was to meet Wednesday with the top two officials of the governing National Salvation Front, Ion Iliescu and Dumitru Mazilu, as well as Prime Minister Petre Roman and other senior officials.

He is also to meet with Romanian intellectuals during a lunch at the French embassy here.

Dumas is accompanied on the trip by French Agriculture Minister Henri Nallet, who travelled to Bucharest at the request of the Romanian authorities.

VANCOUVER, Canada (JAN. 10) - Canadian police and customs officers Wednesday seized seven kilos (more than 15 pounds) of heroin in a package sent from Hong Kong, and arrested an unspecified number of people, officials said.

The drugs were said to have a street value of 40 million U.S. dollars.

Officials said the narcotics were hidden in a food package which also contained Chinese crackers and the drink, ginseng.

The package was seized Dec. 19, but authorities who swapped the heroin for another substance to confuse the alleged traffickers maintained an information embargo until they had completed several arrests.

#90010d5950 01/10/1990 ~French/German News Agency

LAGOS (JAN. 10) - Nigeria Airways earned 480 million naira (64 million dollars) in 1989 and airlifted 1.8 million passengers in the same year, as against the two million passengers it recorded in 1988 on its international and domestic routes, an official source stated here Wednesday.

On international routes, the airline moved a total of 103,911 passengers on the New York, London and Jeddah routes last year, the source stated, adding that more than 204,578 were transported within Africa in the same year, as against the figure of 179,200 passengers in 1988.

Last year's earnings, which amounted to a daily average of 1.3 million naira, were one of the highest in the airline's 30-year history, said the source.

Although the airline recorded a drop in total passengers in 1989, it generated more revenue as a result of increases in air fares effected twice last year alone, observers noted.

The airline's ''huge'' losses last year, whose exact figures were not disclosed, were due to high operating costs, said the source.

For example, it earned 30 million naira (four million dollars) last February but spent over 50 million naira on costs in the same month.

A total of 6,927 international and local flights were operated last year, while 1,739 were cancelled, the same source said.

#90010d6000 01/10/1990 ~French/German News Agency

AUCKLAND (JAN. 11) - Israeli tennis professional Amos Mansdorf, who once said he would have played tennis in Nazi Germany, claims his remarks were taken "out of context" and said that they have made him "an outcast" at home.

Mansdorf, taking part in the New Zealand Open in Auckland, was the target of protests here Monday because he has played in South Africa.

Talking to the press after a game he said politics and sport should not mix and asked if he would have played in Nazi Germany, he said: "If I could have, I would have."

The remark has prompted outrage in Israel and a rebuke from the Israeli Embassy here. But Mansdorf said Wednesday he had been "misquoted."

"I don't know if I can ever live in Israel for the rest of my life. Lots of people survived the war and it is very upsetting for them to hear this when I didn't say it. It is very serious and I'm under a lot of pressure," he said.

"I was talking about the 1936 Berlin Olympics and it was all hypothetical, because there was no Israel at the time. I said maybe if Israel sent a team I would go back alive. It was a joke but you have no sense of humor."

Later, in a statement released through the Association of Tennis Professionals (ATP), Mansdorf said: "My heart is in Israel and there is no way that I would have said anything that would have belittled the state of

Israel or the memories of the survivors of the holocaust."

"I am extremely sorry about the reaction in Israel, and I believe that my complete statements were taken out of context and not released in full."

#90010f0422 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - Jim Palmer, the glamorous right-hander of the Baltimore Orioles, and Joe Morgan, a central cog of the Big Red Machine, Tuesday night were elected to the Baseball Hall of Fame in their first year of eligibility.

In results announced by the Baseball Writers' Association of America, Palmer received votes on 411 of the 444 ballots cast. His appearance on 92.5 percent of the ballots, was the second-highest percentage for a pitcher behind Bob Feller (93.75).

Morgan received 363 votes, 30 over the total needed for election. His total of 81.7 percent was well above the 75 percent required for election.

Palmer and Morgan became the 20th and 21st players to gain entry in their first year on the ballot. Last season, writers elected Carl Yastrzemski and Johnny Bench in their first year.

Gaylord Perry, who made a career of throwing the illegal spitball, was 13 votes short of election and was named on 72 percent of the ballots. Perry fell 32 votes short of entry last year in his first bid for election.

Pitchers Jim Bunning and Ferguson Jenkins have received strong support in recent years. Jenkins was 102 votes shy last year and just 37 short this year, fourth overall in the voting. Bunning, whose eligibility on the ballot expires in 1991, missed by four votes in 1988, 53 last year and was 76 short this year.

The Hall of Fame now contains 206 members. Seventy-eight were voted in by the baseball writers, 119 by the Veterans Committee, and nine by the Baseball Hall of Fame Committee on Negro Baseball Leagues.

Ten-year veterans of the BBWAA are eligible to vote. A total of 20 first-timers appeared on this year's ballot, but only Palmer and Morgan - both of them broadcasters after their playing days - owned credentials necessary for election.

A graceful right-hander who befuddled hitters and feuded with Manager Earl Weaver, Palmer pitched all 19 major-league seasons with Baltimore. And he wore it with style, winning the American League Cy Young Award in 1973, '75 and '76.

Born in New York on Oct. 15, 1945, Palmer won 20 or more games in eight of nine years beginning in 1970. He pitched 19 years in the majors, compiling a 268-152 record with a 2.86 ERA.

Palmer, as gifted in appearance as he was in skill, also earned fame (as well as money) by endorsing a line of men's briefs.

Palmer pitched in eight playoff games, winning four. He also appeared in nine World Series games, winning four. Overall, he went 8-3 in post-season play.

Morgan, a second baseman from Bonham, Texas, broke into the majors with the Houston Astros in 1963. By the time his career ended, he owned two National League MVP awards, as he combined power and speed in a way seldom seen in a second baseman.

Morgan, who was born Sept. 19, 1943, played 22 major-league seasons, with a .271 batting average, 1,865 walks, 689 steals, and 1,651 runs.

Morgan spent parts of nine years with the Astros, before being part of a trade that changed the complexion of the National League for the rest of the decade.

On Nov. 29, 1971 the Astros sent Morgan, Denis Menke, Jack Billingham, Ed Armbrister and Cesar Geronimo to the Reds for Lee May, Tommy Helms and Jimmy Stewart. Morgan helped to form the Big Red Machine that included Tony Perez, Dave Concepcion, Bench and Pete Rose.

Using Morgan's combination of power and speed, the Reds won the NL West in 1972, '73, '75, '76 and '79. They advanced to the World Series three of those years and won it twice. Morgan won the MVP in 1975 and 1976, both World Champion seasons.

Among Others receiving consideration were Orlando Cepeda with 211 votes, Tony Oliva with 142, Bill Mazeroski with 131, and Harvey Kuenn with 107. The induction will be Aug. 5, in Cooperstown, N.Y.

#90010p0001 01/10/1990 ~PR Newswire

ST. LOUIS, WHEAT RIDGE, COL (JAN. 9) PR NEWSWIRE - Calgon Vestal Laboratories, a division of Calgon Corp., (a wholly-owned subsidiary of Merck & Co. Inc.) and Matrix Membranes Inc. (PSE: MMI P), have entered into an agreement for Matrix to manufacture and supply Mitraflex(TM) wound dressings to Calgon Vestal, which has begun to market the product in the United States and Canada.

Used by professional care-givers in institutions such as hospitals and nursing homes, Mitraflex(TM) wound dressings are designed to treat chronic and traumatic wounds such as dermal ulcers, abrasions and lacerations. The patented dressings create a moist-healing environment, conform to body contours and are easily applied, monitored and removed by care givers.

The agreement between Calgon Vestal and Matrix provides that Matrix will supply Calgon with its needs for Mitraflex(TM) dressings, for a six year period.

Commenting on the agreement, Walter R. Maupay, Jr., Calgon Vestal's president, said, "We expect Mitraflex(TM) dressings to play an important role in Calgon Vestal's efforts to attain a prominent position in the wound care marketplace. Entry into the agreement was preceded by Calgon's field evaluation of the product in selected areas of the U.S."

Christopher L. Pillow, Matrix' president, said, "By retaining a marketing partner with considerable resources, as well as the respect of the North American medical community, Matrix expects to achieve substantial sales of Mitraflex(TM) dressings in the near term." He added that, "This marketing relationship will enable Matrix to focus its resources on manufacturing Mitraflex(TM) dressings to fulfill its obligations as a supplier. Building on research begun in 1982, Matrix will continue the development and commercialization of additional products based on its propreitary polymer technology."

Calgon Vestal Laboratories markets an extensive line of skin care, infection control and wound management products to hospitals and nursing homes in the United States and Canada. It is a unit of Merck & Co., the worldwide, research-intensive health products organization based in New Jersey.

Matrix Membranes, manufacturers and sells its patented Mitraflex(TM) wound dressings, which advantageously utilize the unique characteristics of its proprietary Mitrathane(TM) compounds. Matrix plans to use these Mitrathane(TM) materials for a variety of other commercial applications in various stages of development.

CONTACT: George A. Rauh, Jr. of Calgon Vestal Labs., 314-862-2000; or Mark P. Shuman of Matrix Membranes Inc., 303-431-6000

#90010p0016 01/10/1990 ~PR Newswire

MELBOURNE, AUSTRALIA (JAN. 10) PR NEWSWIRE - Mayne Nickless Limited has announced that the company has been assigned prime term credit ratings of A-1 by Standard and Poor's Corporation and P-1 by Moody's Investor Services.

The new ratings from the international agencies, together with the company's existing Australian ratings grading of A+/A1, confirm the standing of Mayne Nickless Limited as a prime credit in international financial markets.

"The agencies have recognized the company's strong earnings growth, management quality, geographic and product diversification, and its sound financial structure and policies", Mayne Nickless' finance director, Lindsay Bytheway said today.

"Not only will the ratings broaden the company's investor base in the global capital markets, but they also clearly distinguish Mayne Nickless as a 'blue chip' company with sound management and a long track record of outstanding performance."

The ratings apply to the company's US$200 million euro-commercial paper program which has been recently increased from US$100 million. The increased program will provide Mayne Nickless with additional flexibility in financing its operations. To this end an option to issue sterling denominated commercial papers has also been added to the program.

Mayne Nickless also announced the signing of a US$175 million revolving credit facility, syndicated by S.G. Warburg and Co. Ltd., which supports the euro-commercial paper program.

"The facility was over subscribed, even though it was finely priced and syndicated prior to the assigning of the ratings', Bytheway said. "We believe this is evidence of the financial community's continued willingness to support conservatively managed corporations."

Mayne Nickless Limited is a diversified, Australian based transport, security, computer services and health care company with 40,000 employees in 13 countries. In 1988/89 the company had sales revenue of Aus.$2.34 billion and operating profit after tax of Aus.$120 million. The company operates under a number of trading names such as Ipec, Wards Express, Armaguard and MSS in Australia, Parceline and Security Express in the U.K. and Stanley Smith Security and Loomis Couriers in North America.

#90010p0020 01/10/1990 ~PR Newswire

SAN JOSE, CA. (JAN. 10) PR NEWSWIRE - Altos Computer Systems (NASDAQ: ALTO) today announced and shipped the first Altos 486 System 1000, the company's most powerful multi-user UNIX system. With a 15 MIPS 80486-based CPU, the System 1000 gives Altos resellers the opportunity to explore new markets including transaction processing and network servers, which have traditionally been dominated by minicomputer vendors.

Ron Conway, chief operating officer, said, "The 486 System 1000 has almost tripled the processing performance of 386-based systems. VARs will be

able to take advantage of this power transparently since they can use all of their existing applications software when upgrading to the 486 System."

With the 486 System 1000, Altos takes advantage in Intel's latest 80486 microprocessor technology including 8KB of on-chip cache memory and a floating point unit. Now on-chip, the math and cache functions operate more efficiently and perform at a higher speed than was possible with the 80386. Nonetheless, the advanced engineering design from Altos doesn't compromise the System 1000's compatibility with Altos' 386-based software and hardware. All existing 386-based applications software will be fully supported on the 486 System 1000 without any modification or recompilation. The peripherals and add-ons of the existing 386 Series 1000 Models 25 and 33 are fully supported under the 486 System 1000, including multiple disk drives (each with up to 630MB formatted capacity), along with cartridge, high-capacity helical scan, and industry-standard 9-track tapes.

The 486 System 1000 supports up to 128 ports and features internal and external disk storage options that include up to 630MB of internal storage and up to 2.5GB of external storage. The system comes standard with 4MB of main memory on the main system logic board. Memory can be expanded with three extra cards to a maximum of 28MB. The system features a separate input/output processor which off-loads I/O tasks so that the CPU is freed for compute-intensive applications. Although end-user pricing for all Altos products is set by resellers, the company expects the basic configuration of the 486 System 1000 (including 4MB RAM, 170MB hard disk, and a 125/150MB streaming tape drive), to retail for about $20,000.

Along with the system, Altos offers a line of general-purpose applications software packages suitable to a variety of reseller needs. This includes Altos Open Office (AOO) which integrates WordPerfect, SCO Professional, Electronic Mail and Altos Calendar manager under the UNIX windows environment, Multiview. Other products include Oracle, Informix, and SCO FoxBASE database management systems. Communications options include TCP/IP, DOS Server, SNA, X.25 and RFS.

ARLEE, MT (JAN. 10) PR NEWSWIRE - Montana Naturals Intl. Inc. (NASDAQ: MTNA) announces the resignation of its chairman and director, Dr. Bruce W. Vorhauer, effective March 1, 1990. Vorhauer has resigned in order to pursue his campaign for the U.S. Senate. MNI is a Montana corporation engaged in the marketing and manufacturing of nutritional supplements for

domestic and international distribution. The company became a public corporation through a successful public offering in September 1987 and was approved for listing on the NASDAQ system on Aug. 31, 1988.

Vorhauer became an investor and director in Montana Naturals in 1985 and was nominated chairman after the company's initial public offering in 1987. According to Vorhauer, "The load of my campaign for the U.S. Senate will not permit me to perform my duties for the campaign in an effective and responsible manner."

According to company President and Chief Executive Officer Ron Hange, "Dr. Paul Larson, a professor in the University of Montana's School of Business Administration, has accepted our nomination to replace Vorhauer as director on the board effective March 1. Larson has assisted the company in the past as a consultant and we're confident he will be a valuable contributor to our board of directors and our company. A new chairman will be selected at the company's February board meeting."

DENVER (JAN. 10) PR NEWSWIRE - Sindor Resources Inc. announces that it has acquired additional properties adjacent to its Lisbon Valley Copper Property in San Juan County, Utah.

These acquisitions will allow Sindor to pursue a high-grade exploration target identified by previous drilling.

Pursuant to these agreements, Sindor obtains the exclusive right to explore, develop and mine the copper and associated minerals contained on the additional 1,000+ acres.

Fred H. Lightner, president of Sindor, said, "We can now expand on previous drilling which identified several intercepts containing significant copper and silver values. One hole intersected 30' of 5.85 percent copper, with a 5' interval of 17.5 percent copper and 4.5 ounces of silver per ton." Additional drilling is scheduled to begin in approximately one month.

Shares of Sindor Resources trade on the unlisted market in Ontario (COATS) under the trading symbol "SNDR."

LOS GATOS, CA (JAN. 10) PR NEWSWIRE - Hytek Microsystems Inc. (NASDAQ: HTEK) completed the sale of certain of the assets of its Topaz Semiconductor Inc. subsidiary to nCHIP Inc. and Teledyne Industries Inc. on Dec. 22, 1989. nCHIP Inc. purchased certain capital equipment and miscellaneous supplies for cash. Teledyne Industries Inc. purchased certain capital equipment, all product inventories, and intellectual property rights used in the manufacturing of the Topaz C-MOS and D-MOS products line in exchange for cash and a future royalty stream.

The company had recorded at Sept. 30, 1989 a provision of $620,000 to reduce the carrying amount of assets of the discontinued Topaz operations to their net realizable values including operating losses during the phase-out period.

Founded in 1974, Hytek specializes in custom hybrid microelectronic circuits that are used in computer, automotive, communications, medical and military applications. Hytek's common stock is traded over-the-counter under the NASDAQ symbol HTEK.

SUNNYVALE, CA (JAN. 10) PR NEWSWIRE - Dionex Corp. (OTC: DNEX) today announced revenues and earnings for its second fiscal quarter ended Dec. 31, 1989.

Sales for the quarter were $20,310,000, a 7 percent increase over the $19,005,000 reported in the same period last year. Net income was $3,442,000, or $.38 per share, a 9 percent increase in earnings per share over the comparable period in fiscal 1989. Earnings per share were favorably affected by the company's stock repurchase programs which were announced in fiscal 1989. During this year's second quarter, the company repurchased 85,000 shares of Dionex common stock in the open market.

For the six months ended Dec. 31, 1989, sales totaled $39,139,000 compared to $37,369,000 reported for the first six months of last fiscal year. Net income for the six month period rose to $6,778,000, or $.74 per share, representing a 7 percent increase in earnings per share over the prior fiscal year.

A. Blaine Bowman, Dionex president and chief executive officer, commenting on the results said, "We are pleased with the company's performance in the second quarter as both sales and earnings reached record levels. The rate

of sales growth in the quarter improved from that of our recent quarters and was in line with our expectations. Profitability during the quarter remained strong.

"As we anticipated, the overall demand for chromatography equipment is uneven in many markets and this business environment continues as we begin the second half our fiscal year. However, in the months ahead, we will continue our efforts to expand our rate of growth through new product introductions and investment in our operations," concluded Bowman.

Dionex Corp. is a leading manufacturer and marketer of chromatography systems for chemical analysis. The company's systems are used in environmental analysis and by the chemicals, petrochemicals, life sciences power generation and electronics industries in a wide variety of applications.

#90010p0029 01/10/1990 ~PR Newswire

SAN JUAN, PUERTO RICO (JAN. 10) PR NEWSWIRE - First Federal Savings Bank of Puerto Rico (NASDAQ: FFPR) today reported net income of $11,743,000 or $2.27 per share for the year ended Dec. 31, 1989. For 1988, the bank earned $12,452,000 or $2.42 per share. (Reported earnings per share of common stock are after payment of preferred stock dividends.)

For the fourth quarter of 1989, First Federal recorded earnings of $2,231,000 or $0.40 per share. Net income was $2,606,000 or $0.47 per share for the last three months of 1988.

Commenting on the bank's performance for 1989, President and Chief Executive Officer Mariano J. Mier said, "The growth of First Federal's loan portfolio fueled an increase in net interest income, despite pressures on the interest margin due to the high short term interest rates that prevailed during most of the year."

Net interest income before provision for possible loan losses was $58,794,000 for 1989, rising 6.0% from the 1988 figure of $55,487,000. For the fourth quarters of 1989 and 1988, net interest income was $15,216,000 and $14,389,000, respectively, representing a 5.7 percent increase.

Total other income was $13,137,000 for 1989, an increase of 48.2 percent over the 1988 figure of $8,866,000. For the fourth quarter of 1989, other income rose 29.2 percent to $3,085,000, compared with $2,387,000 in the same period of 1988. Most of this increase was due to gains on the sale of the bank's holdings of Federal Home Loan Mortgage Corporation preferred stock. The provision for loan losses was $11,275,000 for 1989 and

$2,925,000 in the fourth quarter, compared with $8,549,000 and $2,834,000 for the respective periods of 1988.

First Federal reported total assets of $1,927,836,000 at Dec. 31, 1989, representing an increase of 6.0% since the end of 1988. Real estate loans and mortgage-backed securities totaled $862,855,000 at the end of the 1989 while consumer loans were $415,868,000 and commercial loan outstandings were $300,981,000. Deposits rose 17.7 percent during 1989, to reach $1,301,317,000.

The bank had total capital of $83,134,000 at Dec. 31, 1989. First Federal's equity per common share was $12.69 at the end of the year.

"In addition to maintaining strong earnings in a difficult interest rate environment, First Federal acquired a branch franchise in Florida and paid four full quarters of regular common stock dividends in 1989," said Mier. "With a moderation in interest rates and a continuation of solid loan demand, we can look forward to another successful year in 1990," he added. First Federal Savings Bank is the largest savings institution in Puerto Rico. Organized in 1948, the Bank operates 29 branches in Puerto Rico and the U.S. Virgin Islands. Its First Tropical Savings Bank subsidiary has three branches in the Miami, Fla., market.

NEW YORK (JAN. 10) PR NEWSWIRE - RJR Nabisco Inc. announced today that it has closed its sale of the Del Monte processed foods business to a group formed by Merrill Lynch & Co. Inc. for $1.475 billion.

The businesses divested in the transaction include: Del Monte Foods USA; Del Monte Foods Europe; Del Monte's processed food businesses in Mexico, the Carribean and the Far East; and Del Monte's pineapple operations in the Philippines and Kenya.

RJR Nabisco is retaining Del Monte/Aylmer Canada, Del Monte's processed food business in Venezuela, and Nabisco food businesses in Latin America, which were managed by Del Monte.

Louis V. Gerstner Jr., chairman and chief executive officer of RJR Nabisco said: "This substantially completes our plan to reduce debt through asset sales. We are pleased with the prices we received, that the process was completed ahead of schedule, and that we have retained a powerful group of brands in the new RJR Nabisco."

RJR Nabisco Inc. is an international consumer products company. Its major operating units are R.J. Reynolds Tobacco Co., R.J. Reynolds Tobacco International Inc., Nabisco Brands Inc., and Planters LifeSavers Co.

WHITE PLAINS, NY (JAN. 10) PR NEWSWIRE - New Jersey Transit will soon offer passengers greater convenience in purchasing tickets due to an innovative application of electronic funds transfer technology to be installed by NYNEX Information Solutions Group. The company today announced a $1.2 million contract with New Jersey Transit Corp. to design, install and maintain an electronic revenue transaction and accounting system.

The system will enable NJ Transit customers for the first time to purchase tickets by mail using credit cards, and will provide a platform for other credit card applications in the future.

NYNEX is teaming with industry experts to integrate the automated ticket-dispensing machines in major terminals such as Atlantic City Rail Terminal, Penn Station-Newark and the New York Port Authority Bus Terminal with NJ Transit's revenue reporting system, which is currently under development. The system software will furnish NJ Transit with computerized accounting reports and ridership statistics.

As prime contractor, NYNEX Complex Systems Integration Group, a unit of NYNEX Information Solutions Group, is providing overall program management and technical systems integration. NYNEX Information Solutions Group will also provide off-the-shelf and custom software for NJ Transit's revenue reporting system, along with EFT and revenue accounting system expertise.

Applications software will be provided by LeRoux, Pitts and Associates Inc.'s off-the-shelf Total Payment Systems package. Based in Clearwater, Fla., the company specializes in point-of-sale software systems to banking retail and government customers.

Computer systems for terminal polling and credit authorization will be provided by Tandem Computers Inc. of Cupertino, Calif., a leading manufacturer of computer systems and software products for the on-line transaction processing market.

Point-of-sale terminals will be provided by VeriFone of Redwood, Calif., a leading manufacturer of point-of-sale terminals.

This is NYNEX's third major systems integration project for the mass transit industry. NYNEX recently won a $33.5 million contract with the Port Authority of New York and New Jersey for a parking revenue control system at the three metropolitan airports, and is currently installing a similar system at the Dallas-Fort Worth International Airport.

NYNEX Information Solutions Group Inc., a subsidiary of NYNEX Corp., is a leading provider of EFT systems, application software, professional services and systems and network integration. Based in White Plains, the company has 6,000 employees in 13 countries and more than 30 U.S. cities.

OLD BROOKVILLE, NY (JAN. 10) PR NEWSWIRE - Banfi Vintners has announced the appointment of Jeffrey L. Napoleon as vice president - sales.

The appointment is effective immediately.

Harry F. Mariani, Banfi president, noted that Napoleon's promotion comes within six months of his appointment to head up the company's nationwide sales organization. "It is not only recognition for a job well done but also reflects the wisdom of promoting from within," he said, adding:

"As a 15-year Banfi veteran, Napoleon is intimately aware of the firm's strengths and how they can be marshalled to overcome trade problems. His fresh direction has helped to improve Banfi's overall performance within a relatively brief period, both in case and dollar sales."

Banfi, an American family-owned firm established in New York in 1919, has been the U.S.'s leading wine importer for the past 15 years, and it is Italy's largest privately held wine operation with vineyard estates in Montalcino, Tuscany; and Strevi and Gavi, Piedmont.

Napoleon joined Banfi in 1975 as a street salesman. In subsequent years he held district, regional and divisional posts in the company and served as general manager of Banfi's New York wholesale operation.

A graduate of Iona College, he began his career in the wine field 26 years ago, learning all facets of the trade at a former wine house established by his family, Napoleon Wine Co., of Westchester, N.Y.

Napoleon is married to the former Marcia Purcher and they have two children: Lori, 17, and Amanda, 7. They reside in St. James, Long Island.

LAS VEGAS, NEV (JAN. 10) PR NEWSWIRE - PaineWebber and Sahara Resorts (NASDAQ: SHRE) today announced that non-union employees of the Sahara Hotel and Casino, the Hacienda Resort Hotel and Casino, and the Pioneer Hotel and Gambling Hall in Laughlin, Nev., will be eligible to participate in a new 401K retirement savings plan. The 401K will be managed by PaineWebber Inc., and administered by Howard Johnson and Co. PW Trust, a wholly owned subsidiary of PaineWebber Inc., will act as trustee for the program.

Beginning Feb. 1, 1990, eligible employees will begin making contributions to the 401K which is ranked in the top 20 percent of programs provided by Southern Nevada gaming properties in terms of matching funds provided to participants. 401K plans are currently offered by 98 percent of the Fortune 500 companies, and PaineWebber executives say the new Sahara Resorts plan exceeds half the Fortune 500 companies in providing matching funds.

"This is a new step in the evolution of Sahara Resorts," said PaineWebber investment executive Mike PeQueen. "The company realizes that its employees are its greater asset, and is making a strong commitment to assist those employees in securing their financial independence for retirement."

Participants in the plan will have the option of investing in a combination of four separate portfolios. A money market portfolio, guaranteed insurance contract portfolio, conservative bond portfolio, and value equity portfolio will be made available.

In addition of the three existing Sahara Resorts properties, employees of the new, as yet to be named facility to be built in Las Vegas will also be eligible for the 401K.

TAMPA, FL (JAN. 10) PR NEWSWIRE - Poe & Associates, Inc. (NASDAQ: POEA) has been selected as one of 14 companies listed in Interstate/Johnson Lane's (NYSE: IS) Featured Stocks report for 1990. Featured Stocks is a selection of companies expected by the Research Department to demonstrate superior price performance over the next 12 months.

Thomas G. Rosencrants, senior vice president and director of Research for Interstate/Johnson Lane recommends the purchase of Poe & Associates stock for speculative investors. He said, "We believe Poe is on the threshold of a major revenue and earnings advance. Based on our 1989 and 1990 earnings per share estimates, Poe is presently selling at a steep discount to other publicly traded insurance brokers."

"Poe's strong retail brokerage presence in Florida and other Sun Belt states, its very profitable niche wholesale programs, an aggressive acquisition strategy, and a seasoned management team highly regarded in the insurance industry, all contribute to the attractiveness of the company," notes Julie Hilt, assistant vice president and analyst with Interstate/Johnson Lane, who co-authored a recent research report on Poe.

Poe & Associates, presently ranked as the 15th largest insurance broker in the United States, was founded in 1956 as a local insurance agency by William F. Poe. Since that time it has grown both internally and through acquisitions. Poe markets a broad range of property and casualty insurance and employee benefits programs.

The Retail Division of Poe & Associates sells traditional insurance

products primarily to businesses and institutions through local agencies in Arizona, Florida, Georgia, New Jersey, North Carolina, and Texas. In contrast, the Wholesale Division designs, markets and administers niche programs for national professional and trade associations groups through a network of over 100 affiliated agencies.

Interstate/Johnson Lane is the largest broker-dealer and investment banking firm headquartered in the Southeast and among the top five full-sevice regional brokerages in the nation. Tom Rosencrants, a Chartered Financial Analyst, is one of the leading investment analysts in the U.S., and is widely quoted in the financial press.

Portions of the Interstate/Johnson Lane Featured Stocks report for 1990 are listed below:

FEATURED STOCKS

DEC. 19, 1989 Featured Stocks is a selection of companies expected to demonstrate superior price performance over the next 12 months. These stocks have been selected from the top-rated stocks (No. 1 investment rating) recommended by the Research Department.

Company/Symbol	12/18/89 Price	12-Month Price Target	Market Cap. ($ Mil.)

CEM Corporation/CEMX (1,2)	9.75	17	44

Thomas G. Rosencrants, CFA
Senior Vice President
Director of Research

Poe & Associates, headquartered in Tampa, Florida, is the nation's 15th-largest insurance broker. Poe appears poised for a major advance in revenues and earnings. A strong retail brokerage presence in Florida and other southeastern states, coupled with very profitable proprietary wholesale programs, should generate $1.05 in earnings per share in 1989.

At 10 times our 1990 estimate, Poe's price is presently depressed in light of significant litigation which is likely to be resolved in 1990. Although we cannot predict the outcome of the lawsuit, we do not believe the price tag will be as high as the $20 million suit. Attractive investment characteristics include a recurring revenue stream, strong cash flow which exceeds reported earnings, minimal capital requirements, and very high return on equity. The company has exited the insurance underwriting business which impaired financial performance during the early and mid-'80s. We regard Poe as a particularly attractive acquisition candidate with a large number of potential suitors. Our 12 month price target is $18-$20 per share for this speculative recommendation.

Thomas G. Rosencrants, CFA
Julie A. Hilt

TECHNICAL VIEW

Poe & Associates has recently experienced a powerful move to the upside accompanied by about average volume. The 30-week moving average line at $12 should be support with some resistance near the all-time highs near $15.

Technical Comment by Ricky Harrington.

MIAMI (JAN. 10) PR NEWSWIRE - IVAX Corporation (AMEX: IVX) today announced that its wholly owned subsidiary, Baker Cummins Pharmaceuticals, Inc., entered into an agreement with Carter-Wallace, Inc. (NYSE: CAR) regarding the co-promotion in the United States of Baker Cummins Pharmaceuticals' new sleeping medication, quazepam, which will be sold under the trademark "Doral." The product will be jointly promoted by Baker Cummins Pharmaceuticals and Carter-Wallace's Wallace Laboratories Division. Wallace Laboratories has a sales force consisting of approximately 300 representatives and Baker Cummins Pharmaceuticals is in the process of establishing its own sales force, having recently hired ten sales representatives in Florida and ten district managers.

Carter-Wallace has agreed to pay Baker Cummins Pharmaceuticals $4,000,000 for the right to co-promote Doral. The co-promotion period will be five years with Carter-Wallace having the right to extend the co-promotion period upon payment of an option fee.

The agreement is conditioned upon the approval by the United States Food and Drug Administration of promotional materials in a form satisfactory to

Carter-Wallace. Baker Cummins Pharmaceuticals anticipates that national promotion of Doral will commence by March 1990.

Phillip Frost, M.D., chairman of IVAX Corporation, said "We are quite enthusiastic about having the opportunity to co-promote Doral with Carter-Wallace. Carter-Wallace is an excellent organization with considerable expertise in the marketing of pharmaceutical products and Doral will fill an imporant need in the hypnotic market." Baker Cummins Pharmaceuticals estimates that annual United States sales for drugs in the same class as quazepam (sedatives/hypnotics) are approximately $240,000,000.

IVAX Corporation is a holding company consisting of four operating divisions: IVAX Industries, Inc., a chemical specialties business; Baker Cummins Pharmaceuticals, Inc., a pharmaceuticals company; Best Generics, Inc., a distributor of generic pharmaceuticals; and Diamedix Corporation, a medical diagnostics company.

ST. LOUIS (JAN. 10) PR NEWSWIRE - CPI Corp. (NYSE: CPY) announced today that sales volumes for the final weeks of 1989 were adversely affected by inclement weather at the peak of the Christmas season.

Citing the snow storms and record low temperatures experienced throughout

the country, Alyn V. Essman, chairman and chief executive officer, described the onset of bad weather as ''a case of very unfortunate timing, but certainly not as serious as it might have been a few weeks earlier.''

Essman characterized the situation as unfavorable but not dramatic. He reported that in spite of the lost sales due to inclement weather, net earnings per share should still exceed those of last year's fourth quarter though by somewhat less than previously stated expectations, and that full-year earnings per share should be within the range of analysts' estimates.

The cold snap caught the very end of the Christmas sitting schedule, affecting mainly the after-Christmas sittings in the portrait studios. Results in the Photo Finish minilabs were also negatively affected as normal holiday celebrations were curtailed by the weather, thereby reducing amateur photo activities.

Sittings for the three weeks ending Dec. 30 were 8.6 percent off expected levels based on current trend lines, and average sales were off slightly. Roll volumes for the three-week period in the company's minilabs were off from expected levels by 8.8 percent. Because this is an especially strong seasonal period for ancillary sales in the minilabs, the inclement weather could have also affected those sales volumes. As Essman explained, though that category of sales is so seasonal that it is difficult to measure except as it shows up in slightly reduced average sales per roll.

CPI is a $348-million consumer retail services company, operating about 1,300 retail locations, including over 930 Sears Portrait Studios in the USA, Puerto Rico, and Canada, over 280 one-hour photofinishing minilabs and 27 high-tech copy stores.

TAMPA, FL (JAN. 10) PR NEWSWIRE - Kimmins Environmental Service Corp. (NASDAQ: KEVN) today announced its board of directors has approved a stock dividend of one share for every two shares held, payable Feb. 19 to record holders on Feb. 1.

This will increase the number of common shares outstanding to approximately 12,334,000 from approximately 8,222,000. This increases the "publicly held shares" to approximately 5,796,000.

Francis M. Williams, president of Kimmins Environmental Service Corp.,

stated: "This action, increasing the number of outstanding shares, will provide additional liquidity for our shareholders."

Kimmins Environmental Service Corp. and its subsididaries provide hazardous and non-hazardous waste remediation and incineration; demolition and dismantling of industrial facilities; asbestos abatement and containment services; environmental surety bonds; and environmental contracting services.

Kimmins Environmental Service Corp. is headquartered in Tampa, Fla.; and has regional offices in Niagara Falls, N.Y.; Philadelphia; and Houston.

Kimmins Environmental Service Corp.'s common stock is traded over the counter under the NASDAQ symbol KEVN.

LOS ANGELES (JAN. 10) PR NEWSWIRE - Orion Pictures Corporation (NYSE: OPC) announced today that its net income for the nine-month period ended Nov. 30, 1989, the first three quarters of fiscal 1990, was $8,457,000 ($.37 per share on both a primary and fully diluted basis) on revenues of $348,663,000. In the nine-month period ended Nov. 30, 1988, the company recorded net income of $6,284,000 ($.34 per share on both a primary and fully diluted basis) on revenues of $307,507,000.

The company realized net income of $1,762,000 ($.08 per share on both a primary and fully diluted basis) during the quarter ended Nov. 30, 1989, the third quarter of fiscal 1990, on revenues of $104,372,000 compared to $1,204,000 of net income ($.06 per share on both a primary and fully diluted basis) on revenues of $92,385,000 in the preceding year's third quarter. Gross profit for the current year's quarter and nine-month period was positively affected by the emergence of basic cable networks as licensees of feature films in the United States, which has resulted in a sizable basic cable network licensing agreement recently concluded by the company and which impacted favorably on the company's estimates of future revenues.

PONTIAC, MI (JAN. 10) PR NEWSWIRE - Light-duty truck sales of 11,228 during the Dec. 21-31 period pushed GMC Truck dealers to a calendar-year sales record for light-duty trucks in 1989, reported John D. Rock, general

sales manager of GMC Truck Division.

Sales of 353,788 light-duty trucks last year broke the former record of 352,999 set in 1988, Rock said.

Individual model sales records include S-15 compact pickups (52,601); S-15 Jimmy sport utility vehicles (44,850); Sierra full-size pickups (137,407); and Suburbans (23,651).

Total GMC Truck calendar-year sales for 1989 were 376,397, the second-highest on record behind 1988 sales of 386,174, Rock said.

EPSON, ENGLAND (JAN. 10) PR NEWSWIRE - Lep Group plc (NASDAQ-NMS: LEPGY) announced today that it has reached agreements in principle with Harvey E. Pittluck, chairman of the board and James E. Lineberger, a director, of Profit Systems, Inc. (NASDAQ-NMS: PFTS) for the purchase of their shares of Profit Systems at a cash price of $12 per share. Pittluck and Lineberger own directly, and through certain affiliated entities, approximately 10.5 percent of the outstanding shares of Profit Systems. The agreements in principle are subject to the parties entering into definitive agreements, which would provide, among other matters, that Lep, or an affiliate, would make a proposal to Profit Systems for the acquisition of all of the other shares of Profit Systems (other than the shares presently owned by Lep, or its affiliates) for a cash price of $12 per share. It is expected that the purchase of Pittluck and Lineberger's shares would occur concurrently with the acquisition of the other shares of Profit Systems, which it is anticipated would occur on or before April 30, 1990. In the event that the purchase of all of the shares has not occurred on or before April 30, 1990, it is expected that the price per share would be increased by $0.25 for each calendar quarter thereafter (or on a pro-rata basis for any portion of any such quarter) until such purchase occurs, subject nevertheless to certain conditions.

It is also contemplated that if Lep's proposal to Profit Systems is accepted, then simultaneously with such acceptance Pittluck would resign as chairman of the board. In addition, he would receive payment of $1.5 million in settlement of all obligations to him under his employment and consulting contracts, which contracts would be terminated as of such date.

Lep Group through an affiliate presently owns 3,157,916 shares of Profit Systems, constituting approximately 60.25 percent of its outstanding shares. The purchase price for the remaining 39.75 percent of the outstanding shares, including the shares owned by Pittluck and Lineberger,

would be approximately $25,000,000.

Profit Systems, through its subsidiaries, is engaged in the business of forwarding and transporting freight by means of air and surface carriers and the provision of incidental services, both within the United States and to cities throughout the world.

Lep Group is a diversified service company based in Epsom, England with annual revenues of approximately $1.7 billion. Through its subsidiaries, Lep Group is principally engaged in international freight forwarding, specialized physical distribution in Europe, distribution and production of scientific and engineering products principally in the United Kingdom and furnishing of electronic security services in the United States.

Lep ordinary shares trade in the form of ADRs on the NASDAQ National Market System.

CHICAGO (JAN. 10) PR NEWSWIRE - With the completion of Wertheim Schroder's purchase of the Chicago Missouri & Western east/west line on Jan. 9, 1990, Santa Fe Railway will initiate service today under terms of a haulage agreement that was negotiated in September 1989 with the now new owners.

"Santa Fe has achieved a goal that it has sought for nearly a half century. We have tried to reach the St. Louis gateway since the mid 1900s. The realization of this long-held ambition also helps preserve the competitive rail service of the CMW route," said Michael R. Haverty, Santa Fe president.

The new owners of the CMW route are calling the line the Gateway Western Railway. The agreement calls for Santa Fe to route a guaranteed volume of traffic between Kansas City and East St. Louis giving the new rail operation a reliable revenue base. Initially less-than-trainload traffic will be handled by GWR at Kansas City until volume builds. Santa Fe estimates that it will move a train a day in each direction operated by GWR by the end of the first quarter.

CINCINNATI (JAN. 10) PR NEWSWIRE - The all-new 1990 Lincoln Town Car, named last week by the editors of Motor Trend Magazine as its 1990 Car of the Year, also was the car of the month in December for the Cincinnati area's Lincoln-Mercury dealers, with sales up 48 percent over December 1988.

Donald L. Kaegi, Cincinnati Lincoln-Mercury Division district sales manager, said that, for the 1989 calendar year, the dealers sold 33 percent more Lincoln Town cars than in 1988, 51 percent more Lincoln Continentals, 7.6 percent more Lincoln Mark VIIs, and 8.1 percent more Mercury Grand Marquis full-size sedans.

Overall, for the calendar year, Cincinnati Lincoln-Mercury dealers sold 3 percent more cars than in 1988.

Kaegi said, "We are very proud that Motor Trend has selected the Lincoln Town Car as Car of the Year for 1990. It's the first time ever for any Lincoln product, and the first time in 38 years that a luxury sedan has won the award."

HAMILTON, MT (JAN. 10) PR NEWSWIRE - MELACINE(TM) melanoma theraccine has

been designated an orphan drug by the U.S. Food and Drug Administration (FDA), Ribi ImmunoChem Research Inc. (NASDAQ: RIBI) announced today.

A drug is eligible for orphan status if the prevalence of the disease for which the drug is intended is less than 200,000 cases in the United States. Such status helps assure that drugs will be developed for even small groups of affected patients. Approximately 28,000 new cases of melanoma and 6,000 deaths from melanoma are reported each year in the United States.

Orpan drug status provides seven years of marketing exclusivity from the date of marketing approval, and it also provides certain tax credits for development and clinical trial expenses.

''We are very pleased with the designation of MELACINE melanoma theraccine as an orphan drug,'' said Robert E. Ivy, chief executive officer, president and chairman. ''This designation strengthens our conviction that MELACINE will become a standard therapy for late-stage melanoma.

''The progress of MELACINE melanoma theraccine to date has been very exciting,'' said Ivy. ''The clinical response rate, extension of life expectancy and maintenance of quality of life associated with MELACINE are very favorable compared to chemotherapeutics currently used against the disease.''

MELACINE melanoma theraccine was developed by continuous cultures of two types of melanoma tumor cells. The two cell lines provide a broad array of antigens and allow for a product that can be manufactured in a uniform, commercial manner. MELACINE incorporates killed tumor cells and the company's proprietary DETOX(TM) adjuvant.

In October 1987, Ribi ImmunoChem signed a $1 million, five-year collaborative development agreement with the University of Southern California (USC) providing Ribi ImmunoChem with commercial rights to MELACINE melanoma theraccine in return for sponsorship by the company of certain research at USC. Malcolm S. Mitchell, M.D., professor of Medicine and Microbiology at USC, is the principal investigator for the USC project.

MELACINE melanoma theraccine is now in Phase II human clinical testing at USC and other sites, and the company is preparing to conduct a multi-center controlled study of MELACINE beginning in early 1990. Such controlled testing is required in order to receive marketing approval from the FDA.

Ribi ImmunoChem Research Inc., a biopharmaceutical company founded in 1981 is a leader in the development of immunostimulants for use in preventing and treating human and animal diseases.

GAITHERSBURG, MD (JAN. 10) PR NEWSWIRE - Oncor, Inc. (NASDAQ: ONCR), the first molecular pathology company to receive FDA market approval for a complete DNA-based cancer test system, announced today that it raised in two stages $1,510,000 in additional capital during the fourth quarter of 1989. The first stage, received in October 1989, consisted of a private placement of 510,000 Oncor common shares. The second stage, received in December 1989, consisted of a private placement of 700,000 Oncor common shares and $300,000 of debt convertible into 300,000 common shares. The combined financing increases by 1,210,000 the number of common shares now outstanding to 7,300,000, according to Stephen Turner, chairman and chief executive officer.

Said Turner, "This additional funding, combined with the increased sales of our existing products, as well as other new product introductions, gives Oncor strong momentum to meet its near term objectives, including the initiation of profitable operations in 1990."

"Production of our B/T Gene Rearrangement Test, which recently received FDA market approval, has already begun and we expect shipments to commence in the current quarter. Our B/T Test is useful in the diagnosis of the majority of leukemia and lymphoma cases and represents significant improvements over the current state-of-the-art, both in terms of sensitivity, specificity and reduced cost to the patient," Turner noted.

"In addition, our test system for the analysis of Human Papilloma Viruses (HPV) is currently in clinical trials and we expect to file a Pre-Market Approval (PMA) Application with the FDA in the first half of 1990," he added.

DALLAS (JAN. 10) PR NEWSWIRE - Royal International Optical Corporation (NYSE: RIO) announced that it has entered into a definitive merger agreement with U.S. Vision, Inc., a privately held optical retailer based in Glendora, N.J. with whom Royal previously announced its management had reached an agreement in principle to merge the two companies. The merger is subject to certain conditions including approval by the shareholders of Royal, and U.S. Vision's receipt of financing adequate to consummate the

transaction. The resulting corporation, which would continue as a public company under the name Royal International Optical Corporation, would operate more than 850 retail optical stores in over 40 states.

In the transaction, holders of not more than 80 percent of Royal's common stock who so elect will receive $12.50 for each Royal share, and holders who do not elect to receive cash will receive one share of common stock of the resulting corporation for each share of Royal stock. If holders of more than 80 percent of the Royal shares elect to receive cash, then all shares electing cash will be exchanged for a pro rata combination of cash and shares of stock of the resulting corporation. Former Royal stockholders will own 25 percent of the common shares of the resulting corporation. Goldman Sachs & Co., Royal's financial advisors, advised Royal that, in its opinion, the transaction is fair to Royal's stockholders.

Management of Royal and U.S. Vision expect the merger to be completed during the second quarter of 1990.

Following the combination, William A. Schwartz Jr., currently chairman of U.S. Vision, will become chairman and chief executive officer of Royal, and Donald A. Gross, currently the chief operating officer of Royal, will also be elected president.

Royal operates 645 retail optical stores in 36 states and also manufactures, imports, and distributes optical frames. U.S. Vision operates 220 retail optical stores in 20 states.

MONTREAL (JAN. 10) PR NEWSWIRE - Cast (1983) Ltd. has introduced a new short sea container service with the addition of a 235 TEU fully cellular container vessel, the "Cast Porcupine," which enters regular service on Jan. 11, 1990.

Sailing from Antwerp every 7 days, the Cast Porcupine will provide weekly container service between Hull (UK), Aarhus (Denmark), Varberg (Sweden) and Kiel (W. Germany).

The new vessel joins the "Cast Raccoon" which currently provides container service every 3 days between Antwerp and Ipswich for UK shippers using the company's transatlantic Blue Box container service.

According to Peter Keller, president of Cast North America, the new

service is a logical extension of Cast operations in Europe, particularly in light of the recent opening of two new sales offices in Gothenburg and Copenhagen. Said Mr. Keller, "Our presence in Scandinavia permits us to offer the full resources of our transatlantic Blue Box System to companies shipping between Scandinavia, northern Europe and the UK. That provides Cast short sea customers with a significant benefit in comparison to other available services."

The new service, to be known as the "Cast Short Sea System," offers door-to-door service to Cast customers and pier-to-pier service to third party operators requiring North Sea or Channel container transport. Sales and service will be provided by Cast offices in Birmingham, London, Ipswich, Dusseldorf, Bremen, Rotterdam, Gothenburg, Copenhagen and Antwerp.

EATONTOWN, NJ (JAN. 10) PR NEWSWIRE - Syntrex, Incorporated (NASDAQ/NMS: STRX) announced today the signing of a definitive purchase agreement with Harris Corporation (NYSE: HRS), Melbourne, Fla., to acquire substantially all of the assets and liabilities of Lanier Business Systems, a unit of Harris' Lanier Worldwide subsidiary. The transaction is conditioned on Syntrex's lender extending an existing line of credit on or before Jan. 31 1990. Pending the closing, the Lanier Business Systems division is being operated at the direction of Syntrex. Other terms of the transaction were not disclosed.

Lanier Business Systems produces and distributes document processing and network systems for both general purpose and specific applications. Syntrex, a network system integrator, specializes in the design, implementation and support of a wide array of industry standard network systems for the Fortune 2000, service industries and government.

Upon completion of the acquisition, the combined organization will have over 550 networking sales, service and support professionals based in 50 cities nationwide. Syntrex believes that the combination of the two organizations will result in significant economies that are expected to reduce operating losses sustained by the two organizations while operating independently.

Daniel Sinnott, chairman of Syntrex said, "We believe that the combination of Syntrex and this division of Harris/Lanier will afford us the opportunity to strengthen our position in the network system integration marketplace."

TWIN CITIES (JAN. 10) PR NEWSWIRE - Mesaba Aviation, Inc., today reported that it flew 14.1 million revenue passenger miles during the month of December, a 68.9 percent increase over 8.4 million revenue passenger miles flown during the same month last year (one revenue passenger flown one mile equals one revenue passenger mile). The airline said it carried 66,548 passengers in December, an increase of 77.4 percent over 37,516 passengers carried last December reflecting the addition of cities served out of the carrier's Detroit hub. Mesaba's load factor in December was 50.0 percent, compared to 53.6 percent last year.

The Twin Cities-based carrier reported, however, that December's traffic was lower than expected due to the record-setting cold temperatures during the holiday traffic period which adversely impacted the carrier's operations.

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines at the Minneapolis/St. Paul, Detroit and Milwaukee airports. The regional carrier currently provides scheduled airline service to 34 airports in the 10 states of Illinois, Iowa, Ohio, Michigan, Minnesota, Nebraska, North Dakota, Pennsylvania, South Dakota and Wisconsin.

Mesaba Aviation, Inc., is the wholly owned subsidiary of AirTran Corporation. AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

MURRAY HILL, N.J. (JAN. 10) PR NEWSWIRE - The board of directors of C.R. Bard, Inc. (NYSE: BCR) today declared a regular quarterly dividend of 10 cents per share on Bard's common stock. The current indicated annual dividend rate is 40 cents per share. The dividend is payable Feb. 2, 1990 to shareholders of record Jan. 22, 1990.

The board also authorized purchases from time to time of up to 2 million shares of Bard's common stock. The shares to be purchased will be cancelled and returned to the status of authorized but unissued.

In 1989, Bard purchased a total of 2 million shares of its common stock.

Over the past five years, the company has purchased slightly over 8 million of its common shares.

For the full year 1989, Bard had a weighted average of 55.4 million shares outstanding. At year-end 1989, shares outstanding were 54.5 million.

C.R. Bard, Inc., headquartered in Murray Hill, is a leading multinational developer, manufacturer and marketer of health care products.

DENVER (JAN. 10) PR NEWSWIRE - Altex Industries Inc. (NASDAQ: ALTX) announced today that David L. Goldman of the Goldman Financial Group Inc. disclosed in an amended 13D filing with the Securities and Exchange Commission that he has acquired approximately 7 percent of the company's common stock.

In his original 13D filing dated Oct. 31, 1989, Goldman disclosed that prior to Aug. 31, 1989, he had purchased 512,500 shares of Altex stock and that between Aug. 31, 1989 and Nov. 8, 1989, he purchased an additional 450,000 shares of Altex stock. In his amended 13D filing dated Jan. 3, 1990, Goldman disclosed that he had purchased an additional 250,000 shares between Dec. 11, 1989, and Jan. 4, 1990.

Steven H. Cardin, chairman of the board of directors of Altex, stated, "Although I have never met Mr. Goldman, I have spoken with him by telephone, and I find him to be both cordial and insightful. It is my understanding that Mr. Goldman is an astute and very successful investor, and I am gratified that he believes that the common stock of this company is an attractive investment opportunity."

Altex Industries is a holding company with subsidiaries involved in oil and gas and mineral exploration and production. An indirectly wholly-owned subsidiary of Altex recently announced an agreement in principle to purchase the assets of a manufacturer of wood products.

WATERBURY, CT (JAN. 10) PR NEWSWIRE - Chairman Robert J. Narkis of Centerbank (NASDAQ: CTBX) announced today that the bank will add approximately $40 million to loan loss reserves in the fourth quarter. An

additional $9 million will be set up as a reserve against other non-performing investments, while $13 million will be charged off. Centerbank will end the year with loan loss reserves of approximately $44 million, and nonperforming assets of $86 million. Accordingly, the bank will incur a substantial loss for both the fourth quarter and the year.

"Although we remain one of the most strongly capitalized financial institutions in the Northeast," Narkis remarked, "state banking regulations prohibit Centerbank from paying its first quarter dividend. Based on the bank's earnings capabilities, and its financial condition, management believes that Centerbank will be in a position to resume payment of a dividend in the second quarter.

"A conservative reassessment of our position in the New England real estate environment has dictated that we increase our reserves at this time " Narkis stated. "Even with such an addition, Centerbank closes the year with capital of approximately $200 million or 10.5 percent of assets, a book value of over $16 per share, and reserves that are 51 percent of nonperforming assets. As a consequence, the public should find us most attractive as a depository for their funds."

"Management has reevaluated the bank's entire balance sheet in arriving at this decision. Based on our assessment of the current economic climate, we believe these steps are prudent and in the best interest of our shareholders."

Established in 1850, Centerbank is the largest independent financial institution headquartered in western Connecticut. Its subsidiaries include Centerbank Mortgage Company in Massachusetts, New York, New Jersey Georgia and South Carolina; Burgdorff Realtors in New Jersey and Pennsylvania; Realtech Realtors in Connecticut; and an equipment leasing firm, Center Capital Corporation.

#90010p0085 01/10/1990 ~PR Newswire

NEW YORK (JAN. 10) PR NEWSWIRE - The election of Diana L. Taylor as president of M.R. Beal & Company was announced today by Bernard B. Beal, chairman and chief executive officer.

M.R. Beal & Company is a municipal securities and financial advisory firm, founded in June 1988. The company, which managed or co-managed over $7.5 billion of municipal issues in 1989, was recently named lead manager of a major securities issue for the City of Chicago: $50-million of general obligation equipment tender notes, due 1993-97. It is expected the sale

will take place before the end of January.

Ms. Taylor will retain her position as head of investment banking at the firm as she takes on the role of president. Ms. Taylor came to M.R. Beal from Donaldson Lufkin & Jenrette where she was senior vice president and manager of DLJ's education finance and short-term banking groups. Earlier she had been with Lehman Brothers Kuhn Loeb and Smith Barney Harris Upham. Ms. Taylor holds an MBA from the Columbia Graduate School of Business and a bachelor's degree from Dartmouth College.

In addition to the elevation of Ms. Taylor, Mr. Beal announced two new managing directors and a vice president.

- Maxine C. Leftwich, vice president, in the firm's Chicago office, was named a managing director.

- Lawrence W. Littig, senior vice president in charge of sales and trading was also named a managing director.

- Suzanne F. Shank, senior associate, was named a vice president. Ms. Taylor, along with Mr. Beal, Ms. Leftwich and Ms. Shank were with the firm at its founding; Littig joined in May 1989 from Integrated Resources Equity Corp's fixed income division where he was executive vice president.

Ms. Leftwich had been a deputy programs manager with the Public Buildings Commission of Chicago and earlier an assistant to the city's late Mayor, Harold Washington. She holds a bachelor's degree from Roosevelt University.

Earlier in his career, Littig was senior vice president with Dean Witter Reynolds. He is a graduate of the University of Michigan.

Before joining the Beal firm, Ms. Shank was a municipal finance associate with James J. Lowrey. Earlier she was a design engineer with General Dynamics Corporation. She holds an MBA from the Wharton School, University of Pennsylvania, and a B.S. degree from Georgia Institute of Technology.

SOMERVILLE, NJ (JAN. 10) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED) announced today that it has received approval from the U.S. Food and Drug Administration (FDA) to conduct human clinical studies on G-6-M. One study has been initiated at Mt. Sinai Medical Center, New York City, and a

second will begin shortly at the University of Edinburgh in Scotland.

G-6-M, licensed from Georgetown University, is a nitrogen mustard derivative which has been uniquely modified to retain its anticancer activity while significantly reducing bone-marrow toxicity.

Nitrogen mustards are currently marketed for the treatment of leukemia, lymphoma and breast cancer. The potential worldwide market in which G-6-M may compete is over $100 million.

Harold J. Tenoso, Ph.D., president and chief executive officer of Unimed, stated, "We believe this is a major step in our strategy to develop cancer therapeutics. If the clinical results confirm the high potential seen in the animal studies, G-6-M will provide therapeutic benefit with a significant reduction of side effects for the patient."

Unimed is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

AVON, MA (JAN. 10) PR NEWSWIRE - Child World, Inc. (NASDAQ: CWLD), one of the nation's largest toy retailers, reported that net sales for the Christmas selling season totaled $375.3 million, or 1.4 percent less than sales of $380.8 million for the same period a year ago. Net sales for the eleven months ended Dec. 30, 1989 increased 2.7 percent to $800.9 million from $779.5 million for the first eleven months last year. Comparable store sales decreased 7.3 percent and 3.2 percent for the Christmas selling season and the eleven months ended Dec. 30, 1989, respectively, compared to the same periods a year ago.

Peter J. Hayes, president and CEO, stated that, "Sales increases in electronics, including Nintendo, were offset by sales weakness in the traditional toy categories. For fiscal 1990, a number of new programs are planned to improve sales including the remerchandising of our baby furniture department and the introduction of children's apparel." Mr. Hayes further stated that "Despite soft sales, inventory reduction programs were successful with ending inventory being below year ago levels."

Child World opened eleven new stores in the past year and plans to open approximately ten new stores in fiscal 1990. The company now operates 174 toy supermarkets in thirty-one states offering a broad assortment of merchandise including toys, bicycles, baby furniture, electronics, learning toys, children's sporting goods and outdoor play equipment.

LACKAWANNA (N.Y. JAN. 10) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) said today it has signed a letter of intent to sell its stock in the South Buffalo Railway Company to an Alabama-based railroad group which plans to continue operating the local terminal and switching line, servicing Bethlehem Steel and trade customers in the Gateway Metro-Port.

Bethlehem said that discussions are continuing on the final terms of a purchase and sale agreement for the South Buffalo Railway, a wholly owned subsidiary of Bethlehem Steel.

The railroad group, Rail Management & Consulting Corporation, currently operates seven short-haul railroads in the United States. A commonly owned and operated group, Rail Switching Services, Inc., conducts in-plant switching services for 16 customers across the country.

Bethlehem will continue to be a major purchaser of rail services here for its three Lackawanna production facilities -- the galvanizing line, the 13-inch bar mill and the cokemaking division.

In addition, the South Buffalo Railway, through its interconnections, provides transportation services to the Ford Motor Company plant here and to a number of other customers. These services represent a substantial percentage of the rail line's business.

SOMERVILLE, N.J. (JAN. 10) PR NEWSWIRE - Hoechst Celanese Corporation today announced that Horace S. Webb, 49, has been appointed vice president of communications and public affairs at corporate headquarters, effective Jan. 1.

In the new position, Webb will be responsible for all aspects of employee and public communications, media relations, government and community affairs for Hoechst Celanese.

Webb joins Hoechst Celanese from the Hill & Knowlton, Inc. public relations agency, where, since 1984, he was a senior vice president of public relations. From 1986 to 1988, he was the public relations group director of the Hill & Knowlton, Washington, D.C., office, providing communications and media-relations counsel to a variety of clients, including: Rotary International, Smithkline-Beecham, Wyeth International, Bayer AG, and Blue Arrow Challenger, a British group which sought to challenge the San Diego Yacht Club for the America's Cup.

For the past 15 months, Webb's assignment was with the DuPont Company in Wlimington, Del. As senior public affairs counselor to DuPont's Agricultural Products Department, he created and implemented an internal communications program in support of the department's strategic quality initiative called Global Business Excellence.

Webb was previously vice president of corporate affairs for Iowa Electric Light and Power Company and vice president of corporate affairs for Potomac Electric Power Company. At Iowa Electric he developed expertise in public-affairs issues related to nuclear electric-power generation. Prior to that, he served as public-affairs counselor and press secretary to cabinet officials heading the federal departments of Commerce, Interior and Justice.

An alumnus of Howard University, Webb is a Vietnam veteran and served in the U.S Air Force as a navigator-bombardier.

Webb and his wife, Theora, will relocate from Silver Spring, Md., to the Bridgewater, N.J., area. They have three grown sons.

Hoechst Celanese, a subsidiary of Hoechst AG of West Germany, is a Fortune 100, $6-billion (sales) corporation with leading positions in chemicals, fibers and film, advanced materials and the life sciences.

#90010p0098 01/10/1990 ~PR Newswire

ROCHESTER, NY (JAN. 10) PR NEWSWIRE - ACC Corp. (NASDAQ: ACCC) today announced record net income and revenues (unaudited) for the year and quarter ended December 31, 1989. Fourth quarter net income from continuing operations was up 69 percent and total year net income was up 29 percent compared to 1988 levels. Net income from continuing operations for 1989 was $1,418,632 or $.43 per share on revenues of $39,400,137 compared to net income from continuing operations of $1,099,542 or $.33 per share on revenues of $38,673,205 for 1988.

ACC's consolidated net income of $1,418,632 compares with 1988's level of $341,603, or $.10 per share on revenues of $38,673,205. Net income for the fourth quarter of 1989 was $440,820 or $.13 per share on revenues of $9,905,994 compared to net income of $260,808 or $.08 per share on revenues of $10,697,353 for the same quarter in 1988. This represents the sixth consecutive quarter of increasing profitability for the company.

In commenting on ACC and the year end results, Richard T. Aab, Chairman and Chief Executive Officer, stated, "ACC has closed the decade of the eighties stronger than ever before. 1989 was a year of record long distance revenue growth and record profitability for the company. Consolidated revenues showed little change from last year due to the discontinuation of the Danbury consulting activities during early 1989. However, ACC's toll revenue portion gained 10 percent over the prior year. Billable minutes were 210 million for 1989, an 18 percent increase over 1988. In addition, we strengthened our core long distance business in a significant manner by utilizing ACC's exceptional in-house MIS (Management Information System) capabilities. We designed many innovative sales and unique customer support programs which were successfully targeted at specific large and medium size users throughout the year. The results of the expansion into the Province of Ontario, Canada has exceeded our financial expectations and added greatly to our knowledge of that important market.

"Further, ACC's recent winning cellular lottery application for Madison, Kentucky non-wireline Rural Service Area (RSA) license is incredible good fortune. It adds significantly to shareholder value and presents ACC with new horizons, which we are uniquely suited to pursue. We look forward to expanding ACC's various regional and Canadian businesses well into the 1990s."

ACC Corp. is a holding company for ACC Long Distance Corp., ACC Network Corp., ACC Long Distance Ltd., ACC Local Fiber Corp., and Danbury Cellular Telephone Company. The company provides primary long-distance telephone service throughout Northeastern United States and Eastern Canada. The company's sumbol is listed on the national market "OTC" under the NASDAQ symbol ACCC.

OKLAHOMA CITY (JAN. 10) PR NEWSWIRE - American Drug Screens, Inc. (NASDAQ: ADSI), the only publicly-owned company devoted exclusively to drug testing, announced today that it has acquired for cash and notes, the drug testing business of privately-held DataChem, in Salt Lake City, Utah, one of the largest providers of laboratory analytical services in the nation, according to John Simonelli, American Drug Screens chairman and chief executive officer.

Simonelli said, "Last month, with our acquisition of the drug testing business of Willow Toxicology, in Pasadena, Calif., we announced that we have expanded our corporate acquisition strategy to include the drug testing revenues of clinical testing laboratories which have corporate clients requiring N.I.D.A. (National Institute on Drug Abuse) approved drug testing facilities. DataChem represents our second such acquisition in just two months and further demonstrates the added revenue stream potential of this important adjunct to our strategy."

James L. Sorenson, chairman and chief executive officer of DataChem stated "American Drug Screens, with its N.I.D.A. approved labs and its expertise in being a pure drug testing company, will provide our clients with the excellent level of service and performance they require."

"DataChem brings to American Drug Screens an impressive roster of national clients including a number of Fortune 500 companies and a government agency whose drug testing needs can be serviced through our subsidiary laboratories operating as Laboratory Specialists, Inc., in New Orleans, Los Angeles and Dallas," Simonelli noted.

"We continue to seek not only the drug testing segments of clinical labs, but also whole independent drug testing laboratories in key centers around the country. We are currently in negotiations with a number of these drug testing laboratories, particularly in the heavily populated Northeast," he added.

THOMASVILLE, GA (JAN. 10) PR NEWSWIRE - Flowers Industries Inc. (NYSE: FLO) reported that results for the second quarter of fiscal 1990 were exactly in line with management's expectations, it was announced today by Amos R. McMullian, chairman of the board and chief executive officer.

Sales for the second quarter, which ended on Dec. 16, 1989, were

$195,435,000, an increase of 9.2 percent over the $178,972,000 reported a year ago. Net income for the period was $6,681,000, a decrease of 17.6 percent vs. the $8,109,000 reported for the second quarter last year. Net income per share was $.19, a decrease of 17.4 percent from the $.23 reported last year.

For the 24-week period ended Dec. 17, 1989, sales were $388,538,000, an increase of 11.2 percent over the $349,418,000 reported for the first half of fiscal 1989. Net income for the first half of 1990 was $11,874,000, a decrease of 26.5 percent from $16,162,000 reported last year before taking an extraordinary charge of $3,924,000 due to the loss incurred on the Federal Trade Commission ordered divestiture of certain operating facilities at the end of the first quarter of fiscal 1990. Net income per share before the extraordinary item was $.34 vs. $.46 reported last year and after the extraordinary item net income per share was $.23 vs. $.46 reported for the first half last year.

Commenting on the results, McMullian said: "We are pleased with the results reported for the second quarter. Sales revenues set a new record for the quarter and first half of the year. We are beginning to see the quarter-to-quarter improvement in profits your management team expects as we make progress with cost control, product mix and production efficiency programs.

"We are excited about the prospects for the remainder of fiscal 1990," McMullian stated. "The third quarter should show substantial improvement over last year and a continuation of the improving earnings outlook for Flowers Industries.

"We continue to look on fiscal 1990 as a year of recovery with year-end results from continuing operations approaching the operating profit levels achieved in fiscal 1988 and we anticipate marked improvement in profitability during fiscal 1991," McMullian concluded.

Flowers Industries Inc. produces and distributes a variety of specialty branded food products throughout the South.

OVERLAND PARK, KS (JAN. 10) PR NEWSWIRE - Adacom Corporation today signed a definitive agreement to purchase the assets of the Data Communications Division of Harris Corporation (NYSE: HRS).

The combined businesses will comprise a new data connectivity company

named Harris-Adacom.

Adacom, formed in 1985, has become a leading supplier of value-added hardware and software products in the IBM marketplace. The Data Communications Division of Harris has been a worldwide market leader since 1967, offering computer terminals, communications controllers and network connectivity products.

Investors in the new company will include Harris Corporation, retaining a minority investment, and Oak Investment Partners, a leading data and telecommunications venture capital firm.

Moti Gura, founder of Adacom, will become chairman and CEO of the new company. James J. Byrne, presently vice president and general manager of the Data Communications Division, will become president and chief operating officer.

"The acquisition," Gura said, "will result in an expanded sales force and an extended product line that offers LAN, ISDN and IBM SAA solutions that will now reach more customers in the United States while adding new markets in Europe and the Pacific Basin. The synergy is there for success."

Mr. Byrne agreed that, "with the compatible strategies of both companies already focused on the rapidly growing connectivity segment, the new company is immediately positioned as an industry leader."

Harris-Adacom will be headquartered in Dallas with international subsidiaries in the United Kingdom, Canada, Spain, Germany, Holland and Israel. The company will operate in over 200 cities worldwide.

ST. PETERSBURG, FL (JAN. 10) PR NEWSWIRE - Geonex Corporation (NASDAQ: GEOX) reported today the acquisition of Vernon Graphics, Incorporated from LK Comstock & Company, Inc.

Vernon Graphics is the leading outside plant record conversion company for public utilities (primarily electric and gas) with a client list which includes over 300 of the largest public utility companies in the country. In addition, Vernon Graphics was a pioneer and is one of the major producers of support for the Automated Mapping/Facilities Management (AM/FM) technologies.

Vernon Graphics has operating units in Norristown, Penn.; Tampa, Fla.; Louisville, Ky. and Chatsworth, Calif. which employ approximately 180 people. Revenues for this year are expected in the $7-8,000,000 range.

Founded in 1947, Vernon is the oldest service company devoted exclusively to providing field audit, mapping and record management systems and conversion services to the utility industry. Vernon has been on the leading edge of developing the technology that is used in the mapping conversion industry today.

Geonex Martel, located in St. Petersburg, Fla. and Geonex CAS, located in Des Plaines, Ill. will continue to provide support for the telephone industry while the acquisition of Vernon Graphics will enhance Geonex' market share in the electric utility industry.

Geonex Corporation, based in St. Petersburg, Fla. is the nation's largest geo-information company. Using the most advanced technology, Geonex provides mapping and resource interpretation services to telephone, electric and gas utilities, local, state and federal government agencies and a variety of commercial industries. Geonex has overall competence in mapping for agriculture and forestry as well as oil, gas, and mineral exploration. In the environmental and hazardous waste area, Geonex provides the following services through two units: analysis and testing services; and environmental hazardous waste investigation and data base management services.

PITTSBURGH (JAN. 10) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) has been awarded a $30 million contract from Nordostschweizerische Kraftwerk AG (NOK), a Swiss nuclear utility, for plant computer modernization at Units 1 and 2 of the Beznau nuclear power plant.

Under terms of the contract, Westinghouse will supply a state-of-the-art distributed Anlage Information System (ANIS) which will enhance the plant's man-machine interface, and assist plant operators and engineers achieve optimum long-term operation of their nuclear stations.

"The new system will provide NOK the world's most advanced nuclear plant computer system," said Michael P. Comiskey, general manager of the Westinghouse Process Control Division. "Development of NOK's ANIS system is a very demanding project that will involve several Westinghouse divisions. ANIS is an extensive system which will link NOK's main plant, its new bunker facility and the engineering offices."

The advantages of ANIS are in its extensive monitoring and plant analysis capability and the ease with which it can be used, maintained and expanded by NOK's staff. The system will collect and process data from 2,000 analog and 3,000 digital signals located throughout the plant. This information can be used to produce advanced graphic displays and analytical models to help operators and engineers run the plant at maximum efficiency.

Distributed workstations will be used as the operator interface and for calculations, reporting and historical storage. The Westinghouse WDPF process management system will supply data acquisition.

Units 1 and 2 of the Beznau plant, located on an island in the Aare River, are Westinghouse-designed pressurized water reactors that went into operation in 1969 and 1972. NOK supplies electricity to northern Switzerland and is undertaking a major plant renovation which includes safety feature upgrades and the installation of a bunker facility.

#90010p0121 01/10/1990 ~PR Newswire

WASHINGTON (JAN. 10) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today reported net income of $257.6 million for the year ended Dec. 31, 1989, up 14 percent over net income of $225.1 million in 1988.

Earnings per common share of $2.53 in 1989 were up 18 percent from the $2.14 earned in 1988.

Fourth quarter 1989 net income was $68 million, or 66 cents per common share, compared with net income of $58.9 million, or 57 cents per common share, in the fourth quarter of 1988 and net income of $65.9 million, or 65 cents per common share, in the third quarter of 1989. Earnings per share data for the year-ago periods are restated to reflect the two-and-one-half for one split of Sallie Mae's common stock effected in May 1989.

At Dec. 31, 1989, Sallie Mae's total assets were $35.5 billion, up 24 percent over total assets of $28.6 billion at year-end 1988. Student loan purchase volume of $5 billion -- including the record $1.7 billion in the fourth quarter -- brought outstandings at year-end 1989 to $16 billion up 21 percent from year-end 1988. Warehousing advances -- collateralized loans to banks and other education lenders -- outstanding at the end of 1989 were $8.6 billion, up $612 million from Dec. 31, 1988, and up $689 million from Sept. 30, 1989.

At year-end 1989, forward purchase commitments outstanding, the pipeline for future student loan portfolio growth, reached $9 billion, up from $7.6 billion a year ago and from $8.1 billion at the end of the 1989 third quarter. Approximately 50 percent of the commitments outstanding at year-end 1989 were to lenders using Sallie Mae's operational support services in addition to its secondary market facility.

Sallie Mae's cost of servicing student loans owned, measured as a percent of principal amount outstanding, declined to 0.69 percent (69 basis points) in 1989 from 0.77 percent (77 basis points) in 1988. By year-end 1989, 49 percent of Sallie Mae's portfolio of insured student loans was serviced in-house, versus 41 percent at year-end 1988. To continue its expansion of internal loan servicing capability, Sallie Mae in 1989 opened its fifth regional loan servicing center, in Panama City, Fla., and broke ground for construction of a larger facility for its loan servicing operation in Wilkes-Barre, Pa.

During the quarter, and throughout the year, Sallie Mae continued to utilize a variety of debt instruments to fund its operations cost effectively, match the interest rate sensitivity of its assets and liabilities, and provide customized financings for its clients. During the year, Sallie Mae issued more than $6 billion of term debt in the capital markets, including $301 million in the fourth quarter. Throughout the year, the corporation also took advantage of market opportunities to profitably invest short-term funds raised primarily for liquidity purposes.

As part of its ongoing management of the relationship of its equity accounts to its debt, Sallie Mae in 1989 repurchased 4.4 million shares of common stock, including 1.5 million shares in the fourth quarter. At year-end, there were outstanding a total of 98.6 million common shares, including 12.9 million voting common shares and 85.7 million non-voting common shares.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the higher education market.

WALTHAM, MA (JAN. 10) PR NEWSWIRE - Net income more than doubled on a 65 percent increase in revenues for the first quarter of fiscal 1990 ended Dec. 2, 1989, Cambex Corporation (OTC: CBEX) reported today.

Revenues for the first quarter of fiscal 1990 were $6,221,000, compared to $3,771,000 in the first quarter of fiscal 1989. Net income in the first

quarter of fiscal 1990 was $753,000, or 25 cents per share, up from $304,000, or 11 cents per share, in the same period of fiscal 1989.

"Our performance in the first quarter continues a growth pattern begun five quarters ago with the first shipments of our STOR/9000 memory storage systems for IBM mainframe computers. Since that time, we have installed more than 10 billion bytes of STOR/9000 memory and continue to experience broad-based customer acceptance of the product. We are also seeing a steady contribution to revenues and profits from Cambex products that support midrange IBM computers, a market that we expect to develop more fully in the coming months," Joseph F. Kruy, chairman and president of Cambex, said.

Cambex Corporation, headquartered in Waltham, develops and manufactures hardware and software products for use with a variety of IBM computers, including the System/3080, System/3090, ES/3090, Series/1 and RT systems. Its principal products include central and expanded memory storage systems for mainframe computers and controller and peripheral enhancement products for midrange computers.

NEW YORK (JAN. 10) PR NEWSWIRE - The board of directors of Profit Systems Inc., (NASDAQ: PFTS) a Delaware corporation, announced today that it had been advised by Lep Group plc, its majority shareholder, that Lep Group has reached agreements in principal with Harvey E. Pittluck, chairman of the board, and James E. Lineberger, a director of Profit Systems, for the purchase of their shares of Profit Systems at a cash price of $12 per share.

Pittluck and Lineberger own directly, and through certain affiliated entities, approximately 10.5 percent of the outstanding shares of Profit

Systems. Lep Group through an affiliate presently owns approximately 60.25 percent of such shares.

The Profit Systems board was further advised that the agreements in principle are subject to the parties entering into definitive agreements which would provide, among other matters, that Lep Group, or an affiliate, would make a proposal to Profit Systems for the acquisition of all of the other shares of Profit Systems (other than shares presently owned by Lep Group or its affiliates) for a cash price of $12 per share. It is expected that the purchase of Pittluck and Lineberger's shares would occur concurrently with the acquisition of the other shares of Profit Systems, which it is anticipated would occur on or before April 30, 1990.

Based upon such advice, the board of directors of Profit Systems will appoint a committee of independent directors to consider and act upon any proposal received from Lep Group to acquire the shares of Profit Systems not presently owned by Lep Group or its affiliates or by Pittluck and Lineberger.

Profit Systems, through its subsidiaries, is engaged in the business of forwarding and transporting freight by means of air and surface carriers and the provision of incidental services, both within the United States and to cities throughout the world. Profit Systems' common stock is traded in the NASDAQ Market System under the symbol "PFTS".

NEW YORK (JAN. 10) PR NEWSWIRE - Simon & Schuster, the publishing unit of Paramount Communications Inc. (NYSE: PCI), announced today that it has acquired Janus Book Publishers, Inc. Based in Hayward, Calif., Janus publishes supplemental textbooks for middle, junior and senior high school and adult education markets under the Janus Books imprint and English-as-a-second-language (ESL) books under the Alemany Press imprint. Terms of the transaction were not disclosed.

Simon & Schuster also announced that it will combine the Janus Books imprint with two other California-based educational units -- Fearon Education (acquired in March 1989) and Quercus Corporation (acquired in May 1988) -- to form Simon & Schuster Special Needs Publishers, a new division within its Supplementary Education Group. The new division will be based in the San Francisco Bay area.

Alemany Press will become part of Prentice Hall Regents (which also includes the Cambridge imprint), a unit of Simon & Schuster's Higher Education Group. Prentice Hall Regents, the leading U.S. publisher of ESL

materials, will continue to be based in Englewood Cliffs, N.J.

"With the establishment of Special Needs Publishers, we can now offer a comprehensive list of softcover worktexts and hardcover textbooks for middle, junior high, high school and adult level students with special needs," said Patrick Donaghy, executive vice president of Simon & Schuster's educational publishing operations. "Students with special needs and those who teach them are very important to us and we are pleased to be able to offer them a full line of books and materials."

Nick Randall, former president of Janus Book Publishers, will become president of Simon & Schuster Special Needs Publishers and Robert Tong, principal owner of Janus, will serve as a consultant to the newly formed division. Roger Olsen, founder of Alemany Press, will join Prentice Hall Regents in a West Coast marketing capacity.

The Simon & Schuster Education Group publishes a full line of educational materials for kindergarten through graduate and adult learning levels, including basic textbooks, workbooks, film and video, manipulatives and other supplementary materials.

In addition to education publishing, Simon & Schuster is engaged in consumer and business and professional publishing worldwide. Paramount Communications Inc. is a worldwide entertainment and publishing company.

DALLAS (JAN. 10) PR NEWSWIRE - BSN Corp. (AMEX: BSN) today announced that it has received a 13D filing from Pelham Associates of Houston, reflecting their recent purchase of 209,000 shares or approximately 5.4 percent of BSN's outstanding shares.

BSN said that it shares the opinion of Pelham that BSN is an undervalued special situation.

BSN stated that its continuing operations were continuing to reflect the operating improvement and efficiencies from recent consolidations and that such progress was anticipated to continue for the foreseeable future.

Since 1987, BSN has reduced its primary outstanding shares by nearly 50 percent to 3.8 million shares through open market, private purchases and a recent debt for equity exchange offer.

BSN also disclosed that certain members of management and employees,

including Michael Blumenfeld, the company's chairman and president, have indicated a desire to purchase up to 500,000 BSN shares subject to price, availability and financing if needed. As a group, management currently owns or controls approximately 22 percent of BSN shares.

#90010p0143 01/10/1990 ~PR Newswire

WILMINGTON, NC (JAN. 10) PR NEWSWIRE - Reeds Jewelers, Inc. (NASDAQ-NMS: REED) today announced sales and earnings for the third fiscal quarter of 1990, ended November 30, 1989.

Net sales for the third quarter were $11.5 million, up 3.6 percent from $11.1 million for the comparable period of fiscal 1989. Comparable store sales increased 2.9 percent, continuing the upward trend in same store sales which began in the second quarter; the third quarter was the first time Reeds had an opportunity to see true comparisons resulting from strategic changes. Net earnings for the quarter were $142,000, up 31.5 percent from earnings of $108,000 in the third quarter last year. This was equivalent to earnings of $.04 per share as compared to $.03 per share for the same quarter last year.

Alan M. Zimmer, president and chief executive officer, said that he was pleased with the continued positive trend in comparable store sales. Zimmer added, "This trend confirms our long-term strategic decisions which we made and began to implement last year to emphasize 'Quality, Value, and Service.' The combination of improved sales and increased gross margins resulted in an increase of 24 percent in earnings before interest and taxes -- from $1.03 million to $1.28 million for the quarter."

Sales for the nine months ended November 30, 1989 were $31.1 million, up 0.9 percent from $30.8 million for the same period last year. Net earnings for the nine months were $230,000 versus earnings of $57,000, before cumulative effect of a change in accounting principle, for the same period last year; the cumulative effect of $446,000 in the first quarter of last year resulted in net earnings of $503,000 for the nine-month period last year.

During the third quarter we opened three new stores in Chesapeake, VA, Tulsa, OK, and Hattisburg, MS, and closed one store in Tulsa bringing our total to 67 stores. Also six major remodels were completed during the quarter.

Zimmer said that, despite the encouraging third quarter results, sales for December, the first month of the fourth quarter, were disappointing, although positive on a comparable store basis. Sales during two weekends in the month, including the all-important Christmas weekend, were significantly affected by extremely bad weather. A major ice storm early in the month throughout much of the Company's marketing area caused very disappointing sales results. In addition, more than a dozen stores were closed during most of the last two shopping days before Christmas when a rare snow storm covered the southeastern seaboard. "Beautiful as the snow was, it could not have been worse for business on the two days of the year which account for about 5 percent of our annual sales volume," Zimmer added.

The Company does anticipate that earnings will be negatively impacted as a result of the sales lost because of weather conditions. Consequently, preliminary projections are that operating earnings will be in-line with last year, but well below analysts' estimates. In addition, the Company has entered into an agreement to sell the unused office building acquired two years ago in the Dreifus acquisition. Five stores will also be closed during the fourth quarter, two for relocation to better sites, and two downtown stores and one strip center store because of continuing declining sales. These asset disposals are consistent with the Company's strategic positioning, and will result in charges against fourth quarter earnings of approximately $250,000, or $.07 per share. Zimmer added that, "in spite of the effects of weather on the Christmas season, mangement is pleased with the steadily improving comparable store sales this year and the general progress toward strategic positioning objectives."

Reeds Jewelers is a specialty retailer presently operating its 67-store chain primarily in enclosed regional shopping malls in 13 states principally in the Southeast. The company specializes in the sale of fine jewelry, emphasizing customer service.

NEW YORK (JAN. 10) PR NEWSWIRE - Rothschild Realty has acquired Williamsburg Outlets Mall in Williamsburg, Va. from ITD, a Greenwich, Conn.-based syndicate. The retail space totals 177,600 square-feet and the purchase price of the property was in excess of $17,000,000.

The mall, located approximately two miles from historic Colonial Williamsburg, has over 70 outlet shops. These include Burlington Brands, Levi Strauss, Cape Isle Knitter, Dress Barn, Famous Footwear, Hanes Active Wear, Hit or Miss and Old Mill Outlets, among others.

C. Cammack Morton, senior vice president of Rothschild Realty, commented: "We feel the Williamsburg Outlets Mall is one of the premier properties in the outlet mall business and are pleased to add it to our growing portfolio of outlet malls."

The mall, originally built in 1983 and expanded in 1989, is located on 20.5 acres of land. The area's historical significance and a wide spectrum of additional recreational pursuits draw approximately 3.5 million tourists a year.

Rothschild Realty is an affiliate of Rothschild Inc. which is the U.S. arm of the international Rothschild banking group. Rothschild Inc. is engaged in a full range of corporate finance, investment management, venture capital and real estate services as well as arbitrage and hedging activities for domestic and foreign institutions and individuals.

DALLAS (JAN. 10) PR NEWSWIRE - Associates Corporation of North America today announced the 13th consecutive year of record earnings for the fiscal year ended Oct. 31, 1989.

Net earnings rose to $326.7 million, a 14 percent increase over the $287.8 million for the prior year. Earnings before provision for income taxes increased 14 percent to $508.6 million from the $447.9 million reported last year.

Reece A. Overcash Jr., chairman and chief executive officer of The Associates, said assets exceeded $14 billion for the first time. The Associates is the third largest independent finance company in the United States based on total assets.

The Associates also announced that it will change to a December 31 fiscal year to conform with that of Ford Motor Company. Affiliates of Ford acquired The Associates from Paramount Communications Inc. on Oct. 31, 1989. The Associates continues to operate as a separate entity.

As previously announced, subsequent to the purchase of The Associates, Ford Holdings Inc., a Ford subsidiary, contributed TranSouth Financial Corporation to The Associates. TranSouth is a consumer finance company with 154 branches in the southeastern United States. TranSouth continues to operate as a separate company.

The Associates consumer finance operations in the United Kingdom, Japan, and Puerto Rico were sold by Paramount Communications to other subsidiaries of Ford. The Canadian commercial finance operation is also being transferred to another Ford subsidiary. The Associates continues to provide management supervision of these foreign operations.

Consumer finance operations reported gains from residential real estate-secured loans and credit card receivables in the United States, according to Overcash. Consumer operations in the United Kingdom and Japan also had strong growth during the year.

Contributing to improved commercial finance results was the strong performance of the company's Transportation Division which strengthened The Associates' position as the leading source of financing for heavy-duty trucks and truck trailers. Insurance operations of The Associates also showed strong growth, stemming from increased sales of insurance products.

Revenue was the highest in the company's history, increasing 20 percent to $2.4 billion, compared with $2.0 billion a year ago. Gross finance receivables at Oct. 31, 1989, were $13.6 billion, compared with $13.0 billion a year ago, a five percent increase. Volume for the period was

$13.3 billion, compared with $11.9 billion the previous year, a 13 percent increase.

QUINCY, MA (JAN. 10) PR NEWSWIRE - After entering into Massachusetts' hazardous waste facility siting process three years ago, Clean Harbors, Inc. (NASDAQ: CLHB) today announced that it took a significant step by officially filing the RCRA Part B permit application with the Massachusetts Department of Environmental Protection (DEP).

The filing is required under Federal and Massachusetts law as a necessary step to construct a hazardous waste incinerator. Clean Harbors is proposing to build a rotary kiln incinerator at its existing facilty in Braintree, Mass. The importance of the filing is that it formally places the application before DEP and will also be listed by EPA as a pending proposal in its quarterly report on hazardous waste facilities licensing.

The RCRA Part B application contains information about facility design, operation, training, procedures, equipment and monitoring. Filed with the Part B is the air plans application which describes how the facility will meet all air emissions standards.

"This is an important milestone for us," said Alan McKim, CEO of Clean Harbors, "with this filing, we move ahead on schedule toward building this facility and meeting a growing need for the region." According to a 1989 report filed by the Executive Office of Environmental Affairs (EOEA), Massachusetts needs in-state capacity for disposing its hazardous waste. "If built, this 45,000 ton per year incinerator could handle a significant portion of the 250,000 tons generated annually in the state," McKim said.

Clean Harbors, Inc. is the Northeast's largest provider of environmental services which operates out of 32 locations in 11 states and furnishes a wide range of environmental remediation, hazardous waste management, and engineering and laboratory services to a diversified customer base.

CLIFTON, NJ (JAN. 10) PR NEWSWIRE - LCS Industries, Inc. (NASDAQ: LCSI), a direct response advertising services company, today announced that it

closed the operations of its Motivational Marketing Division and will record a one-time estimated pre-tax charge of $450,000 in its income statement for the quarter ended Dec. 31, 1989. The charge relates principally to the write-off of goodwill associated with the division.

The company indicated that Motivational had never met its or LCS's expectations and with no reasonable assurance that the division could be made profitable in the near term, prompt action was necessary.

As a result of the write-off, LCS expects to report a net loss for the quarter ended Dec. 31, 1989 of approximately $250,000 or $.16 per share.

DOVER, NH (JAN. 10) PR NEWSWIRE - Great Bay Bankshares, Inc., (NASDAQ: GBBS), today announced that the company posted $2,122,000 in net income for the first six months of its current fiscal year versus $2,077,000 for the same period of the prior fiscal year. Net income for the second quarter ended Dec. 31, 1989, was $1,031,000 versus $1,163,000 for the second quarter ended Dec. 31, 1988.

Fully diluted earnings per share for the current six month period and second quarter were 68 cents and 34 cents respectively. Earnings per share for the previous year's comparable periods were 61 cents and 35 cents. On Jan. 22, 1990, Great Bay will pay a regular 15 cents per share quarterly dividend to shareholders of record as of Jan. 8, 1990.

Great Bay, under an ongoing stock buy-back program, has repurchased 441,500 shares of its common stock to date and currently has 2,933,500 shares outstanding. Tangible book value per share increasd from $15.85 to $16.50 during the first six months of the current fiscal year.

Great Bay Bankshares, Inc., is the parent holding company of Southeast Bank for Savings, a $300 million, FDIC insured, full- service community bank; and Constitution Trust Company, which has over $50 million of assets under management.

#90010p0174 01/10/1990 ~PR Newswire

DES MOINES, IA (JAN. 10) PR NEWSWIRE - Pioneer Hi-Bred International, Inc. (NASDAQ: PHYB), announced today that operations for the first quarter of fiscal 1990, ended Nov. 30, 1989, resulted in a loss of $31,783,000, or $1.02 per share. The fiscal 1989 first quarter loss was $10,574,000, or 33 cents per share.

The first quarter fiscal 1989 results included a one-time net gain from discontinued operations of 38 cents per share. The fiscal 1989 first quarter loss from continuing operations was $22,790,000, or 71 cents per share compared to the fiscal 1990 first quarter loss from continuing operation of $1.02 per share.

Thomas N. Urban, chairman and president, said that the lower results from continuing operations is attributable largely to costs associated with discontinuing the North American hard red winter and hard red spring wheat product lines together with increased research efforts and the timing of certain selling and marketing expenses. Increased interest expense also negatively impacted first quarter results.

Because of the seasonal nature of the seed business, Pioneer typically operates at a loss during the first fiscal quarter, the results of which are not indicative of year-end earnings.

Urban reported that supplies of Pioneer(R) brand seed look good, but that there may be a shortage in a few key hybrids. ''While overall seed production last fall was satisfactory, poor growing conditions and size-out will limit next season's availability of one of our leading hybrids in both North America and Europe. We also suffered damage from the recent freeze in Texas and Florida, interrupting production of a key hybrid and slowing down the increase of key inbreds,'' he said.

Urban noted that he looks for sales of Pioneer(R) brand seed corn, the company's major product, to be up this year, however, higher production costs are expected to hold margins near fiscal 1989 levels.

''While we are excited about our prospects for the coming decade, we feel that earnings estimates for the current year are too strong,'' he stated.

''We have taken a number of important steps to position ourselves for the competitive '90s and to achieve a fair return for our shareholders.

We see improved performance of our products across the board. There is, however, much to be completed. We are long-term investors and a long-term investment. It will not come all at once,'' Urban concluded.

CAMBRIDGE, MA. (JAN. 10) PR NEWSWIRE - Mitchel Sayare, president and chief executive officer of ImmunoGen, Inc. (NASDAQ: IMGN), reported today at the Hambrecht and Quist Eighth Annual Life Sciences Conference that ongoing Phase I/II clinical trials of the company's first product, Anti-B4-blocked ricin, have yielded a preliminary response rate of 50 percent in relapsed lymphoma patients. The company has completed one Phase I/II clinical trial, initiated three more Phase I/II clinical trials and has just received a go-ahead from the U.S. Food and Drug Administration (FDA) for a fifth. All of the trials involve the use of highly specific monoclonal antibodies to deliver ImmunoGen's extremely toxic, proprietary blocked ricin to tumor cells. All trials are being conducted under FDA approved INDs.

A Phase I/II clinical trial recently completed at the Dana-Farber Cancer Institute evaluated safety and preliminary efficacy of ImmunoGen's first product, Anti-B4-blocked ricin, for the treatment of Non-Hodgkin's Lymphoma (NHL), Acute Lymphoblastic Leukemia (ALL) and Chronic Lymphocytic Leukemia. In the U.S. 40,000 new patients a year are afflicted with these diseases, and fewer than 50 percent survive five years. A second Phase I/II trial for these diseases also uses Anti-B4-blocked ricin. The drug is delivered by constant infusion in this study, and has resulted in a preliminary response rate of 50 percent with little or no toxic side effects.

Phase I/II clinical trials also have been initiated at the Children's Hospital of Boston to evaluate Anti-B4-blocked ricin for the treatment of pediatric ALL, the most common form of leukemia in children.

Phase I/II clinical trials using ImmunoGen's second product, Anti-My9-blocked ricin, designed for the treatment of Acute Myelogenous Leukemia (AML) and Chronic Myelocytic Leukemia are being conducted at Dana-Farber. AML afflicts 11,000 new patients a year in the U.S., with a five-year mortality rate of approximately 80 percent.

ImmunoGen has also received a go-ahead from FDA to conduct clinical trials with Anti-My9-blocked ricin for "ex vivo" bone marrow purging of AML patients as part of autologous bone marrow transplantation.

Sayare stated, "We are very encouraged by the preliminary results of the studies on Anti-B4-blocked ricin, our first product. The data show a solid 50 percent response rate in the constant infusion study in these very sick patients. They have tolerated the blocked ricin immunoconjugate well and do not demonstrate any of the classic side effects commonly associated with conventional chemotherapy." Sayare went on to say, "I am also very pleased with the progress the company has made in filing INDs and initiating new clinical trials, all consistent with our timetable. It reflects a commitment on the part of our entire staff to get this promising technology into the clinic with the utmost urgency."

ImmunoGen, Inc. is a Cambridge-based biotechnology company specializing in the treatment of cancer. The company has developed proprietary toxins, drugs and biologicals conjugated to highly specific monoclonal antibodies which search out and destroy cancer cells.

DOWNEY, CA (JAN. 10) PR NEWSWIRE - Charles W. Helms has been named vice

president and program director for Rockwell International Corporation's (NYSE: ROK) Space Transportation Systems Division (STSD) Shuttle-C program.

Helms will direct the division's work on the proposed National Aeronautics and Space Administration (NASA) program to develop a near-term, heavy-lift launch vehicle derived from Space Shuttle technology. The company, which is NASA's prime contractor for Space Shuttle orbiters, currently leads an industry team conducting Shuttle-C system definition studies under contract to NASA's Marshall Space Flight Center, Huntsville, Ala. Helms will report to Robert G. Minor, STSD president.

Helms joined Rockwell in 1962 as a senior engineer on NASA's Apollo program, progressing through various engineering and management roles to become director of Apollo command and service module engineering. Following Apollo, he served in various executive capacities on the U.S. Air Force's Navstar Global Positioning System (GPS) satellite program. Prior to his current appointment, he was vice president and chief engineer for Rockwell's Satellite and Space Electronics Division (S&SED) in Seal Beach, Calif.

Helms received a bachelor of science degree in aeronautical engineering and master of science degree in engineering from the University of Alabama. He also holds a professional certificate in propulsion and power conversion systems from the University of California at Los Angeles.

Rockwell International is a $12-billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

BLUE BELL, PA (JAN. 10) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today announced that it has combined elements of its commercial and government business groups into a single entity which will provide systems integration and professional services in both government and commercial

markets.

David C. Gompert, previously vice president, Corporate Development and Strategy at Unisys, has been named president of the new Systems Management Group, which becomes part of the corporation's United States Information Systems (USIS) Division. It will be headquartered in McLean, Va.

Unisys said that through the new organization, it plans to extend its success in providing integrated systems and services to U.S. government customers to other U.S. markets, including state and local governments and commercial enterprises. The Systems Management Group (SMG) will offer life-cycle technical and management support to users of large information systems, including computer facilities management, systems and network integration, and professional services.

The new Unisys Systems Management Group consists of approximately 1,500 Unisys employees organized in three related business units: a Support Services Division, a Government Systems Integration Division, and a Commercial Systems Integration Division.

The Support Services Division currently provides a wide range of facilities management and other services to such government agencies as the U.S. Department of Transportation, NASA, and the Environmental Protection Agency (EPA). The Commercial and Government divisions provide system solutions for such customers as United HealthCare Corp. and Suffolk County, N.Y.

Before joining Unisys, Gompert held senior marketing and program positions with AT&T. Gompert has also held a number of posts in the U.S. goverment. He earned his master of public affairs degree from the Woodrow Wilson School, Princeton University, and his bachelor of science degree in engineering from the U.S. Naval Academy.

Unisys is a $10 billion manufacturer of commercial information systems, defense systems, and related services. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

CHICAGO (JAN. 10) PR NEWSWIRE -- United Airlines announced today it has filed with the U.S. Department of Transportation (DOT) for authority to begin air service between Chicago and Tokyo using its new Boeing 747-400 aircraft. The direct flight will originate from Washington, D.C.'s Dulles Airport, providing the nation's capital with its first U.S.-flag same-plane service to Japan.

United was the first carrier to apply to the U.S. government for the Chicago-Tokyo route, and since its first filing on Jan. 4, 1989, has generated support for its case among government business leaders in the city of Chicago and the state of Illinois.

Currently, Japan Air Lines and Northwest Airlines are the only two carriers flying non-stop between Chicago and Tokyo, although neither carrier operates a connecting hub at Chicago.

Washington, D.C.'s Dulles is United's major East Coast connecting hub with service to 35 cities. United also is implementing a major international expansion at Dulles with new service to Mexico City and Cancun, inaugurated last month, and plans to add service between Dulles, Frankfurt and Paris this summer.

United said it would be prepared to begin the flights on Oct. 1, 1990, the date set by the DOT for the inauguration of service.

In a related DOT route award last Friday, United received authorization from the U.S. government to serve Paris from Chicago and Washington, D.C.

#90010p0191 01/10/1990 ~PR Newswire

WASHINGTON, D.C. (JAN. 10) PR NEWSWIRE - MCI Communications Corp. (NASDAQ: MCIC) today announced three international calling plans that offer residential consumers an easier and less expensive means of calling major foreign countries at the most convenient times.

For any one of the three plans, Call Europe, Call Pacific or Call Canada, consumers pay one single, low per minute rate for international calls to available countries during plan hours on weekdays and all weekend long, plus a $3 monthly fee.

MCI's Call Europe plan offers international service for only 59 cents per minute to 23 Western European countries on weekdays from 3 p.m. to 8 a.m. and all weekend.

MCI's Call Pacific plan offers a rate of only 79 cents per minute to 10 Pacific Rim countries, from 10 p.m. in the evening to 2 p.m. the following day on weekdays and all weekend.

MCI's Call Canada plan is priced at 19 cents per minute from 5 p.m. to 8 a.m. weekdays and all weekend for calls to anywhere in Canada.

Expected to be available Jan. 15, the plans are the newest addition to MCI's Premier Calling Plans that allow consumers to purchase long distance service by time, rather than by the distance of the calls.

"MCI has taken this concept and applied it to regions of the world where the majority of U.S. customers most often call," said Wayne Gattinella, MCI vice president for consumer marketing.

"We've designed these new international plans to take the mystery out of high-priced overseas calling. Customers no longer have to worry about complex rates, varying prices for calls to different countries or restrictive calling times in order to get the best value," Gattinella said.

"Best of all," he added, "the plans are tailored to the most popular overseas calling times."

The plans offer MCI's lowest international rates during hours when both the caller and the called party are at home and awake.

According to MCI estimates, the international residential market is approximately $5 billion and is growing at 25 percent annually. Currently over 10 percent of U.S. consumers make monthly overseas calls, with an average duration of 10 minutes. The company said its marketing studies show twice that many consumers would make international calls if more affordable.

The company said it plans to further expand its international calling plans and will offer additional countries during 1990.

ATLANTA (JAN. 10) PR NEWSWIRE - Tom Roeck, Delta's Senior Vice President-Finance and Chief Financial Officer, today said: "We expect that Calendar 1989 net income will be a record for any calendar or fiscal year. However, Delta's (NYSE: DAL) net income and operating income for the December 1989 quarter is expected to be below the results of the December 1988 quarter primarily due to lower than expected passenger mile yield for the December 1989 quarter.

In addition, aircraft fuel expense for the quarter was about 43 percent over last year as announced on January 5, 1990."

PHILADELPHIA, (JAN. 10) PR NEWSWIRE - The board of directors of Comcast Corp. (NASDAQ-NMS: CMCSA, CMCSK) has declared a quarterly cash dividend of $.03 per share on Class A common stock, Class A special common stock and Class B common stock, according to Ralph J. Roberts, president and chairman of the company.

Dividend payment will be made on March 29, 1990, to shareholders of record as of March 8. This is an increase from the previous quarterly rate of $.02-2/3 per share.

Comcast Corp. is principally engaged in the management, development and operation of cable communications systems. The company's consolidated and affiliated operations serve approximately 2.3 million subscribers. This includes 50 percent of the 1,530,000 subscribers served by Storer Communications Inc. The company is a 50 percent shareholder of and provides consulting services to Storer. Additionally, the company provides cellular telephone communications, and sound communications services. The Class A and Class A special common stock are traded in the Over-the-Counter market and are reported in the National Market List under the NASDAQ symbols CMCSA and CMCSK, respectively.

NEW YORK (JAN. 10) PR NEWSWIRE - AT&T (NYSE: T) said today it planned to set up a trust to borrow about $550 million through a private placement to purchase stock that will be used for future company contributions to its existing nonmanagement employee savings plan.

Under the savings plan, established in 1979, the company currently matches - in AT&T stock - 50 percent of employees' basic contributions. Employees can contribute up to $45 per week, depending on their base pay.

In labor contracts reached in May 1989 with the Communications Workers of America and the International Brotherhood of Electrical Workers, AT&T agreed to increase the matching portion to 66-2/3 percent beginning July 1 1990, and to pre-fund future matching contributions through a leveraged Employee Stock Ownership Plan (ESOP). The leveraged ESOP, which is a financing arrangement, will not affect existing provisions of the nonmanagement savings plan.

The company said it would issue about 12 million new shares of common stock, which the ESOP trust will purchase now and use to pay the matching funds over the next ten years. Currently, AT&T has 1.076 billion common shares outstanding. The company will use proceeds of the stock sale for general corporate purposes.

J. P. Morgan Securities Inc. along with The First Boston Corporation and The First National Bank of Chicago will manage the loan placement. American Transtech Inc, a subsidiary of AT&T, will continue as recordkeeper of the savings plan.

ANAHEIM, CA (JAN. 10) PR NEWSWIRE - CalComp Inc., a Lockheed company and a leading provider of computer graphics products, announced it has joined forces with Japan's Nippon Steel Corp. and Sumitomo Corp. in a new Tokyo-based company that CalComp President William P. Conlin predicts will be "the most powerful computer graphics firm in Japan." The new company, called NS CalComp, begins operating today.

NS CalComp emerged from the sale of shares of Nippon CalComp K.K. (NCKK), a CalComp wholly owned sales subsidiary established in 1983. According to Conlin, Nippon Steel purchased 51 percent and Sumitomo 5 percent of NCKK for a price approaching $20 million, with CalComp retaining the other 44 percent.

NS CalComp will market, service and support CalComp's extensive line of plotters, digitizers and graphic display products, which are used in a wide range of computer-aided design, presentation graphics and graphic arts applications.

The joint venture will boost the market share for CalComp products in Japan, said Conlin, as well as foster new products -- developed jointly by CalComp and Nippon Steel's Electronics & Information Systems Division -- specifically for the Japanese marketplace. Sumitomo's role, he added, will be to supplement NS CalComp's marketing and distribution capabilities.

Named president of NS CalComp is Hiroyuki Kishikawa, who had been CalComp's director of Pacific operations prior to the joint venture. Kishikawa, Conlin and Larry Sanders, CalComp Inc.'s senior vice president of sales and marketing, will serve on the new company's board of directors.

CalComp Inc., founded in 1958, manufactures more than 100 computer graphics products, which it markets in the United States and 45 other countries. In 1989, the Anaheim, Calif.-based company achieved worldwide sales of approximately $450 million.

#90010p0209 01/10/1990 ~PR Newswire

DOWNEY, CA (JAN. 10) PR NEWSWIRE -- Charles W. Helms has been named vice president and program director for Rockwell International Corporation's

(NYSE: ROK) Space Transportation Systems Division (STSD) Shuttle-C program.

Helms will direct the division's work on the proposed National Aeronautics and Space Administration (NASA) program to develop a near-term heavy-lift launch vehicle derived from Space Shuttle technology. The company, which is NASA's prime contractor for Space Shuttle orbiters, currently leads an industry team conducting Shuttle-C system definition studies under contract to NASA's Marshall Space Flight Center, Huntsville, Ala. Helms will report to Robert G. Minor, STSD president.

Helms joined Rockwell in 1962 as a senior engineer on NASA's Apollo program, progressing through various engineering and management roles to become director of Apollo command and service module engineering. Following Apollo, he served in various executive capacities on the U.S. Air Force's Navstar Global Positioning System (GPS) satellite program. Prior to his current appointment, he was vice president and chief engineer for Rockwell's Satellite and Space Electronics Division (S&SED) in Seal Beach, Calif.

Helms received a bachelor of science degree in aeronautical engineering and master of science degree in engineering from the University of Alabama. He also holds a professional certificate in propulsion and power conversion systems from the University of California at Los Angeles.

Rockwell International is a $12-billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

#90010p0213 01/10/1990 ~PR Newswire

CALGARY, ALBERTA (JAN. 10) PR NEWSWIRE - Bow Valley Industries Ltd. (Toronto, Montreal: BVI) announced today its 1990 capital spending plans. Bow Valley's 1990 capital expenditures are budgeted at $203 million, reflecting a $63 million (or 45 percent) increase over projected 1989 expenditures of $140 million, excluding acquisitions. Planned expenditures include $73.6 million for exploration, $126 million for development and $3.4 million for mining and other.

In Canada, the company projects 1990 expenditures of $82.7 million, of which $35.4 million is allocated to exploration activities and $47.3 million to development activities. This provides for participation in approximately 42 gross (34.0 net) exploratory wells and 235 gross (123.0 net) development wells.

The exploration focus emphasizes the discovery of new gas reserves, with

near-term cash flow, as well as the continuing enhancement of the company's acreage position in Western Canada.

In Europe, Bow Valley anticipates spending $22.7 million on exploration and $61.1 million on development for a total of $83.8 million, representing 41 percent of the entire budget.

This will allow the company to participate in the drilling of six exploration wells and seven development wells, with an average working interest of approximately 30 percent and 14 percent, respectively. The exploration budget concentrates on Brae and recently acquired blocks in other areas on the U.K. Continental Shelf and offshore the Netherlands.

The development budget reflects costs associated with the commencement of construction of the East Brae production facilities and gas transportation system, which are required to initiate production from undeveloped Brae gas and liquids reserves. Bow Valley expects partner and U.K. government approval for these projects early in 1990.

In Indonesia, Bow Valley has established a $31 million budget, including $13.6 million for exploration and $17.4 million for development. This reflects the drilling of 17 (5.5 net) exploration wells and 20 (7.8 net) development wells.

The exploration program includes continued delineation of the Ogan Komering block, while development activity will focus on Bow Valley's current Production Sharing Contract and Technical Assistance Contract areas, as well as an enhanced recovery project at Jambi.

CINCINNATI (JAN. 10) PR NEWSIRE - The Kroger Co., (NYSE: KR) as a safety precaution, has stopped using water misters in its store produce departments, effective immediately.

The action was taken following reports that an outbreak of Legionnaire's disease in Louisiana had been traced to a misting machine used in another company's supermarket produce department in Bogalusa, La. The disease is thought to be caused by a bacteria carried in small water droplets into the small air passages of the lungs. According to the Louisiana Department of Health and Hospitals, which is investigating the outbreak, the bacteria cannot be carried by food. Thus, produce items that have been sprayed or misted pose no danger to consumers, the state health department said.

Water vapor or mist is used to preserve the freshness and shelf life of produce items. Kroger said that a majority of its supermarkets use automatic spray or mist systems. Stores in Cincinnati and Dayton do not employ spray or mist systems, and apply moisture through hand-held water hoses.

The Company said that in addition to stopping use of the misting systems, it had directed each of its operating divisions to undertake a thorough maintenance check of the systems.

PADERBORN/MUNICH, Germany (JAN. 10) PR NEWSWIRE - Nixdorf Computer AG, Paderborn, and Siemens AG, Berlin and Munich (Germany), have agreed to cooperate in the field of data and information technology. Until now both companies have focused their operations in this field on different market segments and geographic areas. Due to relatively small overlapping, this alliance will offer significant opportunities to exploit synergetic effects.

The Nixdorf-related foundations, the Nixdorf family and Siemens, have agreed that - subject to the approval of the responsible boards and authorities - Siemens AG will acquire a majority of the common stock of Nixdorf Computer AG. Siemens AG is to transfer its Data and Information Systems Group to Nixdorf Computer AG.

Nixdorf will continue to pursue the measures already introduced to strengthen its competitiveness.

The new joint venture, to be named SIEMENS-NIXDORF Informationssysteme AG, will have annual sales of around DM 12 billion.

Nixdorf Computer AG is the parent corporation of Nixdorf Computer Corporation, headquartered in Waltham, Mass. Nixdorf Computer Corporation is a leading marketer of business system solutions incorporating hardware, software and communications. The company serves customers primarily in the retailing, banking, manufacturing, distribution, image/data capture, insurance and public administration sectors through more than 100 sales and service locations in the United States and Canada.

COLUMBUS, GA. (JAN. 10) PR NEWSWIRE - Synovus Financial Corp. (NYSE: SNV) the $2.4 billion asset Columbus, Ga.-based multi-financial holding company, today announced record net income for 1989 of $31,412,000, up 17.0 percent over 1988 net income of $26,838,000.

On a per share basis, 1989 net income amounted to $1.01, up 15.6 percent over 1988 net income per share of $.87.

Net income for the fourth quarter of 1989 was a record $8,661,000, up 15.3 percent over net income of $7,514,000 during the fourth quarter of 1988. On a per share basis, net income was $.28, up 13.3 percent from the $.24 earned in the same period of 1988.

Commenting on the company's performance, James H. Blanchard, chairman of the board of Synovus Financial Corp., stated: "We are very pleased about our performance in 1989. Net interest margins remained healthy, and we produced strong increases in fee income while maintaining control over expenses. This resulted in a 1.50 percent return on assets for the year and 18.02 percent return on equity."

Synovus Financial Corp. is a multi-financial company composed of 18 banks, Total System Services Inc., (NYSE: TSS) a bankcard data processing company and Synovus Securities Inc., a broker-dealer company.

Synovus Financial Corp. stock is traded on the New York Stock Exchange under the symbol "SNV". Synovus owns approximately 82 percent of Total System Services Inc., whose stock is traded on the New York Stock Exchange under the symbol "TSS".

#90010p0235 01/10/1990 ~PR Newswire

HOUSTON (JAN. 10) PR NEWSWIRE - Northern Border Pipeline Co. announced today that effective Dec. 29, 1989, it accepted the Federal Energy Regulatory Commission (FERC) authorization to terminate gas transportation service to United Gas Pipeline Co. and commence service for Natgas, U.S. Inc.

In addition, a restructuring of the Northern Border partnership resulted in the transfer of a 12-1/4 percent interest in Northern Border from United Mid-Continent Pipeline Co. to Northern Plains Natural Gas Co., an Enron Corp. subsidiary. With the additional ownership, Northern Plains now holds a 35 percent interest in the partnership. Other Northern Border owners and their respective interests are: TransCanada Pipe Line Ltd., 30 percent; Panhandle Eastern Pipe Line Co., 22-3/4 percent; and The Williams Companies, 12-1/4 percent.

Under a new transportation agreement, 450 million cubic feet (MMcf) of the more than 1.2 billion cubic feet (Bcf) of natural gas that moves through the Northern Border Pipeline on a daily basis will be transported for Natgas U.S. Inc., a subsidiary of Pan-Alberta Gas Ltd. The new transportation arrangement results from the FERC's approval for Northern Border to terminate its firm transportation of 450 MMcf of natural gas per day for United Gas Pipe Line Co. and the authorization to transport the same volumes for Natgas U.S. Inc.

"The regulatory approvals and resolution of the Northern Border, Pan-Alberta and United negotiations paves the way for Northern Border to complete resolution of its rate case," said Larry L. DeRoin, president of Northern Plains Natural Gas Co. "The resolution of these issues also will allow us to proceed with plans to move additional Canadian gas into the lower 48 states."

The 822-mile Northern Border Pipeline transports Canadian gas from the Canada-U.S. border at Monchy, Saskatchewan, to Ventura, Iowa. During 1989, approximately 389 Bcf of natural gas was transported through the Northern Border system.

#90010p0238 01/10/1990 ~PR Newswire
WICHITA, KS (JAN. 10) PR NEWSWIRE - Latshaw Enterprises (AMEX: LAT) today announced that net sales for the year ended Oct. 28, 1989 were $26,062,000. This is a 14 percent increase over sales of $22,905,000 in fiscal 1988.

Net profit after tax of $863,000, or $1.53 a share, includes a pretax loss on $474,000 for fiscal 1990 due to the unrealized loss on marketable equity securities. This compares to $1,191,000, or $2.10 a share, in fiscal 1988. The increase in sales reflects a greater share in our traditional markets as well as an expanded customer base in Ultra Glide controls and certain plastics markets. The gross profits generated from the sales were $5,010,000 in 1989 as compared to $4,677,000 in 1988.

The 1989 fourth quarter sales volume increased 9 percent from $5,473,000 in 1988 to $5,960,000 in 1989. The gross profit margins were $1,342,000 in the fourth quarter of 1989 as compared to $1,069,000 for the same period in 1988. After the adjustment was made for the unrealized loss on marketable equity securities of $474,000, there was a fourth quarter loss of $124,000 compared to a profit of $224,000 in 1988.

#90010p0246 01/10/1990 ~PR Newswire
SAN JUAN, (JAN. 10) PR NEWSWIRE - BanPonce Corporation (NASDAQ: BDEP) today announced that net earnings for the year 1989 amounted to $20,531,000, or $3.56 per share, compared with $20,913,000, or $3.63 per share, for 1988. Core earnings for the year, or net income excluding securities transactions after taxes, rose $1.3 million, or 7.1 percent, over last year.

Net interest income for the year 1989 totaled $114,791,000, a 10.2 percent increase over the 1988 figure. Likewise other operating income, excluding securities transactions, rose to $32,851,000, or 11.3 percent over 1988.

Fourth-quarter 1989 net earnings were $4,642,000, or 81 cents per share vs. $5,824,000, or $1.01 per share, for the comparable quarter in 1988. While net interest income rose 7.4 percent to $28.8 million, an increase in the provision for loan losses of $5 million offset this gain to some extent.

"After closer review of our LDC loan portfolio, the bank has elected to charge-off $3.6 million of Latin American debt in the fourth quarter. At the same time, we felt it prudent to replenish the allowance for loan losses and provide additional reserves of about $1.4 million against our consumer loan portfolio," said Alberto M. Paracchini, chairman of the board and chief executive officer.

"The ratio of loan loss reserves to total loans now stands at 1.47 percent " he added, "and while consumer loan delinquencies rose slightly during 1989, this trend was reversing for the positive by year end.

"We are particularly pleased with the success of our cost containment program in 1989. Total operating expenses were virtually even with the prior year and everyone should be congratulated," he said.

For the year, BanPonce experienced continued growth in all significant balance sheet categories. At Dec. 31, 1989, total assets reached $3.06 billion, an increase of $224 million, or 7.9 percent, over year-ago levels. Total deposits grew 4.6 percent to $2.6 billion, while total loans, net of unearned income, showed an increase of $83.6 million to $1.8 billion.

Stockholders' equity was up 7.2 percent to $173.7 million vs. $162 million a year ago.

Primary and total capital ratios at year end increased to 6.99 percent and 8.97 percent, respectively, well in excess of regulatory requirements.

On Oct. 19, 1989, BanPonce Corporation agreed to a merger proposal by Banco Popular de Puerto Rico (NASDAQ: BPOP). The merger, which is currently under regulatory review, will be voted upon by shareholders in early 1990.

BanPonce Corporation, a diversified bank holding company, operates subsidiaries engaged in a broad range of financial services including retail and commercial banking, as well as leasing services. Through its primary subsidiary, Banco de Ponce, the corporation operates 54 branches, of which 40 are located in Puerto Rico and 14 in New York City.

BASKING RIDGE, NJ (JAN. 10) PR NEWSWIRE - AT&T (NYSE: T) today announced its international discount calling plan, called AT&T Reach Out(R) World. The FCC tariff for this plan has been in effect since July 1, 1989.

Customers save 10 percent or more on calls made during Reach Out World's hours. For a $3 per month fee, customers receive discounts on calls to 25 of the most frequently called countries and overseas areas: Canada, Mexico the United Kingdom, Japan, Italy, Australia, France, Switzerland and the Netherlands.

Other countries and areas in the program are Denmark, Ireland, Norway, Sweden, Monaco, Brazil, Panama, Peru, Uruguay, the Philippines, Korea,

Guam, Taiwan, Pakistan, Kuwait and Israel.

Reach Out World customers also receive a 5 percent discount on direct-dialed interstate calls within the United States.

AT&T also announced today it will soon add nine new countries and overseas areas to Reach Out World, including West Germany, Spain, Hong Kong, Greece and Thailand.

A nationwide advertising campaign in support of the Reach Out World plan will begin tomorrow in newspapers.

Reach Out World is part of a continuing effort by AT&T to make international calling more convenient and affordable. On Jan. 1, AT&T reduced international calling prices by $104 million. AT&T Reach Out World calling rates also now reflect that reduction.

AT&T has offered discount calls to Canada through its Reach Out(R) Canada program for three years. For the past two years, AT&T has offered Reach Out(R) United Kingdom and Reach Out(R) Philippines.

The Jan. 1 rate decrease and Reach Out World plan continues a decades-long trend toward lower AT&T international rates. The average price of an AT&T international call today is less than half the average price of 15 years ago.

At the same time, AT&T has expanded its Worldwide Intelligent Network. In the next few weeks, AT&T will add the Philippines and Taiwan links to a fiber-optic network that now stretches from Europe to Asia. And later this year, AT&T plans to expand the fiber-optic network to include Hong Kong and Korea in the Pacific, and Colombia, Puerto Rico, Jamaica and the Dominican Republic in the Caribbean.

AMARILLO, TX (JAN. 10) PR NEWSWIRE - The shareholders of Southwestern Public Service Company (SPS) (NYSE: SPS) today elected President and Chief Operating Officer Bill D. Helton as a director and reelected all incumbent directors at the company's annual meeting.

Shareholders approved five of six proposals amending the company's articles of incorporation.

The company received proxies to vote 66.12 percent of the outstanding

common stock in favor of a proposal to increase the affirmative vote necessary to amend certain provisions of the articles of incorporation or to remove any director without cause. Because of the closeness of this vote to the 66-2/3 percent required to adopt the proposal, shareholders approved adjournment of the meeting to Feb. 9 for further consideration of the proposal.

Also today, the SPS board of directors declared a regular quarterly dividend of 55 cents per share on common stock and regular quarterly dividends on all series of preferred stock.

The dividend on common stock is payable March 1, 1990, to holders of record at the close of business Feb. 15, 1990. Dividends on preferred stocks are payable May 1, 1990, to holders of record at the close of business April 20, 1990.

SPS is a regional electric utility that primarily provides electric service to about 1 million people in a 52,000-square-mile area comprising the South Plains and Panhandle of Texas, eastern and southeastern New Mexico, the Oklahoma Panhandle and southwestern Kansas. Corporate headquarters is in Amarillo.

#90010p0254 01/10/1990 ~PR Newswire

PHILADELPHIA, (JAN. 10) PR NEWSWIRE - ExecuFirst Bancorp Inc. (NASDAQ: FXBC), parent company of First Executive Bank, today reported that strong growth in both loans and deposits ednabled it to show a lower than expected operating loss for 1989, the bank's first full year of operations.

The company's preliminary unaudited year-end and fourth quarter results show an operating loss for 1989 of $372,651, or $.30 per share, and a fourth quarter operating loss of $42,319, or $.03 per share.

Zvi H. Muscal, ExecuFirst chairman and First Executive Bank president and chief executive officer, said, "Loan growth during our first year of 606 percent and a 336 percent increase in deposits helped to offset our bank's substantial start-up expenses and have positioned our company for profitability in 1990.

"The trend is clear," Muscal noted. "About 85 percent of the operating deficit was incurred in the first half of the year and the most recent six-month period saw our company come much closer to achieving profitability. We are well ahead of our internal operating goals," he said.

The company's preliminary unaudited results also indicate that on Dec. 31, 1989, net loans totaled $37.1 million and deposits $42.2 million. The loan to deposit ratio was 88.1 percent, strong for banks of First Executive's size.

The preliminary unaudited results indicate that ExecuFirst's assets totaled $53.4 million at year-end 1989, up 162.2 percent from the end of 1988.

Loan and deposit growth during the fourth quarter were 23.7 percent and 15.6 percent, respectively.

The company said that its unaudited net loss for the year was $514,875, or $.42 per share and that its unaudited net loss for the fourth quarter was $113,431, or $.09 per share.

The net loss for the year included an extraordinary charge to earnings of $142,224 for a special, non-recurring additional Pennsylvania Shares and Loan Tax. One half of this amount, $71,112, was included in the fourth quarter results.

Fourth quarter net loss and operating results included a provision of $72,130 to the company's reserve for possible loan losses. At Dec. 31, 1989, the reserve totaled $375,330, or 1 percent of total loans.

The company noted that the $322,330 it provided during 1989 to its reserve for possible loan losses represented 86.5 percent of its operating loss for the year.

Muscal said he was pleased both with First Executive Bank's own growth and with its growing involvement in Philadelphia business, professional and civic affairs.

"We have played an active part in the community and will continue to strengthen our business and civic relationships," he said. As an example, Muscal cited First Executive Bank's midyear forum on real estate opportunities in Greater Philadelphia in the 1990s. "More than 200 executives attended the meeting at which six of the best informed, most visible industry leaders of the region shared their insights into the profound changes taking place in the Delaware Valley," he said.

Also indicative of the company's involvement in business and civic affairs were the additions made to the company's board of directors during 1989, Muscal said.

"While Nicholas DeBenedictis, former president of the Greater Philadelphia Chamber of Commerce and now senior vice president for Corporate and

Community Affairs of Philadelphia Electric Company, is probably the best known of our five new directors, each is a noted leader in his own industry and community," Muscal said. "James P. MacLean, III, Esq., is of counsel and former president of Archer & Greiner, one of New Jersey's largest law firms and former chairman of Penjerdel. He also is a general partner in Brunswick Comfort Hotels Ltd., MacLean Properties, Medford Associates, Newcomb Brothers and on many boards of civic and community organizations.

"Steven J. Batzer is chairman and chief executive officer of the Atlantic City and Philadelphia offices of Rollins Hunter Burdick, international insurance brokers and has chaired the Southern New Jersey Development Council, the Governor's Advisory Commission on gambling, the Greater Atlantic City Chamber of Commerce and the Atlantic County Economic Development Committee. Sheldon Goldberg is general partner in Cumberland Advisors, PTY, an international investment firm in Vineland, N.J., and is a recognized leader in New Jersey educational causes on local, regional and state levels and a leader of Jewish causes. And Gerald Levinson is a financial consultant and principal in a number of real estate, pharmaceutical and video retailing enterprises in Pennsylvania," Muscal said.

"The board will benefit from their experience and their demonstrated commitment to this community," Muscal concluded.

First Executive Bank opened for business in November of 1988. Located at 1513 Walnut St. in Center City Philadelphia, it is a state- chartered bank and a member of the Federal Reserve System. Its deposits are insured by the Federal Deposit Insurance Corp. (FDIC).

MILPITAS, CA (JAN. 10) PR NEWSWIRE - Octel Communications (NASDAQ: OCTL) today announced Sierra, a multiple-applications voice processing platform specifically designed for Voice Information Service (VIS) providers, expandable to 2,304 ports and supporting up to a half- million subscribers in the emerging VIS marketplace. A Sierra is in beta test with U S WEST Advanced Technologies, the research and development arm of U S WEST.

Large Capacity to Handle Expanding Subscriber Populations Expandable from a 48- to 2,304-port multiple-applications platform with a maximum of 10,752 hours of message storage, Sierra gives VIS providers the flexibility of cost-effectively meeting the needs of a variety of different markets (residential, large business, small business and cellular) as they evolve.

Sierra Meets Rigorous Central Office Equipment Standards Sierra is the first platform designed from the ground up to satisfy NEBS requirements. In addition to withstanding environmental stresses and simplifying equipment interfaces, it provides easy access for maintenance and simplifies the planning and engineering of this equipment into the telephone company's Central Office.

Sierra is designed to meet NEBS standards for easy and quick serviceability through design elements that range from front access to all important components to a communications link, which allows service personnel to monitor multiple systems from a centralized location, that is a Switching Control Center (SCC). The overall result is a highly reliable, easily serviceable system with low service costs. Additionally, Sierra's small footprint, 6.5 square feet per 144-port platform, requires

very little floor space, which is at a premium in certain Central Office locations.

Octel Communications Corp., based in Milpitas, designs, manufactures and markets voice processing systems, including the four-product Aspen(R) family and the VPC 100(TM). The company sells its products to VIS providers through a dedicated direct sales force located throughout the United States. Other customers are served by major U.S. and international distributors and direct sales offices in San Francisco, Los Angeles, Sacramento, Calif., Milpitas and Orange, Calif.; New York; Chicago; St. Louis; Kansas City, Kan.; Milwaukee; Dallas; Houston; San Antonio; Detroit; and Grand Rapids, Mich. The company has an OEM agreement with Hewlett-Packard Co. which distributes Octel's full product line in Europe.

NEW YORK (JAN. 10) PR NEWSWIRE - LCP/Brandy Marinas, Inc. has been awarded the management contract for the 350-slip Bahia Mar Resort and Yachting Center in Fort Lauderdale, Fla., according to Chuck Roarty, spokesman for the resort.

"We are pleased to announce that LCP/Brandy Marinas has been awarded the contract to manage Florida's largest and most prestigious marina," Roarty said. "Brandy's extensive experience promises a continuation of the world-class service for which Bahia Mar is renowned."

The Bahia Mar Management contract is the first awarded to LCP/Brandy Marinas, a newly formed joint venture of New York City-based The LCP Group a privately owned real estate investment banking firm which has participated in the acquisition of over 400 properties in the U.S. and Canada, and the Boca Raton, Fla.-based Brandy Group, the country's oldest full service marina management company. The new entity was formed to acquire and manage marinas throughout the U.S.

President of LCP/Brandy, Bruce H. Blomgren, 43, is recognized as one of the nation's foremost experts on marina management. Prior to establishing his own company, he was marketing director of Arvida Corporation, one of Florida's largest land developers.

Bahia Mar Yachting Center offers a full range of amenities and services including room service, uniformed dock attendants, 24-hour security, tennis, swimming, a gallery of restaurants and shops, shower and dressing room facilities, and more.

CLEVELAND (JAN. 10) PR NEWSWIRE - Mor-Flo Industries, Inc. (MORF-NASDAQ National Market System) today reported that on January 8, 1990, the Supreme Court refused to hear its petition to review the previously reported 1988 patent infringement judgment against Mor-Flo and its wholly-owned subsidiary, American Appliance Mfg. Corp. (together the "Company"), in the amount of $8,884,671 which with additional postjudgment interest now totals approximately $9,900,000. This decision will require payment of the judgment for which the Company had previously posted a letter of credit for $9,785,513. As of September 30, 1989, the Company had provided an aggregate of $9,697,000 for these damages.

The case has been remanded to the trial court to reconsider the issue of willful infringement and possible increased damages. The trial court previously found that the Company had relied on advice of patent counsel and did not willfully infringe. The Company is presently considering the matter of remand and intends to vigorously assert its position of no willful infringement.

The judgment arises out of a patent infringement action relating to a method of insulating gas water heaters with polyurethane foam brought by State Industries, Inc., a competitor of the Company. In June 1986 the Company changed its method of manufacturing its foam insulated gas water heaters to avoid any further potential infringement of the patent at issue.

CHICAGO (JAN. 10) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and its wholly owned subsidiary, Sears Receivables Financing Group, Inc. (SRFG), announced that the subsidiary offered for sale $500 million of Sears Credit Account Trust 1990 A 8.75 percent Credit Account Pass- Through Certificates through an underwriting syndicate managed by Dean Witter Reynolds Inc., Goldman, Sachs & Co. and Salomon Brothers Inc. The securities have an expected final payment date of Jan. 15, 1995. The securities were priced at 99.459 percent of par plus accrued interest from Jan. 1, resulting in a yield of 8.80 percent.

Sears, through SRFG, has sold a portion of its credit card accounts receivable portfolio to a trust which issued the certificates. The certificates represent undivided ownership interests in the receivables owned by the trust. The certificates will be rated Aaa by Moody's, AAA by

Standard & Poor's and AAA by Duff & Phelps.

Net proceeds from the trust's sale of certificates will be paid to Sears by SRFG and will be added to Sears general funds and be used initially to effect a reduction of Sears short-term borrowings.

A copy of the prospectus may be obtained from Dean Witter Reynolds Inc., Two World Trade Center, New York, NY 10048; Goldman, Sachs & Co., Prospectus Department, 85 Broad Street, New York, NY 10004 and Salomon Brothers Inc, Prospectus Department, Two New York Plaza, New York, N.Y. 10004.

ST. LOUIS, (JAN. 10) PR NEWSWIRE - Senetek PLC (NASDAQ: SNTKY) announced today that after having carried out over 300 diagnostic tests on cerebrospinal fluid of patients, the primary results of further clinical studies using Senetek's proprietary Alzheimer's test reveal that the diagnosis of this disease is possible for commercialization in 1990.

Senetek further reported it is currently negotiating with companies in Europe and Japan for the commercialization of its Alzheimer's assay procedure in these areas and the United States.

According to Dr. Gerlof Homan, president and chairman of the board of Senetek PLC, the company's antibody based test has undergone trials to evaluate its ability to distinguish Alzheimer's disease from other neurological and dementing illnesses. The results of a blind study indicate that the test produces accurate diagnosis in autopsy confirmed patients.

WILMINGTON, DE (JAN. 10) PR NEWSWIRE - ICI Advanced Materials and Electronics announced today that agreement to sell ICI Array Technology Inc. has been reached.

Buyers Weiss, Peck and Greer Venture Associates and the proposed management of the company have signed a letter of intent and expect to complete the transaction by Jan. 15, 1990. The purchase price was not

disclosed.

According to Charles S. Lemak, ICI Electronics' vice president and general manager, the sale is part of ICI Advanced Materials and Electronics' exit from business operations in downstream component activities. In addition to selling Array Technology Inc., ICI announced on Dec. 8, 1989, that agreement on the sale of Arbco Electronics had been reached. ICI is also negotiating for the sale of the Vanguard(TM) range of high-density interconnects and 3-D molded circuit boards and ICI Wafer Technology Ltd., producer of high-purity gallium arsenide, indium phosphide and indium arsenide wafers. Formal announcements are expected shortly for the two remaining business units.

Lemak stated, "ICI Electronics is exiting its business operations for several reasons which include a shift in ICI's Advanced Materials business strategy. ICI will increase its resources committed to supply the raw materials, processing technology and design services required by OEMs in the electronics industry. The Applications Laboratory recently opened at Exton, Pa., together with the Wilton Materials Research Centre and Japanese Technical Center near Tokyo, Japan, will play a central role in achieving our objectives and have facilities devoted specifically to the electronics industry." Added Lemak, "We are pleased to see operations continue under the direction of a quality management team and wish all of the employees at the former ICI Electronics' business unit well."

The sale of ICI Array Technology Inc. includes the production plant in San Jose, Calif. Array Technology Inc. markets printed circuit board layouts and integrated circuit designs, and performs contract surface- mount manufacturing. Manufacturing operations and customer shipments are expected to continue uninterrupted.

ICI Electronics, an operating unit of ICI Americas Inc., markets printed circuit boards, contract surface mount technology and related design services, advanced electronics interconnect technologies and wafer manufacturing. ICI Americas Inc. has annual sales of $4 billion and is the U.S. operating subsidiary of Imperial Chemical Industries PLC (NYSE: ICI), London. ICI PLC is a $20 billion company with a diverse range of products including engineering thermoplastics, specialty chemicals, pharmaceuticals, fibers, agrichemicals and paints.

ST. PAUL, MN (JAN. 10) PR NEWSWIRE - Northwest Airlines announced today that passengers flying roundtrip to Asia will earn a free roundtrip ticket for anywhere the airline flies in the United States or Canada.

Northwest will award at least 10,000 bonus miles in its WorldPerks free travel program to passengers flying across the Pacific between Jan. 15 and April 15. The 10,000 mile bonus, combined with the actual mileage flown on the Asian trip, guarantees enough mileage for a free roundtrip ticket.

Executive Class and First Class travelers will be well on their way to a second free roundtrip ticket with just one roundtrip to Asia. They'll earn 12,500 and 15,000 bonus miles, respectively, on all flights.

To qualify, passengers must be enrolled in WorldPerks. Membership in the program is free. WorldPerks members receive two free one-way tickets after compiling 20,000 travel miles.

After Asian travel is completed, Northwest will send travelers the complimentary tickets -- no forms need be filled out.

The offer does not apply on travel to Honolulu, Guam and Saipan. Northwest has flown to Asia for 43 years and is the largest U.S. airline across the Pacific, serving 12 Asian destinations from eight U.S. gateway cities.

#90010p0286 01/10/1990 ~PR Newswire

SAN JUAN (JAN. 10) PR NEWSWIRE - BanPonce Corporation (NASDAQ: BDEP) today announced that net earnings for the year 1989 amounted to $20,531,000, or $3.56 per share, compared with $20,913,000, or $3.63 per share, for 1988. Core earnings for the year, or net income excluding securities transactions after taxes, rose $1.3 million, or 7.1 percent, over last year.

Net interest income for the year 1989 totaled $114,791,000, a 10.2 percent increase over the 1988 figure. Likewise other operating income, excluding securities transactions, rose to $32,851,000, or 11.3 percent over 1988.

Fourth-quarter 1989 net earnings were $4,642,000, or 81 cents per share vs. $5,824,000, or $1.01 per share, for the comparable quarter in 1988. While net interest income rose 7.4 percent to $28.8 million, an increase in the provision for loan losses of $5 million offset this gain to some extent.

"After closer review of our LDC loan portfolio, the bank has elected to charge-off $3.6 million of Latin American debt in the fourth quarter. At the same time, we felt it prudent to replenish the allowance for loan losses and provide additional reserves of about $1.4 million against our consumer loan portfolio," said Alberto M. Paracchini, chairman of the board and chief executive officer.

"The ratio of loan loss reserves to total loans now stands at 1.47 percent " he added, "and while consumer loan delinquencies rose slightly during 1989, this trend was reversing for the positive by year end.

"We are particularly pleased with the success of our cost containment program in 1989. Total operating expenses were virtually even with the prior year and everyone should be congratulated," he said.

For the year, BanPonce experienced continued growth in all significant balance sheet categories. At Dec. 31, 1989, total assets reached $3.06 billion, an increase of $224 million, or 7.9 percent, over year-ago levels. Total deposits grew 4.6 percent to $2.6 billion, while total

loans, net of unearned income, showed an increase of $83.6 million to $1.8 billion.

Stockholders' equity was up 7.2 percent to $173.7 million vs. $162 million a year ago.

Primary and total capital ratios at year end increased to 6.99 percent and 8.97 percent, respectively, well in excess of regulatory requirements.

On Oct. 19, 1989, BanPonce Corporation agreed to a merger proposal by Banco Popular de Puerto Rico (NASDAQ: BPOP). The merger, which is currently under regulatory review, will be voted upon by shareholders in early 1990.

TAMPA, FL (JAN. 10) PR NEWSWIRE - GTE Florida, Inc. today asked the Florida Public Service Commission (FPSC) to reconsider terms of a $21.4 million 1990 rate reduction order.

"We agree with the commission that a permanent rate reduction will resolve federal tax savings but we disagree on the amount," said Bruce Holmberg, vice president-regulatory and government affairs. "In addition, if we follow the document as written, the impact would be far greater than the ordered reduction of $21.4 million."

Holmberg said GTE Florida will accept the order if the commission will limit any other reductions in 1990. If the limitation is not approved, the company filing asks for a complete review of the reduction.

"We are anxious to move ahead with the appropriate reductions," said Holmber, "and we are asking for expedited commission review."

#90010p0291 01/10/1990 ~PR Newswire

LEXINGTON, KY (JAN. 10) PR NEWSWIRE - Kentucky Utilities Company (NYSE: KU) reported earnings per average share of common stock for the three and twelve months ended December 31, 1989, of $.57 and $2.32, respectively, as compared to $.30 and $1.94 for the corresponding periods of 1988.

Results for both periods of 1989 reflect a change in accounting to recognize unbilled revenues, which became effective January 1, 1989. The effect of the accounting change on the current three and twelve-month periods was an increase to earnings of $.16 and $.40 per share, respectively. Thirty cents per share of the $.40 increase for the twelve-month period was attributed to a one-time addition for the cumulative effect of the accounting change for years prior to 1989.

Operating revenues for the fourth quarter of 1989 were $138.5 million, up 8 percent from the same quarter of 1988. The increase was primarily due to greater sales which resulted from a period of record-breaking cold weather in December 1989. Operating expenses and taxes of $109.7 million for the current quarter declined from $110.4 million in the comparable period of 1988. A $7.9 million decrease in maintenance expense reflects additional maintenance expense at the Company's generating stations in the fourth quarter of 1988. A $6.0 million increase in federal and state income taxes for the current quarter was attributed to greater pre-tax operating income.

For the twelve months ended December 31, 1989, operating revenues of $531.9 million declined 5 percent from 1988 primarily due to lower sales and reduced average fuel costs passed to customers. Operating expenses and taxes of $424.8 million for the year 1989 were down 6 percent from 1988 largely due to lower fuel expense attributed to a reduction in coal consumption and a decrease in the average cost of coal burned by the Company.

NORWALK, CT (JAN. 10) PR NEWSWIRE - Great Northern Nekoosa Corporation (NYSE: GNN) said today that it has filed a supplemental memorandum of law

in Maine Federal Court in support of its motion for a preliminary injunction against Georgia-Pacific Corporation's (NYSE: GP) tender offer and proxy solicitation. The memorandum was filed to bring to the court's attention newly discovered documents that Great Northern Nekoosa described as the most powerful evidence produced to date showing Georgia-Pacific's intentions with respect to asset divestitures should its takeover effort succeed.

The new documents, consisting of memoranda and notes of conversations between Georgia-Pacific officers and one of Georgia- Pacific's financing banks, show that Georgia-Pacific officers assured the bank that they intended to divest assets if they succeeded in taking over Great Northern Nekoosa, but that "they did not want to commit to any (asset sales) as part of their tender strategy." Notes of a conversation between the bank and James Van Meter, chief financial officer of Georgia-Pacific, read:

-- Don't want to commit to divest, but they do plan to sell:
-- Paper Distribution
-- GP Western operations
(illegible), Belingham, timber, Toledo box
-- Maine (Millinocket, E. Mil.)
$1B-1.5B"

Great Northern Nekoosa's court filing asserts that these documents demonstrate that there continues to be a material disparity between the recent public statements of Georgia-Pacific officials and the evidentiary record.

ATLANTA (JAN. 10) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today said that the personal attack on Marshall Hahn launched by Great Northern Nekoosa Corp. (NYSE: GNN) as part of its campaign of false allegations about purported divestiture plans is unconscionable and intolerable.

The company's answer to Great Northern's scurrilous and false charges will be filed in a formal response in accordance with the court's required time schedule.

Georgia-Pacific's comment was made in response to a supplemental memorandum filed in Federal District Court in Maine by Great Northern Nekoosa. The filing attempts to use documents provided by Citibank to impugn the integrity of Georgia-Pacific's chairman and chief executive officer, T. Marshall Hahn Jr.

"While I cannot control what interpretations others may make of our discussions, I can and do control what is finally decided. Our decision, as evidenced by the proposal made to and approved by our Board, was that asset sales are neither necessary nor desirable.

"And so, for the umpteenth time, we have no asset sale plans and no undisclosed intentions relating to the acquisition of Great Northern Nekoosa," said Hahn.

CINCINNATI (JAN. 10) PR NEWSWIRE - The Knoxville (TN) News- Sentinel Company, owned by The E.W. Scripps Company, today filed a lawsuit in Knoxville, Tennessee, against The Knoxville Journal Corporation, its president, Gerald Garcia, and its parent, Persis Corporation, in response to Persis' recent purchase of another Knoxville-area newspaper, the Maryville-Alcoa Daily Times.

In the suit, the News-Sentinel contends Persis' ownership and operation of The Daily Times breaches a joint operating agreement between The Knoxville News-Sentinel and the Knoxville Journal.

The News-Sentinel, published in the morning, handles advertising, production and distribution for the Journal, published in the afternoon. Profits from the joint business operation are shared by the companies according to a formula set by the operating agreement.

The Maryville-Alcoa Daily Times competes in Blount County, TN, with the jointly operated News-Sentinel and Journal for advertising and circulation revenues. Through the joint operating agreement, Persis has access to the News-Sentinel Company's confidential business information and trade secrets.

Since the News-Sentinel and Journal compete with the Daily Times, ownership of the Daily Times by Persis violates Persis' contractual obligation to "cooperate with each other in every proper way that will promote the successful operation" of the joint operating agreement, the suit contends.

The complaint was filed in the Chancery Court for Knox County, Tennessee. In summary, it asks the court to:

- Declare that the joint operating agreement has been breached by the defendants and order that it be dissolved.

- As an alternative to dissolving the joint operating agreement, order Persis to relinquish control of the Journal or sell the Daily Times, and, if Persis retains control of the Journal, amend the joint operating agreement to eliminate the defendants' right to set the Journal's advertising and circulation rates.

- Award yet undetermined damages.

The complaint also asks the court to immediately:

- Enjoin the management of the Journal and Persis from active management and operation of the Daily Times.

- Halt the defendants' access to the joint operating agreement's business records and order them not to use the News-Sentinel Company's confidential business information already in their possession.

- Prevent the defendants, for the remainder of the joint operating agreement, from acquiring additional newspapers which compete with the News-Sentinel and Journal.

The E.W. Scripps Company, headquartered in Cincinnati, publishes 19 daily newspapers.

CHICAGO (JAN. 10) PR NEWSWIRE - The board of directors of the Chicago Board Options Exchange (CBOE) Wednesday unanimously elected Thomas A. Bond an independent market maker, to a third consecutive one- year term as vice chairman of the exchange and chairman of the executive committee for 1990. Bond, a CBOE member since 1975, ran unopposed.

"This past year was a turning point for CBOE," Bond said. "CBOE volume rose 13 percent in 1989, as retail investors continued to return to the listed options market and institutional activity increased. CBOE's commitment to high standards of market quality and an expanded educational and marketing program have played key roles in bolstering investor confidence in our marketplace."

Bond said prospects for an increasingly competitive environment in 1990 underscore CBOE's efforts to enhance market quality. "Quality markets and customer service will be our primary marketing tools of the future," he said. "CBOE, as the leader in the options industry, will remain dedicated to ongoing technological advancements, new product development and the

globalization of options trading in the 1990s."

Long active in exchange business, Bond, 47, has been a member of the board of directors and executive committee for 12 years. He currently is chairman of the executive, compensation and floor directors committees. He also serves on the Modified Trading Systems Appointment Committee.

Before becoming a CBOE member, Bond was a management consultant for Coopers & Lybrand and for A.T. Kearney, both in Chicago, and a systems analyst in the Office of the Secretary of Defense while on active duty in the U.S. Army.

A certified public accountant, Bond holds a master's degree in industrial administration from Purdue University and a bachelor's degree in physics from DePauw University.

CBOE, regulated by the Securities and Exchange Commission, is the pioneer of listed options and the world's largest options marketplace. The exchange lists options on 214 equities, the Standard and Poor's 100 and 500 market indexes, U.S. Treasury notes and bonds, and short-term and long-term interest rates.

ST. PETERSBURG, FLA. (JAN. 10) PR NEWSWIRE - Geonex Corporation (NASDAQ: GEOX) reported today the acquisition of Vernon Graphics, Incorporated from LK Comstock & Company, Inc.

Vernon Graphics is the leading outside plant record conversion company for public utilities (primarily electric and gas) with a client list which includes over 300 of the largest public utility companies in the country. In addition, Vernon Graphics was a pioneer and is one of the major producers of support for the Automated Mapping/Facilities Management (AM/FM) technologies.

Vernon Graphics has operating units in Norristown, Penn.; Tampa, Fla.; Louisville, Ky. and Chatsworth, Calif. which employ approximately 180 people. Revenues for this year are expected in the $7-8,000,000 range.

Founded in 1947, Vernon is the oldest service company devoted exclusively to providing field audit, mapping and record management systems and conversion services to the utility industry. Vernon has been on the leading edge of developing the technology that is used in the mapping conversion industry today.

Geonex Martel, located in St. Petersburg, Fla. and Geonex CAS, located in Des Plaines, Ill. will continue to provide support for the telephone industry while the acquisition of Vernon Graphics will enhance Geonex' market share in the electric utility industry.

Geonex Corporation, based in St. Petersburg, Fla. is the nation's largest geo-information company. Using the most advanced technology, Geonex provides mapping and resource interpretation services to telephone, electric and gas utilities, local, state and federal government agencies and a variety of commercial industries. Geonex has overall competence in mapping for agriculture and forestry as well as oil, gas, and mineral exploration. In the environmental and hazardous waste area, Geonex provides the following services through two units: analysis and testing services; and environmental hazardous waste investigation and data base management services.

#90010p0316 01/10/1990 ~PR Newswire

TALLAHASSEE, FL (JAN. 10) PR NEWSWIRE - Florida's Public Service Commission today set a return on equity of 12.8 percent for Florida Power & Light Company to be used for all regulatory purposes by the PSC in 1990.

"What we've done today is set a new return on equity for FP&L and established a guideline for the company's earnings until we have a chance to further review the company's expenses, investments, and operations," said Michael Wilson, chairman of the PSC.

The actual range for FP&L's return on equity is 12.3 percent to 13.3 percent, with 12.8 percent being the midpoint. Earnings over the 13.3 percent cap may be subject to refund, pending a PSC staff review of FP&L's earnings based on the company's October, 1989 surveillance report and an additional PSC staff recommendation to be presented to the commissioners at the PSC Agenda on Jan. 30.

The PSC has already ordered FP&L to file modified minimum filing requirements no later than March 31, 1990. If the commission orders a full rate case on Jan. 30, then the company's MFR's could be expanded to fulfill this requirement.

The limited proceeding held yesterday and today, which reduced FP&L's authorized return on equity, was ordered by the commission on Dec. 19. FP&L's last authorized return on equity was 15.6 percent, with a range of 14.6 percent to 16.6 percent, set in the company's last rate case in 1984. However, the PSC ordered FP&L to use a return on equity of 13.6 percent for purposes of the 1987 and 1988 tax savings.

Also at its Dec. 19th Agenda meeting, the PSC reduced FP&L's rates by $38.5 million, effective Jan. 1, 1990. This rate reduction for FP&L customers will cut between 60 and 70 cents a month from bills for a typical residential customer using about 1,000 kilowatt hours a month.

In other action related to FP&L, the commission has scheduled a hearing, May 7-10, to decide whether Florida Power & Light should return more money for FP&L's 1988 tax savings. The company has already refunded $38.2 million related to 1988 tax savings as a result of commission action in April, 1989, but further refunds could be ordered.

Florida Power & Light Company, the state's largest utility, serves 3 million customers in Florida, and had revenues of $4 billion last year.

CHICAGO (JAN. 10) PR NEWSWIRE - Telephone and Data Systems Inc. (AMEX: TDS) announced that its total customer base exceeds 469,000 units in service at year end 1989.

TDS' telephone operations currently serve 263,900 access lines in 27 states. In addition, five pending acquisitions representing 13,900 access lines will increase the total access lines served to 277,800.

United States Cellular (AMEX: USM), an 81.6-percent-owned subsidiary of TDS, dramatically increased its customer units in service in markets operated or managed to over 44,000. Cellular customer units in service in consolidated markets increased to 36,000 at year end.

American Paging (API) also grew tremendously during 1989. API added over 33,000 net pagers in service in 1989, bringing the total pagers served to over 161,000. API is the fifth largest non-Bell affiliated paging company in the United States.

TDS is a diversified Chicago-based communications service company with established local telephone operations, rapidly expanding cellular telephone operations, and developing radio paging operations. TDS seeks to build value for its shareholders by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

SOUTH PLAINFIELD, NJ (JAN. 10) PR NEWSWIRE - Amgen Inc. (NASDAQ: AMGN) and Enzon Inc. (NASDAQ: ENZN) today signed a joint product research and development agreement to apply Enzon's proprietary technology to Amgen's granulocyte colony stimulating factor (G-CSF). Additionally, Amgen has an exclusive option to collaborate with Enzon in developing certain other therapeutic PEG-compounds.

"We are pleased to be working with Amgen on G-CSF and hope to enhance its effectiveness with our unique, patented delivery technology," said Abraham Abuchowski, Enzon president and CEO.

Gordon M. Binder, Amgen CEO stated, "By combining Amgen's therapeutic proteins with Enzon's expertise in drug-improvement technologies, we hope to establish a strong proprietary position in enhanced recombinant-DNA products."

Enzon's technology, known as Pegnology(SM), enables therapeutic compounds to remain in the body for longer periods of time.

Under the agreement, Enzon will receive significant milestone payments for the development of long-acting forms of the drug G-CSF. Amgen has the option to enter into a license and a full development program under which Enzon will receive royalties on Amgen's sales of the product.

G-CSF is the hormone which stimulates production of a class of white blood cells known as neutrophils, the body's primary defense mechanism against bacterial infection. On Dec. 28, 1989, Amgen filed a product license application with the U.S. Food and Drug Administration regarding its Neupogen(TM) brand of G-CSF.

Amgen is a multinational biotechnology company developing human healthcare products based on advances in recombinant DNA and molecular biology. The company, headquartered in Thousand Oaks, Calif., with a regional office in Lucerne, Switzerland, was founded in March of 1981.

Enzon is a pharmaceutical company developing improved therapies for life-threatening diseases through the application of its proprietary technology, Pegnology, to enhance the delivery of protein-based drugs.

Four products developed by Enzon are currently undergoing clinical studies including Adagentm (Peg-Ada), which is awaiting approval from the FDA for treating a form of severe combined immunodeficiency disease, also known as "bubble boy" disease.

TUCSON, AZ (JAN. 10) PR NEWSWIRE - Stephen H. Mayer, chairman of the board of MEM Company, a leading toiletries company with headquarters in Northvale, N.J., and founder of English Leather men's fragrances, died today in Tucson, Ariz., following a stroke. He was 75 years old.

Mayer, born in Vienna, Austria, was educated at the Theresanuim School, the University of Vienna, and the Diplomatic Academy of Austria. In 1936, he joined the MEM Company, a perfume and soap manufacturing firm in Austria which had been founded in 1883 by his grandfather Mark Edward Mayer.

From 1943 to 1946, Mayer served as a master sergeant in the United States Air Force and a first sergeant in the United States National Guard. After his military service, Mayer returned to the MEM Company which was then headed by his father, Paul Mayer.

IN 1947, Mayer became president of the MEM Company and in 1973 he was named as chairman of the board. The MEM Company manufactures and markets men's toiletries including English Leather, women's fragrances including Love's Baby Soft and Heaven Sent, and children's toiletries under the brand name Tinkerbell.

Mayer spoke five languages fluently which he found a distinct advantage in the company's worldwide operations. He put his diplomatic training to use as a director of the Cosmetics, Toiletries and Fragrances Association and as a member of the Listed Company Advisory Committee to the American Stock Exchange.

SAN DIEGO (JAN. 10) PR NEWSWIRE - Yuba Natural Resources Inc. (Pacific: YG) ("Yuba") announced today it has entered into a letter of intent with Western Gold Exploration and Mining Co., Limited Partnership ("WestGold"), of Golden, Colo.

WestGold and Yuba are presently joint venture partners in a gold dredging operation near Marysville, Calif. The joint venture produced 25,780 ounces of gold in 1989. WestGold is the managing partner and has a two-thirds interest while Yuba has one-third interest in the joint

venture. WestGold purchased its interest in the gold operation last September from Bond Gold Corp.

The letter of intent provides for WestGold to contribute its two- thirds interest in the joint venture, plus other consideration, to Yuba in exchange for convertible preferred stock (giving WestGold, with its current stockholdings, approximately 55 percent voting interest in Yuba prior to conversion and 68 percent upon conversion). Concurrently with this transaction, Yuba plans to spin-off to the existing shareholders of Yuba, excluding WestGold, the non-gold assets and liabilities. These assets include Yuba's silica reserves, silica processing facility, and various royalty agreements. These business transactions are subject to various conditions, including shareholder approval.

Upon signing of the letter of intent, Yuba Silica Inc., a 100 percent owned subsidiary of Yuba, received a loan of $1.2 million from WestGold which will be used to pay numerous creditors. The loan is secured by Yuba Silica's assets.

If Yuba does not obtain shareholder or other required approvals for this transaction, or if the transaction does not close for any reason prior to Aug. 1, 1990, Yuba has agreed to sell its one-third interest in the joint venture to WestGold for $6 million in cash, less amounts which have been lent to Yuba Silica Inc. by WestGold, and less amounts lent to Yuba by the joint venture.

WestGold is a limited partnership between Inspiration Resources Corp. (NYSE: IRC) and Minorco (NASDAQ: MNRCY) formed to explore for and develop gold properties in North America.

CONTACT: Peter L. Jensen of Yuba Natural Resources Inc., 619-233-4653, or Gary Callahan of Western Gold Exploration and Mining Co., Limited Partnership, 303-232-5100

DALLAS (JAN. 10) PR NEWSWIRE - Amtech Corp. (NASDAQ: AMTC) today announced that the City of Los Angeles Board of Airport Commissioners had approved award of a contract to Amtech for a turnkey automatic vehicle identification (AVI) system for the Los Angeles International Airport. The initial contract value to Amtech is approximately $1.2 million.

The AVI system, based on Amtech's patented radio frequency identification technology and Amtech's proprietary software, will be installed to provide coverage for all 40 lanes of traffic at ten Airport locations to track some 5,000 taxis, hotel and rental car courtesy vans, limousines, and buses in all four major categories of commercial ground transportation

vehicles using the Airport. The system will enable the Airport to accurately record vehicle entry and exit for purposes of user fee collection. In addition, the system will track each vehicle as circuits are made on the Airport's roadways as well as determine the "dwell time" of each of these vehicles to impose fee variations when appropriate to keep traffic moving through the Airport.

Thomas L. McDaniel, vice president of Amtech, said, "LAX is among the first of the major airports to recognize the benefits of using Amtech's leading edge AVI technology for high-traffic volume revenue collection systems in the airport environment. Also, by focusing on "dwell time," the Airport is able to use the system to encourage rapid transit time of these commercial vehicles through the Airport to help maximize the Airport's passenger handling capabilities without major roadway expansion."

Los Angeles International Airport, otherwise known as LAX to millions of travelers, handles approximately 620,000 aircraft operations each year involving nearly 45 million passengers. LAX is the busiest airport on the West Coast and ranks third in the nation in passenger volume.

Dallas-based Amtech has operating electronic revenue collection systems for non-stop electronic toll collection on several major toll facilities, including the Greater New Orleans Bridge, the Lincoln Tunnel, and the Dallas North Tollway, and a system for commercial vehicle airport access control similar inscope to the LAX system is presently in installation at Dallas/Fort Worth International Airport.

The company also offers systems for electronic identification of other transportation equipment, and the company's AVI technology was the basis for the mid-1989 approval by both the International Standards Organization and the American Association of Railroads of proposed standards for electronic identification of intermodal freight containers worldwide and railcars in the United States and Canada.

The Amtech radio frequency AVI system is the only electronic identification system which is freqency agile, operating in all major RF bands approved for AVI use internationally (850-950 MHz and 2400-2500 MHz). With high speed and extreme range capabilities, the Amtech system has proven to be highly accurate, providing superior overall system reliability. Amtech products are available through a worldwide distribution network.

NEW YORK (JAN. 10) PR NEWSWIRE - Vernitron Corporation announced today

that Judge Nicholas A. Cioffi of the Superior Court of the State of Connecticut has imposed conditions prohibiting Kollmorgen Corporation (NYSE: KOL) from restructuring or taking any action to entrench its management as a prerequisite to the continuance of the court's order enjoining Vernitron from making any proposal to acquire Kollmorgen prior to April 30, 1990.

Stephen A. Bershad, chairman of Vernitron stated, "While we are disappointed that the court did not lift the injunction, Vernitron considers the creation of the special masters' committee of three experts to review Kollmorgen's restructuring as well as acts of entrenchment by its management or any other action which puts Kollmorgen 'in play' to be a significant victory. Unfortunately the judge's decision may prevent shareholders from having the opportunity to receive immediate value for their investment. We continue to be seriously concerned about the steady erosion of Kollmorgen's financial condition since the beginning of 1989 and about the current environment for the company's military businesses."

Bershad added, "Confronted with these mounting losses, we must carefully weigh all our options in light of Kollmorgen's cloudy prospects for the future."

Bershad concluded, "We will also vigorously pursue our suit against Kollmorgen in the Federal Court in Hartford, Conn., which was filed in October. That complaint seeks $58.1 million in actual and punitive damages. Today's ruling by Judge Cioffi does not affect our view that our case against Kollmorgen is meritorious."

As previously announced, Vernitron determined not to proceed with its $25 per share merger with Kollmorgen on Sept. 21, 1989.

BEAVERTON, OR (JAN. 10) PR NEWSWIRE - FPS Computing (NYSE: FLP) and Ingres Corp. (NASDAQ-NMS: RELY) today announced the availability of INGRES Release 6.2 on the Model 500EA supercomputer.

INGRES, a leading relational database management system (RDBMS) from Ingres Corp., includes tools for database query, Fourth Generation Language (4GL), computer-aided software engineering (CASE), SQL transaction processing, and distributed data management. The INGRES tool set enables users of FPS Computing's Model 500EA to transparently share data and create applications programs quickly and efficiently.

INGRES accommodates many needs for scientific and technical users of the Model 500EA. Through its integrated application development environment, INGRES simplifies the creation of programs on the Model 500EA. With INGRES' consistent, user-friendly interface, users can develop programs to model new designs or to test scientific theories. As a database manager, INGRES facilitates the use of data stored in a central location or shared among users on various computers in a network. In this way, INGRES acts as a communication vehicle among users working on a common project.

''Our relationship with Ingres Corp. is bolstered by our complementary strategies,'' said Carolyn McClain, senior product manager at FPS Computing. ''Both FPS Computing and Ingres recognize the importance of products that support open, networked environments. INGRES is part of our solution to our users' needs for convenient development and data sharing in heterogeneous environments.''

Complementing FPS Computing's Integration Strategy, announced last summer, is Ingres Corp.'s commitment to distributed computing. INGRES RDBMS incorporates network communications standards, such as TCP/IP, DECnet, and XWindows, to ensure interoperability between unlike computers. Its tools for distributed data management allow completely transparent access among networked computers. Model 500EA users can conveniently share data with users on a variety of other platforms, particularly DEC and UNIX systems where INGRES is widely used.

The modular architecture of the Model 500EA gives users an excellent upgrade path with INGRES. From a single processor starter system, users can expand from a base configuration to as many as four CPUs -- all supporting INGRES -- as their throughput requirements grow and budgets permit.

FPS Computing will offer upgrades to its customers using earlier INGRES releases. Prices for INGRES on the Model 500EA start at $86,000. INGRES will be available from FPS Computing in the second quarter of 1990.

Ingres Corp. is a worldwide leader in information integration products and solutions for mission-critical applications.

CHICAGO (JAN. 10) PR NEWSWIRE - The Chicago Tribune today opened a news bureau in Berlin and named Ray Moseley its bureau chief.

Moseley joined the Chicago Tribune in 1977. Most recently, he was based

in Washington as the newspaper's senior diplomatic correspondent at the State Department. Before that, he served as the Tribune's London bureau chief for seven years.

The Berlin bureau will cover news throughout Germany and Europe. It is the Chicago Tribune's 24th news bureau.

NEW YORK (JAN. 10) PR NEWSWIRE - The documentation for Mexico's 1989-92 financing package with commercial banks has been agreed upon with the Bank Advisory Committee and will be sent via courier to creditor banks by the end of next week, with signing of agreements expected in early February, Angel Gurria, under-secretary of the Ministry of Finance of Mexico, and William B. Rhodes, co-chairman of the 15-member bank committee for Mexico, announced today.

Gurria and Rhodes said that virtually all of Mexico's approximately 450 current bank creditors worldwide have committed to the package, which covers basically all of the country's approximately $48 billion in medium- and long-term commercial bank debt.

Rhodes said, "The positive response is unprecedented in any package of this magnitude since the debt crisis broke out in August 1982."

Of the three basic options offered banks in the package, approximately 41 percent of the total exposure has committed to principal-reduction bonds, approximately 49 percent to debt-service- reduction bonds and approximately 10 percent to new money.

Gurria said, "The package offer Mexico the support it needs from the commercial banks to carry out its program of economic reform and growth, to leave the debt crisis behind it and to look with confidence to the future."

DENVER (JAN. 10) PR NEWSWIRE - According to John G. Freeman of the U.S. Postal Inspection Service, Capitol Hill Letter Carrier David A. Sutherland was arrested Jan. 9 for theft of mail.

He was arrested for taking several checks totalling $863.84, which had

been entrusted to him for delivery, and depositing them into his own account.

"The public is urged to report any missing mail, especially checks, to the Postal Inspection Service at 297-6220," said Freeman.

MIAMI (JAN. 10) PR NEWSWIRE - CenTrust Bank (AMEX: DLP), a state savings bank (Miami), today vigorously disputed the allegations made by the Office of the Florida State Comptroller in its attempt to remove David L. Paul as an officer and director of CenTrust.

In its formal response to the previously announced administrative action by the Florida Department of Banking and Finance, CenTrust said that the truth with regard to CenTrust and Paul is very different from the allegations contained in the department's administrative complaint.

In its filing, CenTrust: -- disputes each and every one of the allegations of wrongdoing
on the part of Paul and points up department wrongdoing
of an equally serious nature. -- notes inconsistencies between positions the department now

takes and positions it has taken previously. -- complains of the department's apparent policy of attempting to try Paul in the press. -- accuses the department of prejudging Paul then conducting an examination to justify that prejudgment. -- complains of the department's hiring as special counsel against CenTrust and Paul a law firm one of whose parters is CenTrust's former general counsel. That law firm also employs a former CenTrust audit vice president who when employed by CenTrust worked on Centrust's responses to questions, comments and criticisms by the department. A specific example of what CenTrust complains of is the department's allegations regarding oriental rugs purchased and used by CenTrust. The department has gone so far as to assert that Paul has used the rugs in his home. In fact, the department reviewed this matter in its entirety years ago, and determined the facts at that time, which showed there was never any personal use of the rugs. CenTrust's general counsel at the time was Thomas O'Brien, now a partner at Steel Hector & Davis, the department's new special counsel against CenTrust and Paul.

The department has also made much of CenTrust's lease of a jet aircraft on occasion, instead of using commercial aircraft, yet this too was reviewed by the department in a prior examination of CenTrust, with no question or criticism posed by the department regarding the lease of a jet aircraft. Centrust's general counsel at the time was, again Thomas O'Brien.

GOLDEN, COL (JAN. 10) PR NEWSWIRE - Coors Light surpasses the 10 million barrel mark for annual sales in 1989, making it America's fastest growing premium light beer and one of only four beers in the nation to reach this milestone last year, company officials announced today.

With a current annual growth rate of more than 15 percent, Coors Light is now the third best-selling brand in America exceeded only by Budweiser and Miller Lite.

"We attribute Coors Light's success to providing alcohol beverage consumers with a refreshing product that meets their expanding needs for fitness and moderation," said Bob McBride, Coors Light brand director. "The company's goal is to make Coors Light the alcohol beverage of the 1990s."

Company officials noted that Coors Brewing Co. has not yet released its

total barrel shipments, and Adolph Coors Co. has not released results of operations for the fourth quarter and fiscal year 1989.

"Although it's still too early to determine the impact of this sales success as it relates to our earnings, we're confident that this success is a positive indication of the consumers' preference for Coors Light in the '90s," McBride added.

Coors Light, introduced in 1978, is distributed in 49 states, the District of Columbia, Canada, Japan, the Virgin Islands and Bermuda.

#90010u0206 01/10/1990 ~United Press International

GOLDSBORO, N.C. (JAN. 10) UPI - Henry Stenhouse, who was born in the 1890s, wants to be a leader of the 1990s for North Carolina's 3rd Congressional District.

Stenhouse, 100, of Goldsboro, filed Tuesday as the first Republican challenger to 3rd District Congressman H. Martin Lancaster, a Democrat.

''I'm not in this thing just to play,'' he said. ''I want to be of some use.''

The retired opthamologist, known as Doctor Sten to his patients, has lived through 18 presidents, served in two world wars and fathered five children. He also has 16 grandchildren and 18 great-grandchildren.

Stenhouse said his first vote in a presidential election was for William Howard Taft against Theodore Roosevelt and Woodrow Wilson in the 1912 presidential election.

Although he would be 101 before he took office, Stenhouse said he did not believe his age should be a factor. And he is not worried about the difficulty of accumulating congressional seniority.

''I will not serve over two terms, I will promise you that,'' Stenhouse said. ''I think that is long enough to serve up there.''

He is likely to face opposition from Don Davis, 60, of Erwin, N.C., a retired Army major. Stenhouse said a group of local Republican leaders tried to convince him not to run.

''They are trying to get me to withdraw,'' he said. ''I'm not going to do it.''

Lancaster, meanwhile, treated his GOP challenger with kid gloves.

''He's an amazing gentleman,'' Lancaster said. ''He is much loved by his former patients and many friends, and I am certain he will very vigorously pursue the nomination and, if he wins, pursue the general election.''

Stenhouse is running on a platform of requiring mothers to stay home with their young children, repealing the mandatory seat belt law and reducing the national debt.

''This country needs a little shake-up,'' Stenhouse said. ''We have too much big government.''

#90010u0222 01/10/1990 ~United Press International

(JAN. 10) UPI - Deposed Panamanian dictator Manuel Noriega traded in his military fatigues for a blue oxford shirt and brown trousers in his second appearance before U-S District Judge William Hoeveler in Miami. Tuesday's proceedings resulted in a two-week delay for Noriega's bond hearing as well as a requirement that federal agents notify Hoeveler if they want to move Noriega to a different facility.

The Pentagon is trying to nip possible conflicts with the Colombian government in the bud. Pentagon officials Tuesday said the aircraft carrier U-S-S John F. Kennedy and the cruiser U-S-S Virginia are NOT steaming for the Colombian coast and are, in fact, taking part in routine maneuvers off Florida. Reports that the ships were headed for Latin America to join the war on drugs caused concern in Colombia.

The Colombian government also is trying to relieve the controversy. The Foreign Ministry issued an official statement today that Foreign Minister Julio Londono was NOT resigning over the U-S-Colombian military issue. Bogota radio stations had reported that the foreign minister had quit in protest against U-S military involvement in Colombia.

Washington, D-C, Mayor Marion Barry says there's NO truth to an article published Sunday in The Los Angeles Times that quoted him as saying Jesse Jackson- quote- ''don't wanna run NOTHING but his mouth.'' The beleaguered head of the nation's capital says the story was rife with inaccuracies and, in a three-page letter to the newspaper, demanded an apology. The editor of the Times says- quote- ''The story is fair and speaks for itself.''

BARSTOW, Calif. (JAN. 10) UPI - An Army helicopter crashed during a routine training mission in the Mojave Desert Tuesday, killing all four soldiers aboard, authorities said.

The soldiers, assigned to an infantry division based at Fort Riley, Kansas were killed when their UH-60 Blackhawk helicopter crashed at 3:32 p.m.

near Fort Irwin in the desert about 40 miles north of Barstow, Maj. John Wagstaffe said.

He said the soldiers were killed by the impact of the crash, and all were pronounced dead by the time a doctor had reached the scene.

No one else was injured in the crash.

The helicopter crashed about 14 miles east of the main post at Fort Irwin, which lies halfway between Los Angeles and Las Vegas, Nev.

The soldiers, members of the mechanized Fourth Battalion, First Infantry Division, were participating in three-week training exercise that began Jan. 3. The helicopter flight was part of a simulated support mission, Wagstaffe said.

Names of the soldiers were withheld pending notification of their relatives.

The cause of the accident was under investigation by Army safety officials Wagstaffe said.

About 3,500 soldiers have been taking part in the exercise, fighting a Soviet-style force, Wagstaffe said. Fort Irwin is the Army's national training center, and the Air Force also runs air support training missions there.

Tuesday's accident was the third fatal helicopter crash at the training center since it opened in 1981, Wagstaffe said.

Six soldiers died in July 1989 when their Blackhawk helicopter crashed during a training mission. The cause of that crash has not yet been released, Wagstaffe said.

Another crash, a mid-air collision, occurred in November 1985, Wagstaffe said.

The Blackhawk can carry up to 16 people, and is used for air assault and medical rescue missions, Wagstaffe said. It was first used by the Army in October 1987.

The helicopter is made by the Sikorsky Co., and some of its parts are made by General Electric.

(JAN. 10) UPI - Chinese and foreign sources in Beijing say a public announcement of the formal lifting of martial law is imminent. They say Chinese leaders are meeting in the Great Hall of the People, with the announcement expected later in the day. The move would be the first significant gesture by China to ease the climate of repression since the crackdown on the pro-democracy movement last June. But Chinese sources and Western diplomats believe the changes will be largely cosmetic. Says one diplomat- ''It won't change all that much.''

Detectives from London's Scotland Yard have joined the politically sensitive investigation of November's slayings of six Jesuit priests in El

Salvador. A spokesman for the British Embassy in San Salvador says the detectives arrived in the Central American nation during the weekend and will stay ''for as long as it takes.'' Soon after the killings, Salvadoran President Cristiani requested help from Scotland Yard as well as from the F-B-I and Spanish crime experts. The F-B-I has been involved almost from the start. Spanish investigators returned to Spain several weeks ago.

The third storm in as many days smacked the Pacific Northwest with driving rains and high winds Tuesday. Coastal Washington state was drenched by a record two-point-38 inches of rain in just nine hours... gorging rivers, flooding roads and triggering mudslides. 80-mile-an-hour winds were recorded along Oregon's coast. A state of emergency was declared in Oregon's Clatsop County, which was drenched with more than six inches of rain in 24 hours.

Army officials are investigating Tuesday's helicopter crash in the California desert that killed four soldiers. The soldiers... based at Fort Riley, Kansas... were killed when their U-H-60 Blackhawk helicopter crashed near Fort Irwin, about 40 miles north of Barstow. The accident took place during a three-week training exercise that began January 3rd.

#90010u0334 01/10/1990 ~United Press International

MIAMI (JAN. 10) UPI - Treading carefully in the early stages of deposed Panamanian dictator Manuel Antonio Noriega's trial, a federal judge delayed the former general's bond hearing and acted to assure full access to his lawyers.

U.S. District Judge William Hoeveler granted the request by Noriega's attorneys Tuesday to push the bond hearing back two weeks, waiving a federal law that limits such delays to only five days.

Hoeveler, who is presiding over Noriega's trial on drug-trafficking charges, also told prosecutors he would have to be told in advance if the government planned to move Noriega from his holding cell in the Miami federal courthouse.

''We're in the beginning of this case and from the defense counsel's standpoint, it is a very critical time,'' Hoeveler said.

Noriega sat expressionless, listening to a Spanish interpreter through headphones, while Hoeveler agreed to the two-week delay at the request of defense lawyer Steven Kollin.

During his first court appearance Jan. 4, Noriega's lawyers had asked Hoeveler to delay the ousted military dictator's bond hearing. But under federal law, the defense can delay a bond hearing for only five days,

unless a judge rules there is ''good cause'' for a longer delay.

''The fear in this case was the proceeding the other day might be construed as a waiver of the pretrial detention hearing, which is not acceptable under law,'' Assistant U.S. Attorney Myles Malman told the judge.

Federal prosecutors had asked for Tuesday's hearing to settle the matter.

In asking for the delay, Kollin said, ''We are not waiving a full hearing. The government wants to proceed (with the bond hearing). We need adequate time.''

Noriega, dressed in a blue oxford shirt and dark brown pants, listened intently to the Spanish-language translation of the 40-minute proceeding, the second since surrendering to U.S. authorities in Panama on Jan. 3.

In requiring prior notice of any plans to move Noriega, Hoeveler agreed with Kollin, who argued that defense lawyers needed easy access to their client.

Before the ruling, U.S. Attorney Dexter Lehtinen acknowledged that Noriega could be moved at any time. ''It is possible that the government can move this defendant at any time,'' Lehtinen said. ''The government will not announce that movement at any time.''

Hoeveler said once the government notifies him of plans to move Noriega, he will tell defense lawyers and a private hearing will be held to discuss any problems.

The judge's ruling apparently killed any possibility of Noriega being moved from Miami Tuesday night, as reported Tuesday by The New York Times.

The newspaper reported that authorities planned to move Noriega from his courthouse holding cell to any of three federal prisons: Atlanta, Leavenworth, Kan., or the nation's No. 1 maximum-security prison in Marion Ill. The Times said Noriega most likely was to be be moved Tuesday night.

Atlanta was considered the most likely choice of the three federal institutions because it is the closest to Miami, where Noriega will be tried. Miami also is where Noriega's lawyers are based.

Noriega surrendered to U.S. authorities in Panama on Jan. 3, 10 days after he took refuge in the Vatican Embassy in Panama City following the Dec. 20 U.S. attack on the Central American nation.

U.S. authorities brought Noriega to south Florida Jan. 4 to face drug-trafficking charges stemming from two 1988 indictments handed up in

Florida.

During his first court appearance, Noriega would not enter a plea, refusing to acknowledge the jurisdiction of a U.S. court in his case. Hoeveler entered an innocent plea for him.

In refusing to enter a plea, Noriega, through another lawyer, Frank Rubino argued that he was a political prisoner captured in a sovereign nation and that the indictments were politically motivated.

Noriega and 14 other people were charged in Miami on Feb. 4, 1988, with drug trafficking in a 12-count indictment. If convicted on all charges, Noriega would face a maximum of 145 years in prison. Of the 14 other defendants, five are in the United States awaiting trial.

The indictment charges Noriega with turning his country into a haven for Colombian drug traffickers, protecting cocaine shipments as they passed through his Central American nation on their way north, allowing smugglers to set up a processing laboratory and letting them deposit profits in Panama banks.

In return, the indictment charges, Noriega received at least $4.6 million in payoffs from smugglers, particularly key figures in Colombia's Medellin cocaine cartel.

In the separate indictment unsealed in Tampa at the same time as the Miami indictment, Noriega and Panamanian businessman Enrique Pretelt were charged with arranging to smuggle nearly 1 million pounds of marijuana into the United States between 1982 and 1984.

#90010u0345 01/10/1990 ~United Press International

(JAN. 10) UPI - The Boston Celtics, winners of 16 championship titles, endured the worst 12 minutes in franchise history at the hands of a most unlikely opponent - the lowly New Jersey Nets.

Boston scored a franchise-low six points in the second quarter of Tuesday night's game at East Rutherford, N.J., and lost 87-78 to a team that had dropped eight of its previous 10 games.

Nets Coach Bill Fitch, who coached the Celtics from 1979 to 1983, said New Jersey can't take the credit for Boston's 2-of-15 shooting during the second quarter.

''No defense is good enough to hold the Celtics to just six points in a quarter,'' said Fitch. ''Basketball is a game where if the ball doesn't go in the hole, it can really make you look bad.''

The Celtics led 27-24 after one quarter but the decisive second quarter put them behind 44-33 at halftime. Boston was within a point of the NBA-low for a period, the Utah Jazz managing just five points during a quarter in 1981. But the team in green didn't have to set a record to make the evening memorable for Celtics Coach Jimmy Rodgers.

''I'm not sure I've ever seen a quarter that was as horrendous as the second - I've never quite seen anything like it,'' said Rodgers.

Boston, which had won its previous five road games, was without Larry Bird who missed his second straight game due to a sprained ankle.

During an 18:39 span, from 1:00 of the first quarter until 5:39 of the third quarter, Boston scored just 10 points.

New Jersey led 81-69 with 3:25 remaining when Purvis Short hit a jumper from the left corner. Boston responded with a 9-2 surge then failed to score in the final 51 seconds. The Celtics were led by Reggie Lewis with 22 points.

--- AROUND THE NBA ---

In other NBA games on Tuesday night, Sacramento topped Minnesota 84-70, Phoenix downed the Los Angeles Lakers 121-118 in overtime, Houston stopped Seattle 97-90, Detroit overcame Chicago 100-90, San Antonio defeated Miami 107-102, the Los Angeles Clippers stopped Charlotte 108-98, and New York out-scored Washington 131-127 in overtime.

Kings 84, Timberwolves 70

At Sacramento, Rodney McCray scored a game-high 21 points and the first-year Timberwolves endured the lowest-scoring quarter in their brief history, managing just 10 points in the third quarter. New Kings Coach Dick Motta gained his first win. Tony Campbell paced Minnesota with 20 points and 9 rebounds.

Suns 121, Lakers 118 OT

At Phoenix, Kevin Johnson scored 10 of his 34 points in overtime, including a pair of free throws with five seconds left in the extra period. Tom Chambers, who also scored 34, intercepted a pass by the Lakers' Magic Johnson with two seconds remaining to end Los Angeles' last hope. James Worthy led Los Angeles with 25 points. Magic Johnson scored 24 points and matched his career-high in assists with 24.

Rockets 97, Supersonics 90

In Houston, Akeem Olajuwon scored 38 points and grabbed 15 rebounds to lead the Rockets, who limited Seattle to 42 percent shooting from the field. Houston led 81-79 until Mike Woodson hit a free throw and a 3-pointer and Olajuwon made two free throws and a basket and blocked a shot. Dale Ellis had 22 points to lead Seattle.

Pistons 100, Chicago 90

At Auburn Hills, Mich., Joe Dumars scored 28 points and helped hold Michael Jordan to 16 as Detroit won its sixth straight game. The Pistons, who also have won 10 of their last 11 games, moved back into first place in the Central Division. Scottie Pippen led Chicago with 17. Mark Aguirre backed Dumars with 18 points.

Spurs 107, Heat 102

In Miami, Terry Cummings finished with 31 points and Willie Anderson had 26 for the Spurs. A 16-2 San Antonio run resulted in a 107-97 Spurs' lead with 35 seconds remaining. San Antonio rookie David Robinson finished with 20 points. Rony Seikaly scored 21 and Glen Rice had 20 for the Heat, who dropped their 11th game in a row.

Clippers 108, Hornets 98

In Charlotte, N.C., Ron Harper scored 19 of his 25 points in the second half and the Clippers captured their third road game of the season. Clippers forward Charles Smith finished with 23 points and 15 rebounds, Danny Manning added 22 points. For Charlotte, Dell Curry scored 23 points and Armon Gilliam added 22.

Knicks 131, Bullets 127 OT

In New York, Patrick Ewing scored 35 points, including the go-ahead points on a pair of free throws with 31 seconds left in overtime. The victory improved the Knicks' home record to 15-1. The Bullets dropped their 13th consecutive road game, despite a season-high 42 points from Bernard King.

#90010u0365 01/10/1990 ~United Press International

SAN SALVADOR, El Salvador (JAN. 10) UPI - Leftist rebels launched attacks in eastern El Salvador and detectives of Scotland Yard joined the politically sensitive investigation of the slaying of six Jesuit priests.

U.S. Embassy spokesman Jefferson Brown said Sens. Christopher Dodd, D-Conn., and John Warner, R-Va., arrived Tuesday for a two-day visit as part of a fact-finding tour of Central America.

The spokesman said Warner and Dodd, who is chairman of the Senate's Western Hemisphere subcommittee, were scheduled to meet with senior Salvadoran government and military officials.

A spokesman for El Salvador's 6th Infantry Brigade told United Press International that fierce fighting between rebels and the government troops started at 2 a.m. around the town of Santa Elena, about 60 miles southeast of San Salvador.

''Units of the air force are bombing ... where they believe the enemy is located,'' said the spokesman, contacted in Usulutan by telephone at 8:30 a.m. ''There is serious combat in the town of Santa Elena, and it is still going on.''

No information about casualties was immediately available.

Distant explosions could be heard in San Salvador, apparently coming from the Guazapa hills, some 15 miles north of the capital.

Radio reports from station YSU said infantry battalions were operating in Guazapa, but official military sources would not immediately confirm the reports.

The leftist Farabundo Marti National Liberation Front, or FMLN, has waged a decade-long guerrilla insurgency against the U.S.-backed Salvadoran government that has cost more than 72,000 lives, mostly civilians.

The British Embassy in San Salvador said investigators from London's Scotland Yard joined the inquiry into the Nov. 16 slaying of six Jesuits, their cook and her 15-year-old daughter. The killings raised an international outcry and prompted a threat from members of Congress to cut U.S. military aid to the Salvadoran government.

During the 1980s, the United States provided about $3 billion in economic and military aid to El Salvador, the size of Massachusetts with a population of about 5 million. U.S. economic and military aid to the Central American nation amounts to about $1.4 million a day.

''Several investigators are meeting with Salvadoran officials to begin working on the case, but in the fine tradition of Scotland Yard they are not talking about it,'' the British Embassy spokesman said without elaborating.

Soon after the slayings, Salvadoran President Alfredo Cristiani requested Scotland Yard as well as the FBI and Spanish crime experts to help investigate the killings.

The Salvadoran government gave its first briefing on the investigation

Tuesday, but released only technical details. ''For now there are no names or ranks (of suspects) that we can give out,'' presidential spokesman Mauricio Sandoval said.

Investigators have interviewed 103 civilians and 115 soldiers and assembled evidence, including 230 spent cartridges of diverse calibers, he said.

The FBI has been involved in the investigation almost from the start, but little information is known about its exact role. Spanish investigators returned to Spain several weeks ago.

The British Embassy spokesman said the Scotland Yard detectives arrived in San Salvador over the weekend. He said the detectives would stay in El Salvador ''for as long as it takes.''

The slayings, reportedly carried out by a group of armed men who entered the priests' living quarters on the campus of the Jesuit-run University of Central America, occurred during a massive rebel offensive that turned San Salvador into a battleground between government troops and leftist guerrillas.

The slain Jesuits, including the university's rector, Ignacio Ellacuria, were considered El Salvador's top leftist intellectuals.

Rene Emilio Ponce, head of joint chiefs of staff of the Salvadoran armed forces, told reporters Monday that 47 members of the military, including two officers, have been confined to their barracks for questioning in the slaying of Jesuit priests.

The military Monday contended its high command was not involved in the slayings but acknowledged some officers may be linked to the slaughter of the Jesuit priests. The high command consists of the defense minister and the armed forces' top three officers.

Cristiani said in brief nationally televised address Sunday night, ''It has been determined that some elements of the armed forces were involved.''

#90010u0382 01/10/1990 ~United Press International
(JAN. 10) EDITORIAL SAMPLER:

THE DAILY TIMES OF DELAWARE COUNTY

Way back when, when George Bush said, ''Read my lips ... no new taxes,'' we thought he said, ''Read my lips ... no new taxes.''

Obviously, we don't subscribe to the same lip-reading service as he does - or else he has just been pulling our leg all along.

In case you haven't noticed or you haven't had a chance to peek at your new pay stub yet, our Social Security taxes have gone up from 7.51 percent to 7.65 percent on the first working day of the new year. ...

What a cruel joke this has turned out to be. And how deceptive.

More deceptive is the fact that Bush continues the free ride which his predecessor Ronald Reagan so thoroughly enjoyed throughout his administration by using Social Security surpluses to disguise the truly devastating nature of the growing federal debt.

We concur with Sen. Daniel Patrick Moynihan (D.-N.Y.), who's saying to Bush, if you really are opposed to new taxes, join me in repealing the increases that have gone into effect.

This did not happen, however, because if it had, the whole house of cards on which the Reagan-Bush fiscal policy sits ... would have come crashing down.

Nevertheless, the hypocrisy of that policy - one that means raising the regressive tax against middle and even lower income Americans while granting tax breaks to the rich and famous - has been exposed. ...

It would be great if George Bush could read our minds at this moment, because what we're thinking, we're not allowed to print.

THE BOSTON GLOBE

The murder of two nuns on a Nicaraguan country road and the official U.S. reaction brings to mind the slaughter of six Jesuit theologians in El Salvador in November. Both times, shadowy forces killed church people working to heal a war-torn country. Both times, U.S. officials tried to hide the central fact that the prime suspects receive hundreds of millions in U.S. aid.

Defenders of U.S. policy take refuge in purported ambiguity. White House spokesman Marlin Fitzwater said: ''The Nicaraguan government has provided no information to substantiate its charge that the contras launched the attack, and we hope the Sandinistas do not seek to obscure this tragedy by engaging in a propaganda battle.''

The Jesuits died because as intellectual leders calling for a negotiated settlement they undermine the war effort to which the Salvadoran right wing cling. The nuns died because they were in the wrong place at the wrong time.

The Salvadoran objective is to avoid peace talks. The contra objective is to prolong mayhem so that Nicaraguans despair of their government's capacity to bring peace. The White House objective is to ''seek to obscure this tragedy.''

THE PROVIDENCE (R.I.) JOURNAL-BULLETIN

The invasion of Panama illustrates why the ban on direct combat by female members of the armed forces is destined to be revoked... A female Military Police officer last month commanded her platoon in a firefight during the invasion. In addition, several enlisted women participated in the initial attack on Gen. Manuel Noriega's defense headquarters in Panama City...

In a combat zone, virtually all military personnel need to be trained and able to fight, both to defend themselves and to maximize the total power of American forces during the campaign. It seems obvious that well-trained women, like well-trained men, can perform such combat roles with distinction.

Moreover, to officially bar women from direct combat roles unfairly deprives them of the promotions that follow direct combat experience.

So it's encouraging to hear that Congress will soon consider various proposals to drop the combat ban.

THE WASHINGTON POST

The killing of the six Jesuit priests in El Salvador in November seemed to repudiate everything the United States had sought in a decade of support for the democratic cause. An atrocity so heinous, so conspicuous, so obviously bearing the fingerprints of the death-squad right suggested a frightening measure of contempt for Americans. ...

Hence the importance of President Alfredo Cristiani's weekend announcement that members of the military killed the priests. Some 45 men and two officers of an elite American-trained battalion are confined to base. A special commission including civilian lawyers and high-ranking officers is now assisting the investigation. President Cristiani promises to pursue the case ''in its complete magnitude.''

... Bringing the killers of the Jesuits to justice could aid powerfully in drawing suspicious and uncommitted Salvadorans into greater trust of the government's capacity to contest with equal effectiveness violence on the left and violence on the right. This would be a sharp blow to those who claim the oligarchy leaves no alternative to armed struggle. This case could break the war.

#90010u0383 01/10/1990 ~United Press International
(JAN. 10) EDITORIAL SAMPLER:

ST. LOUIS POST-DISPATCH

The U.S. government seems to use a strange barometer to determine its response to the killing of Americans abroad. The degree of outrage is contingent on where the death occurred. When an American died in Panama, for example, President Bush sent in thousands of troops to topple a government. When Sister Maureen Courtney, an American nun, was killed in Nicaragua, the administration reflexively defended the Contras and said it had no intentions of investigating the murder. Once again, politics has come before human rights.

One can only believe that the United States is reluctant to look into Sister Courtney's death because it fears what it may find. While the U.S.-backed Contras have asserted they were not responsible for the ambush that killed two nuns and injured a third nun and a bishop, religious workers in the region say they have no doubt the Contras did it. Certainly at this point, evidence points toward the Contras, who have been mounting skirmishes to sabotage upcoming elections.

This is hardly the first time that the U.S. government has displayed a ho-hum attitude toward an American death in the wrong Central American country. ...

The Bush administration, which has steadfastly opposed dismantling the Contras, has a legal obligation - not to mention a moral duty - to certify that they are not engaged in terrorist acts. It is abrogating its obligations by refusing to take an active role in the investigation.

THE MILWAUKEE SENTINEL

Israeli leaders apparently have reached a compromise agreement through which they hope to put on the back burner the issue of alleged contacts by a high Cabinet member with the Palestine Liberation Organization.

The allegations by Prime Minister Yitzhak Shamir accused Science Minister Ezer Weizman of exchanging messages with PLO officials through an Israeli Arab physician.

But Weizman - who will keep his Cabinet post but is excluded from strategy meetings - said he had been doing that for years, since Vice Premier Shimon Peres headed the government. And he has charged that Shamir's government has been negotiating with the PLO through Egypt and the United States.

If that is true, U.S. officials, who have been on the forefront of a Mideast peace overture that will begin with elections in the occupied territories, should urge that the Israeli factions be out front on their position toward the PLO.

If the Israeli government publicly refuses to negotiate with the guerrilla group as a matter of principle, that is understandable. But if the stance on the PLO is a political posture that can be bent in secret, it is only holding up resolution of the problem.

THE CHICAGO TRIBUNE

The explosion of Pan American World Airways Flight 103 over Scotland a year ago left a compelling question in its aftermath: Should airlines tell the public about threats to blow up their planes?

Families of the 270 passengers were outraged when they learned that the U.S. government knew enough about a threat to the flight to have warned some State Department employees.

Two weeks ago, Northwest Airlines told passengers booked on its Flight 51 from Paris to Detroit about a bomb threat. At first the airline decided to keep quiet about it ''so security people could develop leads,'' said a spokesman. But a Swedish newspaper printed word of the threat, so airline officials concluded they should acknowledge it. Another Northwest spokesman said the airline has a policy of notifying passengers as they check in if there has been a specific, ''credible'' threat.

Flight 51 arrived safely, but with only 22 passengers; more than 100 decided the better part of valor was to take a different flight. Their reaciton illustrates the dilemma faced by airlines. If they make the threats public, they are likely to lose business. If all the threats - including vague, unspecific ones - are made public, the air transportation system could be paralyzed by nuts or people mad about lost suitcases.

What should an airline do? ... The policy should be uniform, implemented by all carriers and worked out by them in conjunction with the Federal Aviation Administration with input from security experts and the public.

(JAN. 10) EDITORIAL SAMPLER:

DALLAS TIMES HERALD

Representatives of the Department of Defense recently told Congress the

military needs more than 3.4 million additional acres of public land in six states so that the armed services can adequately practice tank maneuvers, bombing runs and other forms of battlefield training. Environmentalists and ranchers think the request is more than a little hasty.

So do we.

The U.S. military already has access to more than 19 million acres of public land. The Pentagon claims that's not enough: Today's planes fly faster, today's guns shoot farther, and unless there's more room to practice using them, today's troops are going to be inadequately prepared for war.

What we would like to see is an independent study that examines this dilemma and recommends ways of solving it short of removing thousands of square miles of land from the public domain. ....

We also think it's time Congress gives serious thought to opening negotiations with Canada on the possibility of conducting military exercises there. ... The West Germans and the British - both of whom have little training space on their own soil - have been conducting military exercises in Canada since the mid-1970s.

Before the Pentagon gets the OK to grab another massive chunk of public land, Congress ought to make absolutely sure every other alternative has been explored.

SAN FRANCISCO CHRONICLE

The war on drugs is being fought out on city streets, over international landing grounds, and in high, hardscrabble Andean fields - to cite just a few of the critical loci of this wide-ranging engagement. Here in the United States, an important element of the battle is also being fought out in the courts. And it is discouraging to contemplate that failure could result from insufficient depth in the system.

In his annual report to the federal judiciary, Chief Justice William Rehnquist gave a riveting picture of the situation as he made a strong plea for more federal judges to help cope with the situation. ...

Chief Justice Rehnquist has asked for ''immediate action'' on a proposal to create 59 new judgeships for the district courts and 16 appellate positions. (Fifty-seven judgeships are now vacant.)

We trust his words fall on willing ears in Washington.

SEATTLE POST-INTELLIGENCER

While concerns over the implications of German reunification are not to be dismissed, and celebration of the end of the Cold War may be premature, there are, nonetheless, indications great and small that the world is a decidedly different one than it was in the heat and aftermath of World War II.

One of the small indications involves Manfred Rommel, the lord mayor of Stuttgart and son of German field marshal Erwin Rommel, ''The Desert Fox.''

Another involves Susan Eisenhower, grandaughter of President Dwight Eisenhower.

The young Rommel (he's 60) has been named honorary Commander of the Order of the British Empire by Queen Elizabeth in recognition of his ''long and valuable serivces to Anglo-German relations.''

The young Eisenhower (she's 38) next month will marry leading Soviet rocket scientist Roald Z. Sagdeev. ...

The romance reportedly blossomed as the two worked on a book about the survival of Soviet intellectuals.

And the world turns 'round and 'round.

#90010u0495 01/10/1990 ~United Press International

MANILA, Philippines (JAN. 10) UPI - Two former aides to the late President Ferdinand Marcos and three others were charged with rebellion Wednesday in last month's failed coup attempt against President Corazon Aquino, officials said.

Rafael Recto, a Marcos attorney, and Marcos press officer Lito Gorospe were among five people accused of rebellion by the justice department, senior prosecutor Aurelio Trampe said. The others were air force Col. Eduardo (Red) Kapunan, businessman Jack Rodriguez and newspaper columnist Cecilio Arillo.

The charges filed by the National Bureau of Investigation named six witnesses who saw the five at the suburban government television network Dec. 1, the first day of the coup attempt, Trampe said.

Kapunan led the takeover of the television station at the start of the weeklong uprising but was unable to use it because employees removed vital equipment, rendering the network inoperative.

Network manager Dodie Limcaoco said earlier Recto and Gorospe were carrying tapes apparently containing rebel statements that were never used.

Trampe said at least 53 civilians have been charged with rebellion in the uprising that left 119 people dead and more than 500 wounded. It was the sixth and most serious coup attent against Aquino.

Among those charged are opposition Sen. Juan Ponce Enrile and the Senate's military consultant, retired Brig. Gen. Felix Brawner.

An aide said Recto has not received a copy of the charges, which carry a penalty ranging from six months to 12 years imprisonment. Recto has denied involvement in the rebellion.

Gen. Renato de Villa, the military chief, Wednesday eased the alert status in the 159,000-member armed forces for the first time since the coup attempt last month.

Mutineers said they launched the uprising to save democracy from the inept and corrupt Aquino government, but the government has called it a naked power grab by disgruntled officers and associates of Marcos.

Marcos was overthrown in a civilian-backed military revolt in February 1986 - in which Enrile was a leading figure - and died last year in exile in Hawaii.

#90010u0514 01/10/1990 ~United Press International

HONG KONG (JAN. 10) UPI - An international women's group Wednesday deplored ''concentration camp-like conditions'' in Hong Kong refugee camps and criticized the government for forcibly repatriating Vietnamese boat people before sending volunteers back to Vietnam.

The group, which visited five detention centers normally closed to outsiders, told reporters conditions were ''inhumane'' and urged the British colonial goverment to allow voluntary agencies to work in the camps run by prison personnel to improve the lives of the Vietnamese.

The delegation, headed by former Assistant Secretary of State Patricia Derian and Norwegian actress Liv Ullmann, denounced Hong Kong's refugee situation hours before a group of 123 boat people left for Hanoi as part of a voluntary repatriation program.

The returnees brought to nearly 1,000 the number of boat people who have voluntarily returned home since March rather than face forced repatriation if they are found to be economic migrants rather than political refugees.

Those classified as economic migrants have no chance of resettlement overseas and must stay in the crowded camps until they are sent back to Vietnam.

Britain honored its threat to forcibly repatriate boat people last month, sending 51 Vietnamese back to Hanoi in a secrecy-shrouded operation that government officials said was only the first of several deportations.

Expressing special concern for women and children held behind barbed wire and high walls in the detention centers housing about 56,000 Vietnamese, the group said conditions in the camps appeared to be deliberately bad to discourage new arrivals.

''No justifiable excuse exists for imprisoning infants, keeping them behind barbed wire, packed like sardines in concentration camp-like conditions,'' they said in a statement. ''The delegation can only conclude that the policy is designed to punish people who are seeking freedom.''

Women in the camps are particularly vulnerable, Ullmann said.

''They are scared of everyone - of the gangs, their fellow Vietnamese and they are scared of the police,'' she said, adding that young women told members of the group they had been told by correctional officers they must provide sexual favors if they were to receive protection in the camps.

''The delegation decries the policy of forced repatrations, which has had particularly devastating consequences for women and children,'' the statement said. ''Fear of forced return permeates the camps. Children are afraid to go to sleep, fearing that their parents will be gone when they awaken.

''The delegation calls for an immediate end to forced repatriation.''

They said it was ''indefensible'' to initiate forced repatriation when more than 2,000 Vietnamese were waiting to participate in the voluntary return program.

#90010u0579 01/10/1990 ~United Press International

(JAN. 10) UPI - A busy day for the space shuttle crew... another day in court for Manuel Noriega... China is expected to lift martial law... and vigilantes reportedly are on a rampage in Romania. Those stories and more, next from U-P-I.

Morning has come early for the crew of the orbiting space shuttle Columbia.

Shortly after 1 a-m, eastern time, the astronauts rose to start preparing for the first major task of their mission- launching a Navy communications satellite

Astronaut G. David Low plans to deploy the drum-shaped Syncom-F-5 satellite by pressing ''arm'' and ''fire'' switches in the cockpit to send the 15-thousand-pound satellite rolling out of the shuttle's cargo bay like a giant Frisbee.

An on-board solid-fuel rocket motor is scheduled to ignite 45 minutes after deployment to begin raising the relay station's orbit. Subsequent firings of liquid-fueled motors eventually will boost the satellite into its final orbit 22-thousand miles above the equator.

Once that's taken care of... the crew can start concentrating on Friday's mission of retrieving another satellite that's been orbiting the Earth

since 1984.

A ruling by a federal judge in Florida appears to have postponed the transfer of deposed Panamanian dictator Manuel Noriega to a federal penitentiary from his holding cell in the Miami federal courthouse.

U-S District Judge William Hoeveler is presiding over Noriega's trial on drug-trafficking charges. Hoeveler told prosecutors he must be told in advance if the government plans to move Noriega.

In making the ruling, Hoeveler agreed with defense lawyer Steven Kollin, who argued that Noriega's lawyers need easy access to their client.

U-S Attorney Dexter Lehtinen acknowledged that Noriega could be moved at any time. But Hoeveler's ruling apparently killed any possibility of Noriega being moved from Miami last night, as previously reported.

Reports said Noriega would be moved to one of three federal prisons- Atlanta... Leavenworth, Kansans... or Marion, Illinois.

Atlanta is considered the most likely choice because it's closest to Miami.

Hoeveler also granted the request by Noriega's attorneys to push the bond hearing back two weeks,

Noriega sat expressionless throughout the 40-minute proceeding, listening to a Spanish interpreter through headphones.

#90010u0595 01/10/1990 ~United Press International

(JAN. 10) UPI - The Detroit Red Wings used their special teams to extend their recent hot streak.

The Wings scored three power-play goals, three short-handed goals, and three goals at even strength Tuesday night in a 9-0 rout of the Minnesota North Stars. Glen Hanlon earned the shutout in the Wings' fourth victory in their last five games, and sixth straight at Joe Louis Arena.

''It was a team loss,'' Minnesota Coach Pierre Page said. ''It was like when you go on a plane trip and your luggage makes it, but you don't. Our luggage made it. We didn't make it tonight.''

Shawn Burr scored three goals, two short-handed. Steve Yzerman, who added four assists, also scored with the Wings a man short. The Wings lead the NHL with 12 short-handed goals.

Burr, whose other goal came on the power play, scored his third goal at

16:32 of the second period. After scrapping for a loose puck at center ice he broke in on goaltender Jon Casey and pushed a shot through Casey's legs that trickled into the net.

Hanlon's shutout, the 13th of his career, was the first for the Wings since he shut out Chicago Feb. 25.

--- AROUND THE NHL ---

In other games, Quebec upset Montreal 5-2, St. Louis nipped Los Angeles 4-3 and Edmonton overtimed Calgary 3-2.

Nordiques 5, Canadiens 2

At Quebec, Michel Goulet scored a goal and picked up two assists to lead the upset. Goulet's goal, at 5:27 of the third period, gave Quebec a commanding 4-1 lead. Goulet took a Tony Hrkac pass from behind the net and slapped one behind netminder Brian Hayward for his 11th of the season.

Blues 4, Kings 3

At Los Angeles, NHL goal-scoring leader Brett Hull fired in a 30-foot wrist shot with 26 seconds left to carry St. Louis. Hull scored his 37th goal of the season after taking a cross-ice pass from Jeff Brown to beat goalie Mario Gosselin on a shot to the glove side. The Kings have lost four straight.

Oilers 3, Flames 2 (OT)

At Calgary, Martin Gelinas collected his 11th goal of the season at 2:11 of overtime to lead Edmonton. Gelinas rapped Joe Murphy's centering feed past goalie Mike Vernon. The triumph for the Oilers was their first in Calgary in six games dating back to Dec. 26, 1987.

-30- 2398

#90010u0612 01/10/1990 ~United Press International

(JAN. 10) UPI - A Romanian newspaper says mobs of Romanians have begun taking justice into their own hands and lynching or shooting officials of the former repressive communist government.

Romania's new provisional government executed former leader Nicolae Ceausescu and then outlawed capital punishment. It began trying member's of Ceausescu's secret police Monday.

The Bucharest newspaper says vigilante groups in some areas of the country are lynching or shooting former provincial and security officials... and terrorizing members of their families.

The paper condemns the attacks as what it calls- ''absolutely contrary to the democratic climate established in our country.''

It remains UNclear how many people are facing trial for crimes linked to the Ceausescu government. It also is UNknown how many former members of the secret police remain at large.

The communist trade alliance ''Comecon'' enters the second day of a two-day watershed meeting in Bulgaria today.

The reform governments of Eastern Europe appear ready to pass a call to study changing the organization to a more market-oriented system to match the political changes sweeping their countries.

Members complain that Comecon... whose common currency is the unconvertible Soviet ruble... mainly serves Soviet interests as a market for shoddy, unwanted goods.

Delegates said yesterday there was a consensus that a commission would be formed to study proposals to change the entire concept of trade among the 10 member states. The change would be to base the system on world prices and a convertible currency, possibly before year's end.

Poland, Czechoslovakia and Hungary led the calls for reform. Cuba expressed the most serious reservation about the reforms.

-30- 1934

#90010u0665 01/10/1990 ~United Press International

(JAN. 10) UPI - No. 3 Oklahoma won a game by 53 points Tuesday night, and the victim said it could have been worse.

''They could have easily scored 160 on us, but Billy (Oklahoma Coach Billy Tubbs) called his full-court press off,'' Arkansas-Little Rock Coach Mike Newell said after the Sooners scored a 134-81 victory.

Skeeter Henry scored 35 points, hitting 10 of 12 shots from the floor and 11 for 11 from the foul line. He hit all 4 of his attempts from 3-point range.

''It was a very humbling experience for us,'' Newell said. ''OU was really that good, but we are not that bad. OU's heighth and quickness reminds me a lot of last year's Illinois team. They may not be as strong, but they're definitely better shooters.''

William Davis scored 25 points and Smokey McCovery added 20 for the Sooners, 11-0. Terry Evans scored 13 points and Tony Martin and Kermit

Holmes had 12 apiece.

David Hall's 17 points powered Arkansas-Little Rock, 7-4. Derrick Owens added 15.

The Sooners used pressure defense to take a 19-8 lead in the first half and took advantage of the Trojans' turnovers to grab a 59-37 advantage at halftime.

Oklahoma began the second half with a 6-0 surge and eventually took a 118-63 lead with 5:31 remaining. The Sooners hit 12 of 18 shots from 3-point range.

It was the ninth time this season the Sooners topped the 100-point mark.

--- AROUND THE COLLEGE SCENE ---

In the only other game involving a Top 20 team, No. 20 Alabama routed Georgia 79-62.

At Tuscaloosa, Ala., Robert Horry and Keith Askins each scored 17 points for the Crimson Tide. The Tide, 11-3 overall and 2-1 in the SEC, jumped to an early lead over the Bulldogs, 8-4, 1-2, who shot only 18 percent from the field in the first half and only 33 percent for the game.

In other games, Notre Dame beat Boston College 80-67, Connecticut blasted Villanova 71-54 and Clemson beat Virginia 76-70.

At Chestnut Hill, Mass., Keith Robinson scored 21 points and Notre Dame shot 60 percent from the floor.

At Philadelphia, Nadav Henefeld and Chris Smith each scored 19 points to lead UConn. David Miller scored 11 points for Villanova.

At Charlottesville, Va., Kirkland Howling hit a pair of free throws with 18 seconds left to give Clemson an Atlantic Coast Conference victory.

In other games, it was: DePaul 68, Duquesne 55; La Salle 106, Siena 90; Temple 60, George Washington 57; West Virginia 82, St. Joseph's (Pa.) 62; and Pacific 70, UC Irvine 58.

-30- 2702

#90010u0691 01/10/1990 ~United Press International

(JAN. 10) UPI - Prices on the Tokyo Stock Exchange closed broadly lower in quiet trading Wednesday under pressure of the faltering Japanese yen.

The Nikkei Average of 225 selected issues, which plunged 343.50 points

Tuesday, lost 254.95 points to 37,696.51.

The broader-based Tokyo Stock Exchange Index of all listed major shares fell 23.44 points to 2,793.80.

An estimated 500 million shares changed hands, compared with 543 million traded Tuesday.

Declines widely outnumbered advances 595 to 347, with 185 issues unchanged.

Elsewhere in Asia, stocks rallied sharply in thin trading on the Hong Kong Stock Exchange on speculation the Chinese government would lift martial law.

The Hang Seng Index, which gained 5.92 points Tuesday, surged 45.84 points to 2,868.00, or 1.6 percent.

Utilities rose 50.23 points, financials gained 21.93, industrials firmed 39.76 and properties closed up 102.19 points.

Volume amounted to 680 million shares, well below the 1 billion shares changing hands Tuesday.

Stocks closed higher in active trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which gained 9.06 points Tuesday, closed up 13.04 points to 1569.52, a new record.

The narrower All Singapore Index added 2.77 points to 432.80.

Volume amounted to 145 million shares, up from 128 million changing hands Tuesday.

In Australia, stocks closed slightly lower in light trading on the Sydney Sharemarket.

The All Ordinaries index, which lost 9.0 points Tuesday, slipped 0.9 points to 1689.7, for its third consecutive loss.

The All Industrials index fell 2.1 points to 2643.3 and the All Resources index eased 0.1 point to 962.8.

Volume amounted to 93 million shares, slightly above the 88 million shares changing hands Tuesday.

#90010u0839 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - The Justice Department planned to go to court Wednesday in an attempt to block The Gillette Co.'s acquisition of the razor blade business of Wilkinson Sword.

In a statement late Tuesday, Alison Smith, acting assistant attorney general in charge of the Antitrust Division, said the department intended to file a civil antitrust suit alleging that Gillette's acquisition would violate Section 7 of the Clayton Act ''because it may substantially lessen

competition in the sale of wet shaving razor blades in the United States.''

''The acquisition poses a significant threat to competition in the wet shaving razor blade market in the United States,'' Smith said. ''Gillette is the dominant supplier of razor blades in the United States. This acquisition would eliminate one of only four other suppliers of blades and would further increase Gillette's dominant share.''

''As a result, there would be a significant risk of American consumers facing higher prices for razor blades in the future. The antitrust laws do not tolerate such a loss of competition,'' Smith said.

Until recently, Wilkinson Sword was owned by the Swedish company Stora Kopparsbergs Bergslags AB. In a leveraged buyout partially financed by Gillette, Stora sold Wilkinson Sword's worldwide operations to a Netherlands corporation, which in turn agreed to sell Wilkinson's non-European Community business to Gillette.

The Justice Department statement said Gillette of Boston, Mass., is the leading seller of wet shaving razor blades in the United States and most other areas of the world. Wilkinson Sword of Atlanta, Ga., is the fourth- or fifth-largest seller of wet shaving razor blades in the United States. Gillette and Wilkinson Sword are two of only five suppliers of wet shaving razor blades in the United States.

Gillette sold about half of all wet shaving razor blades in the United States in 1988, which accounted for about 65 percent of the estimated $700 million U.S. consumers spent for wet shaving razor blades that year, the department said. Wilkinson sold about 3 percent of the razor blades sold in the United States in 1988, which accounted for about $7 million in consumer sales.

#90010u0854 01/10/1990 ~United Press International

BONN, West Germany (JAN. 10) UPI - West German Chancellor Helmut Kohl Wednesday criticized East Germany's Communist Party but said he would not give in to demands for the cancellation of a meeting with East Germany's communist prime minister, Hans Modrow.

He also said he was likely to travel to Moscow for talks with Soviet leader Mikhail Gorbachev later this year.

Addressing his first news conference of the year, Kohl said opposition parties in East Germany were not given equal opportunities in preparing for spring elections - the first free ballot since the East German state was formed 40 years ago.

But he said his government would continue to talk with both the East German government and opposition movements in a bid to support the current reform process.

He said East Germans ''opened the door to freedom and democracy with their peaceful revolution and want this process to continue.''

''I therefore will stick to the talks with Modrow, planned for early February. They will offer an opportunity to discuss among others the problems that are currently cropping up,'' he said.

Kohl's remarks coincided with growing criticism in both Germanys of the East German Communist Party, which has been accused of manipulating its control of the government to gain electoral advantages.

Several leading West German politicians have urged Kohl to cancel his invitation to Modrow, claiming it could be construed as support for the Communist Party - called the Socialist Unity Party of Germany, or SED.

At the news conference, Kohl took up a claim by East German opposition groups that the SED was trying to form a new secret police force to replace the once-feared National Security department that is currently being disbanded.

''Whoever considers it a priority to form a new state security service under new clothing - as the SED does - ignores the interests and hopes of the people'' in East Germany, he said.

He said it was essential the East German authorities draft a new electoral law that is supported by the opposition, adding, ''This approval is essential.''

''This means giving all political parties equality in the election process involving, for example, unlimited access to the press and television,'' Kohl said.

But, answering a question, he said that ''from everything I have heard from opposition groups about their access to the media, equality in the electoral process has not improved.''

He said his government's policies would be aimed at supporting the stable development of reform in the Soviet Union and Eastern Europe, and added ''its success is in the interest of all of Europe.''

Asked whether he intended to travel to Moscow this year for talks with Gorbachev - whom he last met in Bonn in June - Kohl said this was ''essential and probable.''

''Our relations with the Soviet Union remain for us of major importance, he said.

He also said he was confident that President Bush and Gorbachev would pave the way at the next summit in June for the completion of a treaty regulating the halving of U.S. and Soviet strategic nuclear potentials.

#90010u0882 01/10/1990 ~United Press International

MINNEAPOLIS (JAN. 10) UPI - Norwest Corp., a major bank-holding company in the Upper Midwest, has announced a tentative agreement that could lead to its purchase of First Minnesota Saving bank, the second largest savings and loan association in Minnesota.

Norwest said Tuesday its proposal is subject to approval by officials of both companies and also by regulatory agencies, including the Federal Reserve Board.

Norwest will conduct a detailed review of the thrift, which does not meet recently adopted capital requirements set by Congress as part of the bailout of troubled savings and loan institutions.

Banking analysts predicted approval of the deal, which would cost Norwest at least $100 million over five years and keep First Minnesota solvent.

First Minnesota operates subsidiaries in home mortgages, insurance and full service brokerage and has 50 banking locations in Minnesota with 1,149 employees. It has assets of $3.2 billion but has a negative net worth of $4.6 million but its financial condition is considerably stronger than that of Midwest Federal Savings and Loan, which has been taken over by the federal government and is at least $800 million in debt.

Norwest has assets of $24 billion and offices in 47 states with 16,200 employees.

Although First Minnesota does not face immediate government intervention, it is required to raise about $100 million in additional capital by the end of 1994 to meet the new regulations governing the amount of equity an institution must hold in reserve against potential losses.

EDENTON, NC (JAN. 10) UPI - At least 70 children suffered sexual abuse at

a day-care center where 375 charges have been filed against seven people, including the facility's owners, a prosecutor says.

Robin Boles Byrum, 19, of Edenton was the latest person arrested in connection with the Little Rascals Day Care Center. She was charged Tuesday with 11 counts of taking indecent liberties with a minor, eight counts of first-degree sex offense and one count of crime against nature.

Byrum, who is jailed on $500,000 bond, along with the other defendants also is charged with conspiracy to commit indecent liberties. Two men and five women from Chowan County have been charged in the case.

A grand jury has returned the indictments against the defendants facing a total of 375 charges in the case, said District Attorney H.P. Williams Jr.

The indictments involved multiple charges and abuse of six children not previously included in earlier indictments, but more information about Monday's charges could not be released until all the defendants were served warrants, he said.

The children involved have been referred to therapists since the investigation began last January.

''Based on the assessments of these children by their therapists, over 70 children aged 2 through 7 have been abused in some way,'' court documents in Chowan Superior Court said.

Darlene Harris, 25, previously indicted on three sexual abuse charges, was arrested Monday and charged with one count of conspiracy to take indecent liberties with a minor and two counts of taking indecent liberties. Her bond was set at $75,000.

Williams, in the bond hearing, said Harris had taken photographs of adults participating in sexual acts with children at the Little Rascals day-care center. He requested a high bond because he said the children were threatened by their tormentors.

One mother whose child attended Little Rascals told Williams that her child said, ''Mommy, I can't tell you what happened or I'll die.''

Those indicted in the case include William Scott Privotte, 40, who faces 13 charges; former day care center owners Robert Kelly Jr., 41, who faces 152 charges, and his wife, Elizabeth Kelly, 34, who faces 19 charges; two former employees Katheryn Dawn Wilson, 23, and Shelley Alyce Stone, 34. Wilson faces 19 charges and Stone, nine.

Monday's indictments named Harris, Privotte, the Kellys, Wilson, Stone and an unnamed suspect.

Stone was released on a $375,000 bond but the others remained in jail Monday.

#90010u0932 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - President Bush is riding high in the polls with Americans and Panamanians in the aftermath of the invasion of Panama.

But there is some fallout in Central and South America where the fears of Yankee domination and gunboat diplomacy were revived with the sending of U.S. troops to Panama.

American officials have been passing the word that the leaders of the Latin countries were really happy with the move, although they took face saving votes in the Organization of American states deploring the U.S. actions.

Nevertheless, there is a strong feeling on the part of those sovereign states that the United States considers the Western Hemisphere its private domain.

Bush went out of his way at a news conference last week to begin mending fences, and plans to dispatch Vice President Dan Quayle to the region later this month to smooth out relations.

''I want to assure all of the countries of Latin America that United States policy remains one of a friendly, supportive and respectful neighbor,'' the president said at a news conference last week. ''We have worked hard and intensively to consult bilaterally and multilaterally with Latin America, and we will continue to do that.''

Bush said he would be ''personally involved'' in winning the Latin American countries back into the fold.

''I am determined not to neglect the democracies in this hemisphere,'' he said.

The problem immediately in the aftermath of the Panamanian intervention is

the pursuit of the anti-drug war off the coast of cocaine-growing Colombia. Two warships the United States dispatched to the Atlantic last week, apparently destined for Colombia, are in a holding pattern now that Colombia President Virgilio Barco has protested the move.

Bush's unilateral military move also may be giving Nicaragua's Daniel Ortega and Cuba's Fidel Castro the jitters. Senate Republican leader Robert Dole has warned Ortega that to be aware of what could happen if a fair election is not held in Nicaragua on Feb. 15. The statement was viewed as an implicit threat, but Dole explained that he only meant that the Nicaraguan people would rise up against Ortega if the election were manipulated.

''I am well aware of how our friends south of the border look at the use of American force anywhere,'' Bush told reporters. ''So I am concerned about it.''

He said he thought the damage could be repaired because he had consulted with the South American leaders extensively and had exhausted diplomatic remedies before resorting to force.

''But given the history of the use of U.S. force,'' he said, ''I would be remiss if I didn't face up to the problem that we must go forward diplomatically now to explain how this president looks at the protection of American life (his reason for taking the action after a soldier was killed in Panama) ... that we acted, in our view, well within our rights.''

U.S. officials insist that the Panama situation is ''unique'' and not a pattern. Bush also said he has to get the Latin leaders ''to understand that this isn't a shift away from what some had termed excessively timid diplomacy.''

The president, meanwhile, is determined to go to the Andean drug summit in Cartegna, Colombia, on Feb. 15 despite Colombia's ire over the Panamanian invasion and in spite of the warnings of the dangers involved in a country where drug cartels have declared war on the government with almost daily bombings.

With European nations becoming more cohesive and independent, that continent will become more remote for U.S. goods and opportunities. A closer relationship with Latin America is imperative and will take a revival of the good neighbor policy to put relations back on track.

#90010u0949 01/10/1990 ~United Press International
(JAN. 10) UPI - The crew of the shuttle Columbia is preparing a Navy relay station for launch this morning to complete a military communications network. As it's launched, the Syncom F-5 will roll out of the shuttle's cargo bay like a giant Frisbee.

Columbia's next task is recovering a satellite for return to Earth. Commander Daniel Brandenstein and co-pilot James Wetherbee will take manual control and maneuver the ship within 35 feet of the satellite for the Friday space rescue.

The Chinese government today formally announced the lifting of martial law in Beijing. The move is the first major conciliatory gesture by China since its brutal crackdown in June of the pro-reform movement.

Chinese sources and Western diplomats say the change is largely cosmetic. The capital remains under tight security. However, one Western diplomat said the lifting of martial law will ''present a better image'' to the world.

Romanians are showing they have long memories after 25 years of repressive rule under deposed President Ceausescu. A Romanian newspaper reports that citizens are lynching or shooting officials connected to his ousted regime.

Army officials say more than two-thousand paratroopers who particiated in the invasion of Panama will return to Fort Bragg, North Carolina, on Friday the same way they arrived in the Central American country- by parachute.

The U-S-installed government of Panama is having trouble gaining credibility with its neighbors. President-elect Callejas of Honduras snubbed Panama by refusing to invite Panamanian President Endara to his inauguration.

President Bush denounced as ''hideous'' last month's bombings that killed a civil rights attorney in Georgia and a federal judge in Alabama. Bush issued a statement saying his administration will not stand for racial intolerance.

-30- 2012

#90010u0963 01/10/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 10) UPI - Mobs hungry for revenge after 25 years of repressive rule under dictator Nicolae Ceausescu are lynching or shooting officials connected to his ousted regime, a Romanian newspaper said.

The report Tuesday came a day after the start of military trials of members of Ceausescu's secret police, accused of killing hundreds and perhaps thousands of people during last month's pro-democracy revolution.

The Bucharest newspaper Adevarul said vigilante groups are taking justice into their own hands in some areas of the country, lynching or shooting former provincial and security officials and terrorizing members of their families.

''A lot of executions are taking place without trials,'' the newspaper said. ''These are horrible things that remind us of the dictatorship.''

Adevarul said the attacks were ''absolutely contrary to the democratic climate established in our country.''

''Any other act of judgment (other than the government's) is against the law and results only in causing panic in society,'' the newspaper said.

State-run television showed excerpts of the trial of a major in the Securitate, or secret police, charged with attempted murder in the

wounding of a soldier. The broadcast said the major was convicted and sentenced to nine years in prison.

A secret military tribunal convicted and executed Ceausescu and his wife, Elena, Dec. 25 for genocide, corruption and anti-state offenses. The government has since abolished the death penalty.

It remains unclear how many people are facing trial for crimes linked to the Ceausescu government. It also is unknown how many Securitate members remain at large.

Western diplomats said the remaining Ceausescu loyalists are believed to pose little threat to the new government except possibly for individual acts of terrorism.

Fighting ceased almost immediately after the government announced that Ceausescu had been executed. Western sources estimate about 7,000 people were killed since the first outbreak of violence Dec. 16 in the western city of Timisoara.

Romania's interim government appealed for calm in a nationally broadcast statement, urging Romanians to avoid acts of violence.

In Zurich, Swiss lawyer Moritz Leuenberger said Wednesday he has been asked by the new Romanian government as well as by Romanian exiles to track down funds reportedly deposited in Switzerland by Ceausescu.

Leuenberger, a member of Parliament for the socialist party, declined to comment further.

Exile groups claim Ceausescu stashed up to $400 million in Swiss bank accounts, including large quantities of gold transferred in the last weeks before his death. The Swiss government ordered banks to freeze Ceausescu family accounts just before Christmas.

A spokesman at the Romanian embassy in the Swiss capital of Bern said that Bucharest will soon formally ask Switzerland for legal assistance in tracing and securing the return of Ceausescu funds.

Under Switzerland's banking secrecy laws, only the courts can order banks to turn over information about accounts, a process that can take years.

Also Wednesday five Romanians wounded during demonstrations arrived aboard a specially chartered French Air Force plane and were admitted to state hospitals for treatment.

#90010u0988 01/10/1990 ~United Press International
NEW YORK (JAN. 10) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.50-73.50 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 123.95 c-lb.

Lead, common, U.S. primary producers 38.00-40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $4.21-$4.40 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $131.00-135.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $490.00-$493.00; dealer-approx., $472.00-$480.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.00 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 326.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

#90010u0999 01/10/1990 ~United Press International
WASHINGTON (JAN. 10) UPI - The Supreme Court ruled 5-4 Wednesday that a federal judge went too far in ordering members of the Yonkers, N.Y., City Council to change their vote to enact a minority housing plan.

In an opinion by Chief Justice William Rehnquist, the court said the lower court order was an abuse of discretion and the judge should have instead first tried fining the city before the individual council members.

However, the court left open the possibility that such individual fines could eventually be assessed against the councilmen. Rehnquist wrote that only if the fines against the city failed should fines against the councilmen be considered.

In writing for the court, Rehnquist said the issue was ''relatively narrow. There can be no question about the liability of the city of Yonkers for racial discrimination: The district court imposed such liability on the city, its decision was affirmed in all respects by the court of appeals, and we (refused to review it).''

However, Rehnquist said threatening the individual members of the council with fines if they did not change their vote and enact a minority housing plan ''effects a much greater perversion of the normal legislative process than does the imposition of sanctions on the city for the failure of these same legislators to enact an ordinance.''

''The imposition of sanctions on individual legislators is designed to cause them to vote, not with a view to the interest of their constituents or of the city, but with a view solely to their own personal interests,'' Rehnquist said.

Nonetheless, Rehnquist refused to rule out such fines against individual members in the future.

He said the lower court should proceed with sanctions first against the city and ''only if that approach failed to produce compliance within a reasonable time should the question of imposing contempt sanctions against (the councilmen) even have been considered.''

Rehnquist was joined in his ruling by the conservative wing of the court made up of Justices Byron White, Sandra Day O'Connor, Antonin Scalia and Anthony Kennedy.

In dissent, Justice William Brennan, joined by Justices Thurgood Marshall, Harry Blackmun and John Paul Stevens, said that given the city's ''consistent defiance'' the lower court judge's sanctions against the councilmen was a ''sensible approach.''

''The court's contrary judgment rests on its refusal to take the fierceness of the councilmembers' defiance seriously, a refusal blind to the scourge of racial politics in Yonkers.''

Brennan said he worried that the court's ''message will have the

unintended effect of emboldening recalcitrant officials continually to test the ultimate reach of the rememdial authority of federal courts, thereby postponing the day when all public officers finally accept that 'the responsibility of those who exercise power in a democratic government is not to reflect the inflamed public feeling but to help form its understanding.''

The case stems from attempts to end segregated housing in the city of Yonkers. In three combined cases, four members of the city council sought reversal of a ruling by the 2nd U.S. Circuit Court of Appeals that ordered them to change their vote and approve a desegregation plan or face fines of $500 a day.

In the twisted, long-standing dispute, the city had originally agreed to remedy the city's practice of racial discrimination in public and subsidized housing but then tried to back out of the agreement. The courts ordered fines against both the city and members of the council.

The massive fines against the city, which reached $1 million a day before the council gave in and approved a housing plan, were upheld but the Supreme Court stayed the sanctions against the council members and accepted the cases for review.

The federal government argues that the council members ''obstructed the city's compliance with the district court's orders to remedy illegal racial segregation of the city's public and subsidized housing.''

''This pattern of disobedience is precisely the type of conduct that traditionally has warranted the considered exercise of a court's civil contempt powers.''

Attorneys for Councilman Peter Chema, however, argued that a court is obliged to use the least intrusive means to effect remedial measures.

''Here, the district court took the most constitutionally intrusive course of action by ordering Councilman Chema how to vote, thereby unnecessarily depriving him of his First Amendment rights and his rights as an elected legislator, and infringing his constituents' right to unfettered political representation.''

#90010u1033 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - President Bush declared the Rio Grande Valley of Texas a disaster area Wednesday, ordering federal aid to help farmers recover from a severe winter freeze that struck just before Christmas.

Officials estimate the freeze caused about $385 million in damage to crops

agricultural businesses and lost wages. About 70 percent of the citrus crop remaining at the time was destroyed.

Rio Grande Valley farmers were just beginning to recover from the devastating 1983 freeze that destroyed 50,000 acres of citrus, and farmers now are saying this winter's freeze was worse.

A White House statement said the aid will cover unemployment compensation for lost jobs directly related to the freeze, which struck Dec. 21 in Cameron, Hidalgo, Starr and Willacy counties.

The aid is being coordinated by the Federal Emergency Management Agency.

#90010u1081 01/10/1990 ~United Press International

LAS VEGAS, NV. (JAN. 10) UPI - Mike Tyson has agreed to defend his heavyweight championship against top-ranked contender Evander Holyfield June 18 for a payday of about $22 million, Holyfield's promoter said.

Dan Duva, who has promoted all of Holyfield's 23 professional bouts, said he reached agreement with Tyson's promoter Don King Wednesday night after a six-hour meeting at Las Vegas.

Duva said Tyson will receive two-thirds of the purse and Holyfield one-third, although the challenger has been guaranteed $11 million. Promoters are projecting the fighters will share between $35 million and $40 million from closed circuit, pay-per-view and other income.

Donald Trump's Taj Mahal in Atlantic City, N.J., is the leading contender to land the fight. Caesars Palace and the Mirage Hotel and Casino in Las Vegas, Nev., are the other likely sites. A group from Japan, where Tyson will defend his title against Buster Douglas Feb. 11, is also interested in staging the fight in Tokyo.

Tyson is 37-0 with 33 knockouts. Holyfield is 23-0 with 19 knockouts.

WASHINGTON (JAN. 10) UPI - Vice President Dan Quayle, stressing consultation and outreach, said Wednesday his plans were nearly complete for a diplomatic mission to Latin America ordered by President Bush.

Although details were not announced, an administration official said Quayle was unlikely to visit Colombia as part of the journey, but probably would travel to Panama.

Touching on his trip to Latin America, requested by Bush after an acknowledgement last Friday that relations with some southern neighbors had been harmed by the Dec. 20 U.S. invasion of Panama, Quayle denied the visit would be conciliatory.

''It's not a fence-mending mission,'' he said at a photo opportunity with the Japanese minister of trade and industry, Mikaru Matsunaga. ''It's a mission of consultation. We have many strong friends and supporters in our hemisphere and we're going to go and visit with them on a mission of democracy and freedom, a mission of consultation and a mission of listening to what they have to say.''

The official, who asked not to be identified, said Quayle would probably not travel to Colombia because Bush was already scheduled to go there Feb. 15 for a previously planned hemispheric drug summit in Cartegena with the heads of Colombia, Peru and Bolivia. Likewise, the official said it was unlikely the vice president would need to travel to Peru or Bolivia.

Quayle, however, probably will travel to Panama to boost the new government of President Guillermo Endara, who took over when American troops invaded Dec. 20 and ousted strongman Manuel Noriega, the official said.

More than 20,000 U.S. troops remain in Panama.

There are no plans for Bush to travel to Panama, the official said.

Quayle's itinerary will likely be broken into two trips, lasting a little more than a week, the official added.

The mission, for which he postponed a trip to Europe in early February, will likely include a previously planned inaugural trip to Honduras and comes amid controversy over the U.S. use of warships off Colombia to

combat cocaine traffickers.

Word of the impending naval maneuvers leaked last week, apparently before Washington had discussed it with the government of Colombian President Virgilio Barco, and ignited a storm of protest in Colombia.

In announcing that he was dispatching Quayle on the diplomatic mission, Bush told reporters Friday that he was concerned about relations with Latin America.

''I am well aware of how our friends south of the border ... look at the use of American force anywhere,'' he said. ''(But) I think it's something that's correctable.''

GENEVA (JAN. 10) UPI - Documents giving details of torture, executions and mass graves in Iran were presented Wednesday by Iranian resistance officials to the head of a U.N. investigation into human rights violations in Iran.

The eight documents named 653 prisons and ''torture centers'' in Iran and the identities of 1,786 persons accused by the resistance of being torturers. They gave the locations of 30 mass graves around Tehran and reprinted official Iranian reports on the execution of 1,200 prisoners in 1989.

Kazem Radjavi, a representative of the National Council of the Iranian Resistance, said the execution of political prisoners is often ''camouflaged'' by calling them drug traffickers to avoid foreign condemnation.

One document said there are about 110,000 political prisoners in about half of the known prisons, meaning that the total must be substantially higher.

Radjavi and resistance movement spokesman Behzad Naziri presented the documents to Reynaldo Galindo Pohl, appointed by the U.N. Commission on Human Rights to lead an on-the-spot inquiry in Iran.

The investigation team was to have flown to Tehran Wednesday but U.N. sources said the Iranian government demanded a postponement to prevent a report being prepared in time for the Commission's annual session Jan. 29 to March 9.

Iran, meanwhile, said it executed another 31 people, including three women and four Afghan nationals, after Islamic revolutionary courts convicted them of trafficking in narcotic drugs.

The official Islamic Republic News Agency of Iran said 10 of those hanged were members of an international ring of traffickers who had set up a distribution network in the Middle East, mainly in Iran and Turkey.

The agency did not name the traffickers, but said 23 were hanged in the Qezel Hasar Prison in Karaj, about 25 miles west of Tehran, and the remaining eight were sent to the gallows in Shiraz, Sabzevar and Saveh.

The latest execution brought to at least 1,294 the total number of people Iran said were hanged for drug trafficking in Iran since January 1989, when Tehran's ruling clerics launched their latest campaign to stamp out the illicit drug trade.

#90010u1151 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - U.S. female soldiers who saw combat in Panama will not be awarded the coveted Combat Infantryman's Badge because Army policy prohibits women from serving in the infantry, the Army confirmed Wednesday.

Many of the 600 U.S. women soldiers stationed in Panama and the 170 that were sent in with the Dec. 20 invasion forces were assigned to military police units - not infantry groups.

And because of that, the women soldiers who saw action in Panama are not eligible for the Combat Infantryman's Badge.

''Women are not authorized to serve in infantry positions,'' Army spokesman Maj. Joe Padilla said, citing Army policy that does not allow women into combat positions.

He emphasized, however, that male soldiers who served in non-infantry positions also would be denied the infantryman's badge.

Women soldiers who exhibited bravery under fire are eligible to receive the nation's highest military honors - the Bronze Star, the Silver Star, the Distinguished Service Cross or the Medal of Honor, Padilla said.

In addition, he said, women soldiers who saw action in Panama will be allowed to shift the arm patches on their uniforms that establish the unit they serve in from their left to the right sleeve, which denotes they were in combat.

FRANKFURT, WEST GERMANY (JAN. 10) UPI - A boom spurred by exports, investment, and the influx of East European refugees resulted in the largest growth rate of the West German economy in the past ten years, an official report said Wednesday. The West German Gross National Product grew by four percent in 1989 in real terms, the official Bureau of Statistics said.

"All national and international commentators were united and positive, partially euphoric, at the turn of the year about the economic situtation in West Germany," West German Chancellor Helmut Kohl told his first news conference of the new year.

"The main reasons for the positive economic developments were foreign demand and lively investment," Egon Hilder, President of the Bureau of Statistics, said.

Exports of goods and services grew by more than ten percent in real terms, the largest increase since 1974. West Germany registered a $47.80 billion balance of trade surplus in 1989.

Investment increased by almost seven percent, including major growth of capital investment in both construction and equipment, the report stated. Hitting its highest level since 1981, fixed investment accounted for 21.3 percent of overall GNP, it said.

Hilder noted three other factors influenced the economic boom in West Germany: the mild weather which permitted early construction activity, high foreign interest rates and the entry of hundreds of thousands of refugees.

Last year 720,000 East Germans and East Europeans moved to West Germany. In addition, almost 14 million visitors from East Germany came to West Germany in the fourth quarter of 1989. "Without these special influences, our national product would probably have grown by only three percent" Hilder said.

WASHINGTON (JAN. 10) UPI - Major U.S. banks were exposed to more than $224.5 billion worth of debt from foreign countries during the third quarter, with the United Kingdom and Japan topping the list of borrowers, the Federal Reserve said Wednesday.

By the end of the third quarter, the United Kingdom owed U.S. banks $32.4 billion, followed by Japan's debt of $21.6 billion. The combined debt owed U.S. banks by the ten largest industrialized nations, plus Switzerland, totaled $95.2 billion.

Members of the Organization of Petroleum Exporting Countries had combined borrowings at the end of the third quarter of $12.8 billion, led by Venezuela at $7.4 billion.

Among the developing non-oil exporting nations in Latin America and the Caribbean, Brazil led with borrowings of $18.1 billion, followed by Mexico at $16.2 billion, the Fed reported. The combined debt exposure of developing nations in region totaled $48.7 billion.

The debt exposure of non-oil exporting developing Asian nations totaled $15.2 billlion, led by South Korea with loans of $4.1 billion and the Philippines at $3.6 billion.

Non-oil exporting developing African nations owed U.S. banks a combined total of $1.6 billion, led by Morocco at $618 million.

WARSAW, POLAND (JAN. 10) UPI - An explosion ripped through a Silesian coal mine Wednesday, killing at least seven miners and injuring 22, the Polish news agency PAP said.

Six men were found dead at the scene, more than 3,000 feet underground at the ''Halemba'' pit at Ruda Slaska near Katowice, 180 miles south of Warsaw, the agency said. A seventh later died in a nearby hospital.

PAP said rescue teams rushed to the site of the blast, which was possibly caused by a buildup of excess methane gas.

Most of the injured were burned and were being treated at specialist miners hospitals at Siemanowice and Bytom.

The manager of the pit told PAP that 42 miners were working in the area of the pit where the blast occured and that all were accounted for. He said an inquiry would be held to determine the cause of the explosion.

BOGOTA, COLOMBIA (JAN. 10) UPI - A congressman was seized by armed men in what may have been the latest in a string of kidnappings blamed on cocaine traffickers, authorities said Wednesday.

Foreign Minister Julio Londono also called on the United States to conduct anti-drug operations in U.S. territory following an announcement by the Bush administration it would not use military ships to intercept cocaine off the Colombian coast.

Congressman Mario Silgado Romero, a member of the governing Liberal Party, was kidnapped Tuesday in a rural area of the state of Sucre on the Caribbean coast as he was driving to his ranch, Gov. Arturo Martinez said.

The Silgado Romero kidnapping came as the commander of the secret police, Gen. Miguel Maza, reported that drug traffickers had received nearly $460,000 in ransom for kidnap victims.

Maza, in an interview with the magazine Semana distributed Wednesday, said the Medellin cartel of cocaine traffickers was using kidnapping ransoms to finance terrorist activities.

However, no group claimed responsibility for Silgado Romero's abduction and communist guerrilla groups also are known to kidnap wealthy Colombians as a way to raise funds. Ranchers said Wednesday that 225 rural businessmen and ranchers had been kidnapped in Colombia.

''Police are trying to locate the people who yesterday kidnapped the legislator,'' Martinez said.

Londono reaffirmed his nation's willingness to cooperate in the war on cocaine traffickers Tuesday night after the United States announced it would not conduct maneuvers off the Colombian coast intended to intercept

planes and ships carrying illegal drugs.

News reports of the proposed exercises had touched off a storm of controversy, with Colombians viewing the action as a threat to national sovereignty, especially after the U.S. invasion of Panama.

''We have indicated that the government of Colombia believes that it is not its role to authorize, nor has it authorized, nor could it authorize any type of naval or air maneuvers in its territorial sea,'' said Londono.

''And it believes that it is pertinent that the United States exercise control within its own juridiction.''

He said Colombia ''does not need demonstrations in order to show it is fighting in an evident and untiring manner against narcotics trafficking.''

Police also said Wednesday night they had captured an alleged cocaine trafficker who fled from Florida after he was released on bail.

Joaquin Oswaldo Gallo Chamorro had been jailed in Miami in 1988, accused of smuggling a ton of cocaine into the United States, police said.

Gallo Chamorro, 41, who is linked to the Medellin cartel, was allowed out of jail on bond in Florida and subsequently fled the country, police said.

The Justice Ministry has asked the U.S. Embassy for information on Gallo Chamorro for possible extradition to the United States, officials said. In 1989, 11 suspected drug traffickers were extradited to the United States from Colombia.

WASHINGTON (JAN. 10) UPI - President Bush will travel next Friday to Atlanta for a speech to the National Association of Home Builders, followed by a trip to Miami to tour the Everglades and attend a fund-raiser for Florida Gov. Bob Martinez, the White House announced Wednesday.

White House spokesman Roman Popadiuk said the president was tentatively scheduled to address the home builders group in Atlanta at 11:30 a.m. EST.

In Miami, the spokesman said, Bush planned to first travel to the Everglades National Park for a tour and briefing before attending the evening fund-raising reception and dinner for the Republican Florida governor.

Bush then planned to head directly to the presidential retreat at Camp

David, Md., for the weekend.

#90010u1234 01/10/1990 ~United Press International
(JAN. 10) UPI - The five-member crew of the shuttle Columbia successfully launched a Navy communications satellite this morning... sending the drum-shaped relay station into a preliminary orbit like a giant Frisbee. Astronaut David Low launched the Syncom F-5 satellite... setting the stage for a rocket firing later to boost the relay station toward its final orbit 22-thousand 300 miles over the equator. Columbia's next challenge is snaring an orbiting satellite with its 50-foot arm on Friday and bring it back to Earth.

China's official news agency credits stability and the return of social order for the Chinese government's decision to lift martial law in Beijing. China imposed martial law last May as protests by students in central Beijing demanding reform shook the communist government until it ordered the army to clear Tiananmen Square. The resulting action left hundreds, and perhaps thousands of students slain and cost BILLIONS of dollars in foreign investment.

Tens of thousands of Lithuanians turned out for demonstrations on the eve of Soviet President Gorbachev's visit to the maverick Baltic republic. The Soviet leader's trip is intended to stem a break-away by Lithuania's Commmunist Party, which declared its independence last month. One Lithuanian citizen said ''Gorbachev thinks only a small part of our people want freedom. Let let him come here and see that all of us want to leave the Soviet Union.''

After a White House meeting yesterday with N-DOUBLE-A-C-P Executive Director Benjamin Hooks, President Bush strongly condemned last month's bombings that killed a civil rights attorney in Georgia and a federal judge in Alabama. Bush says he's outraged by the recent bombings, obscene phone calls and hate mail received by N-double-A-C-P offices nationwide since the attacks. The president pledged that his administration will NOT allow racial intolerance.

-30- 2074
#90010u1237 01/10/1990 ~United Press International
(JAN. 10) UPI - Manuel Noriega is staying in a Miami jail for the time being... thanks largely to an order by a federal judge who says he must be informed of any intention to move the deposed Panmanian dictator. The judge issued the order to assure Noriega's lawyers that they would have access to their client. A published report says the federal government was going to move Noriega to one of three more secure federal penitentiaries... either in Atlanta... Leavenworth, Kansas... or Marion,

Illinois.

A United Nations spokesman and Israel Radio are reporting that Israeli artillery units shelled targets in south Lebanon today for the second day. The U-N spokesman reported NO injuries or damage in the shelling on what Israel called ''terrorist positions.'' Israel Radio quoted Lebanese sources as saying yesterday's shelling near Syrian positions killed two people and injured 16.

Oregon Governor Neil Goldschmidt declared an emergency on Oregon's north coast last night. Four days of torrential rains have pushed rivers over their banks, flooding several small towns and forcing dozens of people to flee their homes. Officials say the town of Seaside had six and one half inches of rain in a 24-hour period... and Astoria had nearly five inches. The rains closed Highway 101 near Seaside and stranded the community hospital.

A published report qutoes Olympic gold medalist Carl Lewis as saying he's ''sure'' Ben Johnson took an amphetamine the day he beat Lewis in the 100-meter dash at the 1988 Seoul Olympics. Lewis also told the newspaper that he believes Johnson is still taking anabolic steroids. Johnson's attorney denied the charge. Johnson's steriod use cost him a world record in the 100 meters, as well as the gold medal.

#90010u1281 01/10/1990 ~United Press International

DETROIT (JAN. 10) UPI - A top executive of Saturn Corp. said Wednesday that parent company General Motors Corp. will see a return on its multi-billion dollar investment in the small-car subsidiary within three or four years.

Donald W. Hudler, vice president of sales and marketing for Saturn, also said the bulk of its cars, to start appearing in showrooms this fall, will be priced in the $10,000 to $12,000 range - refuting reports that GM's highly touted small-car project had moved into the $14,000-$18,000 price range to compete with cars like Honda's Accord.

Hudler, speaking at the Automotive News World Congress, said some Saturn models would even be priced below that range and compete with subcompacts like Honda's Civic and Toyota's Corolla.

The pricing and profit expectations will be closely watched as Saturn comes to market because top U.S. carmakers have been unable in recent years to domestically build a small, relatively inexpensive car profitably - hence the many partnerships and import arrangements with Asian carmakers.

Hudler said GM has spent about $1.9 billion for its Spring Hill, Tenn.,

plant, at which more than 3,000 workers are expected to be producing 240,000 cars on two shifts by the early 1990s.

But GM's overall investment is closer to $5 billion when the total program is considered, he acknowledged.

''We've not lost our way,'' Hudler said. ''We're still on track.

Also watched closely will be how much added business Saturn will mean for GM, or whether it will steal sales from Chevrolet and Pontiac.

Hudler also said Saturn will not attempt to distance itself from GM, which has seen its market share slide in recent years.

''But the focus will be on Saturn,'' he said, noting Saturn ''is positioned as a separate kind of company that has a high degree of autonomy.''

Saturn, first announced by GM in 1983 as its ''clean-sheet approach'' to building a small car domestically and competitively with Japanese automakers, will open with more than 90 dealers in 115 major markets across the country, he said.

It expects to have as many as 400 Saturn stores by 1992 or 1993, with that number growing to about 800 outlets by the mid-1990s. Dealers are to operate more than one sales and service facility in a specific marketing area.

Initially, Saturn expects to build under 120,000 coupes and sedans in its first year as it accelerates production levels toward the 240,000 unit capacity at its Spring Hill plant, now 90 percent complete.

''We are developing a family of cars that are already well along,'' Hudler said, adding that new models will appear in Saturn dealers by 1995 and that Saturn is striving to get its product redesign cycle under three years.

As reported earlier, workers at the Spring Hill plant will operate on a four-day, 10-hour week, said John Michaud, a United Auto Workers union official and adviser to Saturn.

An interim contract with the UAW, separate from the national labor pact GM has with the union, is now in effect at Saturn. It will come up for formal ratification one year after the first car goes on sale, Michaud said.

#90010u1291 01/10/1990 ~United Press International

PULASKI, TN (JAN. 10) UPI - The Ku Klux Klan vowed Wednesday to assemble at Pulaski this weekend despite the orders of a federal judge and state police canceled leaves and holidays to prepare for a confrontation.

''We're Americans and we've got the right to be in Pulaski ... or wherever we want to be,'' said Scott Shepherd, chief of the Knights of the KKK in western Tennessee. ''If the people of Pulaski don't like it, they can kiss our robes.''

Pulaski Mayor Hal Stewart, saying he fears violence, went to the state Capitol to deliver a letter to Gov. Ned McWherter asking him to send National Guard troops if needed.

Pulaski is the birthplace of the KKK and the Klan originally planned to parade there Saturday for the fourth year on the weekend the nation honors the late Martin Luther King Jr.

But Friday, U.S. District Judge John Nixon ruled the city could bar the march because it had already issued a parade permit for Saturday to Pulaski citizens for an anti-Klan rally.

Klan leaders then decided to assemble at Giles County High School in Pulaski and move on to neighboring Lawrenceburg to parade, but U.S. Magistrate Kent Sandidge ruled Tuesday the Klan is cannot assemble at the school because basketball games are to be played there Saturday.

''It is reasonble and constitutionally permissible for Giles County to prohibit a group from using its high school on the date for which another group has reserved the facility,'' Sandidge said.

Col. Larry Wallace, head of the Tennessee Highway Patrol, said all leaves and holidays have been canceled for troopers in the district that includes Pulaski and Lawrenceburg this weekend.

''We have taken steps to ensure that we are at maximum manpower levels in the Lawrenceburg and surrounding districts,'' he said. ''Just say it will be an adequate number for any contingency. We will be there. We will be available to assist local agencies in the event of an emergency.''

Stewart said Pulaski police will take action against Klansmen who gather at the high school, only 1 mile from the town square where the anti-KKK rally will be held.

''We'll either arrest them or issue citations,'' the mayor said. ''We're afraid if the two groups make contact there'll be violence. We're going to try to keep them away from each other.''

Shepherd also said the Klan plans a news conference Saturday outside the

Giles County Courthouse in Pulaski's public square where a statue of confederate hero Sam Davis stands.

''There's no law that says we can't hold a press conference,'' he said. ''That's just another example of the Giles County communist law that they're running down there.''

Last fall on the birthday of Davis, who was hanged in Pulaski by Union troops as a spy, about 500 white supremacists paraded one mile to the public square to lay a wreath at the foot of the statue. About 200 troopers in riot gear lined the parade route.

Citizens of Pulaski draped the city in orange, the international color of brotherhood, and many businesses closed in protest of the parade. City leaders then decided to hold a ''Brotherhood March'' Saturday to discourage the Klan from marching again.

SACRAMENTO, CA (JAN. 10) UPI - An animal collector wants to enter giant African frogs in California's annual Frog Jumping Jubilee, but a state ban against importing the 3-foot-long amphibians is in his way.

The African Goliath frogs are ''amphibia non grata'' in California, spokesman Lanny Clavecilla of the state Department of Fish and Game said Tuesday.

Andy Koffman of Seattle wants to enter 10 of the frogs - which are 3 feet long and weigh up to 12 pounds - in the Calaveras County Fair's Frog Jumping Jubilee.

The race was inspired by an 1865 story by Mark Twain, ''The Celebrated Jumping Frog of Calaveras County.''

The huge frogs worry fair directors. They're concerned the creatures might endanger the audience, and easily defeat - or even eat - their common bullfrog opponents in the 71-year-old jump scheduled in May.

Clavecilla said of Koffman's plan:

''Under the Fish and Game code, those species are considered undesirable and prohibited from import. He has to get the appropriate permits from the appropriate agencies ... and we wouldn't be inclined to issue them for that purpose.''

Koffman, who braved the crocodile-infested waters of Cameroon to collect the frogs, said Tuesday he wouldn't yield easily to bureaucracy.

ROCKY HILL, Conn. (JAN. 10) UPI - Ames Department Stores Inc. announced Wednesday plans to lay off about 85 employees and eliminating another 240 unfilled corporate positions in the face of expected losses for 1989.

The company said it expected to experience a loss for 1989 due to

insufficient fourth-quarter profits as a result of ''soft sales'' at the 315 Zayre stores acquired in 1988.

Ames spokesman Bill Roberts said the employees being laid off in the company's corporate offices in Rocky Hill and West Hartford were being offered severance packages and the company had set up a professional outplacement service to help them find new jobs.

''We're eliminating 325 positions but not all of them are filled positions '' Roberts said. ''Only about 85 people are actually being laid off.''

Ames President Peter B. Hollis said the company was undertaking the lay offs ''in a restructuring move designed to improve profitability.''

Hollis said the company was pleased with the holiday season performance of its original 375 Ames stores, which had a comparable-store sales gain of 5.8 percent.

But because of soft sales at the 315 Zayre stores acquired in 1988, the company no longer expected fourth-quarter earnings to be sufficient to show a profit for the year, Hollis said.

During the first nine months of 1989, Ames recorded a net loss of $22.6 million before an extraordinary charge, Hollis said.

''Our results were hampered by a soft economy particularly in the Northeast, and an intensely competitive holiday selling season,'' Hollis said.

''Our profit shortfall is due entirely to a sales shortfall at the acquired stores, despite a significant reduction in the Zayre historic expense level,'' Hollis added. ''The Ames stores continue to perform well.''

To improve profitability and in light of an uncertain economy, Hollis said the company was taking a number of actions following the completion of the integration of the Zayre organization with Ames.

On Dec. 28, Ames announced it was closing 15 stores, 14 of which had overlapping trade areas with existing stores, by the beginning of February.

''The closing date for most of the stores is Feb. 3,'' Roberts said. ''No additional store closings are planned.''

The company also was combining the merchandising and advertising for urban stores with the Ames buying organization and planned to change the name of the 61 remaining Zayre stores to Ames, officers said. Most of these stores were located in Chicago, Miami and in the Washington-Baltimore area,

officers said.

#90010u1308 01/10/1990 ~United Press International
MARSEILLE, FRANCE (JAN. 10) UPI - Two French drydock companies have offered to provide repair facilities for the damaged Iranian oil tanker Kharg 5, which spilled 70,000 tons of crude off the Moroccan coast, a company official said Wednesday.

Jean Guichet, president of la Compagnie Marseillaise de Reparation, said he responded favorably when contacted recently by the Iranian shipowner about repairing the 284,000-ton vessel. He said no decision had been made.

''Given our technical expertise, we seem better placed than our Moroccan, Spanish and Portuguese competitors,'' Guichet said.

If it wins the contract, CMR would cooperate with Sud-Marine, another drydock at the port of Marseille, Guichet said. He said it would take about a week for the Kharg 5 to be towed to Marseille.

The National Iranian Tanker Co. is looking for a drydock to repair the Kharg-5, which was damaged by an on-board explosion Dec. 19. The tanker still is under tow by tugs 200 miles off the Atlantic coast of Morocco.

The firm's director, Mohammed Souri, told the official Islamic Republic News Agency that the oil leakage had been ''completely controlled.''

Souri said rough weather still was hindering transfer of remaining 200,000 tons of crude still aboard the Kharg 5 to another Iranian tanker.

#90010u1353 01/10/1990 ~United Press International
WASHINGTON (JAN. 10) UPI - Backstairs at the White House:

Former administration aides say there may have been an easier way to get rid of Panama dictator Manuel Noriega without invading the Central American country.

Requesting anonymity, the Republican sources said that President Ronald Reagan was ready in 1988 to deal with Noriega, to pave the way for his exile to a third country, perhaps Spain, but Vice President George Bush and his campaign manager, James Baker, insisted on no bargaining with drug dealers while the presidential campaign was under way.

The sources said Bush and Baker were adamant and blocked any agreement that might have persuaded Noriega to leave the country. He then became a

major problem for Bush, as president, who had to deal with the problem during his entire first year in office.

Bush's recently widowed sister, Nancy Ellis, gets the credit for inspiring the series of lectures on past presidencies that were inaugurated by Bush.

Ellis is a neighbor in Lincoln, Mass., of Pulitzer Prize winning historian David Donald, a Harvard professor, who opened the series with a lecture on the intimate life of Abraham Lincoln in the White House.

The lecture played heavily on Mary Todd Lincoln's instability and shopping extravagances. Still, she evoked much sympathy in the audience. Barbara Bush said some of the tales of Mrs. Todd were agonizing.

As for the tribulations of Lincoln himself, she had the feeling that ''nothing has changed'' or ''the more it changes the more it is the same.''

White House aides and reporters stand in awe of the first lady who swims a mile each day in the president's heated outdoor pool in the dead of winter.

Bush is devoted to getting the exercise and like the postman, neither rain nor snow, nor sleet, can keep her from jumping into the pool for her one mile swim daily.

Her English spaniel, Millie, takes a shower with the president, but there's no indication she goes swimming with the first lady.

People traveling with the president are not adverse to picking up souvenirs. Those with Bush at Disney World in Orlando, Fla., bagged Mickey Mouse caps and salt water taffy.

On other trips, reporters have wound up with baseball-style caps from the USS Forrestal aircraft carrier and T-shirts from summit meetings, along with other historic memorabilia, even to the tags on their baggage, referring to the time and place of the presidential trip.

Vice President Dan Quayle, who oversees the nation's space program for the president, recalls where he was on July 20, 1969, when the Apollo space ship landed on the moon. In a recent speech, he told the Astronomical Society that he had just graduated from college and was in his Indiana

home with his parents ''awaiting word of my active duty assignment.''

Then with wry self-deprecation, he added: ''As some of you may have heard, I served in the National Guard.''

He referred to the 1988 presidential campaign when Quayle's service in the National Guard, rather than on active duty with one of the armed services, became a political issue after he was named to the No. 2 spot on the Republican ticket.

President Bush says he has not yet decided where he will locate his presidential library. But he has indicated it will be built in his adopted home state of Texas. That will give Texas two presidential libraries, including that of Lyndon Johnson in Austin.

California also will boast two presidential libraries when President Richard Nixon's library is dedicated in July and President Ronald Reagan's libary is build near Ventura, Calif.

#90010u1389 01/10/1990 ~United Press International

LONDON (JAN. 10) UPI - Stock prices closed lower in moderate trading Wednesday on the London International stock exchange.

The key Financial Times 100-stock index, which gained 5.0 points Tuesday, closed off 23.7 points to 2,412.6. The narrower top 30 industrial average lost 20.1 points to 1,936.6.

Volume amounted to around 449 million shares, compared with 563 million changing hands Tuesday.

Analysts said prices fell as investors took a second look at a government report late Tuesday that projected less consumer spending, lower company profits, and more corporate borrowing in the months ahead.

In addition, traders said, news of British Chancellor of the Exchequer John Major's warning of the impact that high wage claims would have on inflation, sent prices lower.

Following a meeting with leading union, industry and government representatives, Major told reporters inflation is the central problem facing the British economy and stressed the importance of getting it down ''significantly.''

He also said that interest rates will not come down until inflation has

started to fall.

Among the most widely traded stocks, Ferranti International Signal PLC added 5 cents to 61 cents a share amid hopes of a bid from Thomson CSF.

Wellcome PLC lost 26 cents to $12.12 amid worriers over a rival drug to the group's anti-AIDS drug, Retrovir.

British Aerospace PLC eased 8 cents to $9.10. The Financial Times said the company may be liable for 40 percent of the losses suffered by Airbus Industrie because of a nine-week strike at British Aerospace. The report said the strike is estimated to have cost the Airbus group $100 million.

Elsewhere in Europe, prices closed broadly lower in fairly active trading on the Frankfurt Stock Exchange.

The German Stock Index closed off 26.31 points to 1,839.63.

Traders said a Federal Statistics Office report showing West Germany's gross national product grew 4 percent in real terms in 1989, had little impact on the market.

The report was in line with most expectations.

#90010u1403 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - Four Massachusetts congressmen asked the government Wednesday to postpone a licensing decision on the Seabrook nuclear power plant, citing a new study revealing safety problems at the plant.

The lawmakers said a full-scale independent investigation should be completed before the Nuclear Regulatory Commission makes its final decision on granting a full-power operating license to New Hampshire Yankee, the owner of Seabrook Station.

In November, the NRC licensing board recommended a full-power license for the southern New Hampshire plant. The full commission has scheduled a Jan. 18 briefing on the matter.

The Massachusetts attorney general and several consumer groups have opposed the plant on safety grounds, including skepticism that neighboring Massachusetts communities could be evacuated safely in an emergency.

The report, conducted by the Quality Technology Co. at the request of the Employees Legal Project of New Hampshire, said that based on interviews with current and former Seabrook employees, it has concluded there are

safety concerns warranting a full-scale independent safety investigation.

The report said it identified many problems involving quality assurance and quality control, inaccuracies in operating procedures, equipment problems and inspection falsifications.

Massachusetts Democratic Reps. Nicholas Mavroules and Edward Markey and Sens. Edward Kennedy and John Kerry, both Democrats, cited the findings in a letter to NRC Chairman Kenneth Carr and asked for a postponment of its licensing decision.

''We are convinced the investigation demonstrates that there still remain unanswered substantive questions regarding Seabrook Station's safety,'' the lawmakers said.

NRC spokesman Frank Ingram said he could not comment on the request.

Ron Sher, a spokesman for New Hampshire Yankee, discounted the report and expressed confidence the plant will be licensed.

''The report was done by the Employees Legal Project, which is nothing more than a professional anti-nuclear organization and like several others around the country, makes allegations about nuclear plants in their final stages of licensing,'' Sher said.

He said the report's allegations ''have no substance,'' adding the plant is ''well-built and is a safe plant and as a result, we deserve our license to operate.''

A House subcommittee, chaired by Rep. Peter Kostmayer, D-Pa., announced last month it will investigate the NRC's licensing of nuclear plants, saying there has been a ''steady erosion'' of congressionally mandated safety standards.

Kostmayer said the agency's licensing proceedings concerning Seabrook ''now threaten to overrun rational decision-making and to compromise the integrity of the commission.''

#90010u1404 01/10/1990 ~United Press International

SAN FRANCISCO (JAN. 10) UPI - Joe Montana, who set new standards for playing quarterback in the NFL this season, was named the NFC Offensive Player of the Year Wednesday by United Press International.

Montana received 39 of 42 votes from pro football writers around the NFC to win the award for his first time and became the third consecutive San Francisco player to win the honor. Wide receiver Jerry Rice won the award

last year and running back Roger Craig in 1987.

Rice was one of three players to receive one vote this year. The other two were Detriot rookie running back Barry Sanders and Green Bay quarterback Don Majkowski.

Montana set an NFL all-time mark for quarterback rating in 1989, completed 70.2 percent of his passes, tossed 26 touchdown passes and threw just eight interceptions while putting the 49ers in position to repeat as league champions.

Montana says his outstanding numbers will mean nothing unless the 49ers achieve the latter goal. San Francisco plays against the Los Angeles Rams Sunday in the NFC Championship Game.

''It's an honor to be picked,'' he said. ''I'm honored they (the voters) thought I played that well this season, but my goal right now is to keep on playing and just let it (winning awards) slide by.''

Montana helped transformed the 49ers into the team of the 1980s, leading them to three Super Bowl titles and twice being named the MVP of the championship game. His uncanny ability to move his team in the final two minutes of a half or game has earned him a reputation as one of the greatest clutch quarterbacks in football history.

He is tied with Dan Fouts for most NFL seasons (six) of passing for 3,000 yards or more and holds the NFL mark with 22 consecutive completions.

Montana's most remarkable achievement, however, came in 1986 when he recovered from serious back surgery in just three weeks and guided the 49ers to a playoff berth.

His 112.4 passing rating broke the record of 110.4 set by Cleveland's Milt Plum in 1960.

''There is nothing I can do on this team without having a supporting cast '' Montana said. ''All I can do is go back and throw the ball. If I don't get time from the offensive line and if the receivers don't catch the ball then there is little I can do to win a game.''

Montana also admits to a few butterfiles before a big game.

''I think you get nervous before all ball games,'' he said. ''You get those little butterfiles deep inside because you hope you can play to the level you did last week. For us this week, that (playing to the level of the week before) may be hard to do.''

Montana also has the competitive heart of a lion. He never feels a game is

lost.

''I think the whole team feels that way (that it is never out of a ball game),'' Montana said. ''We are always trying to find a way to win.''

There was talk two years ago that Montana was in the twilight of his career and he even was forced to battle Steve Young for the starting position in training camp before the 1988 season. But the competition motivated Montana to another level and now he admits his last remaining accomplishment will be ''to finish my contract,'' which runs out after the 1991 season.

#90010u1405 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - An extremely rare 17th century bust of Pope Gregory XV estimated to be worth more than $7 million failed to sell at auction Wednesday, officials at Christie's auction house said.

The bust, sculpted in 1621 by Gianlorenzo Bernini, went on the block about 12:55 p.m., but a high reserve price apparently discouraged anyone from buying the piece.

The exact amount of the reserve price was a confidential matter between the auction house and the bust's owners, said Susan Britman, a Christie's spokeswoman.

Britman said Christie's officials were not available for comment on the bust's failure to sell.

The record for a sculpture sold at auction is $10.7 million for a Renaissance fawn sold in London on Dec. 7, Britman said.

Christie's experts had estimated the white Bernini marble bust would sell for more than $7 million, easily topping the previous record for a bust - $2.86 million paid in 1987 for a Thomas Jefferson bust by Jean-Antoine Houdon, Britman said.

Considered the greatest sculptor of the Baroque age, Bernini sculpted the bust in 1621 when he was 23, the year Alessandro Ludovisi was elected Pope Gregory XV.

The bust measures 32 3/4 inches high and sits on its original base of mottled marble. It is one of three Pope Gregory XV busts known to have been made by Bernini that year. The other two were bronze casts.

The work shows the Pope bareheaded, wearing a lavish cape embroidered with images of St. Peter and St. Paul.

The bust was acquired in 1983 by Joseph and Toby Tanenbaum of Toronto. It has been exhibited at the Kimball Art Museum in Fort Worth, Texas, and at the Art Gallery of Ontario in Toronto.

#90010u1414 01/10/1990 ~United Press International

TORONTO (JAN. 10) UPI - Spalding Sports Worldwide said Wednesday it acquired Dudley Sports Co. of Dublin, Pa., to enhance its softball operations but did not disclose the terms of the agreement.

Spalding said it purchased Dudley from Athlone Industries Inc.

Rick McGruff, director of marketing at Spalding, said combining Dudley with the company's existing business ''makes Spalding the No. 1 softball company in the world.''

Dudley, headquartered in Dublin, has plants in Vidalia, Ga. and Perkasie, Pa., and a cover-stitching operation in Haiti. The company was founded in 1947 and acquired by Athlone in 1967.

Spalding said it was not planning any immediate merger of Dudley with its Canadian operations.

Spalding is a privately-held, full-line sporting goods company. It operates a golf equipment manufacturing plant in Chicopee, Mass.

#90010u1422 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - President Bush welcomed China's announcement that it will end seven months of martial law, a spokesman said Wednesday, but economic sanctions imposed by the United States against Beijing remain in place.

Roman Popadiuk, a deputy White House spokesman, said Bush viewed the move as a ''positive step'' along with other gestures by the Chinese government to ease repression since the massacre of pro-democracy demonstrators last June.

Martial law is scheduled to end in eight Beijing districts on Thursday.

Vice President Dan Quayle said the lifting of martial law proved the president's policies toward China are working. ''We view China's decision to lift martial law as a step forward,'' said Quayle.

Beijing hopes the move will help reverse declines in foreign investment,

trade and tourism. China has suffered a drop in foreign exchange earnings and faces repayment of more than $40 billion foreign debt beginning this year.

Asked about reports that the United States will continue to block World Bank loans to Beijing, Popadiuk said, ''The United States will take a close look at loans that meet human needs on a case-by-case basis.''

He said that humanitarian loans did not represent a loosening of the bans imposed by Bush following the bloody crackdown on demonstrators last spring, and insisted there was no policy change.

''We welcome this action,'' said Popadiuk. ''We are pleased with the lifting of martial law and see it as a positive step. Obviously we must assess the full scope of this action after observing its implementation. This is another in a series of positive steps that we have witnessed in the past few weeks.''

Popadiuk, unlike Quayle, would not credit Bush policies with the change. ''We would like to believe it. We would like to think that General Scowcroft's trip played a part,'' he said.

National security adviser Brent Scowcroft and Deputy Secretary of State Lawrence Eagleburger have made two secret trips to Beijing in an effort to keep the lines of communication open and to mend relations.

Popadiuk said other signs of improved relations were noted with Beijing's visa renewal for a Voice of America reporter; China's forswearing the sale of Silkworm missiles in the Middle East, and the ''reduced critical commentaries'' against the United States in the Chinese statewide media.

Chinese Premier Li Peng issued the martial law decree last May 20.

After months of repression in which tens of thousands of people have been arrested, Chinese sources and Western diplomats said the change will be largely cosmetic. The capital remains under tight security with reinforcements to the Beijing army garrison.

-30- 2932

#90010u1423 01/10/1990 ~United Press International

BEIJING (JAN. 10) UPI - China announced Wednesday the lifting of martial law in Beijing seven months after the crackdown that crushed the pro-democracy movement.

The move was seen as a largely symbolic gesture designed to win back foreign economic aid.

Shortly after midnight, hours after the announcement martial law would be lifted Thursday, police withdrew from Beijing's Tiananmen Square - where Chinese troops forcefully put down last year's pro-democracy protests.

As the first Chinese move toward easing the climate of repression prevailing since the army fired on the demonstrators last June, the decision to lift martial law is likely to help repair relations with the United States and other Western nations.

At the White House, Vice President Dan Quayle called the move ''a positive step forward.

''I believe that you are beginning to see the dividends from the president's policy towards China,'' Quayle told reporters as he met with the Japanese minister of trade and industry, Mikaru Matsunaga.

Chinese and Western sources said Wednesday's move was largely cosmetic, as tight security continued amid fears recent upheavals in Eastern Europe and domestic economic problems could reignite political unrest.

Premier Li Peng, in a speech on national radio and television, said martial law in eight Beijing districts - the entire urban center - would end Thursday. He did not say how the change would affect current security measures.

''The situation in the capital and the country as a whole has become stable, social order has returned to normal, and a great victory has been won in checking the turmoil and quelling the counterrevolutionary rebellion,'' Li said.

Just after midnight Wednesday, armed paramilitary police withdrew from guardposts in central Tiananmen Square, the center of last spring's protests, for the first time since the army cleared it of the college students who occupied the plaza for weeks.

A senior officer told reporters the square would be fully reopened to the public, after months in which visitors needed special passes. He said only a lone guard would remain.

Braving frigid temperatures, small groups of college students and other Chinese bicycled to the square in the early morning hours, saying they wanted to visit the spiritual center of dissent.

''They have given the square back to the people,'' one student said.

Beijing's restive college campuses, the centers of last spring's protests, were reported generally quiet after the announcement.

But in his speech, Li warned ''unstable factors still exist'' and ''hostile forces'' still hoped to overthrow communism in China, adding, ''no matter what may happen in the world, we shall unswervingly advance along the socialist road.''

A Western diplomat quoted Chinese officials as saying Li, a hardliner, fought against lifting martial law, but senior leader Deng Xiaoping ''put his foot down'' and ordered the move to persuade foreign nations to end economic sanctions imposed after June.

The violence also led to sharp declines in foreign investment, trade and tourism in China, crippling foreign exchange earnings even as the country grappled with a domestic economic crisis.

The government imposed martial law last May 20 as student-led demonstrations for greater freedom swept the country. The movement was quashed when the army opened fire June 3-4 in Beijing, leaving nearly 300 people dead according to the official account - many times that according to unofficial estimates.

After moderate Communist Party leader Zhao Ziyang was purged, the leadership veered conservative, launching investigations leading to thousands of arrests. A decade of free-market economic reform stalled and orthodox Marxist dogma resurged.

Western analysts predicted little would change now in Beijing. Additional People's Liberation Army troops beyond the standard garrison strength remain billeted in closed compounds, although guard posts are now manned by paramilitary police.

''It won't change all that much,'' said a Western diplomat. ''But it will present a better image to the rest of the world.''

An objective is a sign of concession toward President Bush, whose surprise initiative last month to restore ties with China was fiercely criticized in Congress. The White House fears Congress might insist on further sanctions.

But Sen. Alan Cranston, D-Calif., a member of the Foreign Relations Committee, said the decision does not justify lifting U.S. economic sanctions against China.

''Today's decision by the PRC government is a small, very small, step in the right direction,'' Cranston. ''Martial law should not have been declared in the first place.''

-30- 4990

#90010u1452 01/10/1990 ~United Press International

SOFIA, BULGARIA (JAN. 10) UPI - A legislative commission Wednesday took the first step toward recommending the abolition of a clause in the constitution which underpins the Communist Party monopoly on power in Bulgaria.

Another parliamentary commission reviewing the abuses of the ousted regime announced it was looking at the property holdings of former President Todor Zhivkov and his family - including the copyright earnings from Zhivkov's officially sanctioned books.

''The royalties and excessive public expenditure on the publication of (his) numerous writings give grounds to initiate investigative proceedings '' the commission said.

The commission also said it was probing whether Zhivkov operated foreign bank accounts.

The official news agency BTA said the commission studying constitutional reform adopted a resolution proposing the cancellation of Article 1, which determines that Bulgaria is ''a socialist state ... headed by the working class.''

Annulment of the clause has been a consistent demand of pro-democracy opposition groups pressing for the ruling Bulgarian Communist Party to relinquish its monopoly on power.

The news agency said the commission recommended a new clause, reading: ''Bulgaria is a state of all Bulgarians irrespective of their religion or ethnic origin. Its territory is integral and indivisible and its official language is the Bulgarian language.''

The change is scheduled to be debated in the national assembly on Jan. 15.

The announcement came as representatives of the Communist Party, heads of opposition pro-democracy groupings and leaders of the ethnic Turkish and Moslem minorities met for a third day to discuss an ethnic crisis that has led to demonstrations in eight Bulgarian cities.

In a decree Dec. 29, the authorities reversed a four-year campaign to force Bulgaria's 1.5 million ethnic Turks to take Bulgarian names, drop Islam and stop speaking Turkish. But a Bulgarian nationalist backlash against the concessions triggered large anti-Turkish demonstrations across the country.

In Kuwait, Turkish Foreign Minister Mesut Yilmaz ended two days of discussions Wednesday with his Bulgarian counterpart Bioko Dimitrov on the status of Bulgaria's ethnic Turkish minority.

A joint statement after the discussions in Kuwait said the two sides ''made a detailed and comprehensive review of the current state of Bulgarian-Turkish relations,'' but did not say what action, if any, was taken on the issue of the ethnic Turks.

The ministers are scheduled to meet again in Ottawa, Canada, next month, where both are due to attend the Open Skies Conference.

Some 80,000 ethnic Turks who entered Turkey between May and August last year have since returned to Bulgaria. There was no word on the fate of the 260,000 still in Turkey.

#90010u1461 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - President Bush, concerned about the Nicaraguan elections scheduled for next month, telephoned opposition candidate Violeta Chamorro at a Houston hospital Wednesday, a White House spokesman said.

At the same time, spokesman Roman Popadiuk said Chamorro's opponent, Nicaraguan President Daniel Ortega, did not need to fear an American invasion similar to that launched in Panama. ''We have no plans to invade Nicaragua,'' Popadiuk said in response to questions.

Chamorro, challenging Ortega and his ruling Sandinistas in the elections to be held Feb. 25, was hospitalized for treatment of a knee injury suffered when she fell in her home last week.

''The president called to inquire about her health and to wish her well and they briefly discussed the state of her election campaign,'' Popadiuk said.

The spokesman also said Bush was concerned her treatment ''takes valuable time from the campaign trail'' but that he was given no indication how long she might be incapacitated.

He said she was expected to return to Nicaragua early next week.

At the same time, Popadiuk reiterated the U.S. call for fair and free elections in Nicaragua and said the administration was concerned that $9 million allocated by Congress had yet to be disbursed.

The money, funneled through the National Endowment for Democracy, has reached Nicaragua, he said, but ''there has been some delay in its actual disbursement.''

''We see this as troublesome. We would like to see the expeditious disbursement of those funds,'' he said, adding, ''Each day is very important.''

The money is supposed to be distributed to both sides and used for such non-partisan activites as encouraging voter turnout.

Popadiuk's invasion comments were made in response to questions about threats from some members of Congress last week that Nicaragua could face U.S. military intervention, as Panama did last month, if Ortega attempts to steal the elections.

''The Nicaraguans have been harassing the opposition to a great extent,'' the spokesman said, ''all of which is counterproductive to a election process going forward smoothly.

''This is something that troubles us. It is something that we and the rest of the international community will be looking at. (But) there are no plans to invade Nicaragua.''

#90010u1472 01/10/1990 ~United Press International

LOS ANGELES (JAN. 10) UPI - Jurors in the McMartin Pre-School molestation trial Wednesday returned five more sealed verdicts, bringing to 39 the number of verdicts reached thus far and leaving 26 counts still to be decided.

The eight-man, four-woman Superior Court jury returned the five verdicts on its 32nd day of deliberations. The jury previously returned 34 other sealed verdicts, most of them prior to its two-week Christmas vacation.

The panel must now reach verdicts on 26 other counts.

Superior Court Judge William Pounders has said that as long as he is satisfied the jury is making progress in its deliberations on the remaining counts, he will not unseal and announce the returned verdicts until all are in.

Former pre-school teachers Raymond Buckey, 31, and his mother, Peggy McMartin Buckey, 62, are charged with one count of conspiracy and 64 counts of child molestation.

The charges stem from the alleged sexual assaults of 11 pupils ranging in age from 2 1/2 to 5 1/2 at the now-closed Virginia McMartin Pre-School in suburban Manhattan Beach from 1978 until 1983.

If convicted, the Buckeys, who have steadfastly maintained their innocence

could be sentenced to life imprisonment.

The nearly 3-year-old trial is the longest, costliest criminal trial in U.S. history. Since it was filed in March 1984, the case - both in the pre-trial and trial stages - has cost Los Angeles County taxpayers more than $15 million.

When initially filed, the case was also the largest molestation case in U.S. history. Since then, however, five co-defendants and scores of charges have been dismissed because of insufficient evidence.

#90010u1504 01/10/1990 ~United Press International

(JAN. 10) UPI - TODAY'S PEOPLE:

HELMSLEY HIRES HARVARD HELP: Leona Helmsley has hired Alan Dershowitz, the Harvard law professor who helped clear Claus von Bulow of attempted murder to handle the appeal of her tax evasion conviction. The appeal team also will include Susan Estrich, who headed Michael Dukakis's unsuccessful presidential campaign. Dershowitz says Helmsley has been ''very pleasant'' during their Boston meetings and he says her image as a tempestuous shrew is undeserved. ''She is demanding but I like working for demanding people '' he said. ''She wants to be sure no stone is unturned. Were she a man, she'd be regarded as exacting and demanding.'' Helmsley, 69, was sentenced to four years in prison and fined $7.1 million for cheating on her taxes but Dershowitz says his review of her records probably will show that the government owes her. ''This is a woman who paid over $300 million a year in taxes and she has probably overpaid her taxes,'' he said.

QUAYLE BAITING: Just how smart is Dan Quayle? The authors of a new book, ''Scandal Annual 1990 - Who Got Caught Doing What in 1989,'' a compendium of last year's silly wrongdoings, have included a chapter titled ''How Dumb is Danny?'' The book says determining Quayle's intellectual ability is a matter of national security and that the question could be settled once and for all by having the vice president be a contestant on ''Jeopardy'' for a week in competition against Henry Kissinger and last year's ''Jeopardy'' champion. The book even includes a form letter for readers to fill out and send to Quayle urging him to take the challenge for the sake of ''the future of our family and the fate of the nation.''

BERLIN REMEMBERED: The late Irving Berlin will be remembered at a memorial concert Feb. 6 at New York's Music Box Theater. Those taking part in honor of Berlin, who died in September at age 101, include Mandy Patinkin, Roberta Flack, Tony Bennett, Rosemary Clooney, Jerome Robbins, Kitty Carlisle Hart, Dorothy Loudon and Sammy Cahn.

BONNER TO FULFILL ENGAGEMENT: Yelena Bonner, wife of the late Soviet

dissident Andrei Sakharov, will speak Feb. 17 at the Peace Prize Forum at Augsburg College in Minneapolis. Bonner and Sakharov were both scheduled to appear but he died days after accepting the invitation. The forum also will include former President Jimmy Carter and his vice president, Walter Mondale, who personally invited Sakharov and Bonner. Organizers are awaiting word on whether the 1989 Nobel Peace Prize winner, the dalai lama will attend.

'ALWAYS' AIRPORT GETS ENCORE: The airport in Moses Lake, Wash., is becoming the hardest working airport in show business. Bruce Willis will be filming his cataclysmic airport scene for ''Die Hard 2'' there instead of Denver. 20th Century Fox had wanted to film a scene featuring terrorists and a crash at Denver's Stapleton Airport but airlines had complained that such a scene would be bad for their image and that the movie lights would interfere with air traffic. ''As a matter of principle '' said United Airlines official Jack Ekey, ''we don't believe that kind of thing represents either airports or airlines in a way which we see ourselves, or want the public to see us.'' As a result, the film crews start work Feb. 1 at the Grant County Airport in Moses Lake, which is the same airport Steven Spielberg used to film ''Always.''

(JAN. 10) UPI - A new Navy Syncom satellite is orbiting the Earth today after being launched into space by the crew of the shuttle Columbia. Astronaut David Low carried out an extensive series of checks, then pressed two buttons in the shuttle cockpit to force the satellite out of the cargo bay like a spinning Frisbee. Later, with Colombia a safe distance away, an on-board solid-fuel rocket ignited to begin the relay station's voyage to its final orbit 22-thousand 300 miles above the equator.

The Beijing government today made what Western analysts view as a gesture to ease repression that's existed since the Chinese army killed hundreds or perhaps thousands of pro-democracy protesters last June. China announced the end of martial law tomorrow. Some political analysts say the move is largely symbolic and is likely to advance efforts to improve ties with the United States and to reverse declines in foreign investment, trade and tourism.

The Soviet-dominated trading bloc Comecon is meeting again today in Sofia, Bulgaria... still working on an agreement for changes to match the sweeping political shifts in East Europe. As expected, Poland, Czechoslovakia and Hungary are leading the push for reforms. Delegates say there is a consensus to create a study commission to examine proposals to change the whole concept of trade among the member states.

#90010u1517 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - Vice President Dan Quayle, warning that the ''rest of the world is catching up and may pass us by,'' vowed Wednesday to give a bold yet cost-conscious boost to America's space program.

As the space shuttle Columbia entered the second day of its mission, which Quayle said ''signifies America's successful return to space,'' the vice president said a national goal must be ''to open the frontiers of space.''

In a speech delivered to the American Astronomical Society in nearby Arlington, Va., Quayle, chairman of President Bush's National Space Council said: ''We've got our work cut out for us.''

Quayle added, ''Unfortunately, over the past two decades, we have not maintained the momentum of the 1960s.''

During the 1960s, the United States was the unmatched pioneer in space travel, the vice president said.

''We have continued to have good ideas - but our programs seem to be taking too long and costing too much to build,'' Quayle said. ''As a result, the rest of the world is catching up and may pass us by.''

The vice president reaffirmed the Bush administration's goals of completing the space station Freedom, setting up a manned base on the moon and sending astronauts to Mars. But as in the past, the administration did not set a target date.

Quayle said as chairman of the space council he intends ''to bring the kind of innovative approaches to the space program of the '90s that were characteristic of Polaris, Atlas, Apollo'' and other earlier space ventures.

''To do this, the council is looking across the traditional divisions among civil, commercial, and national security activities,'' Quayle said. ''We are building a program that is more than the sum of these parts.''

The vice president added that the administration intends to ''develop our space launch capability and its related infrastructure as a national resource.''

David Beckwith, Quayle's press secretary, said, ''This represents new thinking in our approach to space exploration.'' He said Bush wants ''faster, cheaper but still safe high performance modes of exploring space.''

Quayle drew enthusiastic applause from the space scientists with his comment: ''We've got to figure out a way to reduce the time from idea to completion. To reduce it from decades to a few years.''

John Bahcall, president-elect of the astronomy group, said he was heartened by Quyale's theme of stepping up the pace of space exploration.

''There is a great need to respond to technological innovations and new scientific ideas more quickly,'' Bahcall said.

The vice president also emphasized the need to ensure reliable and more affordable access to space. ''I believe we can lower the cost of the space launch,'' he said.''

Quayle said the nation's manned space program will move ahead in conjunction with the unmanned program and that, ''We are committed to a balanced scientific program.''

#90010u1518 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - Mexican diplomats charged Wednesday a NBC program on drug traffic telecast this week was slanderous and hinted legal actions might be taken against the network.

In a written statement, Ambassador Gustavo Petricioli said in the ''Drug Wars'' special, telecast Jan. 7-9, ''assertions made by the interviewer, reporter and guests are the product of sheer ignorance, imprecise, unfair, lacking of any evidence, and, maybe, in bad faith.''

Meanwhile, in New York, Mexican Consul Agustin Barrios said the program was ''full of inaccuracies.''

''The United States is the world's largest producer of marijuana, and this was not mentioned in the program,'' said Barrios. The NBC special ''opens old wounds'' in relations between Mexico and the United States.

The NBC program focused on the February 1985 kidnapping and killing in Mexico of a U.S. Drug Enforcement Agency official, Enrique Camarena, and his Mexican pilot, Alfredo Zavala. Camarena's murder caused frictions in U.S.-Mexican relations.

Rafael Caro Quintero and Ernesto Fonseca, convicted for the crimes, have been sentenced to 116 and 114 years in prison in Jalisco.

Asked why Caro and Fonseca were not extradited to the United States, Gustavo Gonzalez, a drug expert at the Mexican Embassy, said, ''Mexican justice is strong and adequate.''

The ambassador's communique said a ''slanderous statement was that Mexico is just like Panama, and drug corruption is deep and pervasive.''

''The authors of these assertions should first give the name, and, second, have evidence to support such accusations,'' Petricioli said. ''Otherwise, we are facing defamations and slander.''

''Likewise, we categorically deny statements, lacking of evidence, that top Mexican officials are involved in drug trafficking, and that corruption goes to the highest level of the government,'' he added. Petricioli said the embassy is consulting with lawyers on possible legal actions against NBC.

U.S. drug policy director William Bennet said during the NBC program Tuesday night that Mexico is cooperating in the battle against drug traffickers but the United States must keep pressure on Mexican authorities.

''The fight against drugs in Mexico is the exclusive responsibility of Mexicans,'' the ambassador told reporters. ''As President Carlos Salinas said, this is our battle to protect our youth, our society and our national security.'

''Mexico is not answering to pressures. We do it for conviction and a sovereign decision,'' he said.

(JAN. 10) UPI - Tens of thousands of Lithuanians with yellow, green and red national flags for independence turned out for a rally on the eve of a visit by Soviet President Mikhail Gorbachev. Crowds jammed Cathedral Square in Vilnius during in a rally designed to show Lithuania is united in its desire to leave the Soviet Union. Gorbachev's trip is an effort to stem a breakaway by Lithuania's Communist Party, which declared its independence last month.

New York subway gunman Bernhard Goetz has filed a 40-Million-dollar counter-suit against the shooting victim who is suing him for 50-Million dollars in damages. Goetz charges in his suit that shooting victim Darrell Cabey, his mother, his lawyer and other parties have committed fraud, libeled and slandered Geotz and intentionally inflicted emotional stress on him. Cabey filed his suit after being left paralyzed and brain-damaged in the 1984 shooting.

F-B-I experts today are to examine a gun found in a river near Boston to determine whether Charles Stuart used the weapon to kill his pregnant wife

and wound himself in a staged robbery. The .38-caliber revolver was flown to an F-B-I forensics lab in Washington, D-C. Police now believe Stuart used the gun to kill his wife to collect life insurance policies reportedly worth more than 600-thousand dollars.

#90010u1532 01/10/1990 ~United Press International

ALBANY, NY (JAN. 10) UPI - A state Supreme Court judge Wednesday upheld the legality of New York's tough new anti-smoking law, 10 days after it took effect.

''There is no more a fundamental right to smoke cigarettes than there is to shoot-up or snort heroin or cocaine,'' Judge Joseph Harris said, rejecting a challenge to the law by two Albany smokers.

Harris said the law, known as the Clean Indoor Air Act, ''is a recognition by the New York Legislature of the medical harm inflicted upon nonsmokers by involuntary exposure to secondhand smoke in indoor areas open to the public.''

The law, passed last year after 13 years of debate, bans smoking in most public places, including auditoriums, elevators and the Capitol's corridors. It requires no-smoking areas in restaurants, workplaces and bowling alleys but allows smoking anywhere in a bar.

Twenty-six other states have similar laws and another 17 and the District of Columbia limit smoking in at least one public place.

''In the light of ... overwhelming scientific evidence ... it is reasonable to conclude that (the law) is an appropriate response by the Legislature to the need to protect the citizens of the state of New York from involuntary exposure to environmental tobacco smoke,'' Harris wrote.

He rejected as ''without merit'' the claims of Joseph Fagan and Thomas

Blau that the law limits their access to public places and discriminates against them.

''Contrary to the assertion of petitioners, (the law) does not restrict their access to public places, only their right to smoke there,'' Harris said.

''If petitioners in fact have a general 'right of privacy' to smoke, this legislation merely requires them to exercise it outdoors or in private,'' he said.

Fagan's and Blau's attorney could not be reached for comment immediately.

The Supreme Court is New York's lowest court. Its decisions can be appealed to the court's Appellate Division and, under certain circumstances, to the state's highest court, the Court of Appeals.

#90010u1551 01/10/1990 ~United Press International

SOFIA, BULGARIA (JAN. 10) UPI - The Soviet-dominated trading bloc Comecon ended a crucial meeting Wednesday with a compromise agreement for market-oriented reforms and with conservative members pushing to delay actually implementing the changes.

Delegates decided that a commission would evaluate trade between the member states to determine how best to bring deals in alignment with world market prices as expressed by convertible currencies rather than the nonconvertible Soviet ruble. The commission will report back to Comecon at a meeting in Budapest this spring.

The delay in implementing the changes was part of a compromise reached between the reform-minded members of the trade group and the more conservative members suspicious of change, particularly Cuba. Delegates from the Caribbean island, which has steadfastly maintained its communist system, said Comecon should not try to ape capitalism.

Comecon, an acronym for the Council for Mutual Economic Assistance, is based in Moscow and was formed in 1949 to coordinate trade between Soviet-bloc nations. The Soviet Union, Poland, Czechoslovakia, East Germany, Hungary, Bulgaria, and Romania are members as well as Mongolia, Vietnam and Cuba.

Closing the session, Bulgarian Prime Minister Georgi Atanassov said the agreement for change to a market-oriented system marked a new beginning.

"We have reached practical unanimity in the main directions of renovation of cooperation in the forming of a market environment ... blending the

economic interests of individual producers and national economies as a whole," he said. "Irrespective of the differences and nuances of the positions of countries, this unanimity should be appreciated as a real basis for cooperation," he said.

Comecon has been under fire from reform-minded members like Poland, Hungary and Czechoslovakia, which charge the organization's highly centralized bargaining system is too restrictive, serves Soviet interests and trades in shoddy, unwanted goods.

The consensus for change appeared to be based on suggestions from Poland as presented by Soviet Prime Minister Nikolai Ryzhkov, but there was some confusion as the meeting ended. A news conference was canceled and there were long delays in issuing a joint communique. The communique itself was a bland document that refrained from using such words as "market" or "currency."

"The session underlined the necessity of decisive renovation of the whole system of mutual cooperation and of mechanisms for multilateral cooperation within the Council for Mutual Economic Assistance (Comecon)," it stated. It said the special commission would report back "in a short time."

Before the meeting, Poland, Czechoslovakia, and Hungary plus Romania urged the old Comecon structures be scrapped in favor of new trading pacts based on convertible currency and world prices.

The meeting was given a report from Andrei Loukanov, Comecon's executive committee chairman, that reflected widespread dissatisfaction with Comecon trade.

Loukanov reported trade was not expanding as rapidly as predicted and said Comecon goods were of poor quality, could not meet international standards and were delivered late.

After Tuesday's session, Polish Prime Minister Tadeusz Mazowiecki told Polish television that he spoke to delegates of Poland's urgent wish for reform toward a more realistic, market-oriented Comecon system. Hungarian Prime Minister Miklos Nemeth made similar remarks.

"If some Comecon member countries are not ready yet for change, Poland is ready to start immediately on new methods of cooperation with those countries which are ready now," Mazowiecki said.

The Cubans expressed the most serious objection to change. Carlos Rafael Rodriguez, head of the Cuban delegation, said capitalist markets should not be idealized. But while he cautioned against eliminating the present system entirely, he said he would not stand in the way of some kind of reform.

The Soviets opposed the break-up of Comecon and said they favored restructuring it to create a tariff-free, single market to rival that proposed for 1992 by the European Community.

Soviet delegates agreed trade should be based on a convertible currency rather than rubles and prices should reflect real market values. Most states appeared to agree that Comecon should in future foster direct ventures between member companies and other organizations.

NEW YORK (JAN. 10) UPI - The $14 billion merger of Time Inc. and Warner Communications Inc. to form the world's largest media and entertainment company was completed Wednesday, Time Warner Inc. said.

The transaction, announced last July, involved a two-step process in which Time paid $7 billion cash for 100 million shares of Warner and then issued a combination of stock in the new company, valued at $7 billion, to Warner Communications shareholders to acquire all remaining shares.

Time and Warner first announced last March they would merge in a deal that involved an exchange of stock. The transaction swelled to include a cash component after Paramount Communications Inc. made an unsuccessful bid for Time.

#90010u1571 01/10/1990 ~United Press International

BARSTOW, CA (JAN. 10) UPI - Two tanks holding heating oil exploded into flames at a solar energy plant Wednesday, injuring one person who suffered smoke inhalation, authorities said.

California Department of Forestry firefighters responded to one explosion at Luz International, a solar heating company, shortly before 9 a.m., CDF spokswoman Deborah McClelland said.

''As crews arrived on the scene, a second tank exploded,'' she said.

The tank involved in the first explosion was in flames. The second was also on fire, but the extent of the blaze was not immediately known.

The tanks, two of several at the desert plant 140 miles northeast of Los Angeles, hold heating oil stored at 495 degrees, McClelland said.

The oil spontaneously combusts when exposed to air, she said. It also can become volatile during rapid changes in temperature.

The oil is synthetic, not petroleum based, said Howard Hampton, assistant director of communications at Luz.

''We are not sure at this point as to what happened,'' Hampton said. ''We do know the fire was contained to the oil heaters.''

The plant uses sunlight to generate 80 megawatts of electricity at peak operation, enough to serve the average electrical needs of 115,000 people. The power goes directly into the Southern California Edison distribution system.

Sunlight is focused by curved mirrors onto oil running through a vacuum-insulated tube as part of the process. The hot oil turns water into steam that turns the generating turbines.

The Luz project in the Mojave Desert began delivering power on Dec. 28, 1989, becoming the newest of eight solar electric generating plants run by the company in California.

The facility is billed by its operators as the largest solar electric generating plant in the world.

#90010u1573 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - South African anti-apartheid leader Walter Sisulu, released from jail last fall after 26 years in prison, said Wednesday there is less tension in his country now and predicted an end to apartheid in this decade.

''I have the impression that we have reached a period that is exciting to us,'' Sisulu said in an interview from South Africa with ''CBS This Morning.'' ''We have entered a new period and there is no reversal.''

Asked if apartheid would end during his lifetime, Sisulu, 77, said, ''I believe so. I do think there is going to be an end ... to apartheid within the decade.''

In the wake of recent moves toward reform by the minority white government of President Frederik de Klerk, Sisulu said while it was not clear what would happen, ''it is true the tension is less today between the people and the government.''

At the same time, he noted problems continued and referred to the deaths of six striking rail workers who died Tuesday in a clash with non-strikers at a train station in an industrial area near Johannesburg.

Sisulu indicated real change would not occur until the expected release of

African National Congress leader Nelson Mandela, perhaps in February.

But Sisulu said there had been ''much speculation about the release of Nelson Mandela in the last five years'' and called the current expectations more ''mere speculation.''

He said the only difference was that Mandela's wife Winnie now has the impression Mandela's release will be soon.

As for his own release last October after being imprisoned 26 years, Sisulu said while from the beginning he had confidence he would be freed, ''there were times I thought, 'Well, perhaps I may have to die in jail.'''

#90010u1586 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - Education Secretary Lauro Cavazos told a meeting of his department's staff Wednesday that rumors he will be leaving the Cabinet are untrue and suggested such reports come from opponents of his policies.

''From time to time we read about my demise,'' Cavazos said, drawing laughs from the department employees. ''I don't know where those things come from.''

For several weeks Cavazos has been the subject of rumors that he will become the first Cabinet member to leave the Bush administration, and critics from both the right and the left have complained that he has done little to create enthusiasm for educational reform.

But Cavazos, 63, the first Hispanic member of the Cabinet, told the meeting, which was called to review the department's activities, that he has the full confidence of President Bush.

''The only thing I can fathom is that when people start changing the system, when you start changing the status quo ... when you get their attention, they come back around real quick. Maybe that's what's happening. I don't know,'' the education secretary said.

''I serve at the pleasure of the president. I have a full commitment to him. We have never discussed this issue,'' he said. ''When it's really true, you'll hear it directly. I promise you that.''

In his speech, Cavazos said the department's highlights in 1989 included new regulations on student loan defaults, regional meetings promoting the right of parents to choose their children's schools, and Bush's educational summit with the nation's governors in Charlottesville, Va.

The president and the governors said at the summit they would issue national performance goals for American students next month, and Cavazos said he has been working ''on an almost daily basis'' with the White House on the standards.

#90010u1592 01/10/1990 ~United Press International

CHICAGO (JAN. 10) UPI - William Farley's $1.6 billion acquisition of West Point-Pepperell appeared to be unraveling Wednesday, with West-Point stock at a 52-week low and a selloff of West-Point assets bringing $80 million less than expected.

West Point stock reached a 52-week low of $37.50 in trading Tuesday on the New York Stock Exchange, and shed another $1 by noon Wednesday, falling to $36.50 - $21.50 below the $58 a share Farley agreed to pay to acquire the Georgia textile firm.

Farley had been banking on the sale of West Point's Cluett-Peabody subsidiary, maker of Arrow shirts, to help pay off high-interest bridge loans used to make the acquisition.

He announced plans late last year to sell Cluett-Peabody to the French firm, Biddermann S.A., for $600 million. But in filing with the Securities and Exchange Commission this week, West Point-Pepperell said the sale, expected to close later this month, would bring only $520 million.

Farley Inc.'s takeover vehicle, West Point Acquisitions Corp., acquired 95 percent of West Point, Ga.-based West Point-Pepperrell last April in a bitter takeover battle that dragged on for six months.

That step in the takeover was financed by $1.4 billion in bridge loans, a mix of high-interest bank loans and junk bonds. Farley was to obtain permanent to pay off those loans and acquire the remaining five percent of

West Point stock by last November.

But hard times in the junk-bond market made it impossible for Farley to put together workable permanent financing. Analysts said the junk-bond market problems also affected the sale of Cluett-Peabody and resulted in the reduced sale price.

In the SEC filing, West Point-Pepperell said the consortium of banks that provided more than $1 billion of the bridge financing, including Wells Fargo Bank and Bankers Trust Co., had agreed to extend the financing until March for higher interest rates.

The filing also noted the banks indicated they might grant a further extension, until June under certain conditions. But the company said it was unsure it could meet those conditions.

The company advised the SEC it was continuing efforts to find permanent financing and would seek "alternative sources" if such financing could not be found before the bridge loans come due.

Officials of West Point-Pepperell and Farley Inc. were unavailable for comment in the developments, and spokesmen for Wells Fargo Bank and Bankers Trust refused to comment.

Chicago-based Farley Inc., is a diversified, privately owned company with assets of $1.5 billion, operating such manufacturing businesses as Fruit of the Loom, in which it holds a controlling 19.5 percent interest, Acme Boot and Doehler-Jarvis.

Farley officials said that, upon completion of the West Point-Pepperell takeover, West Point would be held as a wholly owned subsidiary of Farley Inc. and kept separate from Fruit of the Loom, which is publicly held.

Farley has insisted that West Point-Pepperell is a natural addition to Farley Inc.'s textile holdings, i.e., Fruit of the Loom. But analysts have questioned the fit, saying there is little common ground between Fruit of the Loom's underwear business and the Pepperell's line, which aside from Arrow shirts, consists primarily of bed and bath textiles.

#90010u1599 01/10/1990 ~United Press International

CHICAGO (JAN. 10) UPI - Grain futures were lower at the close Wednesday on the Chicago Board of Trade, although losses were limited by light commercial buying across the floor.

The volume was light as traders awaited the final 1989 corn and soybean production figures and the estimated acreage planted to winter wheat. The

Agriculture Department is scheduled to release the report Thursday afternoon.

Scattered selling throughout the day was said to be liquidation ahead of the crop report.

Soybeans also were pressured by a slight increase in farmer selling, the weakness of the cash market and favorable weather conditions for South American soybeans.

Grain futures were lower, but had underlying support from news that South Korea bought 100,000 tons of corn and Japan 95,000 tons of wheat.

At the close, corn was off 1/2 to 1 1/2, soybeans down 2 3/4 to 4 3/4, wheat off 1/2 to 1 3/4 and oats down 3 1/2 to 4 1/2.

#90010u1605 01/10/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 10) UPI - Nicolae Ceausescu personally ordered security forces to shoot without warning at pro-democracy demonstrators last month in the western city of Timisoara, a transcript of a conversation between the former dictator and his top generals showed Wednesday.

Ceausescu warned his top military and security officials during the telephone conversation a week before his ouster that troops who disobeyed his orders would be harshly punished.

A transcript of the Dec. 17 conference call was published Wednesday by the Bucharest newspaper Adevarul, or 'The Truth,' which ceased publication when Ceausescu came to power in 1965 and resumed printing this month. The World Union of Free Romanians in London said the newspaper was a reliable publication.

The transcript suggests the longtime dictator was aware of the seriousness of the uprising in its early stages and also appears to show his direct repsonsibiliy for the order to fire on peaceful demonstrators.

''They must shoot without warning,'' Ceausescu said of troops confronting demonstrators in Timisoara. ''And for anyone who will not obey my orders the law will be fully applied against them.''

In France, five victims of the attack arrived in Marseille Wednesday for treatment of wounds received from dum-dum bullets, a particuarly lethal bullet that explodes on impact and which is outlawed under international rules of war.

Ceausescu ordered that Army and security troops, as well as border guards, be mobilized and armed for combat, with instructions to use deadly force to stop demonstrators from smashing windows or entering government property.

''Don't wait for further orders from Bucharest,'' he was quoted as saying in an English translation of the transcript. ''These important instructions must be followed by everyone. If there is anyone who doesn't do his duty report him immediately.''

A general who took part in the conference call told Ceausescu that reinforcements were already heading toward Timisoara and had been ordred to shoot.

Ceausescu referred to Lasylo Tokes, the dissident priest whose arrest Dec. 16 triggered the uprising in Timisoara, as a cult leader and said police should have clamped down on him and his supporters sooner.

''There have been some mistakes,'' he was quoted as saying. ''The problems should have been solved in an hour or two, but ... he (Tokes) succeeded in having a lot of people around him.

''Now we can understand clearly that it was all a pretext, and this (disturbance) had been prepared long before by elements from abroad and imperialist circles from the east and west,'' Ceausescu was quoted as saying.

Estimates of the number killed in the crackdown in Timisoara have ranged from several hundred to tens of thousands. The violence sparked demonstrations in cities across Romania which eventually led to the ouster and execution of Ceausescu.

The ruling National Salvation Front has refused to release figures on the number killed in the uprising pending a systematic count, but Silviu Brucan, a member of the Front's executive committee, was quoted Wednesday by the official news ageny Rompres as saying the number was less than 10,000.

Interim President Ion Iliescu designated Friday as a national day of mourning for those killed in the uprising.

Iliescu said Timisoara and Bucharest would be declared ''martyr cities,'' and memorials to the dead would be erected in both.

#90010u1619 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - The Supreme Court Wednesday ruled that foreign companies doing business in the United States cannot challenge a state's taxing methods in federal court.

The justices, in a unanimous decision, reversed a 7th U.S. Circuit Court of

Appeals ruling that had cleared the way for two foreign companies doing business in California to sue the state in federal court over what it considered to be an unfair and burdensome taxing scheme. Justice Byron White, writing for the court, said that foreign companies are not precluded from bringing such claims in state courts.

Lawrence Salibra, lawyer for the U.S. subsidiary of Alcan Aluminium Ltd., a Canadian company doing business in California, disputed the court's ruling. "I think the Supreme Court is just wrong. They've made a political decision instead of a legally sound one," Salibra said.

Imperial Chemical Industries, a British company also doing business in California, was the other corporation that sued the Franchise Tax Board of California.

"White missed a major issue in the case," Salibra said, contending Wednesday's decision unfairly forces Alcan, Imperial and other foreign companies to show why a state court rather than a federal court should hear their case.

The Supreme Court found that the Tax Injunction Act bars foreign companies from challenging a state's taxing methods in federal court. The act says that as long as a foreign company has a chance to sue in state court, a federal judge cannot order the state to halt its tax collection.

"We cannot hold the act inapplicable on the mere speculation that the California courts will not allow the taxpayer subsidiaries to bring their case," White wrote.

Alcan and Imperial objected to California's "unitary business" tax, which treats the foreign parent company and all its subsidiaries' income as the tax base for state purposes. The state then calculates the tax on a formula that includes the fraction of payroll, property value and sales attributable to California.

#90010u1643 01/10/1990 ~United Press International

PHILADELPHIA (JAN. 10) UPI - Homicide detectives were investigating the death of a 6-month-old girl who was poisoned by a large dose of cocaine that apparently was given to her, a police spokesman said Wednesday.

Capt. Richard DeLise said authorities were trying to determine the circumstances that led to the death of Michaela Robinson of North Philadelphia. She died Dec. 23.

''We are investigating it as a homicide,'' DeLise said. ''The Medical Examiner is still doing further toxicological tests.''

DeLise said the amount of cocaine in the child's body was so large that authorities concluded someone gave her the fatal dose. He said authorities were awaiting tests to determine how the cocaine was administered to the child.

The child was born dependent on cocaine in June at Temple University Hospital. She was found dead sitting in an infant seat at her aunt's house in the city's East Germantown section.

An examination by the city Medical Examiner's Office showed a substantial amount of cocaine in the child's body, as well as evidence of neglect and abuse, DeLise said.

The city Department of Human Services has removed three other children from the custody of the baby's mother, Robin Howell, 31.

#90010u1682 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - More than 50 people agreed Wednesday to undergo questioning as candidates for the jury in the assault trial of John Gotti, the reputed Mafia boss charged with the shooting of a union leader.

Acting Justice Edward McLaughlin announced he would rule later in the week on the admissibility of a key piece of evidence in the government's case.

A total of about 200 people have already volunteered in state Supreme Court in Manhattan to take part in the jury selection, which was scheduled to begin on Tuesday.

As a precaution against jury tampering, the jurors' first names will be kept secret and the panel will be sequestered until the end of the case, which is expected to last one month.

Gotti, 49, the alleged head of the nation's most powerful organized crime structure, is accused of ordering a union official shot and wounded in retaliation for vandalism at a restaurant owned by the Gambino crime family. Also charged is Anthony Guerrieri, 60, a reputed Gambino soldier.

The May 7, 1986, contract hit, allegedly carried out as a favor by a murderous Irish gang known as the Westies, left four bullets in the buttocks of John O'Connor, former business agent of Local 608 of the Carpenters Union.

McLaughlin said he would decide Thursday or Friday whether the jury will hear tapes of a May 16, 1986, conversation between Mickey Featherstone, the admitted No. 2 man in the Westies who turned government informant, and Kevin Kelly, a Westie named as an unindicted co-conspirator in the O'Connor shooting.

Their comments were recorded by a bugging device planted behind a picture in the visiting room at Rikers Island House of Detention for Men, where Featherstone was imprisoned.

On the tape, Kelly says the shooting was done ''for the greaseballs. They needed somethin' real quick.''

He said several Westies ''went to that funeral with Gotti'' and volunteered their services to him.

O'Connor was ''supposed to get knee-capped'' but ''the bullets ended up

high.''

Already convicted of attempted manslaughter and hijacking, Gotti is charged with two counts of assault and one of conspiracy. If convicted of any of the new charges, he could be deemed a ''persistent felon'' and could be imprisoned for life.

Defense lawyers said Tuesday another key piece of the government's case against Gotti - a secretly recorded tape on which the reputed Mafia boss is allegedly overheard ordering thugs to ''bust'' a union leader - does not actually exist.

''Our position is that it was not said,'' said Gerald Shargel, one of the trio of lawyers representing the alleged godfather of the Gambino crime family.

It will be up to the jurors at state Supreme Court in Manhattan to decide whether Gotti made the comment when they listen to some of the 1,001 tapes of wiretapped and bugged conversations. The tapes, many of which are poor quality and some barely audible, are mostly of discussions at Gotti's headquarters at the Bergin Hunt and Fish Club in Ozone Park, Queens.

#90010u1729 01/10/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 10) UPI - Prime Minister Toshiki Kaifu of Japan told the head of the European Community Wednesday that Tokyo's aid package to Eastern Europe is designed to make the region's economic transition as peaceful as possible.

Before his departure for Paris late Wednesday, Kaifu told EC Commission President Jacques Delors that the ''East European problem was not just a regional problem particular to Europe,'' a Japanese Foreign Ministry spokesman said.

Rather ''he regards it as something that has a bearing on the peace and stability in the world,'' with the aid being granted to ''make the transition in Eastern Europe as stable as possible and as peaceful as possible,'' the spokesman said.

Kaifu's meeting with Delors capped a one-day visit to Brussels, following a Tuesday trip to West Germany in which the prime minister announced that Japan would grant credits of more than $500 million each to Poland and Hungary, plus trade and investment guarantees for several hundred million dollars.

Arriving in Brussels from Bonn Wednesday morning, Kaifu had separate meetings with Belgian Prime Minister Wilfried Martens, Belgian King Baudouin and NATO Secretary General Manfred Woerner.

The 90-minute meeting between Kaifu and Delors, described as a ''free and frank exchange of views,'' also touched on Japan's trading relationship with the 12-member European Community, a relationship viewed by many Europeans as lopsided in Japan's favor.

The EC has been trying for years to improve its trade deficit with Japan, which in 1988 amounted to $22.7 billion. For the first three quarters of 1989, the deficit totaled $15.6 billion according to provisional figures.

Delors told Kaifu that ''frankly speaking there are many problems'' in EC-Japanese relations, and that ''on many occasions he had been disappointed,'' the Japanese Foreign Ministry official said.

The EC approach is that Japan should open up its markets to European exports, rather than trying to reduce Japanese exports to Europe.

Also present at the meeting were Japanese Foreign Minister Taro Nakayama and Commission Vice President Frans Andriessen, who is in charge of external relations.

Belgian Prime Minister Martens emphasized his conviction that the European Community has to be integrated further, both economically and politically, to provide a solid basis for EC assistance to East European countries.

A NATO spokesman said they mainly discussed East-West relations and recent developments in Eastern Europe, but that the half-hour meeting was rather an occasion to get acquainted.

#90010u1750 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - The American Electronics Association Wednesday estimated that the U.S. electronics trade deficit, both with the world and Japan, remained virtually unchanged for 1989.

Based on data for the first three quarters of 1989, AEA projected that the U.S. electronics trade deficit with the world increased 4.2 percent in 1989 to just under $10 billion from $9.6 billion in 1988. With Japan, AEA projected a deficit of $20.5 billion, virtually the same as the comparable 1988 figure.

The association calculated that U.S. total electronic exports advanced to $62.2 billion in 1989 from $58 billion in 1988, whereas imports increased to $72.2 billion from $67.6 billion.

AEA President and Chief Executive Officer Richard Iverson deplored the stagnation in reducing the U.S. electronics trade deficit, largely driven by an out-of-balance import/export ratio with Japan.

"Our trade relations with Japan must improve," Iverson said. "Although some progress was made earlier in the decade, the balance between imports and exports of electronic products and services - particularly with Japan - has not improved significantly since 1979 and can no longer be justified."

The AEA estimated that U.S. electronic exports to Japan rose to $7.7 billion in 1989 from $6.3 billion in 1988, while imports advanced to $28.2 billion from $26.8 billion.

Nine-month trade data for 1989 show that the U.S.-world electronics deficit increased by 4.5 percent to $6.9 billion from $6.6 billion in the

first nine months of 1988. U.S. exports grew to $45.5 billion from $42.4 billion in the 1988 period, while imports increased to $52.3 billion from $49 billion.

Full-year projections showed the U.S.-world electronics trade deficit improved in five of nine categories, including computers and semiconductors. A deteriorating balance was reflected in telecommunications and instrumentation products and in photocopy equipment.

#90010u1754 01/10/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JAN. 10) UPI - The charge that Salvadoran soldiers were involved in the brutal slayings of six Jesuit priests has created growing tension in the ranks of the country's armed forces, diplomats said Wednesday.

Two U.S. senators, Christopher Dodd, D-Conn., head of the Western Hemisphere subcommittee, and John Warner, R-Va., were in El Salvador on a fact-finding mission Wednesday and were scheduled to meet with President Alfredo Cristiani, top military commanders and opposition leaders.

Cristiani announced early this week that some members of the armed forces of the U.S.-backed government were involved in the murders of the Jesuits, who were gunned down Nov. 16 along with their housekeeper and her 15-year-old daughter.

One Western diplomat said the investigation has created ''a lot of tension'' within the officers corps of the Salvadoran military. High ranking officers have escaped blame in past cases involving human rights abuses committed by members of the military.

''If we are looking at colonels being indicted, then this is breaking entirely new ground and there is no telling what could happen,'' the diplomat said.

The military has said 47 members of the armed forces, including two lieutenants, have been confined to their quarters in connection with the investigation. Privately, military and diplomatic sources have said those detained include a colonel and at least three lieutenants.

A union leader said Wednesday that the investigation into the slayings, which was criticized when it got off to a slow start, would become completely discredited if responsibility was traced no higher than to lieutenants.

''The government, in order to really have credibility in what it is doing, must get to the bottom in its investigation,'' said Julio Portillo, a

leader of the National Union of Salvadoran Workers. ''There is responsibility among high military officials and Cristiani knows it and the High Command knows it.''

The rector of the Jesuit's University of Central America, where the brutal murders took place, has said it would be ''suspicious'' if the investigation resulted in the arrest of only low-ranking officials.

Separately, rebels of the leftist Farabundo Marti National Liberation Front, of FMLN, stepped up economic sabotage Wednesday in its 10-year war against the U.S.-backed government. Several bombs planted by the rebels left two provinces without electricity Wednesday and damaged a San Salvador auto dealership.

''The FMLN has begun the new year with a change in strategy based in an increase in economic sabotage due to their inability to carry out military operations,'' a military spokesman said.

He said there had been a ''considerable increase'' in economic sabotage during the past week.

The FMLN, in a broadcast on its clandestine Radio Venceremos, confirmed that the rebel front was stepping up its ''line of sabotage against the regime's economy.''

The Executive Hydroelectric Commission reported that guerrillas Wednesday dynamited three high-voltage power lines near the provincial capital of San Vicente, 30 miles east of San Salvador, and that the provinces of San Vicente and Cabanas, 40 miles northeast of the capital, were without electricity.

Two explosions that echoed across San Salvador early Wednesday destroyed three new automobiles at a downtown car dealership, the Armed Forces Press Committee reported. No injuries were reported.

The military also reported that three government soldiers and two rebels died Tuesday during combat in the provinces of Cuscatlan and Usulutan located north and east of the capital.

BRUSSELS, BELGIUM (JAN. 10) UPI - The European Community's executive Commission said Wednesday it has closed proceedings against Ford Motor Co. Ltd. of Britain which committed itself to free competition practices on the marketing of car body panels.

The Commission had started the proceedings in 1985 following a complaint

by independent British panel manufacturers that Ford took advantage of intellectual property laws to prevent other manufacturers from selling competitively priced replacement panels.

A Commission statement said recent legislative changes in Britain made it no longer possible for car manufacturers to claim copyright protection for car body panels. Designs registered prior to the new legislation will continue to enjoy protection for the remainder of their 15-year term.

Ford has now agreed to reduce the period in which it can still claim registered design protection for body panels in Britain. The total period of exclusivity will not exceed five years and may be shorter in some cases the Commission said.

The statement "welcomes the fact that when this remaining protection runs out, the market for replacement panels in the United Kingdom will be entirely free."

The Commission decided to close the proceedings against Ford as it was "satisfied that an appropriate balance has been found between protecting the rights of the car manufacturer... and the need to ensure that consumers are not disadvantaged by being totally dependent on a single source."

#90010u1798 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - Transportation Secretary Samuel Skinner said Wednesday America cannot continue to ''take transportation for granted'' and called for a new national system that relies more on the private sector.

In an address to the Transportation Research Board's 69th annual convention, Skinner called the nation's current transporation system ''efficient,'' but said better technology and management is needed if the United States is to compete with Japan and a unified Europe in the 21st century.

Skinner outlined five areas of the Bush administration's new transporation policy that included a stronger partnership between federal, state and local governments, stimulating more private investment, and more deregulation.

''In the face of expanding international competition, we no longer can take transportation for granted,'' Skinner said. ''We need to maintain, expand and make our transportation system more productive. We need a better application of management and technology.''

Skinner said state and local governments should be less dependent on federal money for transporation projects and that recipients of federal transportation aid should pay a larger share of project costs.

''For too long, high federal shares of transportation projects have lured cities and states into sometimes unwise or inefficient decisions,'' the secretary said. ''By upping the ante for state and local governments, we will help bring the principles of market competition to bear in our financing programs.''

Skinner said the administration will push for the repeal of the tort-based system of liability and damages under the Federal Employers Liability Act ''so that railroads can operate under state workers compensation systems as other industries do.''

''We are also going to push hard on product liability reform and its impact on many businesses, including general aviation.''

Other actions the agency intends to take this year include more attempts to allow foreign airlines greater access to U.S. cities, encouraging commercial space launches, a comprehensive review of U.S. maritime policy, and finding more high speed rail alternatives.

Skinner eluded a cost for his initiatives, but told the group that portions of the new strategy would be in President Bush's 1991 budget proposal later this month.

#90010u1814 01/10/1990 ~United Press International

HURLBURT FIELD, FL (JAN. 10) UPI - The Air Force special operations wing that spearheaded the attack on Panama came away from the invasion with an unusual combat souvenir: the autograph of Manuel Noriega.

After the deposed Panamanian strongman surrendered to American forces Jan. 3, he was flown to Miami aboard one of the wing's MC-130 aircraft, the 1st Special Operations Wing's commanding officer said Wednesday.

Noriega signed the flight chart of the aircraft at the request of the crew. His message, in Spanish, was ''Good voyage,'' Col. George Gray III said.

Speaking publicly for the first time about the 1st SOW's role in Operation Just Cause, Gray said his unit ''essentially spearheaded the operation'' and flew more than 400 missions and a total of 1,200 hours without a single combat injury and only minor damage to one aircraft.

The Dec. 20 assault involved all five of the 1st SOW's flying squadrons -

21 aircraft, more than 500 people - and was ''done absolutely to perfection,'' Gray said.

His unit was notified of the plans for an assault Dec. 17, Gray said. The 1st SOW departed from Hurlburt Field and nearby Eglin Air Force the following day for Howard Air Force Base in Panama, where they positioned themselves for the 12:45 a.m. attack.

The unit was fully prepared for the assault, he said, because ''we had been working a plan for several months'' in anticipation of such orders.

His unit had only 10 minutes to secure the airfield that it attacked.

''We were to be there first to knock out Mr. Noriega's command and control and eliminate any threat to our aircraft involved in dropping the (U.S. Army) Rangers'' who parachuted to the field, Gray said.

''The first night was obviously very harrowing, but essentially our mission was to engage any hostile forces on the airfield that supported the airdrop of our Rangers and to deny the Panama Defense Forces their command and control capability,'' Gray said.

''We used our AC-130 gunships and the surgical firepower that they have to knock out the command and control facilities at the Commendencia and also any (anti-aircraft weapons) that were located at the two airfields where the Rangers jumped in,'' he said.

By midday Dec. 20, Gray said, the 1st SOW's job was essentially finished.

''I think after they (the PDF) saw the destruction of the Commandencia, they very quickly realized that they didn't want to take us on,'' Gray said, referring to the surrender of Noriega's troops.

Air Force Special Operations units are experts in low-intensity conflicts and unconventional warfare. They trace their history to 1943, when they supplied Allied troops behind Japanese lines in Burma.

In recent years, the 1st SOW at Hurlburt has played a key role in secret missions ranging from the ill-fated rescue attempt of American hostages from Iran in 1980 to the successful invasion of Grenada in 1983.

The wing uses MC-130 Combat Talons and AC-130 Spectre gunships for its mission. The AC-130, used for close air support, is armed with 20mm and 40mm cannons and a 105mm Howitzer for concentrated nighttime firepower.

#90010u1842 01/10/1990 ~United Press International
WASHINGTON (JAN. 10) UPI - Defense Secretary Dick Cheney will propose Thursday cost-cutting defense management measures that could result in a savings of about $40 billion over the next five years, officials said Wednesday.

Known as the Defense Management Review, the proposals stem from President Bush's order last year for Pentagon officials to reform the way the Defense Department conducts business.

Cheney scheduled a news conference at the Pentagon for 11 a.m. EST.

Defense officials said the proposals Cheney will announce Thursday should save about $5 billion in 1991 and about $40 billion over the next five years.

One of the largest money savers would be the elimination of the supply corps for each military service. Under Cheney's proposal, a central buying agency would take orders for goods and have the supplier ship them

directly to the base or ship, eliminating warehouse costs and much of the supply corps.

Another proposal would require the services to start using commercially available parts - usually much cheaper than specially made parts - in the repair or replacement of weapons, trucks and aircraft.

Cheney would also eliminate fixed-price development contracts, allowing for changes to be made due to technological advances or late changes called for by the services.

#90010u1843 01/10/1990 ~United Press International

VILNIUS, USSR (JAN. 10) UPI - Thousands of Lithuanians rallied to demand independence from the Soviet Union Wednesday, a day before Mikhail Gorbachev's scheduled trip to confront the Baltic republic's defiant Communist Party.

In a bold assertion of independence, Vitautus Lansbergas, president of the Sajudis National Front, vowed to greet Gorbachev as the leader of a ''neighboring state.'' Another Sajudis activist challenged Gorbachev to address a mammoth rally Thursday that organizers said would draw half a million Lithuanians.

Wednesday's demonstration in Vilnius was a foretaste of the welcome awaiting Gorbachev when he arrives in the defiant Lithuanian capital Thursday on a troubleshooting mission.

A sea of banners, posters and yellow, green and red vertically striped Lithuanian national flags filled historic Cathedral Square in the medieval city as about 25,000 people gathered to demand an end to a half-century of Soviet rule.

Lansbergas drew a roar from the crowd by declaring: ''This year is starting off well. We will fight for many years if necessary but 1990 may be a decisive year in our history.''

''We shall welcome him (Gorbachev) as the leader of a strong neighboring state with which we have had a long and difficult history but with which we do not want bad relations,'' he later told United Press International.

Lansbergas and other speakers were constantly interrupted by the throngs' chants of ''Freedom, Freedom,'' ''Sajudis, Sajudis'' and ''Lithuania, Lithuania, Lithuania.''

''Let him (Gorbachev) come here and see that all of us want to leave the Soviet Union. Let him see that it is not just extremists but the entire

Lithuanian people,'' said Eduardus Balsukas, 60, a retired natural gas worker.

Gorbachev waited in Moscow Wednesday, his time of departure and schedule of activities a well-kept secret. One of his aides who asked his name not be used said he believed Gorbachev would leave for Vilnius Thursday.

During the visit he will try to find a compromise with the Lithuanian Communist Party that declared itself independent of the Soviet party Dec. 20 in the first break of the party in 72 years.

Sajudis was organizing a larger rally for Thursday and appeared intent on turning Gorbachev's trip to deal with the breakaway Lithuanian Communists into a larger showdown over the republic's aspirations for independence.

Kazmiras Motieka, a member of Sajudis and a Supreme Soviet legislator in Moscow, predicted a staggering crowd Thursday dwarfing Wednesday's turnout.

''There will be no comparison,'' Motieka told UPI. ''If there are only a half-million people we will consider it a failure.

''Today's rally was only Vilnius. Tomorrow we have invited people from all over Lithuania. If Gorbachev appears and wants to address the crowd, we would be delighted, we would be happy for him to see how people really feel.''

When asked about possible security concerns in the charged atmosphere, an official reception secretary in Gorbachev's office, Vladimir Savitsky, told UPI: ''I hope that the responsible comrades will be attentive.''

The rallies were the most vivid demonstration of independence aspirations since Aug. 24 when one million Lithuanians, Estonians and Latvians formed a human chain of protest on the 50th anniversary of the Nazi-Soviet pact that led to the end of their statehood.

Before the Lithuanian Communists found their voice, the independence drive had been led by Sajudis, which had galvanized the 2.8 million Lithuanians comprising 80 percent of their republic.

Under Gorbachev, Lithuania has regained much of the sovereignty it lost 50 years ago. It is now economically autonomous and its citizens openly sing the anthem of independence years and fly the flag of statehood.

Signs and comments at the demonstration Wednesday indicated Gorbachev would get a mixed welcome when he arrives on his first visit to Lithuania since he became the Soviet leader in March 1985.

Lithuanians appeared to view Gorbachev as everything from a liberator

willing to give them independence to just the latest in a line of Soviet Communist oppressors.

Tovilas Narkunas, a 60-year-old retired machinist hoisting a small Lithuanian flag at the rally, said: ''Gorbachev has given us the possibility to be free. Before him, Russia was just a tyranny.''

One white poster read, ''Gorby, Gorby. Lithuanians love freedom.'' But a nearby green banner said, ''Gorbachev, go home with the Red Army.''

(JAN. 11)

Auto Racing

Forumla One driver Ayrton Senna of Brazil may be barred from racing in 1990 unless he apologizes for his ''defamatory statments'' following his disqualification from last year's Portuguese Grand Prix.

Basketball

Charlotte Hornets owner George Shinn says he has no intention of firing Coach Dick Harter despite the team's 7-23 record. ''It's not really the coach's fault,'' Shinn said. ''We have to get more good players, have to be aggressive in the free-agent market in the off-season.''

Boxing

Mike Tyson has agreed to defend his heavyweight title against top-ranked contender Evander Holyfield June 18 for a payday of about $22 million, Dan Duva, Holyfield's promoter, said. Atlantic City, Las Vegas and Tokyo are possible sites.

College

Which college has the best athletic program? Stanford, according to a poll by SportsTravel magazine in its January issue. The criteria were

graduation rates, athletic performance, facilities, total sports, athletic budget and coaches. Stanford was followed by North Carolina, Notre Dame, Harvard, Duke, UCLA, Michigan, California, Virginia and Vanderbilt. ... Roy Kramer, Vanderbilt's athletic director, was named commissioner of the Southeastern Conference. He succeeds Harvey Schiller, who became executive director of the U.S. Olympic Committee.

Drugs

The NCAA Convention approved a $2 million program of year-round, random steroid testing for major college football and a one-year ban for any athlete who fails a drug test. The legislation will be in place at least two years.

Football

Doug Graber, the Tampa Bay Bucs defensive coordinator, was named football coach of Rutgers. He replaces Dick Anderson, who was fired after his team went 2-7-2 last season.

Hockey

Vaclav Riha, head of Czechoslovakian hockey, resigned because of increasing player demands, CTK, the official state news agency reports. The players struck Saturday after learning a player who received a near fatal injury was inadequately insured. The strike ended Tuesday after full insurance was provided.

Media

The NFL playoffs were followed about as closely as the Romanian revolution according to a survey by the Gallup Organization for the Times-Mirror Co. The poll also showed that for Americans between 18 and 30 years old, the NFL playoffs ranked ahead of all stories, except for Panama, in December.

Rugby

Britain's Rugby Union hopes to raise funds to help restore the game in Romania. Two former captains of the Romanian national team were killed in last month's revolution.

Skiing

Marc Girardelli, the defending World Cup champion from Luxembourg, will be out until at least early February following surgery to drain blood from rib and back bruises. He was injured Dec. 12 at super-giant slalom at Sestriere, Italy. ... Swiss ski resorts face financial disaster because of lack of snow. Tourist officials say trails remain closed with instructors

and others out of work and lift operators and store owners threatened with bankruptcy.

Tennis

Ivan Lendl and Boris Becker easily advanced to the second round at the $175,000 New South Wales Open in Sydney, a tuneup for next week's Australian Open. Helena Sukova, the women's top seed, won in straight sets.

Track and Field

Olympic star Carl Lewis said he is ''sure'' Ben Johnson took an amphetamine to supplement his steroid use the day he beat Lewis in the 100 meters at the Seoul Olympics, the Washington Post reports. Lewis also told the paper that because he believes Johnson is still taking steroids, he is not sure he wants to run against him this year when Johnson's two-year suspension ends.

#90010u1917 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - An apparent editing error stripped the cloak of secrecy off the price of the newest Navy attack jet, a stealth plane known as the A-12 that documents showed Wednesday could cost nearly $100 million each.

A recently released volume of spring 1989 hearings by the House Defense Appropriations Subcommittee contained a one-sentence reference to the plane's cost at the outset of a question dealing with the plane it is to replace, the A-6E Intruder.

The subcommittee usually holds its hearings in closed session and later releases transcripts of its meetings, edited to drop out secret information. All other references to the A-12's cost or the number to be bought were eliminated from the volume and replaced with the word ''deleted.''

The subcommittee had no immediate comment Wednesday on the apparent editing error that left in the nearly 900-page report the declaration, ''The January 1989 budget included A-12 production through 1994 of 106 aircraft for $10.2 billion.''

At the Pentagon, the Navy declined comment on the release of the figures. ''It would be premature to comment,'' Lt. Jim Wood said. ''We've made no official announcements on the A-12 as of yet.''

A Defense Department source attributed the revelation to sloppy editing and said it was not a deliberate leak to take the plane's cost public.

The source contended that the $100 million-a-plane figure is misleading because the amount also covered crew training costs, spare parts and a variety of other costs. It would not cost that much, the source said, to produce one copy of the plane due for its first flight this year.

The cost of the plane, a twin-engine fighter with a crew of two, could land it in trouble on Capitol Hill, where defense budgets will be falling in coming years and any expensive program - such as the $70 billion stealth bomber - will be under intense scrutiny.

The Navy eventually plans to replace its A-6E Intruder attack plane with 450 of the A-12s, phasing in the A-12 until there are no A-6Es on the carriers by the year 2005. The last A-6Es the Navy bought cost about $20 million each. A version crammed full of electronic jamming gear costs about $30 million each.

Sen. Sam Nunn, D-Ga., head of the Senate Armed Services Commitee, has included the A-12 on a list of projects that, because of their cost, could be targets for reduction or elimination. He has estimated the cost of the program at between $50 billion and $75 billion over its lifespan.

Vice Adm. R.F. Dunn, the Navy officer in charge of aircraft purchases, told the subcommittee at its May 10 hearing that the A-12 ''is a revolutionary program which will improve our all-weather attack capability. ... It will incorporate significant stealth characteristics and become the primary striking platform of the carrier battle groups.''

Like the bigger bomber, it is to be built of composite materials that do not reflect radar signals. Dunn told the panel the plane ''will be able to penetrate even the most heavily defended enemy areas to reach its targets.''

The Marine Corps considered buying the A-12 for its aviation needs but instead opted to stick with the F/A-18, which cost about $30 million each.

(JAN. 10) UPI - Astronaut David Low flipped two switches inside the shuttle Columbia today to send a Navy Syncom satellite spinning out of the craft's cargo bay and into space. NASA officials in Houston say the crew is off to a good start after deploying the Syncom, which was boosted into its final orbit 45 minutes later by a solid-fuel booster rocket. On Friday the crew will attempt to rescue another satellite called the Long Duration Exposure Facility... a science package that is falling back to Earth.

In a split decision, the U-S Supreme Court today ruled that a federal judge went too far in ordering Yonkers, New York, City Councilmen to change their vote to approve a minority housing plan. The desegregation plan called for 200 units of federally funded housing to be constructed on the city's mostly white east side. Writing for the court, Chief Justice William Rehnquist says the federal judge should have first tried fining the city before penalizing individual members of the Council.

Investigators met in a Scottish village today to solve what amounts to an ''international terrorist jigaw'' puzzle on the bombing of Pan Am Flight 103. A British expert on international terrorism told the B-B-C that the ''trail is very hot now.'' Today's conference is the fifth in a series of multi-national summits held since the Pan Am jet exploded over Lockerbie in 1988, killing all 259 people aboard and 11 people on the ground.

The National Weather Service says the rain should taper off in the Pacific Northwest tomorrow. Nearly five inches has drenched the region in 24 hours causing heavy flooding. As Oregon's Governor Neil Goldschmidt declared an emergency for the northern coast today... work crews piled sandbags to protect the Tillamook County Hospital. In Washington, President Bush cleared the way for federal aide to Texas farmers hit by a winter freeze right before Christmas. He declared the Rio Grande Valley a disaster area.

LONDON (JAN. 10) UPI - A record $427 million worth of illegal drugs were seized in Britain last year, 41 percent more than in 1988, customs officials said Wednesday.

Drug enforcement officers said the seizures underscored grave worries about the increase in drugs being smuggled into the country.

Customs agents made 45 percent more arrests last year than in 1988, a spokesman said, and individual seizures were up 41 percent.

The biggest increase came in cocaine seizures, where customs officers intercepted 49.4 percent more of the drug last year than the year before.

Customs said 424 kilograms of cocaine, with a street value of almost $99 million, was seized, compared with 283.7 kilos in 1988.

The heroin haul was 331.5 kilos, up from 230.7 kilos, and worth almost $49.5 million.

Customs officers also seized 50.75 tons of marijuana worth $275 million - 15 percent more than in 1988.

In the past, larger drugs seizures were seen as evidence that Britain was winning the battle against smugglers.

This year, however, officials were in no rush to pat themselves on the back.

Customs Minister Lord Caithness told a news conference the upward trend was cause for serious concern about drug traffic in Britain.

''It is particlarly worrying that about 40 percent of the total seizures come from other European Community countries,'' he said.

#90010u1961 01/10/1990 ~United Press International

BOSTON (JAN. 10) UPI - A new possible motive emerged Wednesday in the case of a Boston furrier accused of killing his wife: that he did not approve of her pregnancy and wanted to cash in on her life insurance policies to open a restaurant.

A Boston newspaper and a Boston television station quoted separate sources as saying Charles Stuart planned to open a restaurant and that his wife's pregnancy had become an obstacle.

One source, identified only as a close friend, said Stuart asked for help in killing his 30-year-old wife, Carol.

''What he ultimately said was that he wanted to have his wife killed. ... The pregnancy was an unwanted thing,'' the friend told WCVB-TV during an interview in which he was not shown on camera. ''He said he'd seen something in her that he never saw before ... a sense that she had an upper hand in the relationship.''

Charles Stuart intially told authorities that he and his wife were kidnapped, robbed and shot by a black man Oct. 23, shortly after they left a childbirth class at Brigham and Women's Hospital in Boston.

Based on interviews with family members and friends of Stuart, investigators now believe Stuart fatally shot his wife in the head, then wounded himself in the abdomen.

Stuart jumped to his death into Boston Harbor on Jan. 4, leaving a suicide note behind, as authorities sought to arrest him for the murder of his wife.

The Boston Globe quoted unnamed investigators as saying Stuart was about to receive a $480,000 check from the Prudential Insurance Co. as proceeds of a third known life insurance policy on his wife. Two other policies totaled more than $180,000.

Police have uncovered evidence suggesting that Stuart wanted to start a restaurant with a friend, Brian Parsons, the newspaper said.

''He decided that a wife and a new baby were going to be too much of a problem for his big plans,'' one investigator told the newspaper.

The man interviewed by WCVB said that ''this pregnancy just somehow was putting an end to those (restaurant) plans.''

The man said he refused Stuart's request for help in killing his wife, and a week later refused another request to help Stuart obtain a gun.

He also said he did not notify police of his conversations with Stuart

because he did not believe his friend was serious. The man said he contacted police in November, after Carol Stuart was killed. WCVB said the man believed police did not give enough weight to his story at the time.

Meanwhile, police divers could not resume a search Wednesday for evidence in the Pines River in Revere, Mass., where Charles Stuart allegedly had his brother dump the murder weapon and personal items belonging to his wife.

Divers last week found the personal items - a purse, makeup and other objects, and on Tuesday recovered a .38-caliber, snub-nosed, nickel-plated revolver that authorities believed Stuart used to kill his wife and wound himself Oct. 23.

The revolver was flown to an FBI forensics laboratory in Washington to confirm whether it was the weapon that killed Carol Stuart.

Suffolk County authorities said fog, adverse tides and a rough current prevented a search of the river again Wednesday for additional evidence. They declined to say what they were searching for.

Suffolk County District Attorney Newman Flanagan said a grand jury investigating the crime will reconvene Friday to hear testimony in the case. He Stuart family members will be among the witnesses.

Stuart's younger brother, Matthew, 23, has told authorities he and a friend dumped the gun and his sister-in-law's Gucci bag on instructions from his brother the night of the slaying.

The Globe reported that Matthew Stuart thought he was participating in an insurance scam and initially had no idea his sister-in-law had been shot.

(JAN. 10) UPI - Mikhail Gorbachev could get quite a welcome when he arrives in Lithuania tomorrow. Thousands of people carrying yellow, green and red national flags and banners rallied today to demand independence from the Soviet Union. An estimated 25-thousand people filled historic Cathedral Square in the medieval city of Vilnius demanding an end to 50 years of Soviet rule.

China has announced the end of martial law in Beijing but some Western diplomats say it's a symbolic move to better ties with the United States. Premier Li Peng said in a nationally broadcast speech that martial law in eight Beijing districts will be lifted tomorrow. In Washington, Vice President Quayle told reporters- quoting here- ''I believe you are beginning to see dividends from the president's policy towards China.''

#90010u1977 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - The Olympia & York real estate company unveiled plans Wednesday to tear down all but the steel frame of the ITT building on Park Avenue and reconstruct it with a new design in hopes of vastly increasing its value.

The International Telephone and Telegraph Corp. is relocating its headquarters this fall to another mid-Manhattan building and to a property it owns in Secaucus, N.J., in a cost-cutting move.

Olympia & York officials portrayed the decision to strip and rebuild the entire 32-story tower at 320 Park Ave. as a symbol of their commitment to the city and as being motivated by the ''rare opportunity'' to create an almost entirely new structure in the prestigious location that has not seen a major new project in about a decade.

Insiders said the company was motivated at least in part by the realization that the property's value was diminished because of a significant asbestos problem.

''It's apparent that a massive amount of work is needed. The place is filled with asbestos,'' a real estate source said.

Mayor David Dinkins alluded to an ''asbestos problem'' at a City Hall news conference where new Olympia & York Cos. U.S.A. President John Zuccotti and Executive Vice President Meyer Frucher announced the plan.

But Frucher downplayed the asbestos problem as one that was routine in renovations of buildings of similar age.

The glass and steel building, located across from St. Bartholomew's Church at 51st Street, was erected nearly 30 years ago. ITT, the original tenant, moved there in 1961. Its lease expires at the end of the year.

ITT spokesman Jim Gallagher said the corporation has been ''downsizing'' its headquarters staff for the last few years and that it was no longer economical to stay in the building.

ITT, which plans to move in September, is leasing 470,000 square feet but is using only 225,000 square feet in the Park Avenue building, having reduced its central staff from 1,000 to the current 400 employees, he said.

Of the 400 headquarters staff, 250 will be moved to the former ABC building at Sixth Avenue and 54th Street and the rest will go to Secaucus, Gallagher said.

Olympia & York, meanwhile, plans to begin demolition as soon as next month

Frucher said. It hopes to have the entire 660,000-square-foot building vacant by November except for a BMW showroom on the ground floor, which will remain open throughout the project, he added.

The entire demolition and reconstruction is expected to take up to 2 1/2 years. The redesign is being overseen by the architectural firm of Skidmore Owings Merrill.

The newly designed building, clad in granite and reflective glass, will include a new atrium lobby and new mechanical, electrical and elevator systems.

Frucher said the steel frame is being retained because the company would only be allowed to erect a smaller building at the site under city zoning rules if it demolished the entire structure.

The new building will have the same number of square feet but it will be substantially reapportioned, with 40 percent of the floor space shifted from the lower to the upper stories where higher rents can be charged, he said.

Frucher said that Olympia & York would only be able to get about $45 per square foot if it ''spruces'' up the building. It hopes to get more than $60 per square foot by performing the drastic renovation, he said.

City officials estimated construction costs will total about $100 million and generate about $17.2 million in taxes.

But Frucher declined to divulge Olympia & York's cost estimates.

No new tenant has been secured for the building.

Olympia & York, a Canadian company, obtained the ITT building along with a portfolio of other major buildings in the city when it branched out to New York in the mid-1970s.

#90010u1982 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - Average yields for money market mutual funds rose in the latest reporting week, while rates at competing savings and loan institutions were down or unchanged, two organizations that track the funds said Wednesday.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds fell to 7.80 percent from 8.06, while 30-day simple yields fell to 7.92 percent from 7.94. The average maturity of fund portfolios was down to 38 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions mostly declined in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.14 percent, down from 6.16; Super-Now accounts 5.02 percent, unchanged; six month certificates of deposit, 7.69 percent, down from 7.72; one-year CDs 7.70 percent, down from 7.71; 2 1/2-year CDs 7.65 percent, down from 7.66; and five-year CDs 7.67 percent, unchanged.

The average rate for a one-year adjustable rate mortgage rose to 8.38 percent from 8.35 percent last week.

The average rate on a 15-year fixed-rate mortgage rose to 9.42 percent from 9.41 percent and the average rate on a 30-year fixed-rate mortgage was up to 9.66 percent from 9.63 percent.

The average rate for a four-year automobile loan fell to 12.12 percent from 12.13 percent.

ST. PAUL, Minn. (JAN. 11) UPI - Northwest Airlines announced a new fare promotion Wednesday.

The Twin Cities-based airline said it will give a free roundtrip ticket for anywhere Northwest flies in the United States in Canada to passengers who fly roundtrip to Asia. The offer is good between Jan. 15 and April 15.

Northwest said there are other restrictions as well, such as passengers must be enrolled in WorldPerks. The offer does not apply to travel to Honolulu, Guam and Saipan.

Northwest will award at least 10,000 bonus miles to its WorldPerks free travel program to passengers flying across the Pacific. The 10,000-mile bonus, combined with the actual mileage flown on the Asian trip, guarantees enough mileage for a free roundtrip domestic or Canadian trip.

Executive-class and first-class travelers will earn 12,500 and 15,000 bonus miles, respectively, on all Asian flights.

KUWAIT (JAN. 10) UPI - Bulgarian Foreign Minister Bioko Dimitrov said at the end of talks with his Turkish counterpart Wednesday that ethnic Turks who fled to Turkey to escape an assimilation drive in Bulgaria are free to return home.

Dimitrov said the property of those who return to Bulgaria will be restored to them and they will be free to travel abroad to visit relatives or even to emigrate if they so desired, as there was now no law in Bulgaria to prevent them from doing so.

An estimated 340,000 ethnic Turks fled to Turkey between May and August last year to escape assimilation with the Slavic population under a policy enforced by ousted President Todor Zhivkov. About 80,000 of the refugees have since returned to Bulgaria, but 260,000 others are still in Turkey.

''Those who left for Turkey may return to their home country Bulgaria,'' Dimitrov told a news conference after two days of meetings with Turkish Foreign Minister Mesut Yilmaz.

Under Zhivkov's assimilation drive, ethnic Turks in Bulgaria were forced to take Slavic names, were forbidden to practice their religion, Islam, and were not allowed to speak Turkish in public.

After Zhivkov's removal from power late last year, the new leadership in Bulgaria announced that it was reversing the policy. But a Bulgarian nationalist backlash against the concessions have triggered anti-Turkish demonstrations across the country.

He said the new government in Bulgaria had taken several decisions with regard to ethnic groups, within the context of recent changes sweeping Eastern Europe. These included the right of religious groups, including Moslems, to practise their faiths freely.

He said the recent decisions reflected the new Bulgarian government's determination ''to build a democratic society where all ethnic groups can enjoy full rights.''

Dimitrov said that in his discussions with his Turkish counterpart over the past two days the two foreign ministers had reached agreement to remove difficulties hindering the development of bilateral relations.

Future relations with Turkey, he said, would be based on respect for human rights as defined by international law.

A joint statement issued after the discussions said the two sides ''made a detailed and comprehensive review of the current state of Bulgarian-Turkish relations.''

The ministers are scheduled to meet again in Ottawa, Canada, next month, where both are due to attend the Open Skies Conference.

Yilmaz held an earlier meeting with his Bulgarian counterpart on Oct. 30, after Kuwait's Ruler, Sheikh Jaber al Ahmed al Sabah, mediated between the two nations in his capacity as head of the 46-state Islamic Conference Organization.

#90010u2034 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - A member of the House banking committee proposed Wednesday to eliminate the Office of Thrift Supervision, created to oversee the troubled savings and loan industry, and merge its functions with two other federal agencies.

"Enactment of last year's savings and loan bailout legislation went a long way toward cleaning up a very troubled industry," Rep. Charles Schumer, D-N.Y., said. "To eliminate the last remnants of the savings and loan crisis, Congress should move to abolish the Office of Thrift Supervision."

As part of the $160 billion savings and loan bailout bill signed by

President Bush in August, the Office of Thrift Supervision replaced the Federal Home Loan Bank Board, the primary regulator of thrifts.

While the bill mandated tough new standards for thrifts, Schumer said, "It also allowed them to retain their own regulator, leaving open the potential for the same abuses that scarred the industry and depositors in the past."

Schumer's legislation would eliminate the Office of Thrift Supervision and transfer its functions to the Office of the Comptroller of the Currency and the Federal Reserve Board. Those two agencies, under his bill, would gradually merge, coinciding with the phase-out of the Resolution Trust Corp. in 1994.

"I think it's a great idea," said Bert Ely, a northern Virginia thrift industry consultant. "We should put thrifts under the same regulatory structure as banks. This reflects what's happening in marketplace," he said, noting there are fewer distinctions now between banks and savings and loans.

M. Danny Wall resigned last month as director of the Office of Thrift Supervision, and Ely doubts there will be much clamor to fill the position. He said Schumer's bill could become part of possible second savings and loan bill. "I don't think we'll see it until 1991. Congress doesn't have the stomach to deal with this again in 1990," he said.

A spokesman for the Office of Thrift Supervision declined to respond to Schumer's proposal.

#90010u2038 01/10/1990 ~United Press International

WASHINGTON (JAN. 10) UPI - The United States would favor World Bank loans to China for ''humanitarian'' purposes, but would not support financial assistance for economic development, the State Department said Wednesday.

The slight relaxation of American sentiment follows Beijing's announcement it will end seven months of martial law, a move popularly accepted as a gesture to improve East-West relations, particularly in the area of economics.

But State Department spokeswoman Margaret Tutwiler said the change of heart toward China on certain World Bank loans had nothing to do with Beijing's decision to end martial law. ''It is pure coincidence,'' she said.

''Our view has changed. It's a partial change. Our view is that basic human needs loans, for instance earthquake relief, should be permitted to

go forward periodically,'' Tutwiler said.

White House deputy spokesman Roman Popadiuk took a measured approach saying, ''The United States will take a close look at loans that meet human needs on a case-by-case basis.''

He said that humanitarian loans did not represent a loosening of economic sanctions imposed on China.

Tutwiler said the United States, an important member of World Bank loan committees, still will oppose lending money to China for economic development projects. Also, a ban on high-level government exchanges remains in effect.

The United States withheld its support for World Bank loans to Beijing after Chinese army troops carried out the bloody crackdown on pro-democracy demonstrators in June.

The United States has 18 percent of the votes in such loan decisions, plus great influence on Western European and Japanese decisions.

According to World Bank officials, about $750 million in proposed loans are now being considered for China by the World Bank. Only one of the seven proposed loans involves ''humanitarian'' needs, as defined by the State Department. That loan, for less than $100 million, would be for earthquake reconstruction.

BONN, WEST GERMANY (JAN. 10) UPI - West German Chancellor Helmut Kohl Wednesday criticized East Germany's Communist Party but said he would not give in to demands that he cancel a planned meeting with East Germany's communist prime minister, Hans Modrow.

Kohl's remarks coincided with a growing crisis in East Germany as parties formerly allied to the communists threatened to quit the government, which has also come under mounting criticism from opposition movements.

During his first news conference of the year, Kohl said opposition parties in East Germany were not given equal opportunities in preparing for spring elections, the first free ballot since East Germany was created 40 years ago.

But he said his government would continue to talk with both the East German government and opposition movements in a bid to support the current reform process.

He said East Germans ''opened the door to freedom and democracy with their peaceful revolution and want this process to continue.''

''I therefore will stick to the talks with Modrow, planned for early February,'' the chancellor said. ''They will offer an opportunity to discuss among others the problems that are currently cropping up.''

Several leading West German politicians have urged Kohl to cancel his meeting with Modrow, saying it could be construed as support for the Communist Party, called the Socialist Unity Party of Germany (SED).

Modrow was to deliver a major statement to East Germany's parliament Thursday that was expected to deal with the growing crisis in East Germany.

Opposition movements had said they would form a human chain around the East German parliament building to protest the policies of the Communist Party, which they have accused of manipulating its control of the government to gain electoral advantages.

The East German Christian Democrats and the Liberal Democrats, formerly linked to the Communist Party, have threatened to pull out of their governing coalition with the communists.

Observers believe such a move may force Modrow to hold a referendum in a bid to confirm his mandate pending the elections, tentatively scheduled for May 6.

At the news conference, Kohl took up a claim by East German opposition groups that the SED was trying to form a new secret police force to replace the once-feared National Security department that is currently being disbanded.

''Whoever considers it a priority to form a new state security service under new clothing - as the SED does - ignores the interests and hopes of the people'' in East Germany, he said.

He said it was essential the East German authorities draft a new electoral law that is supported by the opposition, adding, ''This approval is essential.''

''This means giving all political parties equality in the election process involving, for example, unlimited access to the press and television,'' Kohl said.

But, answering a question, he said that ''from everything I have heard from opposition groups about their access to the media, equality in the electoral process has not improved.''

He said his government's policies would be aimed at supporting the stable development of reform in the Soviet Union and Eastern Europe, and added ''its success is in the interest of all of Europe.''

Asked whether he intended to travel to Moscow this year for talks with Gorbachev - whom he last met in Bonn in June - Kohl said this was ''essential and probable.''

''Our relations with the Soviet Union remain for us of major importance, he said.

He also said he was confident that President Bush and Gorbachev would pave the way at the next summit in June for the completion of a treaty regulating the halving of U.S. and Soviet strategic nuclear potentials.

SANTA CRUZ, BOLIVIA (JAN. 10) UPI - Officials from Bolivia, Peru and

Colombia met Wednesday to prepare for a summit next month between President Bush and heads of state from the three South American cocaine-producing nations.

The two days of meetings were called to form proposals to be presented to the U.S. delegation Friday and Saturday, the last day of the four-day pre-summit conference. The officials were to prepare the agenda and lay the groundwork for the Feb. 15 summit in Cartagena, Colombia.

Bolivian Vice Foreign Minister Javier Murillo opened the meetings saying they were an ''important step'' in looking for common ground on which to battle narcotics traffickers.

The talks were based on the knowledge that isolated actions ''are and will always be insufficient to combat the evil that has reached dimensions of such a size and magnitud that they overcome national capabilities,'' Murillo told the delegations.

He called for the formation of common and coordinated policies but ones that respect the different characteristics of each country.

''For us, the key to an efficient action should come from the clear knowledge of the stages in which the production and illicit trafficking of drugs is undone, for only in this way can the measures that are adopted attack the heart of the problem,'' Murillo said.

Bolivia and Peru produce most of the coca leafs that are the key ingredient in cocaine. The leafs are made into a paste, most of which is smuggled into Colombia for processing and shipment to the United States and other developed nations.

The meeting at a luxury hotel in Santa Cruz, 355 miles southeast of La Paz was surrounded by police contingents from each of the three countries.

Murillo said a final communique would be issued on the last day of the meetings.

The other presidents who will attend the Cartagena summit are Virgilio Barco of Colombia and Jaime Paz Zamora of Bolivia. Peruvian President Alan Garcia said he would not attend unless U.S. troops are first withdrawn from Panama, but a delegation from Peru is expected to be in Colombia.

Latin American leaders have criticized the Dec. 10 U.S. invasion for infringing on Panamanian sovereignty. Garcia has been among the most outspoken critics.

All Latin American governments are traditionally wary of the United States because of repeated armed and covert interventions this century.

Analysis By JOAN HANAUER

NEW YORK (JAN. 10) UPI - Matt Groening has been yearning for a grown-up prime time cartoon show ever since Bullwinkle and Rocky were relegated to the Saturday morning kidvid ghetto - and he finally had to create one himself.

That's ''The Simpsons,'' which makes its series debut on Fox Broadcasting Sunday, Jan. 14, 8:30-9 p.m. Eastern time.

This ''hallucination of a sitcom,'' as Groening calls it, began life as part of Fox's ''The Tracey Ullman Show.'' When ''The Simpsons'' aired as a Christmas special on Dec. 17, it became Fox's second highest-rated show ever, coming in second in its time period, ahead of ''Sister Kate'' on NBC and ''Homeroom'' on ABC. It failed to beat ''Murder, She Wrote'' on CBS - but few shows do.

The Simpson clan can be easily recognized by their bulging eyes and protruding overbites. Homer, the head of the clan, works as a safety inspector at a nuclear power plant. Mom Marge tries to keep peace in the

family and moonlights as a roller-skating carhop. The kids are son Bart, an anagram for Brat; daughter Lisa, whose intelligence goes unrecognized in this crowd, and baby Maggie, who is permanently plugged in to her pacifier.

In the first episode, Bart switches papers with the class brain/snitch during an intelligence test and finds himself transferred to a special school for genius kids. Bart thinks he went to school heaven - there are no books or homework- but it turns out to be a nightmare.

''It's always been my dream to have a TV show,'' Groening, 35, who also draws a syndicated newspaper cartoon strip, ''Life In Hell.'' ''I'm one of those guys, like everybody else, who's been disgusted with the junk on television.

''I've always loved cartoons and there hasn't been one on prime time since Rocky and Bullwinkle that appealed to weird kids like I was and to adults.''

Rocky and Bullwinkle originally ran on weekday afternoons in 1959-60 as ''Rocky and His Friends,'' then spent the 1961-62 season in prime time as ''The Bullwinkle Show'' before being moved, first to Sunday afternoons, then Saturday mornings.

''We're not trying to follow in its footsteps,'' Groening said, ''but we're trying to stretch the boundaries of what television animation is all about. 'The Simpsons' is a show for adults that happens to have kids in it and some of the antics will amuse kids.

''We hope we have enough wild entertainment so different members of the family can enjoy it. It's family entertainment but we're not toning it down or aiming at kids and there will be some jokes kids don't get.''

He pointed out that ''The Simpsons'' is a sitcom without the restrictions of live action sitcoms.

''We have up to 40 speaking parts per show, no laugh track and whatever sets we want. Because of the nature of the medium we can do much wilder stuff that would be merely appalling in live action,'' he said.

''Everybody has watched enough sitcoms over the years to know what the structure is - an A-story and a B-story that are resolved in 22 minutes. With 'The Simpsons' we are doing stories that we defy anyone to predict.''

He cited the one where Homer's family humiliates him at the nuclear power plant's annual picnic. As a result, the Simpsons go for family therapy - electroshock family therapy. Then there's the episode in which the school principle hates Bart so much he hatches a scheme to send him to France as

an exchange student, which results in an animated TV show with subtitles.

''We have some very wild, broad visual humor,'' Groening said, ''but we also have true emotional moments, which you don't see often in TV animation. Our goal is to make people, at certain moments, forget the grotesque side of thse cartoon creatures.''

There's a moment like that in the first episode of ''The Simpsons,'' in which Bart tells Homer how much he loves him - but it doesn't last long.

Willie Nelson and Kris Kristofferson produce a warm glow of theatrical chemistry that makes ''Pair of Aces,'' a modern-dress western, fun to watch.

The show airs on CBS Sunday, Jan. 14, 9:30-11:30 p.m. Eastern time (8-10 p.m. Pacific Time) in a schedule gone awry because of the afternoon play of the NFC championship game.

Kristofferson plays Texas Rangers Captain ''Rip'' Metcalf, who got the nickname because so many of the villains who crossed his path wound up resting in peace.

He unexpectedly gets custody of Nelson as Billy Roy Barker, a skilled safecracker who says he's being framed.

Metcalf tries to keep Billy Roy in tow, although his prisoner keeps cracking the locks on handcuffs, chains, etc., while he searches for a serial murderer who beats to death teenage girls. Metcalf is the widower-father of two daughters, one of whom is the same age as the victims.

Helen Shaver and Rip Torn are along for the ride in this good-natured adventure story in which the male bonding chemistry between its stars is a lot more important - and impressive - than the plot.

NEW YORK (JAN. 10) UPI - The stock market closed lower Wednesday in active trading after regaining some of the ground lost to a bout of computerized program selling at midday.

The Dow Jones industrial average, which tumbled 28.37 Tuesday, lost 15.36 to 2750.64 after being down about 35 points at one point in the afternoon.

Among broader market gauges, the New York Stock Exchange composite index fell 1.23 to 192.12 and Standard & Poor's 500-stock index fell 2.31 to 347.31. The price of an average share dropped 23 cents.

Declines pounded advances 1,036-503 among the 1,954 issues crossing the NYSE tape. Big Board volume totaled 175,990,000 shares, compared with 155,210,000 shares traded Tuesday.

Fears about what fourth-quarter earnings reports might show dragged prices

down in early trading, but a spate of computerized program selling around midday exacerbated the losses, driving prices down sharply. The market rebounded late in the day as program buying repaired some of the damage, but analysts were not particularly encouraged by the late rebound.

"I think we need to test the low of the day again Thursday (2730 in the Dow industrials), before people will feel safe buying," said Rodd Anderson vice president of equity trading at Shearson Lehman Hutton Inc.

But what analysts emphasized about Wednesday's trading was the starring role played by program trading, used to profit on fleeting price discrepancies between stocks and stock index futures traded in Chicago.

"The program traders are back," said Ralph Bloch, senior vice president and chief market analyst at Raymond, James and Associates in St. Petersburg, Fla. "Fears about earnings and the economy are the broad backdrop but the program traders are back and have been since the extreme move in the first session of the year (when the Dow surged almost 57 points to an all-time high)," he said. "That's been the dominating force."

Bloch noted, too, that the market has recently been plagued with low volume, which has also served to increase volatility, and that it has suffered from a lack of leadership.

"We have weakness in money center banks and oil issues, which had been higher," he said. "The only area of leadership recently had been the tech stocks, but most people viewed that as a bounce back from the beating they took in late December. There's a dearth of leadership."

On the trading floor, Citicorp was the most active NYSE issue, off 1/4 at 27 as major banks remained under pressure amid fears about fourth-quarter earnings.

Philip Morris followed, down 1/2 to 39 3/4. United Telecommunications was third, dropping 1 1/8 to 34 1/4.

Among the other blue chips, AT&T lost 1/4 to 45, Coca-Cola fell 1/2 to 76 3/8, Merck fell one to 76 3/8, International Paper eased 3/4 to 54 7/8 and IBM fell 3/8 to 99.

As for stocks suffering earnings-related declines, Mead tumbled 1 7/8 to 36 after an analyst was said to have lowered the company's earnings estimate. Paramount Communications lost 1 3/4 to 49 1/4 after reporting Tuesday a loss for the quarter ended in October. Ames Department Stores fell 7/8 to 8 1/8. The company said it expects to report a loss for the fiscal year ending this month.

Delta Air Lines lost 1 5/8 to 66 3/4. Reports said the company was warning

analysts that its December quarter earnings would be lower than expected. And CPI Corp. tumbled two to 31 7/8 after reportedly saying fourth-quarter earnings will fall short of expectations.

Foreign country mutual funds posted some of the market's sharpest gains. Germany Fund surged 3 1/4 to 24 1/8, Helvetia Fund added 1 1/4 to 17 1/8 and Italy Fund jumped one to 18.

Precious metals stocks gained amid uncertainty about the economy and earnings. Newmont Gold rose 1 3/4 to 53, ASA Ltd. climbed 2 3/8 to 59 5/8 and Hecla Mining gained 1/2 to 15.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 208,395,600 shares, compared with 187,944,680 shares traded in the previous session.

Prices closed sharply lower in moderately active trading on the American Stock Exchange. The Amex Market Value index lost 2.15 to close at 378.29. The price of an average share dropped nine cents. Declines led advances 364-210 among the 829 issues traded. Composite volume totaled 15,857,310 shares, compared with 13,655,380 traded Tuesday. B.A.T. Industries led the Amex issues, unchanged at 13 3/4.

The National Association of Securities Dealers composite index plunged 6.07 to 450.70, more than erasing the gains it had made so far this year.

NEW YORK (JAN. 10) UPI - The dollar mostly strengthened Wednesday in New York trading as the market was swept by an apparently unfounded rumor of concerted central bank intervention to boost Japan's yen against the German mark, after which the Fed was detected selling dollars to boost the yen.

Participants had been expecting some action to prop up the yen. It has lost considerable ground against the deutsche mark because of huge flows of capital from Japan into the currently booming West German stock and bond markets, as well as for Japanese domestic political reasons.

So the rumors that the Fed and the Bundesbank intervened simultaneously by selling dollars for yen and marks for dollars gained credence even though such a move would have been very unusual. U.S. and Japanese officials are mainly worried about yen weakness against the dollar.

"We think that basically was a rumor," said Francoise Soares-Kemp, a Credit Suisse treasury vice president. "It worked real well because people had been saying for some time that the mark-yen thing was out of whack." Another New York trader also said he doubted the Fed-Bundesbank intervention rumor, and confirmed the Fed's later action.

Soares-Kemp said the rumors gave players an excuse to take some profits and sent the mark sharply down against the yen before rebounding. Later, Soares-Kemp said, "We did see the Fed come in in the afternoon to sell the dollar against the yen. That did fairly well establish that they were intervening for the yen against the dollar."

Late in the New York foreign exchange session the dollar was quoted at 1.6788 German marks, up from 1.6750 Tuesday. Against the Japanese currency the dollar was fetching 145.56 yen, ahead from 145.05.

Earlier in the trading cycle, Bank of Japan Governor Yasushi Mieno said that he saw no need for special consultations on the yen's current weakness by the Group of Seven major industrial democracies.

"The foreign exchange market is fluctuating on speculation only," Mieno told a news conference. "The exchange market has shown considerable speculative moves since the new year started." The dollar closed at 145.30

yen in Tokyo after hitting an intraday high of 145.90 yen.

Mieno said the market will soon calm down despite a bearish outlook for the Japanese currency, undermined by domestic political scandals which jeopardize Liberal Democratic Party rule, and low interest rates.

In New York, the British pound moved up to $1.6630 from $1.6567. Other dollar rates: 1.5147 Swiss francs, down from 1.5170; 5.7150 French francs, up from 5.7060; and 1,254 Italian lire, up from 1,252.

In Europe the dollar closed lower against the main currencies, declining in Frankfurt to 1.6795 German marks against 1.6805 Tuesday, and easing in Zurich to 1.5098 Swiss francs against 1.5275.

In Paris the dollar ended at 5.6995 French francs, off from 5.7250, It also fell in Brussels and Milan to 35.09 Belgian francs against 35.27, to 1,251.90 Italian lire from Tuesday's 1,256.50. In London the pound closed higher at $1.6615 against $1.6535.

Republic National Bank in New York closed cash gold at $412.25, sharply up from $404.50 Tuesday. The New York Commodity Exchange settled gold at $412.40 an ounce, up from $404.20. Zurich gold rose to $409 an ounce from $403.50, and London gold advanced to $409.25 an ounce from $403.75.

Republic closed cash silver at $5.325 an ounce, up from $5.253, while Comex spot silver rose to $5.316 an ounce from $5.234. Zurich silver was up at $5.30 an ounce, but London silver fell to $5.25 an ounce from $5.29.

PANAMA CITY, PANAMA (JAN. 10) UPI - The United States and Panama signed a broad agreement Wednesday to cooperate in the battle against drug trafficking, an accord that will help Panama become eligible for further American aid, a U.S. official said.

The open-ended agreement calls for cooperation in the areas of law enforcement and drug interdiction, with specific programs to be developed later, said Melvyn Levitsky, assistant secretary of state for

international narcotics matters.

Levitsky described the accord as an important symbolic measure because it comes at a time when former Panamanian strongman Manuel Antonio Noriega awaits trial in Miami on drug trafficking and money laundering charges.

''In signing this accord, President (Guillermo) Endara's democratically elected government has put an emphatic end to that aspect of perhaps the most unhappy period in Panamanian history,'' Levitsky told reporters.

Noriega turned himself over to U.S. authorities on Jan. 3, two weeks after the U.S. invasion of Panama. Under Noriega, efforts between Panama and the United States to halt drug trafficking broke down and money laundering flourished, U.S. officials said.

Panama has been one of the few countries in the past two years that has failed to receive U.S. government certification that it is fighting drug trafficking. Certification is required for countries to be eligible for the full slate of U.S. foreign aid programs.

With Wednesday's agreement, Levitsky said he is ''confident'' that Panama will be certified. Panama was last certified in 1987, he said.

''President Endara has made it clear to me that this government is strongly committed to combatting the flow and use of illicit narcotics and that he considered this to be an important priority,'' said Levitsky, who met with Endara and Vice President Ricardo Arias Calderon during his two-day trip to Panama.

. Ambassador Deane Hinton presented his credentials to Endara, a ceremonial procedure for new ambassadors.

As he left the presidential palace after meeting with Endara and Arias Calderon for 30 minutes, Hinton refused to say how much aid Panama will receive from the United States to recover from the invasion and rebuild destroyed neighborhoods.

Asked about a front-page story in La Estrella, a Panama City newspaper, that Endara sent President Bush a letter requesting $1.5 billion in U.S. aid, Hinton said, ''It is not the time to talk of that.''

Hinton, 66, is a career diplomat who was previously ambassador in Costa Rica, El Salvador, Pakistan and Zaire. He replaced Arthur Davis who held the post for more than three years.

MOSCOW (JAN. 10) UPI - Maverick Israeli Science Minister Ezer Weizman held a surprise meeting with Soviet Foreign Minister Eduard Shevardnadze Wednesday and discussed upgrading Israel's diplomatic representation in Moscow - an initiative that has caused a ministorm in Israel.

Israel and the Soviet Union have had consular delegations in each other's countries for more than a year but the two nations have been striving toward a full restoration of diplomatic relations. The Kremlin severed ties with Israel in the aftermath of the 1967 war.

''Among other things we spoke about was trying to raise their and our status in the representation here to an envoy,'' Weizman told Israel Radio in an interview. ''We spoke in parallel to this about the determination to arrive at diplomatic relations.''

''First and foremost we spoke about raising the status of the representation.''

Weizman, the science and technology minister who two weeks ago barely escaped dismissal from the Israeli Cabinet because of meeting PLO members, was the most senior Israeli official to ever meet Shevardnadze in the Soviet capital.

Weizman, a former RAF pilot in World War II who then helped found and commanded the Israeli Air Force, was allowed to go on the Soviet trip by promising Israeli Premier Yitzhak Shamir he would not engage in diplomacy.

But Weizman won a meeting almost immediately with Shevardnadze's first deputy minister Yuli Vorontsov, the rising star of Soviet diplomacy and a Middle East expert. And Wedesday, Weizman was received by Shevardnadze.

Israeli Foreign Minister Moshe Arens told Israel Radio that Weizman had accepted the Soviets' refusal to include the head of the Israeli delegation in Moscow, Arieh Levin, in the meeting with Shevardnadze.

''This is not only a personal insult to him (Levin),'' Arens said. ''It is more than an insult. It is something that causes us harm in our struggle over the status of the delegation. This is a very important struggle for us.''

Along with the United States, the Soviet Union was the first nation to recognize the infant Jewish state in 1948 and it campaigned for its birth in 1947 at the United Nations. But in the 1950s, it shifted its support to the Arab states, backing them in losing wars in 1956, 1967 and 1973.

In the first week of the Lebanon war in 1982, Israel wiped out Syria's Soviet-supplied army of MiG fighters.

Weizman, who as a former defense minister, matched wits with Soviet defensive strategy, emerged from the meeting with Shevardnadze singing the praises of the new ''political thinking'' in Moscow.

''There is snow outside but it is warm in the heart,'' he said.

#90010u2217 01/10/1990 ~United Press International

(JAN. 10) UPI - Vice President Quayle is calling for a bold initative to keep America competing successfully in space. In remarks prepared for the American Astronomical Society meeting in Arlington, Virginia, today, Quayle says the nation's goal must be ''to open the frontiers of space.'' Quayle- who chairs the National Space Council- says the space program has NOT maintained the momentum of the 1960's and warns ''the rest of the world is catching up and may pass us by.''

Quayle's words of caution come following today's successful deployment of the Navy's Syncom-5 satellite by the shuttle Columbia crew. The communications satellite was rocketed to its final orbit 22-thousand 300 miles above the equator after being pushed from the shuttle's cargo bay. Flight director Granvil Pennington says- ''It was an outstanding morning.''

Vice President Quayle says his coming diplomatic trip to Latin America is ''NOT a fence-mending mission.'' Quayle spoke to reporters during a photo opportunity with the Japanese trade minister in Washington. He says plans for the trip ordered by President Bush last Friday are nearly complete and that it's likely he will visit Panama but probably NOT Colombia. Bush plans to attend a hemispheric drug summit in Cartagena, Colombia, next month.

#90010u2260 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - The story of Boston furrier Charles Stuart, suspected of killing his pregnant wife and blaming the crime on a black man, will be made into a TV movie, CBS announced Wednesday.

The bizarre drama began when Stuart called police from his car telephone Oct. 23 and said he and his wife, Carol, were kidnapped, robbed and shot by a black man shortly after they left a birthing class at a Boston hospital.

Police found their car in a rundown area as the couple lay unconscious from gunshot wounds. They were transported to a hospital, where Carol Stuart gave birth to a son by emergency Caesarean section hours before she died. The infant died 17 days later.

On Thursday, Stuart jumped to his death into Boston Harbor, leaving a suicide note behind, as authorities sought to arrest him for the murder of his wife. They now believe he fatally shot his wife in the head, then wounded himself in the abdomen in the attempted cover-up.

The story, which drew national attention and has all the elements of a television movie, will be produced by Arnold Shapiro, executive producer of the network's show ''Rescue 911.''

Norman Powell, vice president of CBS Entertainment Productions, said a crew from the show was on the scene with the rescue personnel that responded to Stuart's dramatic call for help. He said the crew has maintained close relationships with many of the principals involved.

''CBS has been involved with this story from the start,'' Powell said. ''We have the best sources and are dedicated to producing a film that is both responsible and moving.''

The CBS footage was never aired on ''Rescue 911.''

Shapiro's past credits include producing the ''Scared Straight'' TV documentary and docudrama.

#90010u2272 01/10/1990 ~United Press International

(JAN. 10) UPI - City Council members in Yonkers, New York, got a boost from today's Supreme Court ruling saying a federal judge overstepped his

bounds in ordering them to change their votes on minority housing. The case stems from attempts to end segregated housing in Yonkers. An appeals court ordered some council members to change their vote and approve a desegration plan or face fines of 500 dollars a day. Chief Justice William Rehnquist says the judge should have first tried fines against the city before penalizing individual council members.

Environmentalist Barry Commoner warns his Soviet counterparts that Moscow's efforts to restructure its economy could mean importing pollution from the United States. Commoner says about two-thousand East-West commercial ventures are under negotiation, and that... combined with pressure on Soviet business to generate foreign exchange... could complicate environmental regulation of economic activity. His remarks came in a speech to the U-S-Soviet Joint Commission on Environment Protection in Washington, D-C.

Women fought alongside men in the U-S invasion of Panama last month but the Army confirms that women involved in combat will NOT get the Combat Infantryman's Badge. Army rules bar women from serving in the infantry. Some 600 U-S women soldiers stationed in Panama and the 170 women sent in with the December 20th invasion forces were assigned to military police units- NOT infantry groups. For that reason, the Army says women who saw action in Panama are NOT eligible to be awarded the coveted badge.

#90010u2291 01/10/1990 ~United Press International

ALBANY, NY (JAN. 10) UPI - A cafeteria wall that collapsed at an elementary school during a storm in November, killing nine children, was built with no bracing or other supports to withstand high winds, a state commission said Wednesday.

The Disaster Preparedness Commission called the problem a ''design flaw,'' and a top official said the East Coldenham Elementary School architect, John Clark, is under investigation by the state Education Department.

The finding raises questions about accountability because requirements stipulated in state codes for 1959, the year the building was constructed, did not apply to schools, and it was unclear why Clark was being investigated.

The commission has recommended the building code be updated with tougher wind strength design standards.

Four schools in Dutchess County's Wappinger's Falls and Spackenkill school districts, also designed by Clark, had similar design flaws, the commission said, and the panel has taken steps to prevent future collapses.

The East Coldenham finding also revealed that part of the wall was replaced in 1984, but it was not determined if there was a bracing system within its construction. No blame for the collapse has been placed on that procedure.

The wall collapsed on Nov. 16 when struck by a severe wind gust, not a tornado, as originally reported by the National Weather Service, the commission found.

''The masonry portion of the collapsed wall was structurally flawed by a design error that left it unsupported by lateral or vertical bracing,'' said a letter submitted to Gov. Mario Cuomo from commission Chairman Dr. David Axelrod, the state health commissioner.

Richard Tomasetti, a consulting engineer hired by the commission, said the 12-foot-high ''freestanding'' masonry structure, surrounded by a 25-foot aluminum and glass ''curtain,'' fell as a ''rigid body.''

Tomasetti estimated that the wall as built could have withstood a maximum gust of 80 mph. Without bracing, the wall could withstand a 45-mph gust. The commission estimated the critical wind gust at between 90 mph and 100 mph.

''The curtain gave some additional support as it started to fail,'' Tomasetti said.

The 1959 state building code stipulated that walls must withstand a minimum of 75-mph winds. With additional bracing or the use of building materials exceeding minimum standards, such walls have resisted winds of 120 mph.

The commission said the glass and aluminum curtain was built in 1984 to replace the original wood and glass curtain that had begun to rot. The commission declined to place responsibility on the firm of Flemming and Silverman, which designed the replacement curtain.

''In 1984 an engineer could see (the center masonry wall) was not braced, but could not see if it had a structural system within it, which was another way to reinforce it,'' Tomasetti said.

Education Commissioner Thomas Sobol said his department does not have the resources to see if developers follow design specifications or if the architect submits a safe design.

''We simply accept the professional seal of an architect the way a hospital would not check the operation that a surgeon performs,'' Sobol said.

Besides the design flaw, the commission identified weaknesses in severe weather warning systems. The notification system ''broke down with respect to the East Coldenham school,'' Axelrod said.

Commission recommendations to avert future disasters:

-The Education Department should alert all schools to ''design flaw'' at East Coldenham and make sure reviews of each building are completed.

-State agencies should require checklist of key design items to be evaluated and verified by the architect.

-The state building code should be amended to include wind strength requirements of the American National Standards Institute.

-State and county governments and school districts should take immediate steps to upgrade and streamline severe weather notification systems. School emergency plans should be tailored to tornados and involve training for school staff and students.

#90010u2344 01/10/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 10) UPI - Columbia's five astronauts launched a Navy communications station like a giant Frisbee Wednesday and fired their ship's rockets to zero in on a dying 11-ton science satellite for a dramatic rescue in space Friday.

Working from Columbia's high-tech cockpit, rookie astronaut David Low released the last in a series of five Syncom IV satellites from its cradle in the shuttle's payload bay at 8:19 a.m. EST as the ship sailed over the Atlantic Ocean east of Africa.

''And Houston, we had a good deploy,'' Low, 33, radioed mission control in Houston as the 15,000-pound drum-shaped satellite rolled away, the first major objective of the 10-day flight, America's 33rd space shuttle mission.

Forty-five minutes later, Syncom's on-board solid-fuel rocket motor fired for 61 seconds, boosting it toward a final orbit 22,300 miles above the equator where it will relay voice and data communications for the Pentagon.

''Syncom is headed toward a successful flight,'' the mission's chief flight director, Granvil Pennington, said at a news conference. ''So once again we've got them off to a good start.''

Besides conducting experiments and trying to fix a balky facsimile machine the astronauts pressed on with their chase of the Long Duration Exposure Facility, a 12-sided satellite as big as a school bus that otherwise would plunge back into the atmosphere around March 9 and break apart.

Commander Daniel Brandenstein, 46, co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and Low began stalking the satellite at the moment of their liftoff Tuesday from launch pad 39A at the Kennedy Space Center.

Columbia was trailing LDEF by about 840 miles Wednesday with the shuttle racing along in a slightly elliptical orbit allowing it to catch up with the falling science probe at 9:48 EST a.m. Friday, according to NASA's latest estimates.

Brandenstein fired maneuvering jets to fine tune Columbia's course Wednesday, keeping the rendezvous on track and compensating for a rocket firing earlier in the day to move the shuttle away from Syncom.

''Everything is looking good,'' Pennington said. ''The rendezvous is on schedule.''

During the rescue operation Friday, Brandenstein will take manual control of Columbia, easing the shuttle within 35 feet of LDEF. Dunbar, operating the spaceplane's $50-million, 50-foot robot arm, will snare the satellite and after a thorough visual inspection lower it into the ship's cargo bay for return to Earth.

NASA Administrator Richard Truly, a former shuttle astronaut, said the LDEF rendezvous ''requires ... an intricate series of maneuvers by the crew to capture it and that's always a challenging maneuver. I see it as a lot of work.''

LDEF was launched in 1984 from the shuttle Challenger to serve as little more than a carrier for 57 experiments, most of them passive in nature and

many designed to find out how various high-tech materials stand up to long-term exposure to the radiation, vacuum and extreme temperature of space.

Data from LDEF is expected to help NASA designers choose the materials that will be used to build space station Freedom later this decade.

LDEF originally was to be returned to Earth after just 10 months, but its retrieval was delayed by a series of shuttle launch postponements and ultimately by the loss of Challenger and its crew of seven on Jan. 28, 1986.

Another important aspect of Columbia's 10-day flight is the orbital test of modifications to life support, fuel and waste disposal systems designed to permit ''extended duration'' missions of up to 28 days required for the construction of the space station.

On its first full day back in orbit, Columbia, which ushered in the age of the space shuttle on April 12, 1981, was performing well.

''It's a great ship up there they're flying in and it continues to perform beautifully,'' Pennington said. ''The lady of the fleet is really working fine for us this time.''

Columbia is scheduled to make a pre-dawn landing at Edwards Air Force Base Calif., on Jan. 19.

#90010u2403 01/10/1990 ~United Press International

CINCINNATI (JAN. 10) UPI - The Knoxville, Tenn. News-Sentinel Wednesday filed suit in Knoxville against the Knoxville Journal Corp., its president Gerald Garcia, and its parent, Persis Corp., in response to Persis' recent purchase of another Knoxville-area newspaper, the Maryville-Alcoa Daily Times.

The News-Sentinel, owned by E.W. Scripps Co. of Cincinnati, contends Persis' ownership and operation of The Daily Times breaches a joint operating agreement between the News-Sentinel and the Journal.

The News-Sentinel, published in the morning, handles advertising, production and distribution for the Journal, published in the afternoon. Profits from the joint business operation are shared by the companies according to a formula set by the operating agreement.

''The Maryville-Alcoa Daily Times competes in Blount County, Tenn. with the jointly operated News-Sentinel and Journal for advertising and circulation revenues,'' said Scripps officials. ''Through the joint

operating agreement, Persis has access to the News-Sentinel Company's confidential business information and trade secrets.

''Since The News-Sentinel and Journal compete with the Daily Times, ownership of the Daily Times by Persis violates Persis' contractual obligation to 'cooperate with each other in every proper way that will promote the successful operation' of the joint operating agreement,'' said Scripps' officials.

#90010u2455 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - The state attorney general threatened to sue Exxon Wednesday unless it agrees accept liability and pay for the cleanup of wetlands near Staten Island polluted by an oil spill last week.

Attorney General Robert Abrams, in a letter to Lee Raymond, president of the Exxon Corp. dated Jan. 10, demanded that the oil company accept liability for ''one of the greatest avoidable ecological disasters'' in the city's history.

If Exxon does not ''confess its liability'' within 48 hours, Abrams said he will file suit.

Exxon is already the target of a joint criminal investigation being conducted by Abrams' office, the state Department of Environmental Conservation and Staten Island District Attorney William Murphy.

Exxon officials have blamed the Jan. 1 spill of 13,500 barrels of home heating oil into the Arthur Kill off of Staten Island on a mechanical breakdown of an alarm system that should have shut down a ruptured pipeline.

The leak in the pipeline between Exxon's Bayway Refinery and Bayonne, N.Y. apparently went unnoticed for several hours despite a series of alarms during the night both from the detection system and reports of oil in the water.

Oil has covered large portions of beaches on Prall's island, a bird sanctuary in the Arthur Kill. Oil has also has fouled beaches and marshland on Shooter's Island, the Isle of Meadows, Old Place Creek and Sawmill Creek, sections of Staten Island important for wildlife.

''The wetlands are fouled with heavy fuel oil ... which are poisonous to birds, their food supplies, and plant life,'' Abrams wrote.

#90010u2756 01/10/1990 ~United Press International

NEW YORK (JAN. 10) UPI - The bank committee evaluating Mexico's massive foreign debt has agreed on a three-year plan to finance $48 billion in commercial bank debt and will send the pact to 450 creditor banks for their expected approval, it was announced Wednesday.

Signing of the agreement was expected in early February, according to the announcement by Mexican Finance Ministry undersecretary Angel Gurria and William Rhodes, co-chairman of the 15-member bank committee for Mexico.

Gurria and Rhodes said virtually all of Mexico's approximately 450 bank creditors worldwide have committed to the package for 1989-1992, which covers basically all the nation's approximately $48 billion in medium- and long-term commercial bank debt.

If the package garners the expected bank approval it will bring significant debt relief to Mexico and represent an important victory for the debt-relief program championed by U.S. Treasury Secretary Nicholas Brady.

The Mexican debt plan is seen as the first full implementation of Brady's well-received approach and as a model for solving the Third World debt crisis.

Mexico and its commercial bank creditors reached a tentative agreement last July 24 under which Mexico would be granted a 35 percent reduction in its $53 billion commercial debt. The commercial bank advisory committee for Mexico was charged with working out the details of the tentative pact.

Mexico's foreign debt totals $104 billion, about $51 billion of it owed to the World Bank and other international organizations.

The status of the $5 billion in commercial bank debt not included in the package announced Wednesday was not disclosed.

Rhodes and Gurria praised what they called the ground-breaking work of the commercial bank committee. ''The positive response is unprecedented in any package of this magnitude since the debt crisis broke out in August 1982 '' Rhodes said.

Of the three basic options offered to banks in the package, about 41 percent of the total exposure has committed to prinicipal-reduction bonds, about 49 percent to debt-service-reduction bonds and about 10 percent to new money, the announcement said.

''The package offers Mexico the support it needs from the commercial banks to carry out its program of economic reform and growth, to leave the debt crisis behind it and to look with confidence to the future,'' Gurria said.

President Carlos Salinas de Gortari took office in December 1988 in the midst of Mexico's debt crisis, but resisted intense pressure to declare a moratorium on debt payments.

''I will avoid confrontation,'' Salinas said in his inaugural speech. ''But I declare emphatically and with conviction that the interests of Mexicans come before those of (foreign) creditors. The priority now will be not to pay, but to return to growth.''

#90010u2858 01/10/1990 ~United Press International

(JAN. 10) UPI - U-S will keep economic sanctions against China despite lifting of martial law... Columbia orbits a satellite... rains flood Pacific Northwest... and Vice President Quayle prepares for Latin American trip. U-P-I has it all, next:

The White House says President Bush welcomes China's announcement that it's ending seven months of martial law in Beijing as a ''positive step'' toward easing repression.

But a White House spokesman says the economic sanctions imposed by the United States against China after last June's government crackdown on pro-democracy students will remain in place.

And Japan says the lifting of martial law in Beijing tomorrow will NOT immediately repair relations between the two nations. But, the official spokeswoman for Japanese Prime Minister Toshiki Kaifu says the action will encourage Japan to resume economic assistance to China.

The governor of Hong Kong, Sir David Wilson, arrived in Beijing today for

two days of talks with key Chinese officials. His visit comes at a low point in Sino-British relations over the issue of Hong Kong, which reverts back to Chinese rule in 1997.

The announcement from Chinese officials declaring an end the martial law in Beijing is being viewed as a symbolic gesture designed to win back foreign economic aid.

#90010u2893 01/10/1990 ~United Press International

(JAN. 10) UPI - The shuttle Columbia is moving in on a falling science satellite that the crew hopes to retrieve on Friday.

The Long Duration Exposure Facility was launched in 1984 to help scientists learn about building sturdier spacecraft.

NASA had intended to bring the satellite back to Earth after 10 months... but a series of delays and the Challenger disaster put the mission on hold.

The space agency hopes to put the years of delays behind it Friday, when the shuttle astronauts will use Columbia's robot arm to pull the satellite into the payload bay for the journey home.

Columbia blasted off yesterday on a 10-day mission that has so far been smooth sailing. As flight director Robert Castle puts it, Isaac Newton ''would have been very happy'' with the shuttle's performance.

The five astronauts today launched a Navy communications satellite on its way to a final orbit 23-thousand 300 miles above the equator.

While the shuttle spent a second day in orbit, Vice President Quayle had a few things to say about the nation's space program right here on Earth.

The vice president told the American Astronomical Society in Arlington, Virginia, the space program has failed to maintain the momentum of the 1960's. Quayle says ''innovative'' approaches are needed to- in his words- ''open the frontiers of space.''

#90010u2927 01/10/1990 ~United Press International

(JAN. 10) UPI - Southwestern Washington state has been drenched by heavy rain that's left rivers swollen and roads flooded.

Pierce, Thurston, and Lewis Counties felt the brunt of the bad weather, which forced the evacuation of hundreds of people this morning.

Emergency services spokesman Bob Berg says rushing waters overflowed a section of an earthen dike on Skookumchuk River at Centralia in Lewis County, 100 miles south of Seattle. Berg says 200 people were evacuated this morning, but adds as many as two-thousand of Centralia's 12-thousand residents are threatened by the high waters. He says others may be evacuated today.

More than four-and-a-half inches of rain fell on the Puget Sound during a 24-hour period. The wet weather caused mudslides and power outages and flooded homes, schools and roads.

Elsewhere in the Pacific Northwest, Oregon Governor Neil Goldschmidt yesterday declared a state of emergency for the northern coast, also drenched by heavy rains.

#90010u2944 01/10/1990 ~United Press International

(JAN. 10) UPI - Vice President Quayle says plans are nearly complete for his diplomatic mission to Latin America.

While announcing the trip last week, President Bush expressed concern about relations in the region following the U-S invasion of Panama last month. Bush described the situation as ''something that's correctable.''

But Quayle says he's NOT embarking on- in his words- ''a fence-mending mission.'' He says he's simply going to consult friendly nations on- quoting again- ''a mission of democracy and freedom.''

Details of Quayle's trip have NOT yet been announced, but an administration official says the vice president probably will meet with 12 regional leaders. The official adds the trip may include Panama, but probably NOT Colombia.

The Supreme Court today ruled that a federal judge overstepped his powers when he ordered Yonkers, New York, City Council members to change their votes to enact a minority housing plan.

The case involves the city of Yonkers' attempt to fight plan to build 200 federally funded housing units on seven sites in the city's mostly white east side neighborhoods.

In three combined cases, four members of the City Council tried to reverse the ruling of an appeals court that ordered them to change their votes and approve the desegregation plan or face 500-dollar-a-day fines.

Chief Justice William Rehinquist said the federal judge should have tried to impose fines only against the city before fining individual council

members. But Rehnquist did NOT rule out such fines against individual council members in the future.

(JAN. 11)

Baseball

Baltimore - Traded outfielder Larry Sheets to Detroit for infielder Mike Brumley; signed infielder Tim Hulett to a 1-year contract.

Cleveland - Signed free-agent shortstop Rafael Santana to a 1-year contract.

Houston - Signed infielder Steve Lombardozzi to a 1-year contract.

Montreal - Acquired minor-league third baseman Romy Cucjen from St. Louis for minor-league pitcher Isaac Alleyne; announced Rafael Landestoy will serve as a defensive coach; named Jay Ward minor league hitting instructor and Dave Nelson minor league defensive instructor.

NY Mets - Signed catcher Barry Lyons to 1-year contract.

Philadelphia - Announced pitcher Bruce Ruffin and catcher Tom Nieto have agreed to 1-year contracts.

St. Louis - Signed pitcher Greg Mathews to a 1-year contract; named Brian L. Bartow manager of public relations.

Texas - Signed outfielder Nick Capra to a minor-league contract.

Basketball

Cleveland - Placed forward Winston Bennett on injured list.

Philadelphia - Placed forward Kenny Payne on injured list.

College

Florida State - Named Bob Goin athletic director.

Rutgers - Named Doug Graber football coach.

Southeastern Conference - Named Roy Kramer commissioner.

UCLA - Named Homer Smith offensive coordinator.

Football

LA Rams - Signed safety Johnnie Johnson; placed linebacker Paul Butcher on injured reserve.

Hockey

Minnesota - Sent defenders Neil Wilkinson and Link Gaetz to Kalamazoo of the International Hockey League.

NY Rangers - Sent right wing Rudy Poeschek to Flint of the International Hockey League.

Horse Racing

New York Racing Association - Named Allan R. Dragone chairman of the board of trustees.

Soccer

Tacoma (MISL) - Signed midfielder Rick Davis.

#90010u2977 01/10/1990 ~United Press International

(JAN. 10) UPI - The Soviet-dominated trading bloc Comecon ended a crucial meeting in Sofia, Bulgaria, today. Eastern European members pushed through a compromise agreement for reforms, and conservative members pushed to delay the implementation of such reforms.

Delegates at the meeting decided a commission will evaluate trade agreements between member states and figure out how to facilitate deals in better alignment with world market prices... using a convertible currency, rather than the unconvertible Soviet ruble.

The delay in the actual implementation of economic change is part of a compromise between the reform-minded states and the more conservative members, such as Cuba.

Closing out the meeting, the Bulgarian prime minister said agreement for a change to a market-oriented system marks a new beginning and called the agreements ''a real basis for co-operation.''

Comecon has been under fire from countries such as Poland, Hungary, and Czechoslovakia who say the current bargaining system is too restrictive and only serves Soviet interests.

A showdown appears to be in the works in Lithuania, where thousands rallied today in a dress rehearsal for Mikhail Gorbachev's visit tomorrow.

Gorbachev is traveling to the Baltic republic to try to find a compromise with Lithuania's Communist Party, which broke from Moscow last month.

But the Soviet leader may face a massive demonstration when he arrives. About 25-thousand people gathered to demand independence today.

A sea of banners, posters and people filled a square in the medieval city of Vilnius chanting- ''Freedom, Freedom,'' and ''Lithuania, Lithuania.''

In the words of a retired gas worker taking part in today's protest- ''Let him see that it is NOT just extremists but the entire Lithuanian people.''

-30- 1982

#90010u3098 01/10/1990 ~United Press International

(JAN. 10) UPI - Education Secretary Lauro Cavazos told a department staff meeting today that rumors that he will be leaving the Bush Cabinet are false. Cavazos suggested that such reports come from those opposed to his policies.

A consumer activist says Congress is looking favorably on bills to create a federal seafood inspection program because of recent public interest in food safety. The seafood industry supports an inspection program.

In Alaska, there are reports of minor health problems in the wake of Monday's surprise eruption of Redoubt Volcano. One official says ashfall from the volcanic peak has left many people with scratchy throats and itchy eyes.

Walter Sisulu says he believes South Africa's apartheid system will end during his lifetime. The 77-year-old African National Congress activist spent 26 years in prison. He made his comments in an interview today

An aviation group is blasting the F-A-A's management of a new air traffic system. The head of the Aircraft Owners and Pilots Association says Congress should force the F-A-A to use a more current system that relies on satellites.

The nation's highest court says foreign companies conducting business in the United States canNOT challenge a state's taxing method in federal court. Today's ruling involved a lawsuit by two foreign firms against California.

The White House says President Bush telephoned Nicaraguan presidential

candidate Violeta Chamorro at a Houston hospital where she's receiving treatment for a knee injury. A spokesman says Bush expressed concern about elections scheduled next month in Nicaragua.

Senate G-O-P leader Robert Dole says the White House will likely try to cut farm subsidies by one-BILLION dollars or more. The Kansas lawmaker told an agriculture meeting in Kansas- ''the budget deficit will drive most programs.''

#90010u3329 01/10/1990 ~United Press International

(JAN. 10) UPI - Leaders of the Lithuanian popular front are challenging Soviet President Gorbachev to address a huge rally tomorrow when he arrives in the capital city of Vilnius. Gorbachev is visiting Lithuania to confront the Baltic republic's defiant Communist Party. The leader of the Lithuanian independence group is vowing to greet Gorbachev as the leader of a ''neighboring state.''

A New York state Supreme Court judge compared smoking cigarettes to snorting heroin or cocaine today, saying NONE are fundamental rights. The judge upheld the state's tough anti-smoking law 10 days after it took effect. Two Albany smokers had challenged the law, which bans smoking in most public places.

Researchers report that they have found a link between the most common form of childhood leukemia and the loss of genes that may prevent the growth of cancerous cells. Researchers at the University of Chicago Medical Centers say a small portion of a specific chromosome frequently is missing or damaged in certain leukemia patients.

Israel's coalition government is once again divided on how to approach peace talks. The nation's four top leaders today postponed a decision on how to respond to U-S reaction to their request for guarantees on the peace process. The main issues stalling the talks involve the role of the Palestine Liberation Organization and whether deported Arabs would be included.

The Nuclear Regulatory Commission has NO comment on a request by four Massachusetts congressmen that it postpone a decision on whether to license the Seabrook power plant. The lawmakers say an independent investigation should be held before the N-R-C allows the controversial plant to run at full power.

-30- 1888

#90010u3687 01/10/1990 ~United Press International

(JAN. 10) UPI - The Justice Department says it's considering replacing

acting U-S Attorney Dexter Lehtinen as the lead prosecutor in the drug-trafficking trial of deposed Panamanian General Noriega . A department spokesman in Miami says- ''we're trying to make sure we have the strongest prosecution available to us.'' Lehtinen has NOT had any trial experience in at least 10 years.

Officials say Defense Secretary Dick Cheney will propose cost-cutting defense management measures tomorrow that could result in savings of about 40-BILLION dollars during the next five years. Last year President Bush ordered Pentagon officials to change the way the Defense Department practices business. One money-saving proposal would eliminate the individual supply corps for each military branch.

In Houston, the flight director of the shuttle Columbia says- ''The lady of the fleet is really working fine for us this time.'' The spaceship reportedly performed exceptionally well during its first full day in space. Columbia... the world's first orbital shuttle... ushered in the age of the reusable spacecraft nearly a decade ago. The spaceship was built by Rockwell International in the '70's and designed to fly 100 times.

Reseachers say women drinkers may NOT be able to handle their liquor as well as men. In a published study, U-S and Italian scientists report their tests indicate men have a better enzyme protection barrier against alcohol in their stomachs than women. One researcher says women should be aware that they don't have the same capacity for alcohol as men and ''take it into account.''

-30- 1772

#90010u3698 01/10/1990 ~United Press International

(JAN. 10) UPI - Documents from a House panel show that the newest Navy attack jet could cost nearly 100-Million dollars each. A Defense Department source says the cost was inadvertently included in a volume of hearings by the House Defense Appropriations Subcommittee. The source blamed the revelation on sloppy editing, and said the actual cost of the A-12 stealth plane would NOT be that high.

More than 50 people agreed today to be questioned as candidates for the jury in the assault trial of reputed New York mafia boss John Gotti . A total of about 200 people already have agreed to take part in the jury selection in State Supreme Court in Manhattan. Gotti is accused of ordering a union official shot and wounded in May 1986... in retaliation for vandalism at a restaurant owned by the Gambino crime family.

An aviation group today sharply criticized the F-A-A's management of a new air traffic system that the group says is BILLIONS of dollars over budget. A spokesman for the Aircraft Owners and Pilots Association also says the National Airspace System plan is years behind schedule. An F-A-A spokesman

says the group is overstating both the cost of the plan and the date when it will be in place.

A team of British researchers report a possible breakthrough in the treatment of sickle cell disease. The scientists say they've created mice with a disorder resembling the disease and say that might remove a major obstacle to developing treatments for the disorder. Experts say sickle cell disease affects from 50-thousand to 100-thousand Americans.

#90010u3909 01/10/1990 ~United Press International

(JAN. 10) UPI - The White House says President Bush telephoned Colombia's President Barco today to assure him that the United States is NOT planning a naval blockade of Colombia. The call came after weekend news reports saying two U-S warships were heading toward Colombia to monitor drug smuggling. Colombian news accounts described the operation as a ''blockade '' but Bush told Barco today that ''NO 'blockade' was ever contemplated.''

There's been a slight relaxation in the official American view toward China. The State Department says Washington would favor World Bank loans to Beijing for ''humanitarian'' purposes, but would NOT support financial aid for economic development. China announced today that it would end seven months of martial law. The State Department says the decision was NOT a factor in the revised U-S view toward China.

In Yonkers, New York, city council members say today's Supreme Court ruling in their favor ''vindicated'' their actions. The high court ruled a federal judge went too far in ordering the council members to change their votes to enact a minority housing plan. The plan had sought to end decades of racial discrimination in public and subsidized housing practices.

25-thousand Lithuanians rallied in the capital city of Vilnius today, demanding freedom after nearly 50 years of Soviet rule. Today's protest was a small example of what's to come tomorrow... when Soviet President Gorbachev arrives to confront the Baltic republic's defiant Communist Party. Leaders of the Lithuanian popular front are challenging Gorbachev to address tomorrow's rallies, expected to draw 500-thousand people.

#90010u3952 01/10/1990 ~United Press International

(JAN. 10) UPI - Liberia says it has put down a three-week insurrection by Libyan-trained and funded dissidents. Officials of the West African nation say the rebels infiltrated Liberia from the neighboring Ivory Coast on Christmas Eve. The official Liberian news agency says the dissidents killed up to 200 people during their attack. Those who escaped the rebels report the invaders shot and killed anyone refusing to help them.

Officials in Barstow, California, say a heating tank at a solar energy plant exploded and burst into flames today, damaging a second tank and slightly injuring a worker. Authorities say the flames at the plant in the Mojave Desert have died down considerably, but are expected to continue burning until late tonight. One worker suffered slight smoke inhalation, but was NOT hospitalized.

A Gallup Organization poll finds 60 percent of Americans followed the U-S invasion of Panama more closely than they did any other news story last month. The poll also found interest in the Romanian revolution and the N-F-L playoffs about equal. 28 percent of those surveyed said they were following events in Romania, and 27 percent said they were interested in the post-season football action.

The bizarre story of Boston furrier Charles Stuart will be made into a T-V movie. Stuart is the man who called police from his car phone on October 23rd and said he and his pregnant wife had been shot by a robber. Stuart's wife gave birth to a son hours before she died, and the infant died 17 days later. Stuart killed himself last week after he became a suspect in the killing. A network executive says the T-V movie will be ''both responsible and moving.''

-30- 1846

#90010u4137 01/10/1990 ~United Press International

(JAN. 10) UPI - The laterst news details and developments... from the 'round-the-clock wires of United Press International.

President Bush telephoned Colombian President Barco today in an effort to assure the South American leader the United States is NOT planning a naval blockade of the Colombian coast.

A White House spokesman says Bush reassured Barco that any anti-drug patrol effort would be co-ordinated with what he called the Colombian president's ''courageous and determined'' drive to bring down the drug cartels.

The spokesman adds Bush told Barco the United States never intended to conduct any activities within Colombian territorial waters. The spokesman says the two leaders- quote- ''agreed it was most unfortunate that inaccurate and confusing reports of tentative U-S proposals... had created such a false impression.''

Bush's phone call to the Colombian president came in reaction to weekend news reports that two U-S warships were headed toward Colombia to intercept drug smuggling operations.

An administration official, requesting anonymity, says the anti-drug operations currently are on hold but says- quote- ''We're confident that we'll get it back on track.''

The man who is now the lead prosecutor in Manuel Noriega's drug-trafficking trial in Miami might be replaced.

The Justice Department says it's considering replacing acting U-S Attorney Dexter Lehtinen, who was appointed by former Attorney General Edwin Meese after the resignation of Leon Kellner in June 1988. Lehtinen has NOT had any trial experience in at least 10 years.

Justice Department spokesman Doug Tillett said in Washington that ''there is some ongoing discussion'' of the matter. He said the department is trying to make sure it has ''the strongest prosecution available.''

Also today, New York lawyer Barry Slotnick said he expects to make a decision this week on whether to accept an offer to join the team that will defend the ousted Panamanian leader.

In a separate development, the United States and the new government in Panama signed a broad agreement today to co-operate in the battle against drug trafficking. U-S officials say the pact will help Panama become eligible for further American aid.

-30- 2424

#90010u4198 01/10/1990 ~United Press International

(JAN. 10) UPI - A new motive emerged today in the case of a Boston man accused of killing his pregnant wife in October. Boston news reports are quoting sources as saying Charles Stuart disapproved of his wife's pregnancy and wanted to cash in on her life insurance policies so he could open a restaurant.

During a T-V interview- one source, described as a close friend- said Stuart asked him in a very businesslike manner for help in killing his wife Carol several weeks before the murder.

The source says he refused to help Stuart carry out his plan and later refused to help Stuart obtain a gun.

A Boston newspaper is quoting unnamed investigators as saying Stuart was about to receive a 480-thousand-dollar life insurance check before he committed suicide last Thursday. One investigator said- quote- ''He decided that a wife and a new baby were going to be too much of a problem for his big plans.''

Charles Stuart had claimed a black man abducted, robbed, and shot him and

his wife as they left a birthing class.

Thousands of people rallied for independence in Soviet Lithuania today, and the Communist Party came under attack in several other Eastern European countries as well.

The demonstrations in Lithuania came one day before Soviet President Gorbachev is to arrive to confront the defiant Lithuanian Communist Party. The Lithuanian party last month declared itself independent from the Soviet Republic's Communist Party. Gorbachev has said that move could lead to the fracturing of the Soviet republic.

In Bulgaria, a Soviet-dominated trading group today approved a move toward market-oriented reform. The action by Comecon came at the end of a two-day meeting in Sofia.

Also in Bulgaria, a parliamentary commission took a first step toward abolishing the constitutional clause that gives the communists a monopoly on power.

And in West Germany, Chancellor Kohl sharply criticized the Communist Party of East Germany, saying opposition parties were NOT given equal opportunities in preparing for spring elections in East Germany.

-30- 2257

#90010u4205 01/10/1990 ~United Press International

(JAN. 10) UPI - An aviation group is blasting the F-A-A's management of a new air traffic system as being BILLIONS of dollars over budget and years behind schedule. The head of the Aircraft Owners and Pilots Association... John Baker... says the F-A-A should implement a more current system that relies heavily on satellite monitoring of planes and can be ready by 1995.

Baker says procurement procedures of the Federal Aviation Administration- in his words- ''would make a 700-dollar toilet seat look like one of the all-time great bargains for taxpayers.''

F-A-A spokesman Fred Farrar says the A-O-P-A vastly overstates both the cost of the plan and when it will be in place. Farrar says the modernization plan will cost 15-point-eight-BILLION dollars and estimates it will be completed in 2001.

NASA says the shuttle Columbia performed exceptionally well today, the first full day of its latest mission.

Flight director Granville Pennington said at Mission Control in Houston that ''the lady of the fleet is really working fine'' this time. He said the flight ''is just going beautifully.''

Columbia was launched yesterday from the Kennedy Space Center in Florida carrying a three-man, two-woman crew who released a Navy satellite today and will retrieve another satellite on Friday.

The ship's 10-day mission is the ninth for Columbia, which made its debut on April 12th, 1981, as the world's first orbital shuttle.

Columbia last flew in August 1989 on a five-day classified mission for the Defense Department.

-30- 1708

#90010u4297 01/10/1990 ~United Press International

(JAN. 10) UPI - The White House says economic sanctions imposed by the United States against China will remain in place, despite today's announcement by the Beijing government that it's ending seven months of martial law.

Officials from Bolivia, Peru and Colombia met today to prepare the agenda for next month's summit between President Bush and heads of state from the three South American cocaine-producing nations. The meeting will be held February 15th in Cartagena, Colombia.

British officials say a record 427-Million dollars worth of illegal drugs was seized in Britain last year, 41 percent more than in 1988. They say the seizures underscore worries about the increase in drugs being smuggled into the country.

A divided U-S Supreme Court ruled today that a federal judge went too far in ordering Yonkers, New York, councilmen to change their vote to enact a minority housing plan. Councilmen say the decision vindicated their actions.

The search for the last two of 13 cult members charged in the ritualistic killings of an Ohio family ended today. Authorities in California say the suspects were arrested by a sheriff's deputy during a routine traffic stop in rural San Diego County.

The bank committee evaluating Mexico's massive foreign debt has agreed on a three-year plan to finance 48-BILLION dollars in commercial bank debt and will send the pact to 450 creditor banks for their expected approval.

-30- 1592

#90010u4334 01/10/1990 ~United Press International

(JAN. 10) UPI - Mexican diplomats say N-B-C's mini-series on drug trafficking that aired earlier this week slandered Mexico. And they hint

of a possible lawsuit. The program focused on the 1985 murder in Mexico of U-S drug agent Enrique Camarena.

Poland's news agency says seven miners were killed and 22 more injured today when an explosion ripped through a coal mine near Katowice, 180 miles south of Warsaw. The blast possibly was caused by a buildup of methane gas.

The New York state attorney general says he'll sue Exxon unless the company accepts liability within 48 hours and pays for the cleanup of wetlands near Staten Island polluted by a New Year's Day oil spill.

An investigation into November's school cafeteria wall collapse in upstate New York found the wall was built with NO bracing or other supports to withstand high wind. Nine children died when the wall crumbled during a storm.

Officials at Christie's auction house in New York say an extremely rare 17th-century bust of Pope Gregory the 15th failed to sell today. The white marble bust is estimated to be worth more than seven-Million dollars.

Barbie still reigns as queen of the fashion doll industry. Hasbro... the world's largest toy and game maker... is pulling the plug on its ''Maxie'' high school prom queen doll because of disappointing sales. The doll was introduced to the market in 1988, but never captured the imagination of little girls.

-30- 1608

#90010u4495 01/10/1990 ~United Press International

(JAN. 10) UPI - China has lifted martial law in Beijing, where it's Thursday. Before dawn, armed paramilitary police withdrew from their guardposts in central Tiananmen Square... the focus of last spring's pro-democracy protests that led to a bloody crackdown seven months ago. A senior officer told reporters the square would be fully reopened to the public, with just one guard remaining.

The Beijing government apparently has NO regrets about the massacre of protesters in Tiananmen Square last June. In London, China's ambassador to Great Britain defended the massacre, saying it was ''absolutely essential ... to restore law and order.'' Official estimates say 300 people were killed when the troops opened fire, but unofficial estimates put the number much higher.

The White House says President Bush telephoned Colombian President Barco today to assure the South American leader the United States does NOT plan a naval blockade of Colombia. A spokesman says Bush reassured Barco the United States will take NO action without the co-operation of Colombia. An

unidentified administration official says he's confident the anti-drug patrols will get ''back on track.''

The search for 13 cult members charged in the ritualistic killings of an Ohio family has ended. Authorities in California say the last two of the 13 cult members were captured today about 55 miles northeast of San Diego. Kathryn Johnson and Daniel Kraft were arrested on a road in a remote area of San Diego County. The search for the cult members began after the bodies of five members of the splinter sect were found buried on a farm near Kirtland, Ohio.

-30- 1806

#90010u4507 01/10/1990 ~United Press International

(JAN. 10) UPI - A group of California researchers say there may be a new way to remove industrial pollutants that cause damaging acid rain. Scientists at University of California's Lawrence Berkeley Laboratory say their tests indicate they have developed a cost-effective chemical procedure that ''scrubs'' nitric oxide from industrial exhausts that can later be used to make fertilizer.

Officials in Paris say the managing director of Xerox's French subsidiary... whose shooting was blamed on a disgruntled former employee... actually was shot by a police officer. Authorities initially reported the executive was shot and wounded yesterday as he tried to escape from the ex-worker. But now they say the Xerox official may have been shot during the confusion surrounding his escape attempt.

Customs officials in Miami say they've noticed an alarming increase in a type of drug smuggling known as ''swallowing.'' The so-called ''swallowers'' are people who try to smuggle cocaine by ingesting drug-filled condoms. Vann Capps, head of customs airport operations at the Miami International Airport, says 46 swallowers were apprehended since October 1st... compared to just 84 for the entire previous fiscal year.

The cast and crew of the Pittsburgh production of ''Les Miserables'' were pretty miserable when they found out what happened to a pile of the play's costumes. A spokesman says the clothes were put in garbage bags to be taken to the cleaners, but were taken to the city dump by mistake. By the time the error was discovered, raw sewage had been dumped on top of the costumes, and they were unusable. The incident happened Sunday, but the next performance went on as scheduled on Tuesday, using re-made costumes.

#90011b0005 01/11/1990 ~Business Wire

EAST HANOVER, NJ (JAN. 11) BUSINESS WIRE - Michael J. O'Donnell, chairman of The Ultimate Corp. (NYSE:ULT) announced that the company's board of

directors has appointed Gabriel P. Fusco a director of Ultimate.

Fusco, chairman of privately held Marlboro, Mass.-based Sequoia Systems Inc., was appointed pursuant to marketing and stock purchase agreements announced previously. The addition of Fusco will increase the number of Ultimate directors to seven.

In making the announcement, O'Donnell commented: ''Gabe Fusco has demonstrated his knowledge of the computer industry and his leadership ability as chairman of Sequoia Systems. We believe that adding his strengths to those of our current directors will enhance the board's perspective and its ability to plan effectively. We are delighted to welcome him to the board.''

Fusco, 56, is a veteran of more than 30 years in the computer industry. He joined Sequoia in March 1987 as chairman and chief executive officer after four years as president of Iomega, a manufacturer of data storage devices.

Under Fusco's management, Iomega grew from a $1 million research organization to an aggressive manufacturing and marketing company with annual sales of more than $125 million. Prior to Iomega, the Connecticut resident spent 26 years with IBM. He is a graduate of Boston University.

The Ultimate Corp. provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia.

Ultimate also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France, Australia and New Zealand.

#90011b0016 01/11/1990 ~Business Wire

SAN DIEGO (JAN. 11) BUSINESS WIRE - Cohu Inc. (ASE:COH) Thursday announced the award of a contract from McDonnell Douglas Missile Systems Co. to supply the microwave data link and tracking system equipment for the Joint Unmanned Aerial Vehicle-Short Range (JUAV-SR).

The portion of the program awarded to Cohu will be performed by Broadcast Microwave Services Inc. (BMS), a wholly owned subsidiary of Cohu. The

Phase I contract awarded to Cohu/BMS is in excess of $4.5 million and could exceed $5 million depending on options exercised by the government. The initial release for immediate production is slightly more than $3 million.

The McDonnell Douglas-led team includes Developmental Sciences Corp. of Ontario, Calif., which will provide the airborne vehicles; Hughes aircraft which will provide the airborne infrared sensors; Versatron Corp., providing payload/gimbal; and Cohu, which will provide the microwave systems.

McDonnell Douglas has responsibility for overall systems integration, project management, logistics, mission planning activities and display systems.

The UAV is designed to gather intelligence information in excess of 150 kilometers behind enemy lines. It can be pre-programmed for autonomous flight or controlled from ground stations during flight.

In 1991, the McDonnell Douglas team will participate in a fly-off demonstration of the UAVs developed during the first phase of the program. The competing system is being developed by the team made up of Israel Aircraft Industries and TRW Inc. At the conclusion of the first phase, the two teams will compete for the production phase of the program.

For the production phase, which will be carried out during the period 1992 through 1994, a single contractor will be chosen to produce and deliver eight to 14 systems per year.

MINNEAPOLIS (JAN. 11) BUSINESS WIRE - Dayton Hudson Corp. announced Thursday the implementation of an employee stock ownership plan (ESOP) to enhance the Supplemental Retirement and Savings Plan benefit program for its employees.

Kenneth A. Macke, chairman and chief executive officer, said the plan will increase the overall benefits the corporation provides for its employees. ''This ESOP represents a substantial increase in our employee benefit program.''

Dayton Hudson said its ESOP will be funded by the issuance of $379 million of newly-authorized convertible preferred stock purchased from the corporation.

To fund the purchase, the ESOP will borrow $379 million with a 15-year loan from the corporation.

The corporation said the preferred stock to be sold to the ESOP is convertible into 4,383,530 shares of Dayton Hudson Corp. common stock.

Dayton Hudson's ESOP was initially authorized by the corporation's board of directors last July, pending clarification of legislative issues in Congress. At the same time, authorization was given for the corporation's repurchase of up to 7 million shares of its common stock.

The ESOP, taken in conjunction with the previously completed repurchase of 7 million shares of common stock, will not have a material earnings per share impact.

SEATTLE (JAN. 11) BUSINESS WIRE - Family Savings and Loan Association, Seattle, Thursday announced that in order to comply with the new minimum capital requirements of the Financial Institutions Reform and Recovery Enforcement Act ("FIRREA"), the board of directors of the association has authorized management to engage in discussions with other financial institutions and entities concerning a possible merger or acquisition.

No assurance can be given at this time that merger or acquisition discussions will occur or that, if such discussions occur, they will lead to a letter of intent or merger or acquisition agreement.

Family Savings and Loan Association with assets of $107 million was incorporated in November 1973 as a state-chartered savings and loan. The principal business of Family Savings is the acceptance of savings deposits from the general public and the origination of mortgage loans for the purpose of financing or refinancing one-to-four family dwellings and other improved real estate located primarily within King County and Snohomish County, Washington.

The association's administrative offices are located at 2111 North Northgate Way, Seattle, Wash., 98133. Business is conducted through five retail deposit branches and one loan center located in North King and South Snohomish Counties.

ISSAQUAH, WA (JAN. 11) BUSINESS WIRE - Egghead Discount Software (NASDAQ: EGGS) announced Thursday its intention to sell its personal computer software training and installation service subsidiary, Egghead University.

Egghead also announced a company formed by founder and Chairman Victor D. Alhadeff has submitted a bid of $2.5 million to purchase and operate the subsidiary as a separate company. Alhadeff plans to resign as chairman at Egghead's regularly scheduled board of directors meeting later this month. Egghead will solicit other bids and Alhadeff will not be given the right to increase his bid except in the event of a material event affecting the Egghead University subsidiary.

Founded in Spring 1988, Egghead University is a family of personal computer software training centers around the country. Each center provides classroom and on-site training to both businesses and individuals on a wide variety of computer software applications, from word processing to databases, spreadsheets and complex desktop publishing packages. Egghead University currently operates 10 facilities in six U.S. markets.

For the first 32 weeks of Egghead's current fiscal year, from April 1 through Nov. 11, 1989, the subsidiary posted a loss of approximately $705,000 on sales of $2.4 million, which represented less than 1 percent of Egghead's total sales. Egghead University's book value as of Nov. 11 was approximately $1.1 million.

Included in the sale will be Egghead University's companion service division, Eggs On Legs. Located in the same markets, Eggs on Legs offers mobile, on-site technical PC software support to corporate and retail customers. Eggs on Legs technicians perform software and hardware installation, applications development, and related technical support services.

Egghead Discount Software is the largest-volume personal computer software merchant in North America, serving consumers and businesses through its company-operated chain of approximately 205 retail stores, and its approximately 150-person direct sales force. For more information, contact Diane Merz, Egghead Discount Software, 206/391-6230.

CINCINNATI (JAN. 11) BUSINESS WIRE - Central Parke, Belvedere's planned deluxe business park located on the former General Motors plant site in Norwood, Ohio, is ready for pre-construction work with the closing of the agreement between the Cincinnati-based Belvedere Corp. and General Motors Thursday in Cincinnati.

Belvedere previously acquired, as part of the Central Parke development, Urban Renewal Phase III properties from the City of Norwood in an agreement reached in early December.

Belvedere said that two major tenants for Central Parke should be announced in the next 60 days. Purchase price of the GM property was reported as approximately $2.1 million.

When completed Central Parke will include over 1 million square feet of office, retail and industrial space on 55 acres. Total investment cost for Central Parke is estimated at $80 to $100 million dependent on the eventual tenant mix.

On the GM site closed today, Belvedere plans to begin construction during the second quarter of 1990 of an 80,000 square foot ''flex'' building. Central Parke plans also call for an additional 600,000 to 1 million square feet of mixed-use facilities on this site.

Ground-breaking for the 100,000 square foot Class ''A'' Central Parke building on the northeast corner of Sherman and Montgomery Roads is slated for early April 1990. This building will include, as previously announced service-type retail on the first floor. Belvedere also plans for this portion of Central Parke to include an additional 200,000 square feet of office development on the site which was acquired from the City of Norwood's Urban Renewal Phase III property and includes the existing 1750-space parking facility.

For over 80 years Belvedere Corp. and its affiliates have been involved in the growth and development of Cincinnati and other metropolitan areas including construction of major portions of the General Motors plant and Norwood City Hall. Currently Belvedere owns and/or manages several million square feet of prime downtown office and retail space as well as hotels and suburban industrial and commercial properties. Downtown Cincinnati facilities include the 496,000-square-foot Society Bank Center on the corner of 7th and Walnut, the 100,000-square-foot Tri-State Office Building at 432 Walnut, the 185,000-square-foot 125 E. Court Street Building and the 120,000-square-foot Executive Building at 35 East 7th Street.

OVERLAND PARK, KN (JAN. 11) BUSINESS WIRE - Puritan-Bennett (P-B) will establish a manufacturing operation in Galway, Republic of Ireland, to help serve the fast growing European market for its respiratory products, John H. Morrow, executive vice president, announced Thursday.

The operation will commence in leased facilities but in several years Puritan-Bennett expects to build its own facility. Over a period of six years, the project involves a joint capital investment by P-B and the Irish Development Authority (IDA) of approximately $7 million and the creation of at least 140 new jobs in Galway.

Established in 1913, P-B is a world leader in products related to breathing, according to Morrow, and its products are used in a wide variety of health care settings such as hospitals, home care, physician offices. The company also manufactures emergency oxygen systems for commercial and general aviation.

''Puritan-Bennett's worldwide annual sales have surpassed $225 million, nearly double the level of 5 years ago. We expect to double again during the next 5 years. Europe now accounts for approximately 15 percent of our sales, and this share is expected to continue growing in the future.

''In view of our growth expectations, and developments in the European Economic Community (EEC), we decided to establish a manufacturing presence within the EEC,'' Morrow said.

''Since this will be our first manufacturing operation in Europe and our people there must work closely with our U.S. operations, we preferred to locate in an English language environment.

''Ready availability of people who are well educated and highly motivated, substantial financial and other assistance offered by the IDA, and advantageous corporate tax rates all combined to make the Republic of Ireland and Galway our choice,'' Morrow added.

''The impact of this development on 1990 earnings and cash flow should be neutral to slightly positive, becoming increasingly positive in subsequent years,'' Morrow concluded.

PHOENIX (JAN. 11) BUSINESS WIRE - Emerald Mortgage Investments Corp. (NYSE:EIC) announced that Alan Hamberlin has been appointed as the chairman of the board.

Hamberlin has been president and chief executive officer of the company, a real estate investment trust, since its initial public offering in July of 1988. Philip Polich, the company's former chairman, has resigned from the company's board of directors for personal reasons.

The company also announced that warrants issued in May 1989 to one if its lenders have been exercised. The warrants were exercised to purchase 925,000 shares of the company's common stock at the warrant exercise price of $2 per share. The company stated that the exercise of warrants would not have any effect on the previously announced dividend payable on Jan. 30, 1990, in the amount of 50 cents per outstanding share since the dividend declaration anticipated the exercise.

PHOENIX (JAN. 12) BUSINESS WIRE - Del Webb Corp. (NYSE/PSE:WBB) Thursday announced that it closed escrow on the sale of its remaining casino/hotel and also filed a petition with the New Jersey Casino Control Commission to relieve it of any further gaming licensing or qualifying requirements in that state.

Webb announced last November that it had reached an agreement with real estate developer and hotel operator William J. Yung to sell the High Sierra Hotel and Casino at Lake Tahoe, Nev. With today's closing, Webb has completed the disposition of its gaming-related assets. However, the company will continue to operate the High Sierra Casino until Yung obtains required gaming licenses from Nevada regulatory authorities.

In New Jersey, Webb's petition for withdrawal from licensing requirements is based primarily on the company agreeing to place its interest in any future sale of The Claridge Hotel and Casino in an irrevocable trust. Webb is currently subject to licensing as an ''entity qualifier'' of The Claridge. Until a June 1989 restructuring, Webb had an ownership interest in, and management responsibility for, The Claridge.

Philip J. Dion, chairman and chief executive officer, commenting on the sale and petition said, ''Our restructuring is complete and we are totally focused on the community development business, primarily active adult communities.''

BEAVERTON, OR (JAN. 11) BUSINESS WIRE - Mentor Graphics today announced an agreement to acquire Silicon Compiler Systems (SCS) Corp. and the selection of Sun Microsystems as its second workstation platform.

The two moves serve to solidify Mentor's leadership in electronic design automation (EDA) in the 1990s. The SCS acquisition strengthens Mentor's focus on IC design, while the selection of Sun as a second platform complements the Hewlett-Packard/Apollo workstation line currently sold with Mentor's design automation products.

Mentor Graphics will issue approximately 6.3 million shares for the outstanding common and preferred shares of SCS, placing the value of the acquisition at approximately $110 million. In addition, Mentor expects to issue stock options and warrants for the stock options and warrants of SCS. The acquisition is not expected to be dilutive prospectively after the closing.

SCS currently develops all products on Sun workstations, so its Sun design expertise will speed the porting of Mentor Graphics products to the new platform. SCS products will continue to be available on Sun, as they have been since 1985. Mentor Graphics products will be available on Sun by late 1990, approximately three months after delivery of Release 8.0.

Created in 1987 from the merger of Silicon Design Labs with Silicon Compilers Inc., Silicon Compiler Systems has provided a broad spectrum of integrated IC design systems on industry-standard Sun, H-P/Apollo and DEC platforms. The company pioneered key technologies in IC design automation and analysis, including logic synthesis, mixed A/D simulation, compilation and symbolic IC layout.

SCS provides design software for full custom ICs, ASICs and libraries. SCS employs nearly 400 people and currently has an installed customer base of over 1,700 IC design seals. 1989 revenues were approximately $45 million. The company has registered increasing revenues and profits since its inception.

Mentor Graphics Corp. (NASDAQ:MENT), Beaverton, Ore., was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems. The company is the leader in worldwide EDA sales. The company currently employs more than 2,000 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 51 locations worldwide. The company's headquarters are located at 8500 S.W. Creekside Place, Beaverton, Ore., 97005.

AMERICAN FORK, UT (JAN. 11) BUSINESS WIRE - TEL electronics inc. (NASDAQ:TELS) Thursday announced the recent board appointment of M. Scott Woodland to its board of directors, increasing the number on the board to four members.

Woodland is a graduate of the University of Utah, where he earned the bachelor of arts and juris doctor degrees. Woodland has been a practicing attorney in Salt Lake City for over 30 years, and his practice emphasizes corporate and business matters.

Dr. John L. Gunter, TEL's president stated, ''We are proud to have a gentleman of Scott Woodland's stature and experience join us on our board.

''His many years in the legal profession, his experience in the legal matters of business transactions, in general, and his special expertise in acquisitions and mergers, will all be of great value to our company. We know that his advice and guidance will add a special dimension to our board.''

Woodland's appointment increases the company's current board to four members:

Gunter, chairman and chief executive officer since the company's founding in 1981; Willard H. Gardner, a major administrative official at the Brigham Young University, a state legislator for many years, currently serving on several major Utah state government boards and committees and a director since 1985; David K. Doyle, a retired three-star general in the U.S. Army and now chairman and chief executive officer of WELS Research Corp., as well as a consultant to several Fortune 500 companies, and a director since 1988; and Woodland.

TEL electronics inc. designs, produces and markets proprietary microprocessor-based telephone call accounting, scanner voice processing and other systems for use by the lodging industry, professional firms, government agencies and general business organizations.

SEATTLE (JAN. 11) BUSINESS WIRE - Coming to the aid of motorists

frustrated by the closure of portions of the I-5 corridor, Horizon Air announced Thursday a special $39 one-way ''Flood Fare'' for Horizon flights between Seattle and Portland now through Monday.

The Flood Fare is available on a standby basis on any Horizon flight between Seattle and Portland operating in either direction now through Monday, Jan. 15. Weekdays, Horizon offers flights every half-hour in each direction throughout the business day. On Saturdays, there are 13 Horizon flights each way and on Sundays there are 21.

Flood fare tickets, which are priced lower than any other fares available today between Seattle and Portland, can be purchased from a travel agent or from Horizon Air at the airport. Reservations are not allowed. Flood fare tickets will only be valid between now and Monday, Jan. 15. Unused tickets are fully refundable. For Horizon flight information, persons can call their travel agent or Horizon Air at 1-800/547-9308.

Horizon Air serves 33 cities throughout the Northwest and is a wholly owned subsidiary of Alaska Air Group Inc., which also is the holding company for Alaska Airlines.

#90011b0084 01/11/1990 ~Business Wire
CLEVELAND (JAN. 11) BUSINESS WIRE - Customers of The East Ohio Gas Co. will see their bills decrease by an average of $1.23 per month during February, March and April.

The typical residential customer will pay an average monthly bill of $98.49 during the quarter, a decrease of 1.2 percent.

''While some home heating options have grown more expensive in the wake of December's brutally cold weather, East Ohio Gas is pleased to be able to lower costs,'' said Patrick A. Carney, vice president, public affairs. ''These reductions will be in effect for the rest of the winter and into the first few weeks of spring.''

The price cuts come in spite of a tightening supply of ''spot market'' gas caused by record cold and the fact that the nation's decade-old surplus of gas is finally dissipating. East Ohio Gas is somewhat shielded from seasonal cost increases of spot market gas, thanks to a massive underground gas storage system.

Carney stressed that the company's steady supply of natural gas assured that none of East Ohio Gas' 1 million residential, commercial and

industrial customers had their service interrupted during December's record cold. Employees worked around the clock during the month to move 52 billion cubic feet of gas to their customers -- 30 percent more than normal.

The cost reduction will take effect Feb. 12, pending approval of the Public Utilities Commission of Ohio. The reduction will be in the ''gas cost recovery'' portion of customers' bills, which is adjusted quarterly to reflect East Ohio Gas' cost of purchasing gas supplies. The company makes no profit on this gas cost recovery, which constitutes about two-thirds of a customer's bill.

East Ohio Gas, a subsidiary of Consolidated Natural Gas Co. of Pittsburgh, serves more than 1 million customers in 20 counties throughout Northeast Ohio.

RENO, NV (JAN. 11) BUSINESS WIRE - GEXA Gold Corp.'s President Gary L. Rice announced Thursday that gold dore shipments have commenced at its 40

percent owned Mother Lode Mine near Beatty, Nev.

During the period of Dec. 20 through Dec. 31, 1989, 881 ounces of dore were produced. The Mother Lode Mine is now producing at its anticipated rate of 2,500 tons of ore per day with a projected annual production of 25,000 ounces of gold. The Mother Lode Mine is the first producing mine for the U.S. Nevada Gold Search Joint Venture which is comprised of GEXA Gold Corp. (40 percent), U.S. Precious Metals Inc. (40 percent) and N.A. Degerstrom Inc. (20 percent.)

GEXA Gold Corp. also announced Thursday a significant increase on the Mother Lode extension approximately 2,000 feet southeast of the initial Mother Lode deposit. Drilling to date has defined a drill indicated reserve of 1,812,838 tons with an average grade of 0.048 ounces/ton gold (approximately 87,844 ounces gold contained).

Rice stated that the deposit remains open to the south. Additional exploration programs to delineate this deposit and other targets within GEXA's 40 percent owned U.S. Nevada Gold Search Joint Venture are being prepared now.

GEXA Gold Corp. is a public corporation traded on the National Association of Securities Dealers Automated Quotation system, ''NASDAQ,'' under under the trading symbol of ''GEXA.'' The company's common stock is also listed on the Spokane Stock Exchange.

IRVINE, CA (JAN. 11) BUSINESS WIRE - Charles W. Missler, chairman of the board and chief executive officer of The Phoenix Group International Inc. (NASDAQ:PHIX), Thursday announced that it has sold a majority interest in certain commercial rights to a foreign company through a stock transaction valued at over $3.5 million.

The new business will be conducted under the name of Phoenix World Trade Ltd. and The Phoenix Group will receive a 20 percent interest in the new company as additional consideration for the sale.

Phoenix World Trade will establish trade and countertrade representation, particularly in Eastern Europe and the Soviet Union for various subsidiaries of The Phoenix Group. In addition, Phoenix World Trade will develop other lines of business which could be supportive of The Phoenix Group's international activities.

''We are delighted with this transaction because it will allow The Phoenix Group to concentrate its managerial and capital resources on the further development of our rapidly growing computer and telcommunications subsidiaries and on other opportunities in attractive emerging technology situations,'' commented Missler.

''Phoenix World Trade will be an important ally in developing our international businesses, particularly in terms of accelerating our Joint Venture programs in the USSR and Eastern Europe.''

An innovative part of the financing structure for the transaction involved 1.6 million shares of Phoenix Group common stock, which will be retired, thereby reducing the fully diluted shares outstanding by approximately 12 percent. ''We accomplished a major goal of creating additional sources of trade finance, while reducing the total number of shares outstanding,'' stated Missler.

Missler, is widely known for growing companies rapidly through the development and introduction of innovative families of new products. Missler and Alan J. Mattal, chairman and chief executive officer of Netcom Research Inc., a subsidiary of The Phoenix Group, will serve on the board of directors of Phoenix World Trade.

The Phoenix Group International, with headquarters in Irvine, specializes in developing emergent-technology companies.

#90011b0124 01/11/1990 ~Business Wire

PHOENIX (JAN. 12) BUSINESS WIRE - Acknowledging that nobody wants to pay higher electric rates, Arizona Public Service Co. Thursday filed its earlier announced rate increase request.

It also said in its filing with the Arizona Corporation Commission that it was working to further reduce the amount of the increase. Last month, it announced it would seek an average 6.8 percent increase in each of three consecutive years starting in 1991.

Jaron Norberg, APS chief financial officer, said APS hoped to further cut its rate proposal by several million dollars by recommending ''the De Michele plan,'' a seasonal sharing of electricity with Oregon-based PacifiCorp.

APS President and Chief Executive Officer, Mark De Michele recently presented the power-sharing idea to PacifiCorp as a way to further

increase cost-savings and efficiencies for both APS and PacifiCorp customers. Negotiations toward such an exchange could begin soon.

He said because of the company's cost-reduction efforts, APS trimmed expenses by more than $80 million -- a savings reflected in the $271 million rate request. Furthermore, since 1988, the utility reduced its workforce by 1,200 positions. It also factored that savings into the filing.

The recovery of costs associated with customer growth prompted the rate request. These included additions to the utility's power transmission and distribution systems, higher property taxes and construction and operation of the fourth unit at the coal-fired Cholla Power Plant and the third unit at the Palo Verde Nuclear Generating Station.

If granted by the ACC, the APS rate request would increase an average residential customer's monthly bill $7.12 in 1991, $7.69 in 1992 and $8.30 in 1993. That was based on average monthly consumption of 925 kilowatt-hours, which now cost a customer $88.97.

The company asked for approval of pending applications to continue cost-deferral accounting procedures authorized earlier for Palo Verde Unit 3 and a similar authorization proposed for Cholla Unit 4.

In addition, he requested a mechanism or procedure to deal with the annual cost of fuel to run the company's power plants and electricty it would purchase from other utilities without the necessity of a full rate case.

FEDERAL WAY, WA. (JAN. 11) BUSINESS WIRE - Pacific Nuclear Systems Inc., Federal Way, announced that its PN Services Inc. subsidiary has been awarded a contract to chemically decontaminate the Reactor Water Clean-Up System at Nebraska Public Power District's Cooper Nuclear Station (CNS).

The approximately $300,000 contract will be performed during March 1990.

According to J. Bradley Mason, PN Services' Director of Engineering, ''This task to apply a regenerative chemical decontamination process to reduce plant personnel radiation exposure is another example of the positive steps the nuclear utilities are taking to enhance plant maintenance practices.''

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.;

NuPac Services Inc.; Alaron Corp.; Nuclear Packaging Inc.; and PN Services Inc.) provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

NEW YORK (JAN. 11) BUSINESS WIRE - IPCO Corp. (NYSE:IHS) Thursday said it regretted that Royal International Optical Corp. had entered into a ''definitive merger agreement'' with US Vision Inc.

IPCO's initial offer was $12.25 in cash in a merger for each Royal share. However, IPCO noted that it has increased its offer to $12.50 a share, which was communicated to Royal's board and advisers prior to their decision.

US Vision's $12.50 offer covered only 80 percent of Royal stock.

Richard Block, president and chief executive officer of IPCO, said: ''In our opinion, IPCO's proposal was clearly better for Royal's shareholders. It was an all cash offer for all shares and treated all Royal shareholders alike.''

SEATTLE (JAN. 11) BUSINESS WIRE - First Interstate Bank of Washington Thursday announced that its chairman and chief executive officer, William S. Randall, will move to Phoenix to assume a new position as chairman and chief executive officer of the $6.6 billion First Interstate Bank of Arizona.

Randall joined the Washington bank in December of 1981 as president and chief executive, coming to Seattle from First Interstate's Arizona affiliate, where he served as chief financial officer. He was elected by the bank's board of directors to the additional post of chairman of the board in June of 1985.

In describing his move, Randall reflected on the efforts of his associates in Washington who ''have combined to make First Interstate Bank of Washington one of the nation's top performing commercial banks.'' In addition, he said, ''Kathy and I are forever grateful for the many wonderful experiences we have enjoyed serving this dynamic community.''

During his tenure in Washington, First Interstate has grown from $1.8 billion to over $3.4 billion in assets. Annual net income has increased from $12.3 million to nearly $50 million, resulting in an increase in return on assets from .68 to 1.45 percent.

In addition, he has expanded the bank from 75 to 105 branches, primarily through engineering major acquisitions, such as Spokane based Fidelity Mutual Savings Bank, and Everett-based Olympic Bank. He also has increased First Interstate Bank of Washington's automatic teller machine (ATM) network from 34 to over 300.

RENO, NV. (JAN. 11) BUSINESS WIRE - The Sierra Pacific Resources board of directors announced the appointment Thursday of Austin W. Stedham, 61, as president of the corporation.

Stedham replaces Joe L. Gremban who resigned the position of president today. Gremban continues as chairman of the board and chief executive officer of Sierra Pacific Resources.

The diversified holding company has headquarters in Reno. Its operating

subsidiaries include Sierra Pacific Power Co., an electric, natural gas and water utility -- along with companies engaged in land development and energy exploration and development.

Stedham will continue to serve as the president of Sierra Pacific Power Co., a position he's held since May 1986. He joined Sierra Pacific in 1985 as executive vice president and chief operating officer following more than 30 years experience with electric and natural gas operations for Kansas Power & Light.

SUNNYVALE, CA. (JAN. 11) BUSINESS WIRE - ILC Technology (''ILC'') has entered into an agreement for the sale of the Component group of its United Detector Technology Division for an amount in excess of book value.

The agreement is subject to the ability of the buyer to obtain the necessary financing and the formalization of a definitive purchase agreement by Jan. 31, 1990.

Excluded from the transaction is the UDT Instrument Group which ILC intends to sell separately. The UDT Instrument group designs and manufactures photometry, radiometry, fiber-optic test, and position-sensing instruments.

ILC announced last September, consideration of the divestiture of the UDT Division. The UDT Component group manufactures standard and custom silicon photodiode detectors and opto-hybrid assemblies.

In December, ILC Technology reported a loss from discontinued operations of $3.87 million related to the UDT Division for the fiscal year ended Sept. 30, 1989. Income from ILC's continuing operations before income taxes was $2.21 million. For the fiscal year ended Sept. 30, 1989, the combined operations resulted in a net loss of $1.66 million, 75 cents per share.

ILC manufactures high-performance light sources used in laser excitation, fiber-optic illumination, spacecraft lighting, and film-set lighting applications worldwide.

SAN FRANCISCO (JAN. 11) BUSINESS WIRE - Associated Building Maintenance Ltd. announced the acquisition of Supreme Building Maintenance Ltd.

The company, with headquarters in Nanaimo, British Columbia, Canada, with a branch operation in Victoria, provides janitorial and window-cleaning services throughout Vancouver Island.

In announcing the acquisition, Peter Durkin, president of ABM Ltd., stated that Jim Sawioki, the former owner, will remain with the company as general manager. In addition, Durkin expressed great enthusiasm over the acquisition, stating the company's development of Vancouver Island broadens ABM's coverage in Canada which presently operates offices in Vancouver, Winnipeg and Toronto.

Associated Building Maintenance Ltd., with headquarters in Vancouver, British Columbia, Canada, is a wholly owned subsidiary of American Building Maintenance Industries Inc. (NYSE:ABM) which employs over 33,000 and is one of the nation's leading facility services contractors providing air conditioning, parking, elevator, janitorial, lighting, pest control, security and janitorial supply services to hundreds of communities in the United States and Canada.

#90011b0177 01/11/1990 ~Business Wire
BEVERLY HILLS, CA (JAN. 11) BUSINESS WIRE - American Medical International Inc. (NYSE/London and Zurich Stock Exchanges:AMI) Thursday reported that net revenues for the first quarter of fiscal year 1990 ended Nov. 30, 1989, increased 12.6 percent to $728.2 million from $646.8 million for the first quarter of fiscal 1989.

Earnings before interest, taxes, depreciation and amortization and non-recurring costs rose 21.4 percent to $130.1 million, compared with $107.2 million for the comparable period of fiscal 1989.

Non-recurring merger costs totalling $128.2 million, or $1.28 per share, relating to the buyout of approximately 86 percent of AMI's outstanding common shares by IMA Holdings Corp., led to a net loss for the period of 53.7 million, or 76 cents per share.

These results compare to net earnings of $440,000, or 1 cent per share, for the first three months of fiscal 1989. Last year's first-quarter

earnings were reduced by non-recurring costs for reserves in the amount of $24 million, or 20 cents per share, taken for malpractice insurance and lease buyouts.

Commenting on the company's first-quarter financial and operational performance, Harry J. Gray, chairman and chief executive officer of AMI, highlighted the significance of AMI's strong cash flow before merger costs increased patient activity levels, and the progress being made in the company's cost-reduction and divestiture programs.

''We achieved our revenue and cash flow targets for the first quarter and are confident that we will continue to generate sufficient cash flow to service debt and fund capital expenditures,'' he said.

''The impact of costs related to the buyout process was expected, and does not reflect the performance of AMI's hospitals, which achieved solid improvements in patient activity levels in the first quarter. Admissions in our domestic acute care facilities were up nearly 3 percent, patient days rose more than 3 percent and the average occupancy rate advanced to 46.1 percent from 43.8 the previous year.

''Our efforts to reduce corporate overhead, which included the elimination of our regional offices, resulted in a 22.7 percent decline in overhead costs from last year. Further progress in our cost-reduction program will be made as we relocate our corporate headquarters to Dallas, Texas, in fiscal fourth quarter,'' Gray continued.

''We are also pleased with the progress of our divestiture program. To date we have sold a hospital in North Miami Beach, Fla., and one in Singapore. In December we identified 12 additional U.S. acute care and psychiatric hospitals to be divested, and negotiations also are proceeding for the sale of AMI's foreign assets, which include a 65 percent stake in AMI Healthcare Group plc in the United Kingdom.

''We continue to anticipate that asset sales over the next 12 to 18 months will raise approximately $1 billion in proceeds,'' Gray concluded.

(Asset sales will be closed within 18 months of the merger between AMI and IMA Holdings Corp., a company formed by Harry Gray, Mel Klein and Partners LP and First Boston Investments Inc. The merger is expected to be completed no later than the end of April.)

AMI operates 48 acute care and 6 psychiatric hospitals in the United States, plus 24 hospitals overseas, primarily in the United Kingdom and Switzerland.

IRVINE, CA (JAN. 11) BUSINESS WIRE - Computer Automation Inc. (NASDAQ:CAUT) Thursday reported that on Jan. 5 it entered into and consummated a loan, warrant and security agreement with a group of private investors, pursuant to which the investor group loaned the company $3,150,000 and the company issued to the lenders warrants to purchase shares of the company's stock.

The loan bears interest, at the rate of 15 percent per annum and is to be repaid over 24 months.

The lenders were granted warrants to purchase 315,000 shares of the company's common stock at any time after Jan. 5 at $2 per share, and additional warrants to purchase 420,000 shares at $1 per share at any time after April 30, if the company has not fully prepaid the loan by that time.

The loan is secured by all of the company's assets, guaranteed and/or secured by certain of the assets of the company's operating subsidiaries, and may be prepaid at any time without premium or penalty. One of the lenders is Johan F. Blokker, a director of the company.

Simultaneous with consummation of the new loan, the company fully paid all amounts owed to its prior lender, Sanwa Bank California, which transferred all security being held by it to the new lenders and agreed to termination of its credit agreement with the company. The remaining funds will be used for working capital purposes.

Computer Automation is a manufacturer of board level computer products for industrial OEM applications. Through its wholly owned subsidiary, Talon Technology Corp., the company also manufactures high speed data communications coprocessors, data transmission systems, ruggedized microcomputers and facsimile subsystems for sale in the defense, petroleum and general communication industries.

The company also manufactures automatic test systems which are used in the production testing of electronic subassemblies by equipment manufacturers in the defense, telecommunications and computer industries.

SAN FRANCISCO (JAN. 11) BUSINESS WIRE - Amtech Reliable Elevator Co. has announced the purchase of Elevator Maintenance Co. headquartered in Burbank, Calif.

EMCO was started by Anthony B. Montapert Jr., in January 1974 and provides elevator repair and modernization services in Los Angeles, Orange County and San Diego as well as the San Bernardino and Palm Springs areas. The company has recently signed new maintenance contracts with Bullock's Stores Inc., I. Magnins, Hollywood Park, Ambassador College and JPL.

In announcing the acquisition, Richard Susaeta, president of Amtech Reliable Elevator Co. stated that Montapert will remain with the company.

Susaeta stated that with the acquisition of EMCO and future pending acquisitions, Amtech Reliable Elevator Co. is looking to enhance their position within the market as a strong contender to become one of the top five elevator companies in the United States; in addition to already being the largest elevator service company in Southern California.

Amtech Reliable Elevator Co., headquartered in Whittier, Calif., is a subsidiary of American Building Maintenance Industries Inc. (NYSE:ABM), which employs over 33,000 and is one of the nation's leading facility services contractors. ABM's other divisions provide air conditioning, parking, janitorial, lighting, pest control, security and janitorial supply services to hundreds of communities in the United States and Canada.

#90011b0242 01/11/1990 ~Business Wire

LOS ANGELES (JAN. 12) BUSINESS WIRE - ERLY Industries Inc. (NASDAQ:ERLY) Thursday announced the closing of two important transactions that favorably impact the company's overall financial situation.

ERLY Thursday received cash and notes for approximately $24 million in exchange for its interest in Hansen Foods on closing of a sale of the Hansen assets.

ERLY Industries has carried a $24 million investment in Hansen Foods since March 1987. Hansen filed for protection under Chapter 11 of the Bankruptcy Code in November 1988 and, since that date, the company has been seeking to complete a sale of Hansen's assets in order to recover its investment.

With the approval of the Bankruptcy Court, a sale of Hansen Foods' assets was completed Thursday with ERLY receiving $11.3 million of cash plus notes of approximately $13.5 million payable over 10 years.

Proceeds of the sale were used by ERLY to retire outstanding obligations that were secured by the Hansen notes and supporting collateral.

ERLY also announced that its wholly owned subsidiary, Chemonics Industries Inc., has obtained a $3.2 million term loan and an $8 million working capital line of credit from NMB Postbank Groep, a major bank with headquarters in Amsterdam, Holland.

A portion of the funds from this financing were made available to ERLY on Dec. 31, 1989, to meet its interest obligations on its 12-1/2 percent subordinated debentures originally due on Dec. 1, 1989.

Proceeds from an initial bridge loan of $5.1 million to Chemonics funded on Dec. 1 were used to retire existing secured debt at Chemonics with the balance of $2.6 million distributed to ERLY.

This amount, together with a $2 million advance from ERLY's wholly owned subsidiary, Comet Rice, was used to pay off certain unsecured debt that matured on Dec. 1, 1989, and other parent company obligations.

The Chemonics' refinancing was arranged following termination of negotiations for the sale of Chemonics with an investor group that included certain of the Chemonics employees. To a large extent, proceeds from the refinancing will replace the anticipated amount of proceeds to be

realized from the anticipated sale.

Chemonics Industries is a manufacturer and marketer of a patented fire retardant product ''FIRETROL'' and provides agribusiness consulting services on a worldwide basis to less-developed countries.

ERLY Industries Inc. is a diversified food processing company, with its principal activities in rice milling and juice. For its fiscal year ended March 31, 1989, ERLY reported sales revenues of $283 million.

IRVINE, CA (JAN. 12) BUSINESS WIRE - Printronix Inc. (NASDAQ:PTNX), manufacturer of computer printers, Thursday reported a net income of $1,052,000, or 27 cents per share, for the quarter ending Dec. 29, 1989, on sales of $30,838,000.

This compares with a net loss of $2,998,000, or 65 cents per share, on sales of $31,850,000 for the same quarter of the previous year and net income of $1,237,000, or 30 cents per share, on sales of $31,886,000 for the prior quarter ended Sept. 29, 1989.

For the first nine months of the fiscal year, the company reported a net income of $1,682,000, or 40 cents per share, on revenue of $91,974,000 compared with a net loss of $1,324,000, or 29 cents per share, on revenue of $103,665,000 for the first nine months of the previous fiscal year.

Released backlog as of Dec. 29, 1989, was $22.27 million compared with $26,896,000 at the end of the previous quarter and $17,557,000 at the end of the third quarter of the previous fiscal year.

''As the computer business matures, Printronix has been adapting to a lower growth scenario by restructuring the company to profitably maintain market share while continuing a high level of R & D expenditures that are the key to providing customer support, increased productivity and new products,'' said Robert Kleist, president and chief executive officer.

Printronix, founded in 1974, designs, manufactures and markets a full range of printers for business and industrial applications. Printronix leads the industry as the supplier of printers for rugged industrial applications. Products include patented matrix line printers for heavy-duty cycle, medium- and high-speed printing and plotting; non-impact page printers for shared office applications requiring letter-quality printing and high-resolution graphics; and Intelligent Graphics Processors

(IGP) for on-line generation of forms and bar code labels.

The company's products are marketed worldwide to original equipment manufacturers (OEMs), value-added resellers (VARs) and through a network of exclusive full-service distributors.

#90011b0617 01/11/1990 ~Business Wire

SAN JOSE, CA (JAN. 11) BUSINESS WIRE - VMX Inc. (NASDAQ:VMXI) Thursday announced record revenues and earnings for its second quarter ended Dec. 31, 1989.

The company earned $1,004,000, or 4 cents per share, on revenues of $14,479,000, compared with a loss of $435,000 (2 cents per share) on revenues of $11,436,000 in the previous year's second quarter levels.

The second quarter of fiscal 1990 marked the seventh consecutive quarter of increased revenues, eighth consecutive quarter of improved bottom line performance and third consecutive quarter of profitability.

Fiscal 1990 year-to-date revenues of $28,334,000 represent a 37 percent increase over fiscal 1989's first half revenues of $20,679,000. Year-to-date net income is $1,623,000 (7 cents per share) compared with a loss of $1,430,000 (6 cents per share) in the first half of fiscal 1989.

''Results this quarter reflect increasing market coverage of VMX through strengthened distribution and direct sales efforts,'' VMX Chairman and Chief Executive Officer Jack W. McKittrick said.

He also said, ''The positive response to the introduction of the VMX 100 small voice processing system for our customers' branch offices and smaller headquarters has been most gratifying and contributed to the second quarter performance.''

VMX President Pat Howard discussed the company's success in terms of enhanced customer focus. ''Strategic implementation and support of the VMX product line is best achieved by listening to customers. We continue to invest heavily in the enhancement of our customer relationship at all levels.''

Since it pioneered the voice messaging industry over a decade ago, VMX has been a world leader in networking, multinational distribution and installations and value-added sales and support. The company is focused on providing strategic voice communications and has sold and installed over

3,700 systems worldwide.

The company has headquarters in San Jose, Calif., and has a major manufacturing, engineering and support facility in Dallas. Sales offices are located in Los Angeles, New York City, Chicago, Atlanta, Washington D.C. and London.

#90011b0618 01/11/1990 ~Business Wire

MOUNTAIN VIEW, CA (JAN. 11) BUSINESS WIRE - Hunter Systems Thursday announced the appointment of Roy E. Folk as the company's president and chief executive officer.

Folk, 43, takes over operational responsibility from founder Colin Hunter, who continues as chairman of the board. Hunter Systems converts and markets Unix versions of popular PC applications software.

Folk was previously executive vice president and general manager of the Software Products division of Ashton-Tate, one of the top five independent DOS software producers.

''Roy's appointment brings us great experience in the personal computer software marketplace, as well as seasoned operational and marketing talent '' commented Hunter. ''Hunter Systems act as a Unix marketing channel for DOS software vendors, and that's the world that Roy comes from. Roy is a strategic complement to our management team.''

Hunter, in addition to continuing as chairman, is responsible for future product planning and business development.

During his four-year tenure at Ashton-Tate, Folk built his division into the company's primary revenue producer and successfully integrated the acquisitions of several major companies and technologies.

Prior to Ashton-Tate, Folk founded and was chief executive officer of Paladin Software Corp., which he later merged with Visicorp. He was familiar with Visicorp, having been the first product manager for the pioneering spreadsheet program, Visicalc, in 1981. Folk has also held marketing and technical positions with Versatec, Amcomp, Applicon and Digital Equipment Corp.

''I'm delighted to join Hunter Systems,'' said Folk. ''In the last year I've seen tremendous opportunities in the commercial sector of the Unix marketplace, and the future growth potential is huge. Hunter Systems'

technology will enable the company to become a key player in the Unix applications software arena.''

Hunter Systems Inc. was founded in 1986 to develop and market computer-aided porting tools. Hunter's XDOS technology converts DOS applications software into identical, feature-for-feature Unix applications software.

#90011b0626 01/11/1990 ~Business Wire

SANTA CLARA, CA (JAN. 11) BUSINESS WIRE - AIM Technology of Santa Clara Thursday introduced Suite X, the first commercial benchmark for X Windows-based UNIX systems.

The X Window System, which provides users with multiple windows, popup menus and icons, has been adopted by virtually every UNIX system manufacturer. Suite X provides both detailed and summary analyses of X Windows-based system and server performance, providing an objective method of system evaluation.

Suite X takes into account that many factors affect system performance including users, processes, window managers and networks. Using Suite X, one can quickly and easily evaluate different hardware systems under consideration, or analyze how to modify current systems for better performance.

Suite X provides three levels of testing and reporting: functions, applications and overall system performance. Over 140 specific X Windows drawing, text and font, pixmap (all the data necessary to display information on a screen) and window operations can be individually evaluated by Suite X.

Since common X Window applications include CAD/CAM/CAE, desktop publishing and software development, Suite X provides an AIM X Engineering Rating, an AIM X Desktop Publishing Rating and an AIM X Development Rating for each system tested. Each system tested also receives an overall AIM X Rating, useful for comparing a range of systems at a glance.

Suite X is designed to run on any standard UNIX operating system including System III and V, Version 7, 4.X BSD compatibles and most UNIX look-alikes. Suite X is written in C and most scripts are written for the Bourne shell. The product is distributed on magnetic media in source form. Available immediately from AIM Technology, a single site license of Suite X 1.0 lists for $6250.

An update service for Suite X, which includes new releases, technical support and copies of AIM's APRs (AIM Performance Reports) for Suite X tested systems can also be purchased. For volume pricing information, please contact AIM Technology.

AIM Technology is the acknowledge leader in UNIX system performance measurement and management. AIM's benchmarks are standard at hundreds of government agencies and Fortune 1000 companies worldwide. Privately held, AIM was founded in 1981 to provide software and services for the UNIX market.

LAGUNA HILLS, CA (JAN. 11) BUSINESS WIRE - Hart Industries Inc. (NASDAQ:HRTI) announced that it has acquired 100 percent of Underground Tank Management (UTM), San Diego, a marketing and construction management

company in the underground tank field.

UTM also performs geological and pollution surveys, tank excavation, removal and site remediation.

A spokesman for Hart stated that the acquisition would bring to Hart key personnel in the geotechnical and environmental assessment area, which will be invaluable when the company commences its national environmental compliance program later this year.

Hart is currently marketing its environmental compliance program in selected western states. Hart is the current industry leader in EPA packaged compliance programs for underground storage tank owners. The program includes: geological site investigations; replacement of all underground equipment; posting of the federally required financial responsibility ($1 million); continuous monitoring services; emergency response services; and any required regulatory upgrades, all of which is packaged in a long term lease.

The lease program, which was formulated in response to the final EPA regulations concerning underground storage tanks published in October, 1988, relieves the operator of all responsibility other than the tax deductible lease payment to Hart.

#90011b0629 01/11/1990 ~Business Wire
BEVERLY HILLS, CA (JAN. 11) BUSINESS WIRE - Record loans, deposits and earnings highlighted City National Corp.'s strong financial performance in 1989, announced Bram Goldsmith, chairman of the board and chief executive officer.

''Total net income, including non-recurring net income, rose to a record $59.1 million, or $1.86 per share, up 20 percent from the $49.3 million, or $1.61 per share, earned the previous year.

''Operating earnings totaled $55.7 million, or $1.75 per share in 1989, a 17.5 percent increase over the $47.4 million, or $1.55 per share, earned in 1988. Non-recurring net income in 1989 amounted to $3.4 million vs. $1.9 million in 1988,'' Goldsmith said.

''Operating return on equity remained strong, averaging 21.4 percent in 1989, compared with 21.9 percent in 1988. Operating return on assets averaged 1.34 percent in 1989 compared with 1.35 percent in 1988. The net interest margin decreased to 5.19 percent in 1989 from 5.29 percent for

1988. This decrease was due primarily to a declining rate environment in the second half of 1989,'' said Goldsmith.

Goldsmith reported: ''Total assets reached a record $4.7 billion at year end, a 9 percent increase over the $4.3 billion assets level of last year. Total loans also increased to $2.7 billion, a 12 percent increase compared to the $2.4 billion level of 1988. And total deposits at year end increased to a record $3.9 billion, an 11 percent increase over the $3.5 billion of last year.''

''Asset quality remains excellent,'' said Goldsmith. ''Our loan loss reserve averaged 1.33 percent of average gross loans in 1989, up from the 1.23 percent of 1988. Non-accrual loans (our only non-performing loans) at year end amounted to a minimal .59 percent of total loans. And, City National ended the year with no REO on its books.

''Our liquidity continued to remain very high in 1989. The loan-to-deposit ratio averaged 73.9 percent in 1989, compared to the 74.4 percent last year.''

''City National closes the 80s on a high note, with robust gains in earnings and overall performance, and a continuing emphasis on superior asset quality. We have achieved, and in many cases, exceeded our projections for growth and profitability. This strong performance and a continuing emphasis on the refinement of internal operations and leadership in customer service will help us continue our tradition of excellence into the new decade,'' Goldsmith concluded.

TAMPA, FL (JAN. 11) BUSINESS WIRE - Greg Burgess, President of Jian Electronic Systems Inc., announced that their Jian/PROFEE Professional Pricing Service for the health care industry will be expanding their operations to major metropolitan areas throughout the United States.

"Our first sales office opened in Boston on Jan. 1, and we expect to hire between 50 and 75 sales people over the next ninety days," said Burgess. "Our plans are to go nationwide during the next six months and expand into the international marketplace in 1991.

"In conjunction with our marketing effort our Jian/PROFEE operational staff will be moving into a new 5,000 square foot headquarters office in Tampa, Fla.," added Burgess.

Jian/PROFEE, The Professional Pricing Service, ensures that health care providers are billing fees at maximum accepted industry standards. Jian/PROFEE monitors health care industry trends for allowances on all medical procedures.

It uses a mathematical model that applies data on fee structures, insurance payment trends, geographical information, and individual medical specialty profiles to provide a fee schedule that is tailored to the specific needs of the health care provider. Jian/PROFEE offers a money back guarantee that their service will have a positive impact on the bottom line earnings of their clients.

SUNNYVALE, CA (JAN. 11) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ: MIPS) Thursday announced that Digital Equipment Corp. and Kubota Ltd. have purchased additional shares of MIPS common stock.

Both purchases were made pursuant to rights to maintain percentage voting interests in MIPS in connection with MIPS recent initial public offering. Digital Equipment Corp. purchased 317,016 shares for an aggregate purchase price of $5,189,552. Kubota Ltd. purchased 610,000 shares for an aggregate purchase price of $9,985,700.

Both transactions were completed at a purchase price of $16.37 per share which equals the initial public offering price of MIPS common stock, net of underwriting discounts and commissions.

As a result of these transactions, Digital Equipment Corp.'s voting interest in MIPS is approximately five percent and Kubota Ltd.'s voting interest in MIPS is approximately 18 percent. MIPS Computer Systems is the leading supplier of RISC-based products, including technology, computer systems, optimizing compilers and operating systems.

The company markets a full range of binary-compatible, high-performance computer systems based on RISC, which it sells through OEMS, VARs and system integrators worldwide.

MIPS also licenses its technology to five leading semiconductor companies, which supply components based on MIPS technology on a global basis.

AHAHEIM, CA (JAN. 11) BUSINESS WIRE - Comarco Inc. (NASDAQ: CMRO) announced that the company's employee benefit plans expect to purchase a significantly larger quantity of Comarco common stock in 1990.

At current stock price levels, the plans would be expected to purchase approximately 240,000 shares during the next 12 months. This would represent about five percent of the company's outstanding shares. During 1989 these plans purchased about 60,000 shares.

The trusts for these plans currently own 575,000 shares or about 12 percent of Comarco's 4.6 million outstanding shares. In addition to these shares, the trust distributed over 100,000 shares (to employees and former employees) during 1989.

Harrison Young II, president and chief executive officer, said: "Understanding the many benefits of our employees having an ownership position in Comarco, we made several enhancements to our employee benefit plans. As a result, more than 700 employees are now enrolled in the plans, an increase of 30 percent. I am particularly gratified to see the confidence that our workforce has in Comarco's future."

Comarco provides engineering and computer-based services and products to

the government, commercial, and industrial markets.

PORTLAND, ME (JAN. 11) BUSINESS WIRE - The One Bancorp (NASDAQ:TONE), a $2.4-billion-asset Maine bank holding company, said Thursday it has signed an agreement with the Federal Reserve and the Maine Bureau of Banking, and that its principal subsidiary, $1.6-billion-asset Maine Savings Bank, has consented to a regulatory order issued by the FDIC and approved by the Maine Bureau of Banking.

The agreement and order stipulate, among other things, that the company promptly infuse $20 million of additional capital into Maine Savings and restore the bank's primary capital ratio to 8 percent by June 30, 1991.

The agreement and order also prohibit The One from declaring or paying dividends on capital stock or incurring new indebtedness without approval of the Federal Reserve. Maine Savings Bank is required to substantially reduce its classified assets, an action which could have a strong impact on the company's future results. The One wlll also strengthen controls and reduce its portfolio concentration in commercial real estate.

As a result of necessary chargeoffs and its continuing losses in the soft New England real estate market, the primary capital of Maine Savings Bank Will be substantially impaired. Consequently, success in restoring the bank's capital ratio by mid-1991 depends upon factors, such as market forces, beyond the bank's control.

Furey said The One has infused $20 million of capital into Maine Savings and has prepared a comprehensive capital plan designed to restore its capital ratios and deal with ongoing losses. The capital plan calls for restoration of capital ratios through an extensive downsizing along with debt restructuring and gains on asset sales.

The One's capital recovery plan was designed with the assistance of the consulting firm of Lyons, Zomback & Ostrowski. The investment banking firms of Merrill Lynch Capital Markets and Advest, Inc., as well as other firms, provided technical assistance for specific planned structurings and transactions.

The One Bancorp is a Maine-based Federal Reserve bank holding company formed by 130-year-old Maine Savings Bank in connection with the bank's conversion to stock form in June of 1984. Through subsidiaries in Maine, Massachusetts and Connecticut, The One operates 45 banking offices and five Winslow full-service discount brokerage and asset management offices.

#90011b0639 01/11/1990 ~Business Wire

NEW ORLEANS, LA (JAN. 11) BUSINESS WIRE - First Commerce Corp. (NASDAQ:FCOM) announced its annual and fourth quarter earnings Thursday. For the year, operating income was $28,768,000, or $2.31 per common share, 17 percent over 1988. Net income also grew 17 percent, to $28,197,000, or $2.26 per common share. Securities transactions resulted in losses of $866,000 in 1989 and $857,000 in 1988.

The annual results include fourth quarter operating income of $7,448,000, a 10 percent increase from the like period in 1988. Net income for the quarter was $7,452,000, or 60 cents per common share, a 16 percent increase from $6,440,000, or 52 cents per common share, in 1988's fourth quarter.

Net interest income for the quarter was $39,772,000, 7 percent higher than in the fourth quarter of 1988. An 8 percent growth in earning assets from the previous year resulted in the increased net interest income. Net interest spread narrowed during the fourth quarter and was narrower than for the like period in 1988. The net interest margin was 4.32 percent for the quarter, compared to 4.40 percent in 1988's fourth quarter.

The fourth quarter's provision for loan losses decreased to $7,376,000 from $7,865,000 in 1988. Other income, excluding securities transactions and the effects of a $342,000 gain on the sale of lease receivables in 1989 and a $1,915,000 gain on the sale of mortgage servicing rights in 1988, increased 18 percent from the like quarter last year.

The increase was lead by increases in fees and service charges. Operating expense was 9 percent higher in the fourth quarter of 1989 than in the like quarter of 1988, partially as a result of branch expansion in the New Orleans market.

Net interest income of $156,005,000 for the year was 9 percent higher than in 1988 mainly due to growth in earning assets, particularly loans. The provision for loan losses was $26,220,000 in 1989 and $24,651,000 in 1988.

Other income, exclusive of securities transactions, grew 7 percent during 1989. Operating expense also increased 7 percent in 1989 over 1988 due to higher nonperforming assets expense and branch expansion.

Nonperforming assets were $65.15 million at the end of 1989, or 2.76 percent of loans, compared to 3.50 percent of loans at the end of 1988. Nonperforming assets decreased $4,612,000 during the fourth quarter of 1989. The allowance for loan losses was 1.91 percent of loans on December 31, 1989.

MANHATTAN BEACH, CA (JAN. 11) BUSINESS WIRE - Corporate Data Sciences Inc. (NASDAQ: CODS), announced Thursday a January 22 record date to determine those shareholders entitled to participate in the proposed spin-off or distribution of its shares of common stock of the ARIL Group Inc.

Pursuant to the Corporate Data Sciences (CDS) plan of restructuring, CDS will sell to the ARIL Group Inc. (NASDAQ: ARIL) substantially all of its non-paper related assets, which consist primarily of the shares of its wholly-owned subsidiaries, Medallion Kitchens Inc. and Medallion Kitchens of Minnesota Inc. (collectively "Medallion") for 16,900,000 shares of ARIL. CDS will then own 22,119,256 ARIL shares, representing approximately 81 percent of ARIL, including its current ownership position.

This transaction requires the prior approval of the shareholders of ARIL at a special shareholders meeting in early February. CDS will then spin-off its 22,119,156 shares of ARIL pro-rata to CDS shareholders of record on Jan. 22 on the basis of 1.63 shares of ARIL for each one share of CDS held.

The final step of the restructuring will involve the merger of Consolidated Packaging Corp. (CPC), the company's 92 percent owned subsidiary, into CDS.

The minority shareholders of CPC will receive approximately 1,171,922 shares of the newly issued stock of CDS by virtue of their merger. The surviving entity will be named Consolidated Packaging Corp. The restructuring is anticipated to be completed in February.

Upon completion of the restructuring, each shareholder of record of CDS will own 1.63 shares of ARIL stock for each share of CDS stock now held and one share of CPC stock.

#90011b0645 01/11/1990 ~Business Wire
LONDON (JAN. 11) BUSINESS WIRE - Jan. 11, 1990, British Gas (Malaysia) S.A., the operator and its partners, Occidental Petroleum (Malaysia) Ltd. and PETRONAS Carigali Sdn Bhd, have begun a three well exploratory drilling program for oil and gas in Sabah Block 2 offshore East Malaysia.

The ''Jim Cunningham'' semi-submersible drilling rig, has been contracted from Reading and Bates Malaysia for this work.

The group began drilling the first well, named Gajah Hitam-1 on Jan. 2, 1990 in 520 feet of water. It is located 60 miles northwest of Kota Kinabalu, and 15 miles north of the Tembungo Oilfield (operated by PETRONAS Carigali).

This first phase of exploration in Sabah Block 2 began in 1988 when nearly 5,000 km of seismic data was acquired. These and other data have been interpreted to allow for the planning of the current drilling campaign. To handle the exploration and drilling operations, British Gas (Malaysia) S.A. has three fully staffed offices in Kuala Lumpur, Kota Kinabalu and Labuan.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers.

British Gas is also increasingly active in the exploration for and production of Hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service.

British Gas American Depositary Receipts (ADRs) are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

FRESNO, CA (JAN. 11) BUSINESS WIRE - WestAir Holding Inc. (AMEX:WAH), operating as United Express through marketing agreements with United Air Lines (UAL), Thursday reported preliminary traffic results for the month of December and for the year 1989.

The airline boarded 201,719 passengers during December, a 26 percent increase compared to the same month last year when the company boarded 160,388 passengers.

Revenues passenger miles (RPMs) in December increased 32 percent from 33,378,000 in 1988 to 44,085,000 during December 1989. Available seat miles (ASMs) in December increased 38 percent from 74,120,000 in 1988 to 102,348,000 in 1989.

Load factor for the month was 43.1 percent, down 1.9 percentage points from the 45 percent figure logged during December 1988.

Also in December, WestAir Holding inaugurated service in the East with a hub of operations at Washington-Dulles.

Through the 12 months ended Dec. 31, WestAir Holding boarded 2,361,598 passenges, up 22 percent over the like period last year when 1,929,000 passengers were boarded. Revenue passenger miles for the 12 months were up 41 percent, with 491,101,000 RPMs logged in 1989, compared to 349,536,000 during 1988.

Available seat miles through December were 1,093,657,000 up 49 percent compared to the 735,689,000 ASMs logged in 1988.

Load factor for the 12 months ended Dec. 31 was 44.9 percent, down 2.9 percentage points compared to the 47.5 percent figure logged during the same period in 1988.

WestAir Holding Inc. which operates through two wholly owned subsidiaries

and one operating division -- WestAir/United Express, NPA/United Express, and Atlantic Coast Airlines/United Express -- is the largest regional airline company in the United States.

The company operates over 780 daily flights and serves 50 cities in the West and along the East Coast utilizing both jet and turbo-prop aircraft. The companies major hubs are Los Angeles, San Francisco, Portland, Ore., Seattle, Fresno, Sacramento, Calif., and Washington.

WestAir Holding Inc. is headquartered in Fresno.

#90011b0661 01/11/1990 ~Business Wire

NEW YORK (JAN. 11) BUSINESS WIRE - J.P. Morgan & Co. Incorporated Thursday reported a consolidated net loss for 1989 of $1.3 billion, which included a third quarter provision for credit losses of $2.0 billion related to the portfolio of outstandings to restructuring countries.

This loss contrasts with net income of $1.002 billion in 1988. Net income was $154 million in the fourth quarter of 1989 and $258 million in the same 1988 quarter, which included the recognition of $240 million of Brazilian interest income.

The 1989 loss per common share for J.P. Morgan was $7.04; net income per common share was $5.38 in the previous year. Net income per common share was $0.81 in the 1989 fourth quarter, compared with $1.38 in the final quarter of 1988.

Net interest income was $1.1 billion in 1989, a decrease of 35% from $1.8 billion in 1988. Fourth quarter net interest income was $275 million in 1989, compared with $603 million in the prior-year quarter, which included the recognition of $240 million of interest on Brazilian medium- and long-term nonaccrual loans.

Noninterest income in 1989 was $1.7 billion, 12% higher than in 1988, primarily as a result of higher gains from the sale of equity securities and higher trading revenues. Fourth quarter noninterest income was $444 million, an increase of 18% from the last quarter of 1988. This increase resulted primarily from gains on the sale of leased assets and from higher trading revenues.

Noninterest expenses in 1989 were $1.9 billion, an increase of 7% from $1.8 billion in 1988. The results for the fourth quarter reflected expenses of $535 million, 5% higher than $511 million in the same 1988

quarter.

Income taxes were $176 million in 1989, a decrease from $313 million in 1988. The 1989 fourth quarter amount of $30 million was lower than the $111 million reported in the final 1988 quarter.

The provision for credit losses for 1989 totaled $2.045 billion, including the $2.0 billion provision in the third quarter, in contrast with $200 million in 1988. There was no 1989 fourth quarter provision for credit losses, which compares with $100 million in the 1988 final quarter.

J.P. Morgan's risk-based capital ratios were estimated to be 5.9% for Tier 1 capital and 10.1% for total risk-based capital at December 31, 1989 under the final Federal Reserve Board guidelines. In accordance with the guidelines, these risk-based capital ratios exclude the equity, assets, and off-balance sheet exposures of J.P. Morgan Securities Inc., the company's U.S. underwriting and dealing subsidiary.

NEW YORK (JAN. 11) BUSINESS WIRE - IPCO Corp. (NYSE:IHS) Thursday announced that it is soliciting indications of interest from prospective purchasers of its Whaledent International Division.

Whaledent is a leading developer and distributor of premier-quality proprietary products and systems used in restorative dentistry.

As previously reported, for the fiscal year ended June 30, 1989, IPCO's dental operations had sales of $28.6 million and operating income of $3.5 million.

Richard Block, president and chief executive officer of IPCO, said that although Whaledent is profitable and holds a respected position in the dental industry, should an acceptable transaction occur, IPCO would devote the capital raised to the expansion of its Sterling Optical Division. He noted that no final decision had been reached with respect to the disposition of Whaledent since such a decision would depend upon IPCO's accepting a satisfactory offer.

PURCHASE, NY (JAN. 11) BUSINESS WIRE - IP Forest Resources Co. (IPFR), managing general partner of IP Timberlands Ltd. (IPT), Thursday reported fourth-quarter 1989 earnings of $37 million on total revenues of $64 million.

Earnings per Class A Depositary Unit were 73 cents. These results compared with 1988 fourth-quarter earnings of $21 million on total revenues of $41 million and earnings per Class A Depositary Unit of 55 cents.

For the 12 months ended Dec. 31, 1989, IPT's earnings were $128 million on total revenues of $230 million, with earnings per Class A Unit of $3.05.

These compared to 1988 full-year earnings of $113 million on total revenues of $206 million and earnings per Class A Unit of $2.56.

During the fourth quarter, IPFR announced a regular quarterly cash distribution of 72 cents per Class A Unit, a 6 percent increase compared to the 1988 fourth-quarter cash distribution of 68 cents per Class A Unit. The cash distribution for the period from Oct. 1, 1989 to Dec. 31, 1989 is payable Feb. 14, 1990 to holders of record at the close of business on Dec. 29, 1989.

#90011b0672 01/11/1990 ~Business Wire

SAN JOSE, CA (JAN. 11) BUSINESS WIRE - Fox & Carskadon Commercial Services, one of the largest independent commercial real estate firms in the Bay Area, has named James T. Randolph president, succeeding John R. Oettinger who will become chairman of the board.

Oettinger, who cofounded the Company with Randolph, will remain chief executive officer, a position which he has held since the company's inception in 1984. Randolph, formerly executive vice president, will continue to head the company's retail division.

Oettinger will continue to direct and implement the company's long range plans, oversee all administrative functions, and work with division heads. Randolph will concentrate on business and project development, company-wide.

Fox & Carskadon Commercial Services has been aggressively building its business, increasing the number of its experienced agents and expanding its office space. Oettinger said the company, which handles all segments of commercial real estate from its offices in San Jose and San Ramon, plans to deepen its market presence in the East Bay and expand aggressively into the North Bay.

As reorganized, the company operates under the direction of Cofounder, Chairman of the Board and Chief Executive Officer John R. Oettinger; Cofounder and President James T. Randolph; Chief Operating Officer and General Manager Jack R. Kiewit; Senior Vice President, Industrial/R & D Division, Eric Anderson; Senior Vice President, South Bay Retail Division, Marilyn Brown Cahill; Senior Vice President, Office Division, Gary M. Graumann; and Senior Vice President, Investment Division, Evan G. Gost.

Randolph, who led the expansion of the retail division from the South Bay to the East Bay, discussed the overall performance of the company in 1989.

Oettinger, 53, has 20 years of Northern California commercial real estate experience. Fox & Carskadon Commercial Services is the second commercial brokerage company he has been instrumental in starting. He was the cofounder of Meacham-Oettinger Inc., a San Francisco Bay Area retail leasing company formed in 1980.

During his commercial real estate career, he has assisted in the development and leasing in excess of 50 neighborhood shopping centers, all in the Bay Area. His background includes 10 years in site location, acquisition and leasing for the development of retail projects for Cornish & Carey. In 1976, Oettinger was elected a vice president by that company's board of directors.

Randolph, 37, spent nine years in commercial real estate as a senior sales consultant with Coldwell Banker, where he specialized in retail leasing and commercial development. He was one of that company's top retail/commercial development and leasing producers responsible for numerous major real estate transactions in Santa Clara County.

Randolph was consistently one of the company's top producers in the San Jose office. In 1986 and 1988, Randolph was named together with his in-house partner, Senior Vice President Marilyn Brown Cahill, Outstanding Retail Broker of the Year for retail leasing and sales contributions to the Santa Clara Valley.

#90011b0674 01/11/1990 ~Business Wire

CHELSEA, MA (JAN. 11) BUSINESS WIRE - Town & Country Corp. (AMEX: TNC) Thursday reported net sales for the third quarter ended Nov. 30, 1989 were $137.2 million, an increase of 108 percent over the $65.9 million for the same period last year.

Net income for the quarter was $6.6 million, up 35 percent from $4.9 million a year ago. Earnings per share for the third quarter were 53 cents versus last year's 47 cents.

Nine month net sales reached $331.3 million, from $146.7 million a year ago. Net income declined to $3.8 million, or 32 cents per share, compared with $6.7 million, or 65 cents per share, for the nine-month period of fiscal 1989. The per share comparisons reflect an increase of 1.8 million Class A common shares outstanding as result of a second public offering December 1988.

C. William Carey, chairman and chief executive officer of Town & Country, said, "Our third quarter is, historically, the strongest for our jewelry manufacturing operations, and the gains in sales represent continued growth in our core companies as well as significant contributions from the two manufacturing acquisitions we made a year ago.

"Little Switzerland, our Caribbean luxury products retailing network, however, reported a 30 percent decrease in sales for the three-month period," Carey added. "The immediate impact of the September 17 hurricane which struck parts of the Caribbean, combined with a lingering perception of storm damage, resulted in a sharp decline in tourism and a shift in the demographics of Little Switzerland, customers during our third quarter."

Commenting on the outlook for the balance of the fiscal year, the Town & Country chief executive said, "Overall, the retail climate in the United States has not been strong, with reports indicating that sales volume during the Christmas selling season was generally less than expected.

"With this in mind, Town & Country is concentrating on further improvements in operating efficiencies, particularly in the acquired companies, and continuing to strengthen management in all divisions in order to compete effectively in an increasingly difficult business environment."

Town & Country Corporation's two acquisitions last year were the L.G. Balfour Company, a leading producer of high school, college, and

championship sports rings, and recognition and awards programs; and Feature Enterprises, the leading U.S. maker of fashion bridal ring sets.

WOODBURY, NY (JAN. 11) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ: CMVT) announced the signing of an exclusive distribution agreement with Nokia Data Systems Oy, a Helsinki, Finland based company. Nokia Data will market Comverse's multi-media message management systems exclusively in Finland.

Nokia Data is a member of the giant Nokia Group, which markets telecommunications products, information systems, consumer electronics and other products in 32 countries and has annual revenues of over $5 billion. Nokia is Finland's largest company, by market capitalization, and the world's leading manufacturer of mobile phones and cable machines.

Kobi Alexander, president and chairman of the board of Comverse, stated that, "This is the sixth example of Comverse achieving a major partnership with a large international telecommunication company which further underlines our strategic commitment to international markets, in particular Europe.

"Nokia now joins Ascom (Switzerland), GPT (UK), GPT (Australia), Voice Data Systems (Holland) and Oki (Japan) as OEMs for Comverse's TRILOGUE. The Nordic countries represent a large and fast growing market, and Finland is one the of the leading countries in the world in the early application of technology. We are extremely pleased to count Nokia as one of our partners for the future."

Pekka Takala, general manager, Nokia Data Business Communications, added "Nokia is strongly committed to the message mangement market and believes that value added products such as TRILOGUE will play a major role in our future revenues and profits. Our existing strong relationship with the PTT and Telcos and our aggressive sales program to end users with PBX products offer a strong platform for success with TRILOGUE."

Brian Wiltshire, who has led Comverse's international marketing program, said, "We are particularly pleased to have this relationship in place both because of the significant revenue opportunities involved and the overall power of Nokia. We believe our efforts to penetrate the European PTTs with our combined fax and voice messaging capabilities will be much enhanced by such strong companies representing us."

Comverse, located in Woodbury, develops, manufactures and markets high

performance computer systems for commerical and defense communications applications, including integrated multi-media message managment systems marketed under the name TRILOGUE.

During the last two years, Comverse has marketed its products directly to major subscriber services provider organizations in the United States and internationally through leading distributors in Western Europe and the Far East, while developing advanced communications processing systems for defense and other users under government contracts.

HOUSTON, TX (JAN. 11) BUSINESS WIRE - Plains Resources (NASDAQ:PLNS) Thursday announced that it would seek sharehoulder approval of a one for five reverse split of its common stock.

Plains also said that it intended to list its common stock on the American Stock Exchange if shareholder approval of the reverse split is obtained.

The company said that it had filed a preliminary listing application with the Exchange and that the Exchange had issued a favorable eligibility opinion, subject to the reverse split.

The reverse split and subsequent exchange listing are intended to broaden the market for Plains' common stock and increase the company's exposure in the financial community. Both of these actions should provide a market that will more closely reflect the company's underlying values, Plains said.

Approval for the reverse split will be sought at a special meeting of shareholders to be held in February 1990.

Plains Resources Inc. is an independent oil and gas exploration and production company with operations in the Mid-Continent areas of Oklahoma, the Texas Panhandle and Southwestern Kansas and in the Gulf Coast areas of Texas, Louisiana and Mississippi.

HAYWARD, CA (JAN. 11) BUSINESS WIRE - An exclusive O.E.M. marketing and

support agreement to provide UNISYS users with the Cobra Series of peripheral storage products was announced Thursday by Parallel Technology and Virtual Technology Inc.

The Cobra Tape System, which is designed and manufactured by Parallel and will be marketed and sold by Virtual, is the only fully integrated ''3480'' cartridge tape and reel-to-reel peripheral in the UNISYS marketplace. Capable of up to eight system paths connecting up to sixteen peripherals through standard GCR DLPs, the Cobra Tape System offers an innovative storage solution to UNISYS A Series, V Series and B Series users. An entry level, dual-cartridge drive unit is available for under $100,000.

Michael Dolik, president of Virtual Technology said, ''Our agreement with Parallel complements our current line of quality storage products and permits us to extend to our UNISYS customers a tape technology as reliable as it is economical. The Cobra Series is designed for customers who require multiple system paths, fault tolerance and many flexible upgradable configurations.''

Parallel Technology, based in Hayward, Calif., is a privately held designer and manufacturer of advanced mass storage peripherals for UNISYS/Burroughs systems as well as innovative new tape designs for other markets. The company formerly developed and manufactured the KWIKcache disk product line, recently purchased by Zitel Corp.

Virtual Technology Inc., with headquarters in Rochester Hills, Mich., is a leading supplier of UNISYS and UNISYS compatible products, both new and used, worldwide.

SHAWNEE, OK (JAN. 11) BUSINESS WIRE - Barton Industries, Inc. announced Thursday that its previously reported fiscal 1990 first quarter results omitted from the $4.25 million in reported revenues an additional $1.2 million in revenues realized from the nonrecurring sale of certain real property held for sale.

Total revenues for the quarter, including revenues from the sale of the real property, were $5.45 million vs. $2.3 million for the same period of the 1989 fiscal year.

Previously reported earnings of $681,524, or seven cents per share, for the first quarter of fiscal 1990 included a nonrecurring gain of $290,000, or three cents per share, from the sale of the real property.

The $391,524, or four cents per share, remainder of the previously reported quarterly earnings were attributable to Barton's operations. Such earnings figures compare to a loss of $471,000, or seven cents per share, for the comparable prior quarter.

FORT WORTH, TX (JAN. 11) BUSINESS WIRE - Gainsco Inc. (AMEX SYMBOL: GNA), Thursday reported that General Agents Premium Finance Company (GAPFCO), its premium finance subsidiary, has formed a partnership with Associated Risk Managers International Inc. (ARM International) that should generate additional premium financings for GAPFCO in excess of $10,000,000 for the twelve month period beginning March 1, 1990.

GAPFCO will provide the financing and administration of the venture and ARM International will market the program to its members. ARM International is an insurance and risk management program development and marketing company headquartered in Austin, Texas.

Organized in 1970, its members are located throughout the United States and Canada. ARM International and its local, state and province organizations address the insurance needs of professional and trade associations and of selected industries. Gainsco Inc. is a vertically integrated property and casualty insurance company specializing in underwriting and marketing excess and surplus lines.

The company's subsidiaries include General Agents Insurance Company of America Inc., an Oklahoma corporation, General Agents Premium Finance Company, which offers premium financing programs for general agents in connection with their marketing activities; Agents Processing Systems Inc. which markets a computer software policy management system to general agents; and Risk Retention Administrators, Inc., which assists managing and general agents in forming and operating risk retention groups.

In addition, General Agents Insurance Company of America Inc. operates a wholly-owned subsidiary, MGA Insurance Company Inc., which is the sole

owner of MGA Agency, Inc., the company's marketing arm.

SHELTON, CT (JAN. 11) BUSINESS WIRE - TIE/communications Inc., a leading designer, manufacturer and distributor of advanced telecommunications systems, announced signing a letter of intent with Les Industries C-MAC Inc., ''C-MAC,'' for the sale of the land, buildings, machinery and equipment of its manufacturing facility in Sherbrooke, Quebec, Canada.

The value of the sale is in excess of $3 million Canadian. C-MAC is a designer and manufacturer of hybrid micro-electronics. The facility was owned by TIE's Canadian subsidiary, TIE/communications Canada Ltd. All TIE Sherbrooke employees will be offered employment by C-MAC in this high-tech factory.

Under the terms of the agreement, C-MAC will continue to manufacture certain TIE products from which TIE will receive a commission. TIE will continue to have the benefit of a plant on the North American continent to manufacture telephone systems and most importantly, because of increased plant efficiencies, will be able to procure a lower cost of goods which will make TIE more competitive in the United States and international markets.

The plant was opened in June of 1984 on the crest of the demand for increased amounts of telecommunications equipment occasioned by the deregulation of AT&T. TIE U.S. purchased approximately 20 percent of its product sold in the United States from its Canadian subsidiary. TIE Canada's plant also supplied product to portions of TIE's international business.

NEW YORK (JAN. 11) BUSINESS WIRE - MIZLOU COMMUNICATIONS COMPANY INC. (NASDAQ:MZLU) Thursday announced that its Mizlou Sports News Network (SNN) and Jeep/Eagle, a division of Chrysler Motors, have reached a multi-year, multi-million dollar agreement for Jeep/Eagle to become SNN's first

charter advertiser.

Jeep and Eagle, the official vehicles of the National Basketball Association, will sponsor SNN's extensive coverage of NBA basketball, including live remote telecasts, beginning with the NBA All-Star Weekend, February 10-11 in Miami.

Richard Paschke, Executive Vice President/Management Director-Media for Campbell-Mithun-Esty, the advertising agency for the Jeep/Eagle Division, said that his client welcomes the opportunity to be involved with this unique cable service from its inception.

Paul Green, Senior Vice President of Advertising Sales for SNN, said that the Jeep/Eagle commitment is a great compliment to the efforts put fourth by the SNN team in launching the network.

The nation's first and only 24-hour, seven-day-a-week basic cable sports news and information service, Mizlou Sports News Network will launch on February 1. Its news center and broadcast facilities are located in Hackensack, New Jersey, just 17 minutes from Manhattan and adjacent to the Meadowlands Sports Complex.

MIZLOU COMMUNICATIONS COMPANY INC. the parent company of Sports News Network, has produced more hours of nationally televised sports programming in its 28-year history than any organization outside the sports division of the major networks.

MINNEAPOLIS (JAN. 11) BUSINESS WIRE - Kenneth A. Macke, chairman and chief executive officer of Dayton Hudson Corp., Thursday announced that Stephen E. Watson has been elected president of the corporation by the board of directors. Watson also was elected a director. The changes take effect February 1.

Bruce G. Allbright, president of Dayton Hudson Corp. since 1987, retires at the end of January. Watson, 45, is currently executive vice president of the corporation and chairman and chief executive officer of Dayton Hudson Department Store Co.

"I am delighted to make this announcement today. Steve Watson is a skilled

executive, with a record of outstanding performance in virtually every aspect of retailing.

"This is an important step in our plan for management succession," Macke said. "As chairman and chief executive officer of the department store company for the past five years, Steve's track record has been superb. His achievements have been significant."

As president of Dayton Hudson, Watson will continue to oversee the operations of Dayton Hudson Department Store Co. and will be responsible for the corporation's financial, legal, personnel, public relations, and audit functions.

Watson has been with Dayton Hudson since 1973 as an assistant buyer, buyer divisional merchandise manager, senior vice president and general merchandise manager, and executive vice president for merchandising and marketing.

In 1984, when Dayton's and Hudson's combined to become Dayton Hudson Department Store Co., Watson was named president of Region I (Hudson's). He was named president of the combined company in January of 1985 and later that year also was elected chairman and chief executive officer.

The corporation said it will announce Watson's successor as chairman and CEO of DHDSC prior to February 1. Dayton Hudson Corp. is one of the nation's largest general merchandise retailers with 1988 annual revenues of $12.2 billion.

The corporation has approximately 140,000 employees in its Tardterfyn's and Dayton Hudson Department Store Co. divisions and operates 659 stores in 33 states.

#90011b0706 01/11/1990 ~Business Wire

LITTLE ROCK, AK (JAN. 11) BUSINESS WIRE - TCBY Enterprises Inc. (NYSE:TBY) Thursday announced that net income for its fiscal year ended Nov. 30, 1989, increased 49 percent to $29,493,000, or $1.10 a share, from $19,794,000, or 75 cents a share, in the previous year.

Sales and franchising revenues for the year totaled $144,600,000, up 48 percent from $97,963,000 last year. Total systemwide sales increased 44 percent to a record $303 million in fiscal 1989 from $210 million in fiscal 1988.

Net income for the fourth quarter ended Nov. 30, 1989, rose 31 percent to $6,209,000, or 23 cents a share, compared to $4,726,000, or 18 cents a share, for the fourth quarter of fiscal 1988. Sales and franchising revenues increased 29 percent to $32,588,000 from $25,174,000 a year ago.

Frank D. Hickingbotham, chairman of the board and chief executive officer, said: ''The record results are primarily attributable to the increases in sales resulting from the greater number of franchised and company-owned stores open in fiscal 1989 and higher sales per store unit.''

Hickingbotham noted that average store sales increased to $232,000 in fiscal 1989 from $224,000 in fiscal 1988, a 3.6 percent gain.

Same store sales increased 2 percent in fiscal 1989 over fiscal 1988. Same store sales decreased 4.6 percent in the fourth quarter of fiscal 1989 from the fourth quarter of fiscal 1988.

The decline in sales from existing stores for the fourth quarter of fiscal 1989, the company believes, is primarily attributable to the fact that the same store sales comparison figure for this quarter was made against strong sales reported in the fourth quarter of fiscal 1988 in which same store sales increased 9.5 percent.

TCBY added 89 stores during the fourth quarter of fiscal 1989, bringing the total at Nov. 30, 1989, to 1,582, an increase of 407 from the 1,175 one year ago. The company expects to again open more than 400 stores in fiscal 1990. Of the stores open at Nov. 30, 1989, 149 were company-owned and 1,433 were franchised stores.

TCBY is the largest franchisor and operator of retail stores specializing in soft-serve frozen yogurt products. Sales consist of sales by company-owned stores, sales of the company' yogurt and sales of equipment

and other products to franchised stores. Franchising revenues consist of franchise fees and royalty income.

SOUTH WEYMOUTH, MA (JAN. 11) BUSINESS WIRE - The Software Developer's Co. Inc. (NASDAQ:SDEV) (Boston Stock Exchange:SDC) announced Thursday the operating results for the third quarter ended Dec. 31, 1989.

According to President Bruce Lynch, ''We set new records for both sales and earnings in the third quarter. In fact, after only three quarters, we have already surpassed last year's total sales by 31 percent. Operating income grew 293 percent from the third quarter in fiscal 1989 to fiscal 1990.

''This dynamic growth is the 'return' on the investment we made in expanded direct mail efforts and adding to the ranks of upper management, particularly in each divisions' sales departments.

''At the Programmer's Shop division, a selling catalog and increased emphasis on sales to national account customers continue to generate strong sales of programming tools. At the Solution Systems division, growth is coming from a new version of our flagship product BRIEF, and from a new emphasis on selling to site license customers.

''It is also noteworthy that net income figures for 1988 reflect no tax expense due to utilization of loss carryforwards,'' Lynch added. ''In 1989 amounts include tax expense at an effective rate of 43 percent for the third quarter due to the application of a new accounting rule for income taxes.''

HUNT VALLEY, MD (JAN. 11) BUSINESS WIRE - McCormick & Co. Inc. (NASDAQ:MCCRK), Wednesday reported record net income from food and packaging operations of $52.5 million ($2.39 per share) for its 1989 fiscal year ended Nov. 30.

This represents an increase of more than 50 percent over the $1.53 per share reported for 1988. Sales increased to $1.246 billion. For ongoing operations, 1989 sales increased 6.5 percent over 1988.

Total net income, including the gain on the sale of real estate operations was $135.5 million ($6.17 per share). Earnings per share reported after Jan. 19, 1990, will reflect the recently announced 2-for-1 stock split.

Fourth quarter net income was $20.3 million ($.94 per share). This included a gain of $.11 per share from the sale of operations in Brazil and associated tax benefits.

Charles P. McCormick, Jr., chairman of the board and chief executive officer noted, ''Our 100th anniversary year of 1989 was an outstanding one for the company. Management's emphasis on improving margins resulted in significant increase in profits and returns.

''Food and packaging earnings in both the consumer and industrial

businesses gained substantially over 1988. Consumer products benefited from distribution gains and the national rollout of our revitalized retail spice line, which is now complete. Our industrial flavorings and seasonings business rebounded strongly from last year.

''Our 1989 performance benefited from lower net interest expense as a result of debt repayment and income from the investment of proceeds from the real estate sale. Lower average outstanding shares as a result of our share buyback program have also contributed to improved earnings per share.

''As we begin our second century, we continue to seek opportunities to improve performance while maintaining our high standards of quality. Investment spending in the fourth quarter of 1989 should benefit the company in the future. We are confident that results will continue to improve in 1990.''

#90011b0723 01/11/1990 ~Business Wire

NASHUA, NH (JAN. 11) BUSINESS WIRE - Lockheed Sanders has developed a militarized, rugged, light weight, low power 32-bit data processor capable of faster and more complex computations than the 16 bit processors currently most widely used by the military services.

Called the STAR-MVP (military VME processor) the unit processes 20 million instructions per second, significantly faster than 16-bit systems. While 32-bit processors have been in commercial use for some time, this is the first unit built specifically to meet stringent specifications for avionics applications in military land, sea, air and space based requirements.

The STAR MVP is packaged on a single conductively cooled 6x9 VME board. The unit is based on the MIPS R3000 RISC high performance processor chip chosen by the government's Joint Integrated Avionics Working Group (JIAWG) as one of the standard instruction sets.

It is available with a complete software development environment for 'C' and Ada application. It features onboard floating point, VME interface, timers, serial communications, and up to eight Mbytes of main memory.

Software support includes an Ada Real Time Operating System with communications services, built-in test and diagnostics.

Avionics is one major application for processors of this type. The STAR-MVP will support multiple functions, including tactical situation displays; mission planning and processing; engine instrument displays; and flight information and navigation displays. The processor has potential application on the common cockpit control/display subsystem for the C-130J as well as C-141 and C-130 cargo aircraft retrofits.

Lockheed Sanders is also working on possible STAR-MVP use in a modular mission computer to upgrade the avionics on F-16 aircraft operated by the U.S. Air Force and a number of allied and friendly air forces around the world.

Sanders has built processors for its own systems for more than 30 years. Having developed and manufactured processors for Navy and Air Force Electronic Countermeasure Systems, Army Air Defense Radar Systems and automated test equipment for all three services. The company's manufacturing capabilities range from prototype fabrication to full-scale, high volume production of diverse electronic configurations.

Lockheed Sanders engineers can meet custom/configurations and special requirements in operating systems, necessary interfaces, card size and packaging in commercial, industrial and space environments for the STAR MVP.

NEW YORK (JAN. 11) BUSINESS WIRE - The Navigators Group Inc. (NASDAQ: NAVG) reported Thursday that, effective Jan. 1, 1990, Navigators Insurance Co. has increased its share in all the marine insurance business underwritten by its various affiliates from 34 percent to 50 percent.

The announcement was made by Terence N. Deeks, chairman.

Deeks reported that Navigators has concluded an agreement with Progressive Casualty Insurance Co. whereby Navigators immediately assumed a portfolio transfer of all Progressive's past interests in the affiliated marine pools and at the same time replaces Progressive's share on all the new business being underwritten.

Deeks added that Navigators will account for the assumption of the Progressive portfolio as an additional $12.3 million of written premium in

the first quarter of 1990 and now anticipates a substantial increase in marine premiums going forward.

KNOXVILLE, TN (JAN. 11) BUSINESS WIRE - In a record second quarter ended Dec. 31, Clayton Homes Inc. (NYSE:CMH) reports net income of $3.2 million up 6 percent from the prior year.

Fully diluted earnings per share rose 6 percent for the quarter to 19 cents from 18 cents last year.

Revenues for the quarter advanced 3 percent to $55.3 million from $53.8 million. The improvement was led by the 14 percent increase in revenues from financial services and other income, which grew to $8.6 million from $7.5 million.

Homes sold declined 1 percent to 2,565 from 2,590 in the prior year reflecting the industry slump. Industry shipments declined 12 percent for October and November.

In the first half, net income rose 10 percent to $7.5 million. Fully diluted earnings per share increased 8 percent to 42 cents from 39 cents in the prior year.

Revenues for the first half grew 2 percent to $118.3 million from $116.2 million. Homes sold totaled 5,615 down 2 percent from the 5,736 sold the prior year.

OSHKOSH, WI (JAN. 11) BUSINESS WIRE - Harry M. Krogh has been named president and chief operating officer of Oshkosh B'Gosh Inc. effective Feb. 1.

Charles F. Hyde, the apparel company's CEO, moves up as chairman of the board. Hyde made the announcement Thursday at the firm's national sales meeting in San Diego.

Krogh, 60, has been a consultant to Interco Inc., St. Louis, Mo., since April of last year. He was previously president, chief operating officer and a member of the board of directors of the diversified consumer products company from June 1985 to April 1989. Prior to that he served for five years as president and CEO of Florsheim Shoe Co., a division of Interco. He joined Florsheim as vice president of finance and administration in 1974.

In making the announcement, Hyde said the change comes as a result of the company's tremendous growth during the last decade.

''After the exceptionally successful decade of the '80s we are structuring our management team in anticipation of continuing to build on our strengths and achieving new ambitious goals in the '90s.

''Harry Krogh has extensive, valuable industry experience, and I have great confidence that he will make outstanding contributions to our business and our overall corporate strategy,'' he said.

Hyde also referred to the promotions last October of Douglas W. Hyde to senior vice president of marketing and Michael D. Wachtel to senior vice president of operations, both of whom will report to Krogh. Hyde said he and Thomas R. Wyman, new vice chairman of the board, would now focus on strategic planning and ''seed ventures'', both domestic and international.

Oshkosh B'Gosh Inc., headquartered in Oshkosh, is an internationally recognized manufacturer of children's wear, adult sportswear and workwear. The company employs 6100 people and operates 16 manufacturing facilities in Wisconsin, Kentucky and Tennessee.

PHILADELPHIA (JAN. 12) BUSINESS WIRE - Heritage National Holding Corp., owned by a small group of Philadelphia-area minority businessmen, has entered into an agreement to purchase the common stock of the Pittsburgh-based Heritage National Bank from Equimark Corp., Pittsburgh.

It was announced at a news conference Thursday in the Manna Bible Institute, Germantown, Philadelphia. The sale, which is subject to regulatory approval, is expected to close by the second or third quarter of 1990.

Eugene O. Hatton, chairman and chief executive officer of Heritage National Holding Corp. and also board chairman of the Manna Bible College, Philadelphia, stated, ''We believe this purchase will create as many as 3,000 new jobs in the Philadelphia area with the next 24 months. We also see,'' he added, ''Heritage National Bank as a catalyst to stimulate minority business ventures and as a major vehicle to help our community by providing safe, convenient and timely banking services to all residents of Philadelphia and of Pennsylvania.''

Heritage National Bank qualifies as a minority institution under the rules established by the U.S. Treasury Department. It is the only such commercial bank in the Commonwealth of Pennsylvania. Heritage is a full-service bank with $11.8 million in assets.

Until a branch is opened in Philadelphia, customers can use the bank by mail, direct-deposit programs, or the 24-hour MAC banking service.

Heritage National Bank currently offers a full range of consumer and business banking services, including checking, savings, money markets, loans and certificates of deposits (CDs). Accounts are insured up to $100,000 by the Federal Deposit Insurance Corporation.

#90011b0751 01/11/1990 ~Business Wire

NEW BRUNSWICK, NJ (JAN. 11) BUSINESS WIRE - William J. Washawanny, president of Stuff Yer Face Inc., (''SYF''), a publicly held NASDAQ listed corporation (Symbol:STUF) headquartered in New Brunswick, announced that on Jan. 8, 1990 the Securities and Exchange Commisssion declared Stuff Yer Face's Registration Statement on Form S-4, effective.

This has cleared the way for a combined annual meeting of shareholders of SYF and Tubby's Sub Shops Inc. (''Tubby's''), presently scheduled for March 7, 1990 in Fraser, Mich.

The shareholders of both corporations will be asked to approve a merger of the companies and a change of SYF's name to Tubby's Inc. Concurrent with the merger, there will be a one for three reverse split of the currently outstanding SYF shares from 15,163,553 shares to 5,054,518 shares.

SYF will then exchange its shares on a one-for-one basis for all 10,284,948 Tubby's shares that are presently outstanding. Following completion of the merger there will be approximately 15,339,466 SYF shares outstanding, with a controlling interest to be owned by the present

Tubby's management. The present directors of Tubby's will be elected directors of the merged corporation and Washawanny will continue with the merged companies as director and vice president-eastern operations, pursuant to a three-year employment agreement.

Following the merger J. Thomas Paganes will be president and chief executive officer of the merged corporation. For the year ended Nov. 30, 1988, Tubby's and Subsidiaries reported total revenues of approximately $2.76 million with net income after taxes of $105,414. For the nine months ended August 31, 1989, Tubby's had total revenues of approximately $1.4 million (unaudited) and a net loss after taxes of $72,569 (unaudited).

For the year ended March 31, 1989, SYF reported a net worth of approximately $1.7 million, net sales of approximately $2.5 million and a net loss of approximately $228,000. For the six months ended Sept. 30, 1989 (unaudited) SYF reported net sales of approximatley $1.19 million with a net loss of approximately $3,000.

SYF's restaurant operations are based upon the promotion of the ''Stromboli'', which is a special sandwich with different stuffings of either meats or vegetables along with cheeses and savory sauces wrapped up in a freshly made pizza-like dough and then baked. SYF also serves salads pizza, club sandwiches and hamburgers. The company's East Brunswick location serves alcoholic beverages and Thomas Sweet ice creams.

NEW YORK (JAN. 11) BUSINESS WIRE - Airship International Ltd. (NASDAQ:BLMP) announced Thursday that it will be televising, for the second consecutive year, the network aerial coverage of the Super Bowl with an advanced Gyro Stabilized Camera System.

This year Super Bowl XXIV will be televised from New Orleans, on Jan. 28, 1990. In exchange for aerial coverage with the blimp, the network (CBS) will reciprocate with several audio and visual mentions of the airship and its sponsor while the game is in progress, and during halftime.

Presently, the average rate for network television commercials airing during Super Bowl XXIV are valued at $1.2 million per 60 second spots.

The airship to be utilized is an Airship International Ltd.

state-of-the-art 194 foot Skyship 600 on behalf of the Metropolitan Life Insurance Co. (Met Life). The company's Skyship 600, which is fully Federation Aviation Administration certified is presently on a cross country promotional tour appearing as an eye-in-the-sky television network camera platform for other major sporting and special events.

The Skyship is equippedm with the world's largest full color NightSign depicting logos, messages and animated graphics that can be seen from over a mile away. The Skyship is leased to Met Life for a term of 36 months with a potential value to the company of over $10.8 million.

NEW YORK (JAN. 11) BUSINESS WIRE - The board of directors of the Adams Express Co. has designated Douglas G. Ober, vice chairman, as the next chief executive officer, effective April 1, 1990. W.D. MacCallan will remain as chairman of the board.

The board of directors Thursday declared a 12 cent per share dividend, payable March 1, 1990 to stockholders of record, Feb. 20, 1990.

The 12 cents consists of four cent long term capital gain and three cent investment income, both realized in 1989 and five cents from 1990 investment income.

The net asset value of Adams Express at the end of 1989 is compared with the year earlier in the following table:

ADAMS EXPRESS CO. FINANCIAL HIGHLIGHTS

Net Asset Value	12/31/89	12/31/88
Net assets	$550,091,129	$455,825,580
Shares outstanding	29,982,939	28,295,508
Net assets per share	$ 18.35(a)	$ 16.11

(a) - After capital gain distributions of $1.36 per share paid in 1989.

For the 12 months ended Dec. 31, 1989 according to Indata's figures, total return on Adams Express net asset value, after adjusting for income dividends as well as capital gains distributions paid was 28.6 percent. Comparable figures for the Dow Jones Industrial Average and the Standard

and Poor's index of 500 stocks were 31.4 and 31.3 respectively.

During the three months ended Dec. 31, 1989, the Adams Express Co. added seven new names to its investment list with purchases of: Chubb Corp. (The), Coopers Industries Inc., General Re Corp., Pall Corp., Smith's Food & Drug Co., Tandem Computers Inc., and Xoma Corp.

The company increased its existing holdings in Barnett Banks Inc., Bristol-Myers Squibb Co., New England Electric System, Petroleum & Resources Corp., and Signet Corp.

Eight issues were eliminated from the investment list with the sales of Caterpillar Inc., Cray Research Inc., Kellogg Co., LyphoMed Inc., May Department Stores Inc., Rite Aid Corp., Service Corp., International and USAir Group Inc. Reductions were made in the holdings of International Business Machines Corp., and Sierra Pacific Resources. The annual report is expected to be released on or about Jan. 26, 1990.

#90011b0766 01/11/1990 ~Business Wire

NEW YORK (JAN. 11) BUSINESS WIRE - The board of directors of Petroleum & Resources Corp. has designated Douglas G. Ober, vice chairman, as the next chief executive officer, effective April 1, 1990.

W.D. MacCallan will remain as chairman of the board.

The board of directors Thursday declared the following payments, payable march 1, 1990 to stockholders of record, Feb. 20, 1990.

17 cents per share from undistributed net investment income (3 cents earned in 1989 and 14 cents in 1990)

3 cents per share representing undistributed net capital gains realized during the year 1989.

The net asset value of Petroleum & Resources Corp. at Dec. 31, 1989 is compared with that a year earlier in the table below:

	Net Asset Value	
	12/31/89	12/31/88
Net assets	$ 322,866,019	$ 248,370,688
Shares outstanding	10,384,600	9,997,584
Net assets per share	$ 31.09 (a)	$ 24.84

Note (a) -- After capital gain distributions of $1.20 paid in 1989 and $29,895,000 stated value $1,575 convertible preferred stock outstanding.

For the 12 months ended Dec. 31, 1989 according to Indata's figures, total return on Petroleum & Resources net asset value, after adjusting for income dividends as well as capital gains distribution paid in 1989 was 34.3 percent. Comparable figures for the Dow Jones Industrial Average and the Standard & Poor's Index of 500 stocks were 31.4 and 31.3, respectively.

During the fourth quarter of 1989, Petroleum & Resources Corp. added three new names to its investment list with purchases of Cooper Industries Inc., Enron Oil & Gas Co., and MCN Corp. The corporation increased its holdings in Calgon Carbon Corp., Lubrizol Corp., Nicor Inc., and Oryx Energy Co.

Three issues were eliminated from the investment list with the sales of Endevco Inc., Gulf Canada Resources Ltd., and Newmont Mining Corp. The corporation reduced its holdings in Arkla Inc. and James River Corp. of Virginia.

#90011b0767 01/11/1990 ~Business Wire

WESTBURY, NY (JAN. 11) BUSINESS WIRE - E-Z-EM Inc. (NASDAQ:EZEM) Thursday announced net sales and net earnings for the first half and second fiscal quarter ended Dec. 2, 1989.

For the first half of fiscal 1990, net sales increased 13 percent to $40,004,000 from $35,393,000 and net earnings rose to $3,645,000 from $3,633,000 reported for the first half of fiscal 1989. On a per share basis, both primary and fully diluted earnings slipped from 45.6 cents to 45.3 cents.

''We attributed the increase in first half sales to the acquisition of the barium sulfate division of Lafayette Pharacal in December 1988,'' said E-Z-EM President Howard S. Stern.

''As expected, net earnings were not significantly affected as increased operating profit from barium diagnostic sales was offset by amortization of intangible assets and reduced interest income related to the acquisition.

Net sales of $18,833,000 were up 3 percent in the second quarter from $18,340,000 reported for the comparable period of fiscal 1989. Net earnings declined 23 percent to $1,544,000 from $1,995,000 for the

comparable prior year's quarter.

Both primary and fully diluted earnings per common share decreased to 19.2 cents from 25 cents reported last year.

The quarterly net sales increase is due to increased barium diagnostic sales, which was mostly offset by reduced Nucleotome sales by Surgical Dynamics, a 51 percent owned subsidiary of the company.

The reduction in Nucleotome sales and earnings is attributed to the action taken by Blue Cross/Blue Shield in denying reimbursement for the Nucleotome procedure. Since Nucleotome's inception, more than 40,000 procedures have been performed with a procedure success rate estimated at 70 percent.

Despite this fact and contrary to assurances to Srugical Dynamics, Blue Cross/Blue Shield has yet to reevaluate its reimbursement policy for Nucleotome.

This was the major factor causing the net earnings decline in the quarter. The company expects a continued reduction of Nucleotome sales and earnings until the issue is properly resolved.

E-Z-EM is a leading manufacturer and distributor of diagnostic imaging and other health care products.

#90011b0770 01/11/1990 ~Business Wire

FORT LAUDERDALE, FL (JAN. 11) BUSINESS WIRE - Encore Computer Corp. and McDonnell Douglas Information Systems International Thursday announced an OEM agreement following their joint R & D agreement in September 1989.

McDonnell Douglas will OEM Encore Multimax parallel/multiprocessing systems to commercial markets on a worldwide basis. The collaboration between Encore and McDonnell Douglas is expected to generate $100 million in revenue over the next five years.

Kenneth G. Fisher, Encore chairman and chief executive officer stated, ''The long-term strategic relationship with McDonnell Douglas represents a great opportunity for advanced product development. We are very optimistic about new products and revenues - particularly in the European and Australasian markets.''

The first new products in the areas of transaction processing and data

communications are being announced by McDonnell Douglas Thursday. Encore, with its strength in parallel/multiprocessing systems technology will collaborate with McDonnell Douglas and its proven commercial software solutions to develop a leading commercial product platform for the 1990s.

Marketing by McDonnell Douglas of the new products based on the Encore Multimax has begun.

As a result of the R & D agreement signed with McDonnell Douglas in September, 1989, the applications and end user tools of the McDonnell Douglas Reality Operating System have been extended to run on the Encore leading-edge multiprocessing UNIX operating system.

The multiprocessing power and expandibility of the Encore Multimax provide the ideal platform for Reality as well as UNIX database applications.

The Encore/McDonnell Douglas products will be distributed in Europe by McDonnell Douglas - Sales and Marketing, where positioning for the European Economic Community in 1992 is an important strategic direction for both companies.

Encore Computer Corp. is a Fort Lauderdale, Fla.-based company that designs, manufactures, sells and supports the CONCEPT family of real-time computer systems and the UNIX-based Multimax family of parallel/multiprocessing systems and solutions for the commercial, technical and government markets worldwide.

CAROL STREAM, IL (JAN. 11) BUSINESS WIRE - MicroEnergy Inc. (NASDAQ:MCREC) designer and manufacturer of custom switching power supplies, announced a new contract with the American division of a major European conglomerate.

The American division is already a valued customer of MicroEnergy. The new custom power supplies will be installed in the next generation of optical laser scanners used in point of sales applications in Europe and in the United States during the 1990s.

The customer has agreed to pay NRE costs of $140,000 for the design effort. When the products reach production in 1991, annual revenues to MicroEnergy should reach $3 million per year for 8-10 years.

This contract represents another significant inroad for MicroEnergy into the European common market in anticipation of the 1992 economic coalition.

MAYNARD, MA (JAN. 11) BUSINESS WIRE - Digital Equipment Corp. Thursday announced that it will hold DECWORLD '90 July 8 through Aug. 1, 1990, at Boston's World Trade Center.

The event is expected to bring together a total of approximately 20,000 invited executives from the world's most preeminent organizations and Digital sales professionals in a common educational environment.

The DECWORLD Program, Digital's worldwide information system symposia and exhibitions, originated in Boston in 1983 and has been held here and in Cannes, France, several times since. The North American-focused DECWORLD '90 event will be followed by a comparable European-focused event, DECville '90, in Cannes, France, in September.

DECWORLD '90 will focus its seminars and demonstrations on Digital's innovative application solutions and technologies that meet customer needs in a rapidly changing and competitive global environment. Attendees will experience, first-hand, how Digital's innovative implementation of information system technologies provide its customers with a choice of computing solutions that are available today and have the flexibility to adapt easily in the future.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90011b0777 01/11/1990 ~Business Wire

ROCHESTER, NY (JAN. 11) BUSINESS WIRE - Eastman Kodak Company Thursday announced to its employees a new Employee Protection Plan, designed to provide them specific benefits in the event that jobs were eliminated following a corporate takeover.

The company made the announcement in Kodakery, its employee newspaper.

The Kodak plan is notable because it provides comprehensive coverage to

all regular employees. Similar plans in many other companies protect only a specific level of management.

Among the benefits included are:

o a lump sum termination allowance ranging from a minimum of six weeks pay to a maximum of two years pay,
o continuation of health and life insurance coverages ranging from four months to one year, depending on length of service,
o a full share of any wage dividend declared in the year in which employment terminates, and
o outplacement assistance and a retraining allowance of up to $5,000.

The plan would provide benefits following a change in control of the company. This might occurr when an individual or entity acquires significant holdings of company stock, when incumbent directors no longer constitute a majority of the board, or when shareowners approve a merger or consolidation that means Kodak is no longer an independent, publicly owned company.

An employee would become eligible for the benefits if employment were terminated within two years as a result of the change of control. However the benefits would not be available to individuals who voluntarily resign are terminated for cause, die or become disabled. The termination allowance would be equal to three weeks of pay for every year of service, up to 16 years; plus four weeks of pay for each year of service beyond 16 years.

In addition, employees eligible to retire who were terminated within five years of the change of control would receive an enhanced retirement benefit. The increase would result from adding up to five years to age and service when calculating the retirement benefit.

Kodak's subsidiary companies are not covered by the program, but are reviewing the program to consider similar or identical plans to cover their employees.

#90011b0816 01/11/1990 ~Business Wire
INWOOD, NY (JAN. 11) BUSINESS WIRE - Choice Drug Systems Inc. 1/8NASDAQ:DOSE (common stock), DOSEW (warrants), DOSEU (units); Boston Stock Exchange:CD3/8 Thursday announced unaudited results for the third quarter and nine months ended November 30, 1989.

Revenues rose nearly 20 percent to $4,864,978 from $4,060,596 in the prior year's third quarter. This increase is due primarily to the increase in the company's customer base and sales of additional product lines to new and existing customers, plus the inclusion of the results of operations of the recently acquired Sterling Health Systems Inc. for the month of November 1989.

The net loss for the period was $198,278 or $.05 per share, after a provision of $55,000 for expenses related to an incompleted and terminated acquisition, as compared to a net loss of $53,182 or $.01 per share in the

third quarter of the previous year.

Revenues for the nine month period were up 24 percent to $14,495,514 from $11,654,498 in the same period last year. Income from operations increased to $277,246 from $4,345 in the first nine months of fiscal 1989.

The net loss for the period decreased to $116,206 or $.03 per share, after a provision of $90,000 in expense related to an incompleted and terminated acquisition, as compared to a net loss of $227,739 or $.05 per share in the first nine months of the prior year.

There was an operating loss for the quarter because of an increase in selling, general and administrative expenses and a decline in gross profit margins. In addition, net interest expense increased due to higher rates in effect during the quarter and an increase in long-term debt.

As previously announced, United Jersey Bank, the company's lead bank, has stated that it wanted to be replaced as lead lender as of February 28, 1990, the end of the current fiscal year. As of November 30, 1989, Choice Drug's line of credit is fully drawn and the company is in default under the financial ratio covenants of its loan agreement with United Jersey Bank.

The company continues to meet its interest payment obligations when due and is actively engaged in discussions with banks for replacement financing, while at the same time seeking to retain its facility with United Jersey Bank. To date, the company has been unable to secure alternate financing on satisfactory terms.

These factors indicate that the company's ability to continue as an ongoing concern is dependent upon its ability to replace its current line of credit with United Jersey Bank or alternatively retain its existing line of credit, while generating sufficient cash flow to meet its other obligations and sustain its operations.

In December 1989, the company engaged a new president and retained an investment banker. Consequently, the company will incur additional expenses of approximately $60,000 for the fourth quarter of the current fiscal year, which will have an adverse impact on earnings.

Choice Drug Systems Inc. and its wholly owned subsidiaries provide pharmaceuticals, durable medical equipment and disposables to health care facilities, home health care products, and physician groups in the greater New York/New Jersey Metropolitan area and in Massachusetts and Connecticut.

WASHINGTON (JAN. 11) COMTEX - The 10-Q report filed at the NASD shows Fonar Corp. earned $159,000, or $0.01 per share, on revenues of $7.56 million for the quarter ended Sept. 30, 1989.

This compares with net income of $1.12 million (extraordinary gain of $434,000), or $0.05 per share, on revenues of $15.56 million for the same period in 1988.

-30- 488

#90011c0011 01/11/1990 ~Comtex

WASHINGTON (JAN. 11) COMTEX - Benton Oil & Gas Co. filed a registration statement with the SEC relating to the sale of up to 881,000 shares of its common stock. An additional 70,000 shares of common stock will be issuable upon exercise of warrants issued to the managing underwriter of the company's initial public offering.

The company's common stock is traded on the NASDAQ system under the symbol "BNTN".

The 811,000 shares are offered upon the exercise of 811,000 warrants which were issued during the company's initial public offering at a price of $7.50 per share.

The company's closing bid and ask prices for its common stock was $9.625 and $10.25 respectively, on Jan. 3, 1990.

WASHINGTON (JAN. 11) COMTEX - The 8-K report filed at the SEC shows on Dec. 22, 1989, Capital City Bank Group executed a loan and security agreement with The First National Bank of Atlanta, Atlanta, GA, for $12.00 million. The loan refinances an existing $6.00 million loan and adds an additional $6.00 million one-year, revolving line of credit. Revolver funds are for general corporate purposes, and any revolver balance will be amortized at the end of that revolver's one-year lifetime.

-30- 658
#90011c0018 01/11/1990 ~Comtex
WASHINGTON (JAN. 11) COMTEX - The 8-K report filed at the SEC shows on Oct. 26, 1989, Noland Co. changed its laws of incorporation to allow future incorporation changes to be made with approval from the majority of its shareholders. In doing so, Noland Co.took advantage of a new Virginia corporate law that allows amendment of a company's incorporation laws with only a majority vote. The law formerly required a greater-than- two-thirds approval for such amendments.

At the same time, Noland's board added a bylaw to its laws of incorporation to state that Virginia's new law of "control share acquisitions" will not apply to the company. That law would have required Noland shareholder approval for any control share acquisition (an acquisition that surpasses a 20%, one-third, or majority of voting shares threshold).

SCHEDULE 14D9

SEC - AMENDMENT NUMBER: NONE

ANNOUNCEMENT:

Commercial National Corp., (TICKER: CNCL) a Shreveport, LA, bank, has agreed to be acquired by Deposit Guaranty Corp., a Jackson, MS, bank holding company, for $5.50 a share.

Following the completion of Deposit Guaranty's tender offer, which was begun on Jan. 10, Commerce will remain a separately chartered bank subsidiary.

The tender offer is conditioned on Deposit Guaranty receiving two-thirds of Commercial's stock under the offer.

Deposit Guaranty has already obtained all regulatory approvals to complete the takeover, and the boards of both companies have approved the new offer.

#90011c0076 01/11/1990 ~Comtex

WASHINGTON (JAN. 11) COMTEX - Focus V Inc. filed a Form 8-K with the SEC stating on Dec. 18, 1989, it acquired approximately 94% of the outstanding capital stock of Work Recovery Centers Inc. In exchange, Focus V issued 88,266,000 restricted common shares in equal amounts to Messrs. Thomas L. Brandon and Stephen E. Bubala.

Also, as a part of the acquisition, Messrs. Brandon and Bubala required the sale of 20.10 million restricted shares of Focus V to them by Messrs. Gergory W. Skufca, William L. Skufca and Barney E. Carlson in exchange for $50,000.

Concurrently with the acquisition of Work Recovery, Messrs. William Skufca and Barney Carlson resigned as members of Focus V's board and as secretary/treasurer and vice president, respectively. They were replaced by Messrs. Brandon and Bubala. Mr. Brandon was then appointed the president of Focus V and Mr. Bubala was named secretary/treasurer.

Messrs. Brandon and Babula now control Focus V through their ownership of 54,183,000 (41.45%) each of the outstanding capital stock of Focus V.

Focus V's executive office is located at 2341 S. Friebus Ave., Suite 14, Tucson, AZ 85713 and its telephone number is (602) 797-2888.

#90011c0082 01/11/1990 ~Comtex

WASHINGTON (JAN. 11) COMTEX - Olin Corp. filed a Form 8-K with the SEC stating in 1989, Virginia corporate law was amended. The new law permits Virginia publicly-held companies to reduce the shareholder vote required to amend company articles of incorporation from more than two-thirds of the outstanding shares to a majority of the outstanding shares.

On Dec. 14, 1989, Olin Corp. adopted an amendment to its articles of incorporation to take advantage of this legislation. Thus, Olin may amends its articles of incorporation with the approval of a majority of the outstanding shares.

GROUP LED BY HENLEY GROUP INC OF HAMPTON, NH OWNS 2,950,000 SHARES (7.30%) OF WHEELABRATOR TECHNOLOGIES INC (TICKER: WTI) OF DANVERS, MA.

ANNOUNCEMENT:

On Dec 29, 1989, New Henley changed its name to "The Henley Group Inc." and Wheelabrator changed its name to "Henley Properties Inc."

On Dec. 31, 1989, Wheelabrator distributed to its stockholders all common

stock outstanding of New Henley pursuant to terms of a transition agreement dated Dec. 18, 1989, resulting in New Henley becoming a separate publicly-owned company.

New Henley acquired the class A common stock purchase warrant, dated Dec. 16, 1989, to purchase from Wheelabrator at any time during a ten-year period commencing Jan. 1, 1990, up to 3.725 million newly issued shares of Henley Properties class A common stock.

LATEST TRANSACTION:

On Dec. 31, 1989, Henley Properties transferred 2,950,000 shares to The Henley Group as part of the reorganization.

PURPOSE:

Reorganization and distribution.

#90011d0160 01/11/1990 ~French/German News Agency
MADRID (JAN. 11) - Two rivals of Italian magnate Silvio Berlusconi were on Thursday ousted from new Spanish television network Telecinco, due to go on the air in March, Telecinco said.

Telecinco chairman German Sanchez Ruiperez and advisor Pedro Higuera of publishing house Anaya, which holds a 25 percent stake in the new company, were relieved of their functions by a general meeting of shareholders.

Mr. Berlusconi, who also holds a 25 percent stake in Telecinco, has been in conflict with Anaya, which last Thursday issued a statement complaining of irregularities in the launch of the new station, particularly concerning advertising.

The statement from Mr. Higuera criticised the use of Mr. Berlusconi's

company Publi-Espana to launch an advertising campaign for Telecinco, saying it had not been authorised to act as advertising agent for the new television network.

Mr. Berlusconi told reporters after Thursday's meeting that it had been necessary "to enable the company to continue to advance in the best direction."

Anaya issued a statement saying that its representatives had been ousted by "a majority of 60 per cent of capital, constituted in an irregular manner."

Both Anaya and businessman Juan Fernandez Montreal, who holds a 15 per cent stake, said they reserved the right to take "appropriate legal action" over the move.

No replacements were named for Mr. Ruiperez and Mr. Higuera Thursday.

Mr. Berlusconi and Miguel Duran of the National Organisation for the Blind, which holds 25 percent of Telecinco, will be vice-presidents with executive powers enabling them to convene board meetings.

Mr. Duran supported Mr. Berlusconi in the row with Anaya, saying that the agreement with Publi-Espana was valid.

Publi-Espana had said it signed an agreement in May giving it exclusive rights to sell advertising on Telecinco and to promote the network for five years.

#90011d0990 01/11/1990 ~French/German News Agency
WASHINGTON (JAN. 11) - The U.S. Supreme Court has told foreign companies unhappy about how they are taxed by state governments around the country that it will not intervene on their behalf.

At issue is the so-called unitary tax, used by several states, to fix the basis for taxing corporations trading within those states.

The unitary tax system uses the company's global earnings for assessing the rate of taxation for firms operating within their jurisdictions.

The Canadian Alcan Aluminium group and Britain's Imperial Chemical Indistries (ICI) sought to have California's unitary taxation ruled unfair by the U.S. Supreme Court.

But the court, in a judgment handed down Wednesday, refused to rule on the question telling the plaintiffs to use the court processes available in the individual states to make their case.

However, the court also indicated that it may re-examine the question if it were dissatisfied with the treatment afforded to foreign corporations by the state court systems.

The unitary taxation system has been labelled unfair by many foreign corporations and some foreign governments because, they claim, it is effectively a form of double taxation.

Opponents of the tax say companies already taxed abroad for their earnings there have to pay a higher tax based on the already-taxed foreign earnings in the U.S. states which impose unitary taxation.

WINDHOEK (JAN. 11) - Members of the future Namibian Government met here for the first time Thursday to pave the way for independence from South

Africa.

South West Africa People's Organization (SWAPO) leader Sam Nujoma, who is to be Namibia's president, told future ministers he met with South African administrator-general Louis Pienaar recently and asked him to ease the transition to the new administration, according to a SWAPO communique.

Meanwhile a session of Namibia's constituent assembly that was to have examined a draft constitution on Friday had been postponed until January 19,
assembly secretary Hennie Van Rensburg said.

Three South African experts in constitutional law are drawing up the document and observers said the delay was probably so they could work out final details.

Political analysts say the assembly will probably adopt it later this month by a large majority, well over the two-thirds required and possibly by a unanimous vote.

Adoption of the constitution, in turn, will open the way to Namibia's official proclamation of independence.

According to a copy of the draft constitution published by the pro-SWAPO daily The Namibian, its only reference to socialism, embraced by SWAPO, is a reference that "ownership and control of material resources are to be distributed to serve the common good".

"Just compensation" is promised for expropriated property.

The constitution would also recognize the right of students to attend private schools, provided admission is not based on race.

It includes a human rights charter abolishing the death penalty.

SWAPO, the black nationalist movement that captured 57 per cent of the vote in November's elections, won its demand that the head of state should also be chief executive and, along with a prime minister, run the government.

However it gave in to the opposition on two points -- that an upper house should be set up, with the right to throw out laws passed by the national assembly, and that this body be elected by proportional representation.

The future government is to include 16 portfolios. The finance minister is to be a West German businessman.

SRINAGAR, India (JAN. 11) - Battles between suspected Moslem nationalists and security men left 45 people injured and six schools and a government office gutted in Jammu and Kashmir state Thursday, officials said.

The violence broke out after curfew was relaxed in Srinagar, the state's summer capital, and Baramulla, Anantnag and Pulwama, all in the Moslem-dominated Kashmir valley.

Some 21 suspects were arrested after Moslem gunmen exchanged fire with paramilitary police in Srinagar's Rajouri Kadal and Nawakadal areas, the officials said.

Militants set off three bombs -- two in Srinagar and one in Baramullah -- which damaged three buildings, but no one was hurt.

The separatists, opposed to the Kashmir's integration into India after the 1947 partition of the sub-continent, also threw stones at security forces in the four towns.

The officials said 45 people, including some 30 troopers, were injured, eight seriously, during Thursday's trouble.

Fires started by petrol bombs thrown by the separatists gutted half a dozen schools and one census department buildings in the Srinagar, Anangtnag and Pulwama areas, the officials said.

Some 10 people have died in Moslem militancy-linked violence in Jammu and Kashmir this year.

Meanwhile, Indian security forces shot dead two unidentified men when they entered Jammu and Kashmir from Pakistan early Thursday, violating a curfew imposed along the frontier, the officials said.

BUCHAREST (JAN. 11) - Residents of the central Romanian city Brasov protested Thursday a decision by the authorities to re-introduce food rationing tickets, abolished briefly following the ouster of Nicolae Ceausescu, a reliable source there said.

Shop owners were accosted by crowds of angry consumers who spoke out against the poor quality of food products in the city, according to the source, reaching by telephone from Bucharest.

In 1987, there were riots in Brasov's working-class neighborhoods with protesters demanding "bread and light" because of chronic food and

electricity shortages.

The food rationing tickets, which apply to basic foodstuffs such as oil, sugar, butter and meat, were introduced by the Ceausescu regime.

French Agriculture Minister Henri Nallet, who is accompanying Foreign Minister Roland Dumas on a visit to Romania, said meanwhile that France would be sending a supply ship and more emergency food aid to Romania.

Separately, an informed source here said the first trial of a member of the Securitate state police which fought the army during the December revolution that toppled Ceausescu was due to open Friday in the central city of Sibiu.

The Securitate member was not identified. Some of the heaviest fighting took place in Sibiu on Dec. 22.

The trial of General Marin Neagoe, the former head of Ceausescu's body guards, will also open "in the next few days" in Bucharest, the source said.

Three lower-ranking officials of the police force in Sibiu, which was the political stronghold of Ceausescu's son Nicu, were tried earlier in the week by special military tribunals and sentenced to prison terms of up to 12 and half years.

KAMPALA (JAN. 11) - Oil companies operating in Uganda have threatened to close down their operations following the government's refusal to raise the dealers' profit margin on petroleum products, energy ministry sources said Thursday.

The only six oil companies operating in the country and which are all foreign based - Agip, Shell, Caltex, Total, Esso and UPET - have said that the operating margin offered them is too small to sustain their business operations.

They pointed out that following a futher devaluation on Monday this week of the Ugandan shilling, the hitherto 4.90-shilling margin per litre offered them by government-controlled prices had been wiped out. One U.S. dollar now sells for 375 Ugandan shillings instead of 370.

The sources explained that for every litre sold, the oil companies lose 10 Uganda cents.

Since Monday, most of the country's petrol stations have remained closed

and motorists have been waiting in long queues at those which opened for business.

TOKYO (JAN. 11) - Honda Motor Co. said Thursday that it planned to decrease exports of its motor vehicles by 3.5 percent to 660,000 this year.

But its domestic sales are targeted to rise 8.7 percent from 1989 to 725,000, a spokesman for the major Japanese automaker said.

The announcement was made amid increasing foreign criticism, particularly from U.S. and West European makers, of Japanese car exports.

Honda, which produces cars in the United States, plans to start production in Britain in 1992.

TOKYO, Jan 11 (AFP) - Japanese banks are expected to raise their short-term prime lending rate by half a percentage point to 6.25 percent a year late this month, financial sources said Thursday.

The lending rate, which commercial, trust and long-term credit banks charge their most creditworthy customers on lending of not more than one year, was last raised to 5.75 percent in November.

The expected rise will be the third increase in the short-term prime lending rate since January 1989, when it stood at 4.25 percent.

In an effort to combat inflationary pressure, the Bank of Japan, the central bank, raised its official discount rate - the interest on its loans to commercial banks - by 0.5 percent to 4.25 percent on December 25.

It was the third rise in the Japanese official discount rate in 1989.

HONG KONG (JAN. 11) - Jardine Pacific said Thursday it had bought five Pizza Hut outlets in Taiwan plus a new franchise for developing the restaurant chain there.

The deal was made with U.S. interest Solomon Inc. by the private subsidiary of the local conglomerate, the Jardine Matheson group. The price was not disclosed.

"The potential for Pizza Hut in Taiwan is very exciting, given the large population and increasing disposable income," said Jardine Pacific official Rodney Michell.

The Taiwan acquisition brought to around 200 the number of Pizza Hut outlets Jardine Pacific operates in the Asia-Pacific region and in Canada.

PHNOM PENH (JAN. 11) - Fighting in northwestern Cambodia's traditional "rice bowl" has caused a 15 percent shortfall in last year's expected harvest, a Planning Ministry official said here Thursday.

"We harvested 2.67 million tons of rice in 1989, about 85 percent of what we had had expected," said Un Buntha, deputy director of the ministry's general planning department.

He attributed the "significant decline in production" mainly to the military situation in the northwest, where resistance guerrillas have launched a fierce offensive since Vietnam's announced troop pullout from Cambodia in September.

But Mr. Buntha stressed that despite the problems, overall production of rice was up six percent over 1988. Cambodia needs to harvest 2.8 million tonnes of rice to be self-sufficient, he said.

He said that "in the areas near Thailand, where the opposition's sanctuaries are located, the battles have prevented the planting of several tens of thousands of hectares (acres) of rice."

The Marxist Khmer Rouge, backed by China, is the military backbone of the resistance coalition and since January 7 its soldiers have been waging an attack on the country's second-largest city, Battambang, 270 kilometers (167 miles) northwest of Phnom Penh.

"Before the war, there were more than 400,000 hectares (988,000 acres) of rice in the Battambang area, but now there are less that 300,000 hectares (741,000 acres)," Mr. Buntha said.

Forces belonging to the resistance coalition's two non-communist factions have been active in the provinces of Banteay Meanchey and Oddar Meanchey, in the extreme northwest, notably around the town of Sisophon.

Mr. Buntha said disruptions in transport, especially of fertilizer, were also a factor in last year's harvest shortfall, but added that Phnom Penh forecast rice output for 1990 to be 2.9 million tons if the weather was

good.

"Our output is always limited by archaic agricultural methods, a shortage of fertilizer and the insufficiency of our irrigation system, which covers only 20 percent of the paddies," Mr. Buntha said.

Cambodia, a one-time rice exporter, received 10,000 tons of rice as humanitarian aid last year.

#90011d7760 01/11/1990 ~French/German News Agency

MANILA (JAN. 11) - Corporate investment in new and existing firms in the Philippines rose by 53 percent in 1989, hitting an all-time high of 26.741 billion pesos (1.192 billion U.S. dollars), government researchers said.

Researchers from the official Securities and Exchange Commission (SEC) said the increase from 1988's total corporate investment of 17.4 billion pesos (815 million dollars) indicated growing confidence in this country's business environment.

Domestic investment hit 21.959 billion pesos (979.1 million dollars) in 1989, up 55 percent from 1988, the SEC said.

Foreign investment grew by 44 percent to 4.782 billion pesos (213.2 million dollars) in 1989, the SEC researchers added.

#90011d7780 01/11/1990 ~French/German News Agency

MANILA (JAN. 11) - The head of the state-run Philippine National Bank (PNB), the country's largest commercial bank, said Thursday he had resigned.

PNB president Edgardo Espiritu said President Corazon Aquino had agreed that it would take effect in February after he had fulfilled special assignments for the government, including serving on the country's debt negotiating panel.

He would not give the reason for his decision, but denied suggestions that it was because he failed to be named Central Bank governor or finance secretary in a cabinet revamp last month.

Under Mr. Espiritu's three-year term, PNB became the most profitable government corporation with an aggregate income of 4.94 billion pesos (220.11 million U.S. dollars) including 2.1 billion pesos (93.54 million dollars) last year.

The PNB had been in the red under former president Ferdinand Marcos, deposed in February 1986. It posted a net loss of 3.57 billion pesos (159 million dollars) in 1986. The bank was partially privatized last year.

#90011d7970 01/11/1990 ~French/German News Agency

PARIS (JAN. 11) - French economic growth slowed in the third quarter of last year, with a 0.5 percent increase in gross domestic product over the previous three months against a 0.7 percent rise in the second quarter, according to official figures released Thursday.

GDP growth against the third quarter of 1988 was 3.3 percent.

-30- 520

#90011d8440 01/11/1990 ~French/German News Agency

WIESBADEN, West Germany (JAN. 11) - West German consumer prices rose 0.3 percent in December over the November level, according to revised figures issued Thursday by the federal statistics office.

It had earlier estimated the December inflation level at 0.4 perent.

The revised December figures gave a price increase of 3.0 percent over December 1988.

Prices for the whole of 1989 were 2.8 percent above those in 1988.

-30- 610

#90011d8600 01/11/1990 ~French/German News Agency

ACCRA (JAN. 11) - Ghana has introduced a "super" luxury sales tax of 50 to 500 percent, arguing that consumers who indulge in "conspicuous must be prepared to pay the appropriate price for their lifestyles."

Finance and Economic Planning Secretary Kwesi Botchwey introduced the tax during his budget statement broadcast here late Wednesday on state radio and television.

Luxury goods which are to fall under the tax include aerated water, apples, grapes and other imported fruits, champagne, sparkling wines, whisky, vodka, brandy, rum, video films and cameras.

Diesel-engined, large petrol-fuelled and four-wheel drive cars will be taxed between 75 and 500 percent.

Dr. Botchwey also announced increases of between 30 to 42 percent on petroleum products.

Petrol, he said, will sell at 360 cedis (1.18 dollars) a gallon, up from 275 cedis (90 cents) while diesel was hiked 32 per cent from 250 cedis (82 cents) to 330 cedis (1.08 dollars) a gallon. Kerosene will sell at 270 cedis (88 cents) up 42 per cent from 190 cedis (62 cents) a gallon.

On the 1990 national budget, he said revenues are expected to outstrip expenditures for the fifth consecutive year.

Dr. Botchwey reported that revenues were expected to be 272.5 billion cedis (about 90 million dollars) while expenditures were projected at 256.8 billion cedis (about 84.5 million dollars). The surplus will be channeled to productive sectors, he added.

The secretary said targets for the year include a five-per-cent growth rate in real gross domestic product (GDP) terms and an inflation rate of 15 per cent. Overall balance of payment surplus is expected to be about 90 million dollars.

#90011d8640 01/11/1990 ~French/German News Agency

Tokyo (JAN. 11) - As America's ''big three'' carmakers struggle against falling sales, the Japanese trio of Toyota, Nissan and Honda are gearing up for a new export drive around the world.

They plan to maintain an even higher profile in the world's car marketplace in the 1990s, embarking on a capital spending spree despite calls from the Japanese International Trade and Industry Ministry urging restraint.

Total spending by the major carmakers, including investment by component manufacturers, is projected to top 10 billion dollars again this year, according to industry sources here.

Number one car maker Toyota said in a New Year message that preparations were due to get under way for manufacturing in Britain.

Truck production in the U.S. and expansion of production at existing plants overseas is also planned by Toyota.

''For 1990, Toyota has drawn up ambitious plans both for Japan and abroad. We expect these steps to boost overseas passenger car output in 1990 by 32 per cent to about 650,000 units,'' said the message.

Toyota believes European and Asian markets will keep growing and sees overseas sales rising slightly. It has set an annual export goal at around last year's level of some 1.68 million units.

Nunber two Japanese carmaker Nissan said it planned a series of organisational changes, including strengthening global planning capabilities. These were to come into effect at the beginning of January this year.

-30- 1650

#90011d8710 01/11/1990 ~French/German News Agency

TOKYO (JAN. 11) - Japan's Honda Motor Co. expects car sales to grow 2.5 per cent to almost 1.39 million vehicles in 1990 with stronger domestic sales offset by lower shipments abroad, company president Tadashi Kume said Thursday.

"This year will mark the beginning of our efforts to meet our short-term target of 800,000 unit sales in Japan," he said, adding that Honda's overall sales target was 2.5 million vehicles for the middle of the decade.

Mr. Kume told a news conference that domestic sales, including imports of Accords made in the United States, were likely to rise 8.7 percent to 725,000 vehicles while exports were expected to fall 3.5 percent to 660,000.

The projected fall in exports reflects increased production in the United States, where a new plant opened in Ohio last month, and Canada where output is expected to rise from 80,000 last year to 100,000 this year.

About half of North American sales were met by local production last year.

Mr. Kume said that the signing of an agreement, announced late last year, to make cars in Britain in a joint venture with Rover Group plc "has taken slightly longer than anticipated." The new plant, due to be completed in 1992, will reach full capacity of 100,000 vehicles a year in 1995, he said.

Honda's motorcycle sales are targetted to rise only one per cent this year to almost 1.24 million.

Domestic sales are forecast to rise 3.8 percent to 865,000 motorcycles with exports falling five per cent to 370,000.

"We will steadily increase production outside of Japan to meet demand, concentrating especially on Asia," Mr. Kume said, adding that motorcycle output abroad was forecast to rise from 1.65 million to 1.95 million.

Sales of power products such as engines and lawnmowers are expected to grow 4.5 percent to 1.59 million.

Domestic sales are targetted to rise 5.7 percent to 115,000 with sales abroad rising 4.4 percent to 1.47 million.

#90011d9070 01/11/1990 ~French/German News Agency
Ankara (JAN. 11) - Turkey's trade deficit in the first 10 months of last year increased 98 percent over the corresponding period of 1988 to 3.59 billion dollars, the semi-official Anatolian Agency reported Thursday, quoting official figures.

The report said imports rose from 11 billion dollars to 12.7 billion dollars while the exports remained the same at 9.1 billion dollars.

-30- 551
#90011d9090 01/11/1990 ~French/German News Agency
LONDON (JAN. 11) - Japanese car maker Toyota is to take a 4.7 percent stake in Inchcape for about 50 million pounds (83 million dollars) in exchange for Inchcape's continued exclusive distribution rights for Toyota vehicles in Britain, Inchcape said here Thursday.

In a provisional agreement signed by the two companies here, Toyota will buy new shares in the British-based international marketing and distribution group at 287 pence each, amounting to 4.7 percent of Inchcape's ordinary capital.

Inchcape is currently the sole owner of Toyota (GB) Ltd., the Japanese firm's distribution company here.

Under Thursday's agreement Toyota (GB) will continue to hold the exclusive distribution rights for Toyota vehicles in Britain until 2007, but will gradually come under the control of the Toyota parent company.

Toyota Japan is to acquire a 51 percent stake in Toyota (GB) Ltd. in three phases up to 1998, paying out the full 60 million pound (99 million dollar) purchase price next March, when the Japanese firm will receive an initial five per cent stake.

On the London stock market Thursday morning Inchcape shares were up seven pence at 309 pence after the news. There had been some recent concern that the existing distribution arrangement might not be extended when it came up for renewal this year.

The deal, which marks the 25th anniversary of the relationship between the two companies, has particular significance in view of Toyota's plans to begin passenger vehicle construction in Britain in 1992.

Toyota expects to be producing 200,000 passenger cars and engines annually in Britain at full production, with a "local content" for the vehicles

targeted to reach 80 per cent in mid-1995.

Last year 49,000 Toyota vehicles were sold in the British market, an important part of Inchape's car distribution operation. Inchape sells 180,000 cars in 20 countries each year.

#90011d9190 01/11/1990 ~French/German News Agency

TOKYO (JAN. 11) - Hitachi Ltd., a major Japanese electronic equipment maker, said Thursday that it would start integrated production of semiconductors in West Germany in 1992.

Monthly production at Hitachi's integrated plant in West Germany will be equivalent to 500,000 units of dynamic random-access memory (DRAM) chips, Hitachi officials said.

Another major Japanese chip maker, NEC Corp., started semiconductor production in Britain in 1987.

Fujitsu Ltd. and Mitsubishi Electric Corp., both leading chip makers in Japan, plan to produce semiconductors in Britain and West Germany, respectively, in perhaps two years, industry sources said.

-30- 834

#90011d9660 01/11/1990 ~French/German News Agency

BRUSSELS (JAN. 11) - The European Economic Community (EEC) is expected to give the green light within a week to an agreement worked out last year with Japanese semiconductor makers, a Community source said Thursday.

The permanent representatives of the 12 EEC members approved the accord Thursday, but the member countries have a week to voice objections.

There is unlikely to be any problem, however, and the agreement, aimed at ending three years of conflict, is expected to take effect before the end of the month, the source said.

The accord sets a floor price of 9.5 per cent above production costs for Japanese imports of Dynamic Random Access Memory (DRAM) chips into the EEC.

It covers five years, but is to be reviewed at the end of 1991, when a similar Japan-U.S. agreement reached in 1986 expires.

The agreement had been due to be signed in October, but Ireland objected,

saying it contravened the principle of free competition and could be against the interests of consumers who would be forced to pay more.

Several computer firms, inlcuding Digital Equipment of the United States,

have plants in Ireland. Dublin finally accepted the agreement but succeeded in having a declaration of principle added to it, a Community source said.

The European Commission had opened an anti-dumping inquiry into Japanese DRAM chips in 1987 following a complaint from European manufacturers including Siemens and Motorola.

Japan's share of the European market for the chips soared from 24.6 per cent to 70.5 per cent between 1983 and 1987.

It still holds more than 50 per cent, industry sources said, but this is well below its world market share of 90 per cent.

TOKYO (JAN. 11) - Major Japanese electronic equipment maker Sharp Corp. said here Thursday that it would produce videotape recorders (VTR's) in Malaysia.

A subsidiary established recently in Johor is to start production in June to meet an increasing VTR demand in Malaysia, a Sharp spokesman said.

VTR's produced by Sharp Manufacturing Corp. Sdn. Bhd. will also be exported to Japan and the United States, he said.

The new company in Malaysia is initially to produce 250,000 recorders annually, increasing to 750,000 a year in 1992, the spokesman said.

#90011d9770 01/11/1990 ~French/German News Agency

FRANKFURT, West Germany (JAN. 11) - West Germany had a balance of payments deficit of 603 million Deutsche marks (363 million dollars) in November, the Bundesbank said Thursday.

The balance of payments showed a surplus of 1.92 billion Deutsche marks (1.15 billion dollars) in October.

The current account balance, covering goods and services and transfers, rose some two billion Deutsche marks over the month, but the volume of long-term capital invested in West Germany fell from 13.29 billion Deutsche marks in October to 9.71 billion.

This led to a sharp fall in foreign direct investment, down from 4.5 billion Deutsche marks in October to only 700 million in November.

But foreign investors continued to buy heavily into the West German stock markets, to the tune of some 12.4 billion Deutsche marks, the central bank said.

The Frankfurt bourse has been booming since the opening of East Germany's borders in November, on hopes that West Germany will reap huge benefits from eastern European economic reforms.

#90011d9850 01/11/1990 ~French/German News Agency

PARIS (JAN. 11) - French oil group Total-CFP said Thursday it was expecting net profit of around three billion francs (535 million dollars) for 1989, up from 1.95 billion in 1988.

The 1989 figures "include a strong boost from the value of stocks, reflecting the rise in crude oil prices, while in 1988 the stocks were a drain on the account," as their value rises and falls with changes in oil prices, chairman Francois-Xavier Ortoli told a press conference.

Mr. Ortoli, who is to retire in February at the age of 65, said he would be handing over to successor Serge Tchuruk a group "in good working order".

Mr. Tchuruk currently heads the chemicals group Orkem, whose speciality chemicals division is going to Total-CFP under a goverment restructuring plan for the chemicals industry.

Mr. Ortoli also warned of possible price tension if world demand continued to grow, urging consumer countries to "seek with producer countries to avoid the creation of an unbalanced situation which could lead to a new oil crisis."

#90011f1002 01/11/1990 ~United Press International

LONDON (JAN. 11) UPI - Stock prices were slightly higher in moderate trading at midday Thursday on the London International stock exchange.

The Financial Times 100-stock index, which tumbled 23.7 points Wednesday,

was up 7.9 points to 2,420.5. The narrower top 30 industrial average was ahead 3.4 points to 1,939.8.

Volume amounted to around 337 million shares, compared with 265 million shares traded during the same period Wednesday.

Among the most widely traded stocks, BET added 14 cents to $4.35 after news the conglomerate's bid to take over Hestair will not be referred to the Monopolies and Mergers Commission.

Major banking concern TSB gained six cents to $2.19 despite reporting a 63 percent decline in pretax profits after an extraordinary loss of around $320 million.

Analysts noted the banks results were in line with market expectations although the exceptional provisions to cover restructuring and possible local government losses were higher than many had forecast.

Elsewhere, the sharp rise in the price of bullion boosted RTZ 11 cents to $14.24, Reuters PLC added 19 cents to $16.86 and Wellcome PLC gained 19 cents to $12.32.

EL SEGUNDO, CA (JAN. 11) PR NEWSWIRE - INFONET today announced the expansion of its worldwide ownership to include Japan. This transaction brings the number of international shareholders to 10, owning a combined 70 percent of INFONET. U.S.-based Computer Sciences Corp. (NYSE: CSC) owns the remaining 30 percent.

The new purchaser, whose shares represent a five percent ownership is Kokusai Denshin Denwa Co. Ltd. (KDD). INFONET's additional current shareholders include: Sweden's Teleinvest AB, Belgium's Regie des Telegraphes et des Telephones, Telecom Australia, Singapore Telecom International PTE Ltd., France Transpac, Spain's Telefonica, West Germany's Deutsche Bundespost, PTT Telecom Netherlands, and the Swiss PTT.

"INFONET continues to be committed to helping its customers meet today's challenges in a dynamic, global business environment," said Jose Collazo, INFONET's chairman and president. "The addition of KDD of Japan strengthens our global sales and support while furthering our ability to provide Japanese and Japan-based enterprises direct access to our global value added network and computing capabilities," said Collazo.

"We are aware of the many benefits that the INFONET organization can provide the multinational enterprise operating in Japan," said Kyo Watanabe, KDD's managing director. "We believe that our participation in INFONET will contribute to the enhancement of global data communications for our customers, particularly as we cooperate with INFONET's worldwide support organization," Watanabe went on to say.

INFONET's services have previously been marketed only by Mitsui Knowledge Industry (MKI; subsidiary of Mitsui & Co. Ltd.) in Japan. The future framework for continuous service provision in Japan shall be discussed among KDD, Mitsui & Co. and MKI.

Established in 1970, INFONET is the leading standards-based international value added networking company. It provides communication and computer services and directly supports those services in 34 countries. The company is jointly owned by Computer Sciences Corp. (U.S.) and the telecommunications administrations of major European and Asia Pacific countries.

CONTACT: Mike Radice of INFONET, 213-335-2875; or Gayle Paride, 714-850-4422, or Julie Petersen, 415-354-4452, both of Regis McKenna, for INFONET

COSTA MESA, CA (JAN. 11) PR NEWSWIRE - Bristol Research Corp. (NASDAQ: BRCC), a company that develops and markets microcomputer products for commercial and industrial applications, announced today that it has signed a letter of intent to acquire Universal Photonix Inc. of Laguna Hills, Calif.

Universal Photonix is a leader in the development of proprietary technology in the field of electro-optic security products for automotive, residential, and commercial applications. The company was founded in 1984 by its president, Dr. Douglas Pinnow, who has extensive experience in the development of communications and fiber optics technology with such leading companies as Bell Laboratories and Hughes Research Laboratory.

Universal Photonix has a signed agreement with a leading lock manufacturer for the development of remote keyless locking and security systems for residential and commercial applications, and is negotiating development contracts with many of the leading domestic and Japanese automotive manufacturers for locking and security systems.

Universal Photonix is presently working in conjunction with Motorola Inc. in the evaluation of the company's patented PHOTON Security System on General Motors' Banshee and Stinger concept cars for introduction in the 1992 model year.

Jerry Mezger, president and chief executive officer of Bristol, said that Universal Photonix could usher in a new era of vehicle and home security systems worldwide. "Universal Photonix will bring to Bristol a new proprietary position in a major electronics market, substantial technical and marketing resources, and the opportunity to increase companywide productivity through consolidation of operations," added Mezger.

In the acquisition, Bristol will issue to Universal Photonix's shareholders 750,000 unregistered units, each unit consisting of two

shares of Bristol common stock and a warrant to purchase one share of Bristol common stock for $2.50. Universal Photonix's shareholders may receive up to an additional 750,000 Bristol units upon achievement of aggregate sales exceeding $50 million over the next four years.

The acquisition is subject to approval by Bristol's and Universal Photonix's boards of directors and shareholders, with consummation through a proxy statement anticipated in mid February.

Bristol also announced that merger discussions with General Display Corp. have been terminated.

SALT LAKE CITY (JAN. 11) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) the parent company of Recomp Inc. of Denver - an integrated solid waste management company with solid waste composting, curbside recycling and material recovery operations - today announced the acquisition of Thermal Reduction Corp. in Ferndale, Washington.

Recomp, a subsidiary of Bonneville Pacific, acquired from Charles V. Wilder Jr., all the stock of Thermal Reduction. John Dunlop, president of Recomp, said that the acquisition of Thermal Reduction now gives Recomp an opportunity to develop the first integrated solid waste management facility in the country. Dunlop said that Recomp will add a 100 ton per day municipal solid waste composting facility to the 100 ton per day incinerator plant, as well as expand the materials recovery operations and recycling.

The reason that Thermal Reduction was attractive to Recomp was because it is a very well run operation and environmentally sound facility, utilizing standards exceeding those generally applied in this industry. Dunlop says that an acid gas scrubber will be added to the incinerating portion of the facility in mid 1990, making this one of the smallest facilities to have such advanced emission controls.

Recomp will also enhance the revenue of the facility by increasing the utilization of recoverable heat. Thermal Reduction now has a 2.5 MW turbine generator that is not reaching full potential, but with the additional heat recovery it will be more productive.

With the increase in revenue from composting and heat recovery, Dunlop said that revenues at the facility will exceed $5.5 million in 1990.

NEWPORT BEACH, CA (JAN. 11) PR NEWSWIRE - Pacific Scientific Co. (NYSE: PSX) announced today the appointment of Charles L. Perry as president of the company's Sigma Instruments division located in Weymouth, Mass. He succeeds Jerald F. McNeil who recently resigned.

Perry, 41, has been vice president and general manager of Restraint Systems in Yorba Linda, Calif., a part of the company's HTL/Kin-Tech Division. This promotion will return Perry to the Sigma Instruments division where he was vice president of operations from 1985 through 1988. Previously he was employed in the management of manufacturing for Schlumberger Ltd. in Canada and Georgia. Perry is a native of Alabama, a graduate of the University of Alabama with a degree in industrial management, and a master of business administration graduate of Alabama A&M University.

As president of the Sigma Instruments division he will head an organization which manufactures proprietary electrical and electronic controls for the worldwide electric utility industry. Sigma is the leading supplier of outdoor lighting controls.

Pacific Scientific's core business is designing, manufacturing and marketing technology based proprietary products for niche markets. The principal products are electric, motors and controls; aircraft equipment, including fire suppression systems, electric generators and alternators; and electric instruments for industry and electric utilities.

LOS ANGELES (JAN. 11) PR NEWSWIRE - Kaufman and Broad Home Corp. (NYSE: KBH), a major home builder and commercial real estate developer, today reported record revenues and earnings for its fiscal year ended Nov. 30, 1989 -- the company's seventh consecutive year of record financial results.

Net income rose to $81.4 million, up 69 percent from $48.0 million in 1988. Primary earnings per share increased 39 percent, to $2.44 from $1.76 in the prior year. Revenues totaled $1.26 billion, a 31 percent increase over $963.2 million in 1988.

Fourth quarter financial results were also up sharply over the prior year's period. Net income increased to $30.3 million, up 77 percent from $17.1 million in the fourth quarter of 1988. Primary earnings per share rose 40 percent, to $.88 from $.63 in the prior year's period. Revenues totaled $529.9 million, nearly double the $267.9 million reported in the 1988 fourth quarter.

Bruce Karatz, president and chief executive officer of Kaufman and Broad, said the company's strong financial performance in 1989 reflected a successful, ongoing expansion effort in its primary home building markets, coupled with continued growth in commercial development.

Kaufman and Broad builds single-family homes throughout California, in the greater Paris, France, metropolitan area and in Toronto, Canada. In its 1989 fiscal year, the company delivered 5,736 housing units, up 19 percent from 4,836 in 1988. The average selling price for these units increased 13 percent, to $162,600 from $143,500 in 1988.

The company is also a major commercial real estate developer in France. Commercial development activities contributed $230.9 million to the company's consolidated revenues in 1989, up 24 percent from $186.9 million in 1988.

Los Angeles-based Kaufman and Broad Home Corp. is the largest single-family home builder in California and the third largest in France. The company also develops office buildings, luxury retirement housing complexes and urban apartments in the greater metropolitan Paris area.

#90011p0032 01/11/1990 ~PR Newswire

TINTON FALLS, NJ (JAN. 11) PR NEWSWIRE - Concurrent Computer Corporation (NASDAQ: CCUR) announced today a restructuring to enhance its leading position as a world class provider of real-time computing solutions. The major purpose of the restructuring is to ensure timely and thorough responsiveness to customers' requirements. With the computer industry being influenced by growing alternatives of powerful, commodity priced hardware, shortened product life cycles, standards based software and requirements to reduce internal cost models, Concurrent believes that it must position itself structurally to provide its customers with specific incremental added value to produce systems and applications which solve real-time computing problems.

To that end, Concurrent reduced its infrastructure to be a leaner, more flexible organization with fewer levels of management and a more concentrated focus on the customer. Resources will be realigned to consolidate worldwide sales, service and marketing operations under one organization.

Concurrent also announced the formation of two product divisions; a small systems division located in Westford, Mass. and a large systems division operating out of Tinton Falls. Each division will include its own research, development and product management and planning groups. The small systems division will be responsible for the continuing development of small systems products employing RTU, the leading real- time UNIX based operating system in the industry today. In addition, the division will be responsible for applications platform development and other areas of advanced technology. The large systems division will be responsible for enhancements to the company's proprietary OS/32 based products as well as providing a migration strategy and complementary products that help to protect its customers' investment in computing resources. With two internal product divisions, each clearly focused on building products for specific segments of the market, the company expects to increase its flexibility and responsiveness to customer demand for innovative new products.

Support functions throughout the company are being realigned to provide internal support in the most cost efficient manner.

The company is also increasing its emphasis on strategic alliances and other joint efforts to supplement its own products in order to add greater value to solutions provided to real-time customers.

James K. Sims, chairman, president and chief executive officer of Concurrent said, "this realignment of resources is a continuing part of a process that began with the merger of Concurrent and MASSCOMP over a year ago. In seeking the maximum ability to serve our customers worldwide, we previously consolidated and realigned the distribution and support channels of the two companies, embarked on major changes to our manufacturing strategy and continue to evolve product line strategies that will allow us to deliver the best solutions for the real-time marketplace while protecting our customers' investments in hardware and software. The restructuring we are announcing today puts us in an even better position to support our customers, and to provide effective migration strategies that take advantage of the latest developments in standards and technology while giving us the appropriate amount of resources to participate in reasonable growth throughout the 1990s."

The restructuring of Concurrent will result in a reduction in force of approximately 240 employees worldwide or approximately 7 percent of the company's workforce. The resultant cost savings are expected to approximate $12.0 million annually. It is expected that a one-time charge for severance and other related expenses of approximately $3.0 million will be necessary. The company estimated that before the effect of this one-time charge its earnings for the fiscal second quarter ended Dec. 31, 1989, to be reported in about two weeks, were expected to be a slight improvement over analyst estimates for the company. The one-time charge will cause the company to report a loss for the second quarter.

Concurrent Computer Corporation is the leading supplier of high-performance, real-time computer systems worldwide. With systems ranging in price from $10,000 to more than $1 million, the company is focused on the real-time simulation, measurement and control, C4I, and transaction processing markets.

PITTSBURGH (JAN. 11) PR NEWSWIRE - Landmark Savings Association (AMEX: LSA) and Standard Savings and Loan Association of Wilkinsburg, Pa., today announced that both institutions have executed a letter of intent to merge.

The resulting company will continue as a publicly owned savings association with assets of approximately $1.8 billion; 31 branch offices

throughout Allegheny, Westmoreland, Butler and Washington counties; and approximately 600 employees.

The combined company will include an extensive mortgage production network with good asset quality and an augmented market penetration, particularly in Westmoreland County. The new Landmark resulting from the merger is expected to be in full compliance with the increased capital standards placed on thrift institutions by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). Standard is currently a state-chartered mutual association with assets of approximately $163 million, strong capital of over 6 percent and six branch offices.

Announced jointly by J. Richard Eshleman, president and chief executive officer of Landmark, and Harry C. Leonhard, president and chief executive officer of Standard, the transaction will be accomplished through the conversion of Standard from a mutual to a stock form of organization and simultaneous merger with and into Landmark. Landmark will continue to operate under its existing name as the resulting institution from the merger. The transaction will be accounted for as a pooling of interests, and will not result in any goodwill.

The merger is subject to the approval of a definitive merger agreement by both boards, by regulatory authorities, by Standard's members and by Landmark's shareholders. The merger is expected to be completed during the third quarter of this year.

SAN DIEGO (JAN. 11) PR NEWSWIRE - The Price Company (NASDAQ: PCLB) announced today results for the first quarter of fiscal 1990 ending Dec. 24, 1989.

In the 16 week first quarter ending Dec. 24, 1989, sales were $1,817 million, compared with $1,567 million last year, an increase of 16 percent. Net income after taxes was $44.3 million, compared with $38.9 million last year, an increase of 14 percent.

Fully diluted earnings per share was $0.86 compared with $0.76 last year, an increase of 13.1 percent.

The weighted average number of shares actually outstanding in the first quarter were 49,847,000 shares, versus 49,346,000 shares last year.

Comparable warehouse sales in those Price Clubs which were operating

during the same period last year increased 7.7 percent in the first quarter.

The company currently operates 47 Price Clubs in the United States and six in Canada (a 50/50 joint venture with Steinberg Inc.).

#90011p0039 01/11/1990 ~PR Newswire

CANNES, FRANCE (JAN. 11) PR NEWSWIRE - Whirlpool International B.V. today announced a new marketing strategy, centered around a dual- branding program, for some 16 European and 75 other countries throughout the world.

The dual-branding program, which will take effect immediately, involves adding the Whirlpool brand name to the Philips name on all of the full line of major appliances that previously carried the Philips name alone. The program also includes major advertising and public relations campaigns and new product literature for all major international markets.

Three specialist brand names under the responsibility of Whirlpool International B.V. -- Bauknecht, Ignis and Laden -- remain unchanged.

This more than $110 million program, over the next few years, is the first plan to be made public since Whirlpool Corporation (NYSE: WHR) and N.V. Philips Gloeilampenfabrieken of The Netherlands formed a joint venture one year ago.

The dual-branding campaign allows Whirlpool International to define a long-term brand position, establishes a brand identity which will be recognized by consumers worldwide, creates a unique market position through added values, and ensures that the Whirlpool brand name has sufficient consumer awareness to compete independently.

Additional research into dual-branding further indicated that this will not only lead to increased product attributes in the minds of the consumer but will also convey to them that when they are buying a Philips Whirlpool product they are buying from a white goods specialist.

Commenting on the program, Whirlpool Corporation Chairman David R. Whitwam said, "We are specialists. It is part of a long tradition at Whirlpool. And now, as a result of the dual-branding project, we are able to offer increased benefits and added values to both our consumers and dealers."

Added values that will benefit consumers include a "Consumer Help Line" to answer questions and respond to concerns anywhere in Europe, and a service and repair network that will be enhanced by a warranty on parts and labor

matching the length of the original product warranty.

For dealers, added values include special, tailor-made distribution systems, and the introduction of new international services from Whirlpool Financial Corporation. Whirlpool Financial Corporation International opened an office in London in October 1989.

Headquartered in Benton Harbor, Mich., Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances.

FALLS CHURCH, VA (JAN. 11) PR NEWSWIRE - QuesTech Inc, (NASDAQ: QTEC) confirmed today that it has reached a settlement of its lawsuit with William L. Mayo, the company's former president and chief executive officer.

The case has been pending in the United States District Court in Alexandria, Va. before Judge T.S. Ellis III.

In announcing the settlement, Vincent L. Salvatori, president and chief executive officer of QuesTech said, "I am pleased that we have been able to resolve our differences with Mr. Mayo and finally put this matter behind us. We can now direct our full attention to the important business of building the future prosperity and success of this company."

Mayo filed a complaint against QuesTech in July of 1989, following his discharge as President of the company the previous fall. Judge Ellis dismissed one of the major counts of Mayo's complaint which alleged that the company had engaged in labor cross-charging, because the allegation had no basis.

Additionally, extensive discovery taken during the lawsuit failed to disclose any incident of sexual harassment in QuesTech, as Mayo had previously charged.

The terms of the settlement were not disclosed and remain confidential.

#90011p0042 01/11/1990 ~PR Newswire

NASHVILLE, TN (JAN. 11) PR NEWSWIRE - Metropolitan Federal Savings and Loan Association (NASDAQ-NMS: MFTN) today reported a loss for the second quarter ended December 31, 1989, of $3.5 million or $.95 per share as a result of adding $5 million to its reserve for possible loan losses.

Edwin W. Moats, Jr., chairman and chief executive officer, said, "The continuing softness in the real estate sector has adversely affected many projects and borrowers. These adverse conditions have been more severe and have lasted longer than we originally anticipated, making the additional reserves both necessary and prudent. We are hopeful that the reduction in the prime rate this week will be the catalyst needed to begin a much needed recovery in the real estate sector."

Moats noted that the loan loss provision is the result of an ongoing in-depth, intensive review of the Association's loan portfolio which is continuing.

Moats said that in spite of the loss for the quarter, Metropolitan Federal remains strong and exceeds all existing capital requirements of the Financial Institutions Reform Recovery and Enforcement Act of 1989, FIRREA.

For the second quarter last year, Metropolitan Federal reported earnings of $2,244,000, or $.61 per share.

For the six-month period ended December 31, 1989, Metropolitan Federal reported a net loss of $3,419,000 or $.92 per share. For the corresponding period a year ago, earnings were $4,247,000, or $1.15 per share.

As of December 31, 1989, the Association had assets of $1,164,368,000 and deposits of $921,340,000. At December 31, 1988, assets were $1,156,709,000 and deposits were $905,389,000.

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 20 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

MATTHEWS, NC (JAN. 11) PR NEWSWIRE - Family Dollar Stores, Inc. (NYSE: FDO), a discount store chain operating 1,616 stores in a 27-state area ranging as far north as Wisconsin, east to New York, south to Florida and west to Texas, reported that sales in the first quarter had reached record high levels, and that earnings for the quarter also had increased. For the first quarter ended November 30, 1989, sales were $206,783,342 or approximately 20 percent above sales of $171,771,349 for the first quarter of the prior fiscal year. Net income was $5,985,589 or approximately 10 percent above net income of $5,419,653 for the comparable quarter last year, and earnings per share increased to $.22 from $.20.

Leon Levine, Chairman of the Company, attributed the record sales results for the first quarter ended November 30, 1989, to increased sales in existing stores and to sales recorded in new stores opened in the Company's store expansion program. Sales in existing stores increased approximately 10 percent in the first quarter ended November 30, 1989. The Company distributed three advertising circulars in November 1989 compared to the two advertising circulars that were used in November 1988, and it is estimated that approximately 3 percent of this increase is related to the extra circular. At the beginning of the current fiscal year, the Company was operating 1,580 stores, compared to 1,429 stores in operation at the beginning of the prior fiscal year. During the first quarter ended November 30, 1989, and in December 1989, there were net additions of 18 and 16 stores, respectively, compared to net additions of 49 and 13 stores in the first quarter ended November 30, 1988, and in December 1988, respectively.

Mr. Levine stated that the substantial sales increases in existing stores in the first quarter reflect the Company's more aggressive advertising program and improvement in the in-stock position of basic merchandise in the stores. The increase in earnings is evidence of progress in the

Company's efforts to modify its merchandising strategy to achieve a satisfactory balance between sales volume and the return on those sales.

#90011p0049 01/11/1990 ~PR Newswire

NORWOOD, MA (JAN. 11) PR NEWSWIRE - Microcom Inc., (NASDAQ: MNPI) today announced record sales, earnings and earnings per share for the third quarter of fiscal year 1990.

"This marks the 16th consecutive quarter in which we have posted record earnings and earnings per share," stated James M. Dow, president and CEO.

For the three months ending Dec. 31, 1989, revenues were $18,506,000, a 25 percent increase over the $14,823,000 reported for the third quarter of last year. Operating income for the period was $3,748,000 -- 36 percent higher than the comparable quarter one year ago. Earnings per share, on a two-for-one, post-split basis, were 31 cents for the third quarter versus 25 cents recorded one year ago.

In Dec. 1989, Microcom acquired HJC Software, Inc., a Durham, N.C.-based company that markets the popular Virex(R) software family of products. Virex detects, prevents and eliminates existing computer viruses in Macintosh and MS-DOS computer systems.

"The Virex products are a key addition to our strategy of providing comprehensive network administration and management tools for the end user " stated Dow. "As a network management tool, the Virex family of products will be integrated with Microcom's existing Carbon Copy Plus(tm) and RELAY Gold(R) communications software packages."

Dow added, "PCs and personal computer networks have been especially vulnerable to viruses because of the large number of users sharing files. The Virex product line will substantially reduce the likelihood of catastrophic failure for many PC and PC network users."

Microcom, Inc., is a workstation connectivity company headquartered in Norwood, Mass.; with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas, Puerto Rico; and international offices in France, Hong Kong, and the U.K. Principal product lines include MNP(R) Protocol Modems(tm); MLB(tm) LAN bridging products; Carbon Copy(tm), RELAY Gold and Virex communications software packages and ISDN products.

CALGARY (JAN. 11) PR NEWSWIRE - North Canadian Oils Limited (AMEX: NCD) of Calgary has announced an agreement in principle with Bramalea Limited of Toronto to purchase Bramalea's entire security position in Coseka Resources Limited by the issue of one million treasury common shares of NCO. The agreement in principle is subject to a number of pre-closing conditions including due diligence and regulatory approvals. Closing is anticipated to occur by Jan. 31, 1990.

The security position held by Bramalea in Coseka is as follows:

-- 22,647,434 common shares representing approximately 48 percent of the issued shares currently outstanding;

-- $20 million of secured convertible debentures, maturing in 2006; and
-- $12.680 million of unsecured debentures which are convertible into common shares on or prior to 1996.

NCO has no current intention to make an offer for the balance of the outstanding Coseka securities.

Coseka is a Calgary-based company engaged in the oil and gas business and its shares are listed on the Toronto Stock Exchange. As at Dec. 31, 1988, the latest annual report disclosed that Coseka had proven and probable reserves of 197 billion cubic feet of natural gas, 8.2 million barrels of oil and natural gas liquids and 446,000 long tons of sulphur. Currently Coseka is producing approximately 41 mmcfd of natural gas and 2800 bopd of oil and natural gas liquids and has total long term indebtedness including convertible debentures of $160 million.

North Canadian Oils Limited is a conservatively managed, financially and technically strong, Canadian oil and gas exploration, production and marketing company. Its common shares are traded on the Toronto and Montreal Stock Exchanges in Canada and the American Stock Exchange in the United States.

NEW YORK (JAN. 11) PR NEWSWIRE - Sutton Holding Corp. announced today that it has extended the expiration date of its cash tender offer for all of the outstanding shares of common stock of DeSoto, Inc. (NYSE: DSO) (including the associated preferred share purchase rights) at $50 per share, until midnight, New York City time, on Monday, Feb. 5, 1990. The offer was previously set to expire at midnight, New York City time, on Wednesday, Jan. 10, 1990.

Sutton Holding Corp. was advised by the depositary for the tender offer that as of 7 p.m. New York City time, on Wednesday, Jan. 10, 1990, 2,252,213 shares of common stock had been validly tendered and not withdrawn which, together with the shares beneficially owned by Sutton Holding Corp. and its affiliates, collectively represent approximately 70.1 percent of all outstanding DeSoto shares. Sutton believes that these shares also represent approximately 79.9 percent of the shares of common stock not owned by either Sutton Holding Corp. and its affiliates or by the DeSoto stock ownership plan and officers and directors of DeSoto.

William Spier, chairman of Sutton Holding Corp., said, "We look forward to

the hearing in Delaware on January 25 regarding our suit against the company and its poison pill. In that hearing, we will seek an order requiring the company to redeem its poison pill so that shareholders will have the opportunity to make their own determination whether to accept our offer, without interference from the board of directors."

#90011p0053 01/11/1990 ~PR Newswire

WINSTON-SALEM, NC (JAN. 11) PR NEWSWIRE - First Wachovia Corporation's (NYSE: FW) net income per share fully diluted in the fourth quarter of 1989 was $.98, a 10.2 percent increase from $.88 in the prior year, according to John G. Medlin Jr., chief executive officer. Net income was $69 million compared with $62.1 million in the 1988 period. Per share figures have been adjusted to reflect the 1989 third quarter 20 percent stock dividend.

For the entire year, net income per share fully diluted was $3.82, an 8.6 percent increase from $3.51 in 1988. Net income for 1989 totaled $269 million compared with $244.3 million in the prior year and represented returns of 16.5 percent on shareholders' equity and 1.19 percent on total assets.

Loan growth was strong in 1989, but the earnings increase was moderated by a narrowing of net interest rate yield, Medlin said. Credit quality and capital ratios remained among the best in banking, he added.

Average interest-earning assets rose $2.260 billion or 12.6 percent for the fourth quarter and $2.317 billion or 13.5 percent for the year in comparison with the same periods of 1988. Average loans grew $1.854 billion or 14 percent for the quarter and $1.838 billion or 14.5 percent for the year.

Taxable equivalent net interest income increased $5.2 million or 2.4 percent for the final quarter and rose $44.8 million or 5.5 percent for the twelve months. Excluding securities transactions, other operating revenues grew 18.8 percent for the quarter and 12.7 percent for the year. Noninterest expense rose 4.1 percent for the quarter and 7.6 percent for the year.

The provision for loan losses was $18.9 million for the fourth quarter and $62.2 million for the full year compared with $16.4 million and $61.3 million in the respective prior year periods. Net credit charge-offs were $18 million for the quarter and $54.4 million for the year.

At December 31, nonperforming assets totaled $82 million or .54 percent of total loans. On the same date, the allowance for possible loan losses was $165 million or 1.08 percent of total loans and 2.01 times nonperforming assets.

NEW YORK (JAN. 11) PR NEWSWIRE - Thames Television PLC announced today that its wholly owned subsidiary, Thames (USA) Inc., had completed its cash tender offer for all outstanding shares of common stock of Reeves Communications Corporation (NASDAQ: RVCC) at a price of $7.00 per share, net to the seller in cash.

Thames stated that approximately 12,217,000 shares of Reeves common stock (including approximately 1,100,000 shares subject to notices of guaranteed delivery) had been tendered pursuant to the offer which expired yesterday at 5:00 p.m., New York City time, and that all of such tendered shares had been accepted for purchase in accordance with the terms and conditions of the offer.

The shares tendered constitute approximately 96.2 percent of Reeves currently outstanding common stock.

As previously announced, any Reeves shares not tendered and purchased pursuant to the offer will be acquired in a subsequent merger transaction at the same $7.00 per share cash price. It is currently anticipated that the merger will be consummated as soon as practicable pursuant to the short-form merger provisions of Delaware law without the vote of the holders of the remaining shares of Reeves common stock.

Thames said that, in accordance with its Merger Agreement with Reeves, Reeves had redeemed all of the rights associated with the Reeves common stock at $.01 per right.

ROGERS, AR (JAN. 11) PR NEWSWIRE - Hudson Foods, Inc. (NYSE: HFI) announced today that it has reached an agreement in principle to acquire

Pierre Frozen Foods, Inc. of Cincinnati, Ohio. Pierre is a frozen food processor and distributor, specializing in portion-control beef, pork and poultry products.

Pierre sells primarily to institutional customers, including school and university cafeteria programs, sandwich assemblers for convenience stores and vending outlets, in-plant employee feeders and national fast- food chains. Sales to school and university programs, including the San Francisco, New York City and Chicago school systems, account for approximately 58 percent of Pierre's revenues. Pierre reported sales of $27.8 million in 1988 and estimates sales of $35.2 million in 1989.

"We believe that the acquisition of Pierre is another important step in our process of diversifying products and markets," said James T. Hudson, founder and chairman of Hudson Foods. "It gives us a strong foothold in the growing institutional-food market. Pierre's record of growth is enviable and we intend to retain the current management team to continue to operate it as a wholly owned, but independent subsidiary."

"Pierre will continue to build its business by dedication to quality products and services," said Ira Dinerman, president of Pierre. "Hudson Foods will provide the additional resources needed to fuel Pierre's growth and provide greater opportunities for all Pierre employees and its broker network."

The acquisition is proposed to be made through the issuance of 923,000 shares of Hudson's class A common stock, a cash payment at closing, and additional contingent consideration. A definitive purchase agreement is being prepared and the transaction is expected to be completed early in 1990.

Hudson Foods, Inc., one of the nation's largest poultry producers, sells a variety of chicken and turkey products under the "Hudson" and "Flavor Fresh" brand names as well as poultry, beef and pork products under the "Ohse" and "Schweigert" brand names.

WARREN, OH (JAN. 11) PR NEWSWIRE - Second National Bank of Warren will sponsor a news conference featuring Notre Dame head football coach, Lou Holtz, on Tuesday, January 16, at 6 p.m. in the Jury Room of the Park Hotel, 136 N. Park Ave. in downtown Warren.

Following the news conference, Holtz will speak at a private dinner reception hosted by the bank. Guests include Second National's private

banking customers, and the reception is by invitation only.

Holtz will discuss his winning attitude as it relates to football and daily living. Topics will include goal setting, leadership, motivation, discipline and striving for excellence.

"We sponsor these types of events because we value the customers we serve. This is the second year that we've planned a special reception for our private banking customers," said Alan G. Brant, Second National Bank of Warren's President and Chief Executive Officer. "Last year noted columnist and television news analyst, George Will, was our featured guest and I'm certain Lou Holtz will provide a memorable evening this year."

The bank's commitment to its customers as well as the community has led it to receive the 1989 Governor's Award for the Arts in Ohio and the 1989 Forbes Business in the Arts Award. Second National Bank of Warren has been serving Mahoning Valley for more than 100 years. It is currently the largest independently owned financial institution in Trumbull County with assets in excess of $430 million.

HOUSTON (JAN. 11) PR NEWSWIRE - Pride Petroleum Services, Inc. (NASDAQ: PRDE) announced the acquisition of the fixed assets of Ranger Well Service Inc. and East Texas Packer Sales and Service, Inc. The acquisition brings Pride's total well servicing rig count to 365 land- based rigs. Pride is one of the largest well servicing contractors in the U.S. Terms of the transaction were not announced.

Ranger Well Service operated 23 rigs from four locations in East Texas, including Kilgore, Palestine, Giddings and Quitman. Pride has East Texas operations in Kilgore and Panola. The Kilgore operations of both companies will be consolidated. The operating management and personnel of Ranger have agreed to join the Pride organization.

Ray H. Tolson, president and chief executive officer of Pride, said, "This purchase significantly strengthens our position in the East Texas well servicing market. It is consistent with our corporate objective to increase market share by acquiring strong contractors within Pride's market area."

Tolson noted, "We completed a $21.5 million private placement in December 1989 which provides a strong capital base from which to continue the aggressive acquisition program which was begun last year."

WILMINGTON, DE (JAN. 11) PR NEWSWIRE - Food Conservers Inc., of Newark, Del., will be able to continue its effort to feed the hungry without interruption because Conoco has given the agency a refurbished over-the-road tractor.

The tractor, which replaces one that is beyond repair, will be used to distribute an estimated $4 million in canned goods and produce to more than 170 agencies in Delaware and adjacent communities in New Jersey, Maryland and Pennsylvania.

Conoco is a subsidiary of Du Pont (NYSE: DD), which has contributed $100,000 to Food Conservers' capital program. The contribution was made in installments over a two-year period.

"As one of Conoco's primary business hubs for transportation and marketing of our products, Delaware makes a sizeable contribution to our success," said James Nokes, manager of operations for supply and transportation. "In return, we want to give something back to the community as an expression of our appreciation. Food Conservers is a productive organization that touches the lives of many."

Food Conservers, a non-profit organization, collects food from local donors and food banks and delivers it to organizations such as the Salvation Army, Emmanuel Dining Room and area churches. They, in turn, prepare meals for thousands of area people who are in need of dietary supplemention.

Beneficiaries include senior citizens, the homeless and displaced youths. The program also uses the resources of the Food Warehouse program, Education and Advocacy, Delaware Food Bank, Food Closet Network and Second Harvest.

Communities outside Delaware that are served by Food Conservers include Cecilton, Chesapeake, Chestertown, Elkton and North East, Md., Bridgeton, N.J., and West Chester, Pa.

NASHVILLE, TN. (JAN. 11) PR NEWSWIRE - The IBM Corp. (NYSE: IBM) announced today that Linda Eskind Rebrovick has been named branch manager for the company's newly created Systems Integration Division branch in Nashville, Tenn.

This office will cover the states of Tennessee, Alabama and Mississippi. Prior to her promotion to head the Nashville branch office, which opened Jan. 2, she served as manager for the IBM Customer Center in Nashville, Tenn.

Rebrovick joined IBM in 1977 as a marketing representative in her hometown Nashville, Tenn. Since that time she has held various marketing and managerial positions in Atlanta and Huntsville, Ala. and has achieved several management excellence awards.

Chosen by the Davidson County Business and Professional Women's Club as a 1988 Woman of the Year, Rebrovick's community service spans the past 13 years in a variety of positions. During 1989 and again in 1990, she will serve as a cabinet member of the United Way of Middle Tennessee corporate campaign.

She is currently on the United Way Management Development Center committee and was chairman of the Nashville Junior Chamber of Commerce 1989 Award of Merit committee. Also, Rebrovick serves on the American Lung Association's Board of Directors and was the 1988 co-chairman of corporate solicitations.

Rebrovick graduated from Auburn University in 1977 with a degree in marketing.

NEW YORK (JAN. 11) PR NEWSWIRE - Robert A. Schiffner Jr. has been promoted to vice president, corporate development, RJR Nabisco Inc.

He was previously senior director of corporate development. In his new position, Schiffner will be responsible for corporate development and planning activity, mergers and acquisitions, and capital expenditures. He will report to Karl von der Heyden, executive vice president and chief financial officer of RJR Nabisco.

Schiffner, 40, began his career at Nabisco Inc. (now Nabisco Brands Inc.) in 1975 and worked in various positions within the controller's departments until 1981, when he was named assistant controller for the Biscuit Group. From 1984 to 1986, he was controller of the Fleischmann Group of Nabisco Brands. Schiffner joined the parent company, RJR Nabisco in 1987.

Schiffner, a native of Wharton, N.J., received an A.B. degree in statistics from Princeton University in 1971, and an M.B.A. from Rutgers in 1975. He and his wife, Marjorie, and their two children currently live in Marietta, Ga., and will relocate to the New York metropolitan area.

#90011p0069 01/11/1990 ~PR Newswire

SWIFTWATER, PA (JAN. 11) PR NEWSWIRE - Connaught Laboratories, Inc. (CLI) has submitted a license application to the Food and Drug Administration (FDA) requesting permission to market an acellular pertussis vaccine for inoculation of 18-month old children. Connaught's submission is based on clinical trials conducted in Sweden and Japan in children from 3 months to 2 years of age and U.S. trials in 18-month olds. The company is continuing to conduct trials in infants from 2 to 6 months of age but feels current results warrant submission of a license application for the use of the acellular vaccine at 18 months.

The acellular vaccine, developed by the Research Foundation for Microbial Disease of Osaka University (Biken) of Japan, has been used in Japan since 1981 to protect millions of Japanese children 2 years of age or older against pertussis, or whooping cough.

"The primary goal of Connaught Laboratories has been to offer a 'safe and effective' pertussis vaccine," explained David J. Williams, president of Connaught Laboratories, Inc. "Should the FDA approve our application, we will be one step closer toward this goal."

Currently, the American Academy of Pediatrics recommends four immunizing doses against pertussis with whole cell vaccine at 2, 4, 6 and 18 months, and a pre-school booster between the ages of 4 and 6 years. If approved, the acellular pertussis vaccine will be combined with Connaught's licensed absorbed diphtheria and tetanus toxoids, and administered in lieu of the last immunizing dose and the booster. Children would still receive the whole call DTP vaccine at ages 2, 4 and 6 months.

Connaught Laboratories, Inc. provides the broadest range of vaccines and biologicals of any U.S. manufacturer. CLI is headquartered in Swiftwater, Pa., where approximately 500 employees research, manufacture, distribute and market vaccines against diphtheria, tetanus, pertussis, polio, Haemophilus influenzae type b, influenza, yellow fever and other diseases. Connaught Laboratories, Inc. is a wholly owned subsidiary of Connaught Laboratories, Ltd., of Toronto, which is a subsidiary of Connaught Biosciences, Inc..

IRVINE, CA (JAN. 11) PR NEWSWIRE - Disease Detection International, Inc., (NASDAQ: DDII) announced today that the company has acquired for cash, the autoimmune testing product line from Antibodies Incorporated of Davis, Calif. The product line consists of two fluorescent microscopy test kits, Antinuclear Antibody (ANA) and Anti-DNA respectively.

H. Thad Morris, president and CEO of DDI, stated that, "This acquisition is a great strategic fit for DDI which complements the company's other fluorescent test kit for Pneumocystis Carinii Pneumonia (PCP). As fluorescent testing is generally performed within the same hospital lab, sales of both product lines should benefit from their combined customer base."

DDI expects to double the sales in the next two years of Antibodies Incorporated's ANA test kit. One of the first kits in the market, it

already enjoys an excellent reputation with its customer base. Total sales of both the ANA and Anti-DNA products exceed $500,000 and account for approximately 5 percent of market share.

DDI plans further expansion of its line of fluorescent products to include tests for infectious and sexually transmitted diseases that will complement the company's family of rapid, yes/no Serocard and Immunocard products.

Morris said that, "In a physician's office setting, our family of rapid test cards provides an immediate yes/no answer of prior exposure to various infectious diseases such a Rubella or Toxoplasma in 4 to 8 minutes wherein a hospital setting, the fluorescent microscopy family of products allow the physician or medical technologist to see the immune response directly under the microscope."

Disease Detection International is an emerging international immunodiagnostics company focused on developing tests in the field of infectious and sexually transmitted diseases. DDI was the first company to receive FDA pre-market approval for its initial family of products, known as the ToRCH (Toxoplasma, Rubella, Cytomegalovirus and Herpes) panel of tests, which use whole blood samples in rapid screening for immune competency.

DALLAS (JAN. 11) PR NEWSWIRE - EDS and Columbia Pictures Entertainment, Inc. (CPE) today announced that they have signed a long- term data processing and communications services agreement. EDS (Electronic Data Systems Corp.) will provide operations support from its Mahwah, N.J., data

center. Terms of the agreement were not released.

"This agreement exemplifies our commitment to working with qualified professionals to accomplish the goals we have set for the future," said Lawrence J. Ruisi, CPE's chief financial officer.

"We chose EDS because of the company's flexible and innovative approach to our information technology management needs. EDS has the necessary depth of experience and expertise to support CPE's data processing and communications requirements at this time," added James Dileo, vice president of Management Information Services.

Columbia Pictures Entertainment, Inc. is an entertainment industry leader operating in three core businesses: motion picture production and distribution; television programming and syndication; and theatrical exhibition.

"EDS is very pleased to establish a relationship with a major entertainment company," said John Harris, president of EDS' Communications Division. "This contract signals EDS' growing presence in the media communications marketplace."

EDS, based in Dallas, is the leader in providing technology-based solutions for management and movement of data, voice and image information. EDS' stock is traded on the New York Stock Exchange under the symbol GME. With customers in all 50 states and 27 countries around the world, EDS reported revenues of $4.8 billion in 1988.

BIRMINGHAM, AL (JAN. 11) PR NEWSWIRE - Matthew L. Gold, chairman and chief executive officer of Precision Standard Inc. (NASDAQ: PCSN) announced today that its Pemco Aeroplex subsidiary and representatives of UAW Local 1155 reached a tentative contract agreement at 3:30 a.m. today.

The 3 1/2 year agreement follows a 16 week strike by approximately 1350 employees at Pemco's Birmingham and Targets facilities and includes improvements in wages, pensions and other benefits. However, the specific details of the agreement were not disclosed. A membership meeting is being scheduled by the UAW, and it is expected that employees could return to work as early as two days following contract ratification. Despite the difficulties associated with the prolonged strike, the parties agreed that the negotiations have resulted in a stronger sense of labor-management cooperation for the future and a common goal to rebuild the Birmingham

facility as one of the area's largest employers. Further, both the UAW and Pemco expect that new job combinations and descriptions will result in improved efficiency and will allow Pemco to improve its competitive position and expand its operations in both the military and commercial aircraft maintenance industries.

Precision Standard, with facilities in Alabama, California, Colorado and Florida and offices in Denver, Boston and London, performs maintenance and modification of aircraft for the U.S. government and foreign and domestic commercial customers and manufactures aircraft cargo systems, aerial targets for military customers, precision springs and components, and rocket vehicles and control systems.

LOS ANGELES, CA (JAN. 11) PR NEWSWIRE - First Executive Corp. (NASDAQ: FEXC) announced the appointment of Alan C. Snyder as president, chief operating officer and a member of the company's board of directors.

Snyder, 43, currently is managing partner of Shinnecock Partners, an investment management firm based in New York City. He also has been serving as an independent consultant to several financial institutions.

From 1973 to 1985, he held a number of senior executive positions with the Dean Witter Organization and Reynolds Securities Inc., which merged with Dean Witter in 1978. He was responsible for the development of various financial products and related businesses, including the design, development and marketing of insurance and annuities.

A graduate of Georgetown University, Snyder holds a master's degree in business administration from Harvard Business School where he was a Baker Scholar.

At Dean Witter, he was executive vice president and a director of Dean Witter Financial Services Group Inc., the direct subsidiary of Sears, Roebuck & Co., and served as director of marketing and a member of the executive committee. In addition to insurance and new products, his responsibilities included oversight of advertising, communications, deposit taking and lending, market development and direct response marketing.

First Executive Corp. is a life insurance holding company with over $19 billion of assets and approximately $59 billion of insurance in force.

WATERTOWN, MA (JAN. 11) PR NEWSWIRE - Ionics, Incorporated (AMEX: ION) announced today that its Ionics Pure Solutions Division in Phoenix, Ariz., has been selected as the successful bidder by a leading American semiconductor manufacturer to design, build and install an advanced ultrapure water system for a major new semiconductor plant now under construction in Texas.

The total contract value is currently estimated to exceed $7 million.

The new water system will incorporate advanced technologies and materials to produce water so pure that impurities must be measured in parts per trillion. The fast-track project requires equipment to be delivered in mid-1990, and the system is currently scheduled to start up in the third quarter of 1990.

Commenting on the new project, Arthur L. Goldstein, Ionics' president and CEO said, "The selection of Ionics Pure Solutions to supply this system follows the completion in 1989 of a similar highly successful system for the SEMATECH consortium in Austin, Texas. Our expertise in designing and building advanced ultrapure water systems is continuing to be recognized within the semiconductor industry with each system being larger and more sophisticated than the preceeding one, tracking the advances in semiconductor technology. This contract caps a year of major advances in our ultrapure water technology and business -- with continuing growth at Ionics Ultrapure Water Corporation in Campbell, Calif., and in our trailer-mounted ultrapure water business in the United States and Europe."

Ionics is a separations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers.

WOBURN, MA (JAN. 11) PR NEWSWIRE - Thermedics Inc. (AMEX: TMD) announced today that it has entered into agreements appointing The Olayan Group of companies as the exclusive distributor of EGIS(R) explosives-detection devices and Sentor(tm) drug-detection equipment in Saudi Arabia and other Arab countries in the Middle East.

The Olayan Group will purchase four demonstrator detection units immediately. The agreements provide for target sales of more than $10 million over the initial three-year term of the relationship.

"We are extremely pleased," said John W. Wood Jr., president of Thermedics "to have such a prestigious company as The Olayan Group represent us in the Middle EAst, which is a very important market for our products."

The Olayan Group is a multinational commercial, industrial, and financial enterprise consisting of more than 50 companies doing business in the Middle East, the United States, Europe, and Australia. The Group is one of the leading businesses in Saudi Arabia, where it is extensively engaged in distribution, manufacturing, and heavy construction. The Olayan Group ranks among the world's largest privately held companies.

Thermedics develops, manufactures, and markets biomaterials, biomedical products, analytical instruments, and explosives- and drug-detection devices, and provides analytical laboratory services. Thermedics is a public subsidiary of Thermo Electron Corporation (NYSE: TMO)

AUSTIN, TX (JAN. 11) PR NEWSWIRE - SEMATECH, a consortium of 14 U.S. semiconductor manufacturers, and the Semiconductor Research Corporation (SRC) today announced the expansion of SEMATECH's Centers of Excellence research program with the addition of Pittsburgh-based Carnegie Mellon University.

Pennsylvania is the 11th SEMATECH Center of Excellence (SCOE) to be established by the consortium. Its research will focus on rapid yield learning in the semiconductor manufacturing environment. A major goal will be to develop a computer-aided manufacturing (CAM) system for managing the yield of chip manufacture to enhance production while minimizing costs.

Carnegie Mellon researchers will develop tools that simulate the chip manufacturing process so output can be determined prior to production. They will design monitoring techniques that will enable them to collect data from a manufacturing line, use it to identify problems and make changes necessary to increase the number of chips produced.

The yield management system to be developed at Carnegie Mellon is an outgrowth of work that has been in progress at the university for the last decade. Funding has come from the SRC, government and industrial

affiliates.

The SCOE program was established to recognize outstanding research capabilities at American universities. There are now 11 Centers of Excellence located in 11 states. SEMATECH's primary goal in establishing the Centers of Excellence is to provide focus for development of manufacturing programs within the graduate schools of U.S. universities, according to Dr. Robert N. Noyce, president and CEO of the consortium. Selection of the SEMATECH-funded centers is based on the equality of the research programs offered, their relevance to SEMATECH's needs, and the nature of the available program resources.

SEMATECH and SRC have committed approximately $10 million annually in research contracts to the SCOE program. The SRC, which plans and implements a semiconductor industry program of basic research at U.S. universities, is directing SEMATECH's university research efforts and oversees the contracts.

Located in Austin, SEMATECH is dedicated to restoring America's manufacturing leadership in semiconductors. Half of its $200 million annual budget is provided by its member companies and half by the federal government.

DETROIT (JAN. 11) PR NEWSWIRE - Ford Motor Company (NYSE: F) has announced modifications to its buyer-incentive program, giving customers extra time to take delivery of the two models involved and still qualify for a cash allowance.

The allowance on the 1990 Lincoln Continental is increased from $1,000 to $1,500, and the 1990 Lincoln Mark VII is added to the program for the first time at $1,500.

The cash offers on both the Lincoln Continental and Lincoln Mark VII are applicable to cars ordered or purchased from dealer stock by the end of the program, March 31, provided they are delivered to the customer within 30 days from the date the vehicle is delivered to the dealership. Previously, the buyer had to take delivery by the program ending date.

NEW YORK (JAN. 11) PR NEWSWIRE - British Airways (NYSE: BAB) carried 5.6 percent more passengers in December than in the same month last year, the airline announced today.

Measured in revenue passenger miles, passenger traffic increased by 4.8 percent compared with December 1988. Capacity increased by 4.7 percent with the passenger load factor remaining at 67.0 percent, the same as December 1988.

The recent strong growth of traffic on European and Domestic routes continued with revenue passenger miles increasing by 9.8 percent despite the loss of passengers due to the Manchester Airport workers strike.

Agreement was reached with Sabena SA to acquire a 20 percent stake in Sabena World Airways, a newly created joint venture airline based in Brussels. KLM holds 20 percent and Sabena SA the remaining 60 percent.

Two options on long range Boeing 747-400s for delivery in November and December, 1991, were converted into firm orders bringing the number of firm orders to 21 with options on a further ten.

The renewal of commercial air links between Great Britain and Argentina was agreed. A twice weekly service, operated by British Airways via Rio de Janeiro and Sao Paulo, will start on Jan. 20, 1990.

#90011p0107 01/11/1990 ~PR Newswire

GAITHERSBURG, MD (JAN. 11) PR NEWSWIRE - The first commercially available molecular biology based test system for "in situ" characterization of human chromosomes has been introduced by Oncor, Inc. (NASDAQ: ONCR), according to Stephen Turner, the company's president. Oncor was the first company to commercialize DNA probes for tumor analysis.

The new system, which couples DNA probe technology to classical cytogenetics, is significantly faster than anything presently available, reducing test time to hours. With traditional methods it takes weeks. In addition the test is easier to interpret and is much less labor- intensive according to Turner. Developed by Oncor's molecular cytogenetics division it was presented at a meeting of the American Society of Human Genetics.

One of the key features of the system, according to Turner, is its ability to characterize chromosomes in cells that are not dividing. This eliminates weeks of preparation, since the cells can be processed immediately rather than have to undergo growth by cell culture in the

laboratory as is done in traditional cytogenetics.

Another feature is the use of multiple targets in chromosomes which greatly enhances the sensitivity of the procedure. Oncor's molecular cytogenetics division has developed a set of DNA probes, and the reagents for their use, to detect multiple copies of a target DNA sequence which is specific for an individual human chromosome. The test is performed on a microscopic slide.

Oncor is currently marketing its new system in the form of a kit, with DNA-labeled probes, to clinical and basic researchers here and abroad.

Oncor, Inc., established in 1983 last year received FDA approval to market the first complete DNA probe-based system used in the differential diagnosis of lymphocytic leukemia and lymphoid malignancies. Oncor continues to develop, manufacture and market nucleic acid (DNA/RNA) probes reagents and instrument systems for the early detection and characterization of molecular diseases such as cancer and genetic disorders.

#90011p0110 01/11/1990 ~PR Newswire

MORRIS PLAINS, NJ (JAN. 11) PR NEWSWIRE - Warwick Insurance Managers, Inc. (NASDAQ: WIMI) announced today that it has reached an agreement in principle for a proposed $10 million capital investment by Carol Management Corporation in Warwick Insurance Managers.

Under the terms of the agreement in principle, at the closing and subject to various terms and conditions, Carol Management or one of its affiliated entities would contribute $10 million of new capital in Warwick Insurance Managers in exchange for 10 million newly issued shares of WIMI common stock. However, this proposed purchase price to Carol Management of $1.00 per share may be subject to upward adjustment, to a maximum purchase price of $1.25 per common share, under a formula based on market price of WIMI common stock.

Under the agreement in principle, Carol Management is to complete its investigation of Warwick Insurance Managers and a definitive stock purchase agreement is to be negotiated and executed as promptly as practicable and at least within the next 90 days. The closing of the investment will be subject to various conditions, including the requirement that concurrently with the proposed $10 million investment by Carol Management, one or more third parties also contribute at least an additional $5 million to Warwick Insurance Managers in exchange for newly

issued WIMI common stock on the same terms as the Carol Management investment or on such other terms as Warwick Insurance Managers, its bank lenders, and Carol Management may approve.

As part of the proposed transaction, Warwick will be required in 1994 to have an independent actuary determine the amount of any deficiency in the statutory loss and loss adjustment expense reserves of Warwick Insurance Company as at Sept. 30, 1989. If there exists any reserve deficiency in excess of $1 million, then WIMI would be required to issue pro rata to Carol Management and the other new equity investors one share of WIMI common stock for each dollar of reserve deficiency in excess of $1 million.

The equity investment will also be subject to various other conditions, including the restructuring of Warwick Insurance Managers' existing $12.5 million bank loan in form and substance satisfactory to Carol Management. Concurrently with the signing of the agreement in principle with Carol Management, Warwick Insurance Managers also reached tentative accord with its lenders for a proposed restructuring of its bank loan which, if the restructuring is consummated, would require no principal payments for 1990 through 1992 and principal amortization to occur over the period 1993 through 1998. In addition, interest payment obligations for calendar years 1990 through 1993 on approximately one- half of the existing loan principal would be restructured and, under certain circumstances, may be forgiven in part. The banks would also be granted warrants for Warwick common stock representing 4 percent of the WIMI common stock outstanding as of the closing of the proposed $15 million capital investment, at an exercise price of $3.00 per share. The proposed loan restructuring would be subject to various conditions, including final approval of the restructuring by the banks and the closing of the $15 million capital investment in Warwick Insurance Managers on terms and conditions satisfactory to the banks.

Based on the approximately 3.7 million WIMI common shares currently outstanding and assuming a $1.00 per common share issue price and a $15 million capital investment, upon the closing of the proposed $15 million capital investment Carol Management would own approximately 53.3 percent of the then outstanding WIMI common shares and the proposed third party investor or investors for the $5 million additional required investment would own approximately 26.7 percent of the outstanding WIMI common stock, without giving effect to the bank warrants. These share ownership percentages would further increase if Warwick's statutory loss and loss adjustment expense reserves at Sept. 30, 1989 are deficient by more than $1.0 million. Warwick Insurance Managers currently anticipates that further strengthening of its Sept. 30, 1989 statutory reserves in excess of this amount will be necessary in future periods.

The proposed investment will be subject to approval by WIMI shareholders and also will be subject to approval by the New Jersey Insurance

Commissioner under the New Jersey insurance holding company systems act. There can be no assurance that the proposed Carol Management investment, third party investment or bank loan restructuring will in fact be consummated.

The company announced in August 1989 that it had retained the investment banking firm of Donaldson, Lufkin & Jenrette to assist it in seeking to increase its capital base.

Warwick Insurance Managers also stated that A.M. Best Company has assigned a NA-7 rating to Warwick Insurance Company, its operating property and casualty insurance subsidiary. According to A.M. Best, this rating is assigned to companies that meet A.M. Best's minimum size and experience requirements, but do not meet the minimum standards for a rating of C minus. Warwick Insurance Company previously had been assigned a C+ rating by A.M. Best.

The company, through its operating subsidiary Warwick Insurance Company, is engaged in writing commercial property and casualty insurance primarily in the state of New Jersey.

LUMBERTON, NC (JAN. 11) PR NEWSWIRE - Southern National Corporation (NASDAQ-NMS: SNAT) today announced that its unaudited net income for 1989 was $23.8 million, a 12 percent increase over the 1988 amount of $21.3 million. On a per share basis, earnings were $1.19 compared to $1.06 for 1988. This represents a return on shareholders' equity of 14.76 percent.

For the fourth quarter, earnings were $6.9 million, or 34 cents a share, compared to $6.4 million, or 32 cents a share, in the same quarter last year.

Per share amounts have been restated to reflect a three-for-two stock split effected in the form of a 50 percent stock dividend on June 30, 1989. The figures have also been restated to reflect the Oct. 31 merger of American Bank & Trust Company in High Point. The merger was accounted for under the pooling of interests method.

Chairman Hector MacLean reported that the corporation's aggressive asset/liability management techniques enabled it to achieve a substantial improvement in net interest margin in the fourth quarter versus the third quarter.

"We are also much better positioned to absorb the recent prime rate decrease than we were for the decreases in June and August," MacLean said.

Total assets at Dec. 31, 1989 were $2.92 billion, a $273 million or 10 percent increase over assets of $2.65 billion a year ago. Loans and leases were $1.88 billion compared to $1.76 billion at Dec. 31, 1988. Deposits grew $173 million, or eight percent, to $2.43 billion.

Southern National, a multi-bank holding company, has 142 offices in 69 cities and communities across the Carolinas.

WALTHAM, MA (JAN. 11) PR NEWSWIRE - Thermo Environmental Corporation (AMEX: TEV) announced today that it has been awarded a $3.5 million contract to provide environmental support services to the Westinghouse Savannah River Company, contract operators of the U.S. Department of Energy's Savannah River Site.

TEV's Normandeau Associates subsidiary has been contracted for the next three years under the Westinghouse Savannah River Company's L-Lake/Steel Creek monitoring program. Under this contract, Normandeau will be responsible for monitoring the biological effects of cooling waters from a nuclear reactor located at this site. Normandeau has been performing similar studies at the Savannah River location since 1982.

"We are pleased that Westinghouse has awarded us the contract to continue studies at L-Lake," noted Gene Eidson, vice president of Normandeau Associates. "Ongoing monitoring studies such as these provide valuable data on the establishment of balanced biological communities in a cooling water reservoir."

Thermo Environmental Corporation provides land-use planning, water quality management, and environmental science and engineering services to industrial, utility, commercial and government customers. The company also provides comprehensive laboratory-based testing and related services for the environmental and nuclear sciences, industrial hygiene, and health physics fields to support the safe management of hazardous waste and radioactive materials. Thermo Environmental is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

ARLINGTON, VA (JAN. 11) PR NEWSWIRE - USAir (NYSE: U) reported a 7.7 percent increase in revenue passenger miles flown during 1989 compared with 1988.

Available seat miles flown rose 6.7 percent during the same period while passenger boardings were down 1.3 percent.

Load factor for 1989 was 60.6 percent compared with 60 percent in 1988. For the month of December, revenue passenger miles rose 7.4 percent and available seat miles increased 3.2 percent. December load factor was 56.9 percent compared with 54.7 percent during December 1988. December passenger boardings were up 0.6 percent from the same month of 1988.

December traffic results were severely impacted by one of the worst months of adverse winter weather in recent years. Approximately 2,900 USAir flights were canceled by weather-related conditions during December.

Statistics for periods prior to USAir's merger with Pacific Southwest Airlines on April 9, 1988, and with Piedmont Airlines on Aug. 5, 1989, have been restated to reflect the combined airline operations of all three carriers on a pro forma basis from Jan. 1, 1988.

#90011p0127 01/11/1990 ~PR Newswire

HANOVER, MD (JAN. 11) PR NEWSWIRE - Crop Genetics International (NASDAQ: CROP) announced today that Dr. Norman E. Borlaug, Nobel Peace Prize winner and founder of the Green Revolution, has joined Crop's board of directors.

Crop is the only company on whose board Borlaug has agreed to serve. Borlaug won the Nobel Prize for developing high-yielding varieties of wheat which more than doubled Third World wheat harvests. His plant breeding breakthroughs have reduced famine in many developing countries, including Mexico, India and Pakistan. The development and use of these improved varieties of wheat and rice, together with improved agronomic practices which permitted the varieties to express their high genetic yield potential, resulted in a dramatic increase in wheat and rice production in Asian and Latin American countries in the postwar period - which became known as the Green Revolution.

For the past two years, Borlaug has been consulting with Crop in the development of its unique agricultural technologies. Crop's InCide(TM) bioinsecticides are plant vaccines which are inoculated into seeds. Crop is also developing X-tend(TM) bioherbicides which will have significant

environmental advantages over current chemical products.

"I believe Crop's plant vaccines and bioherbicides are exciting new developments in agricultural biotechnology," Borlaug said, "and I am pleased to be associated with this pioneering research effort."

Crop and its seed company partners recently completed multi-state field trials of the InCide bioinsecticide against corn's most damaging insect pest. The corn borer destroys $500 million of U.S. corn each year. Crop's X-tend bioherbicide technology is expected to reduce the amount of chemicals required to control weeds by up to 75 percent.

"We're developing effective and safe biological alternatives to chemical pesticides and we're excited that Dr. Borlaug is bringing his vast experience to help our efforts," said Dr. Peter Carlson, Crop's chief scientist. "Borlaug has been there before."

In addition to being the only agriculturalist to win the Nobel Peace Prize Borlaug has been granted 27 honorary degrees from universities on four continents. He is a distinguished professor of international agriculture at Texas A&M University and one of the founders of Mexico's International Maize and Wheat Research Center. Borlaug is also currently working with former President Carter and Ryoichi Sasakawa, a Japanese philanthropist, to improve corn and sorghum production in several African countries.

Crop board member Sol M. Linowitz, formerly chairman of Xerox and the Presidential Commission on World Hunger, said, "Norman Borlaug and I worked together on the Presidential Hunger Commission and I am delighted to be working with him again on the board of Crop Genetics."

NEW YORK (JAN. 11) PR NEWSWIRE - Omnicom Group, Inc. (NASDAQ: OMCM) and Ammirati & Puris have successfully completed an agreement for Ammirati & Puris to repurchase all of its stock from Omnicom and once again become an independent advertising agency.

Terms of the agreement were not disclosed in the joint announcement today by Bruce Crawford, president and chief executive officer of Omnicom, and Martin Puris, co-chairman and chief executive officer of Ammirati & Puris.

Crawford said, "Since our acquisition of Boase Massimi Pollitt (BMP) last year, our intention has been to work toward an agreement for Ammirati & Puris management to repurchase its stock. I am delighted that we are able to announce a solution that is agreeable and beneficial to both parties. Ammirati & Puris is a fine agency and we wish them every success in the years ahead."

Puris said, "We are pleased that Ammirati & Puris was able to part amicably with Omnicom, an organization for which we have great respect. We look forward with renewed vigor to building our future as an independent advertising agency.

"As we approached the buyback, we became aware of a heightened sense of entrepreneurial energy at the agency -- a revitalization if you will, of

the creative spirit that has always driven our growth," Puris said.

"There now exists here a tremendous excitement about the future. Both our present and prospective clients will clearly be the beneficiaries of this 'born-again' enthusiasm."

Ammirati & Puris had been acquired by BMP in 1987. With billings of over $200 million, Ammirati & Puris is especially known for its campaigns for BMW, Club Med, Schweppes and UPS.

WARREN, MI (JAN. 11) PR NEWSWIRE - General Motors today announced completion of the sale of a significant portion of its Norwood assembly plant site to Belvedere Corporation, a Cincinnati developer.

Demolition of the plant was completed in December 1989. GM and Belvedere are continuing their discussions regarding the remainder of the site.

"We are very pleased about this sale," said David D. Campbell, GM vice president and group director of the Chevrolet-Pontiac-GM of Canada Group, which has had responsibility for the site. "We have been working closely with the City of Norwood to find the best possible reuse for this site, and we congratulate Belvedere and the city on their plans for the redevelopment of the area. Belvedere is enthusiastic about moving forward with development of the site as quickly as possible."

In June 1989, GM donated two large parking decks on the site to the city. The donation included the two decks, with 1,783 total parking spaces, and 3.29 acres of land. At the time of the donation, GM stated it believed the donation would provide maximum benefit to the community by providing an added enhancement for development of the plant site.

#90011p0147 01/11/1990 ~PR Newswire

HOUSTON (JAN. 11) PR NEWSWIRE - The U.S. Department of Energy has selected a project proposed by CRSS Capital, Inc. and TECO Power Services in the third round of its Clean Coal Technology Demonstration Program, the two companies jointly announced today.

The DOE is prepared to provide up to $121.1 million as its share of the estimated $400 million cost of the project, which is designed to employ the latest and most advanced technology for generating electric power from coal.

James T. Stewart, president and CEO of CRSS Capital, Inc., said, "We are delighted to be chosen to participate in the largest environmental and

energy program underway in the U.S. today."

Richard E. Ludwig, president of TECO Power Services, said, "This project offers an opportunity to demonstrate the latest and most advanced technology for generating electricity from coal."

The City of Tallahassee has agreed to negotiate for the purchase of the power and to provide a site at its Arvah B. Hopkins Power Station. When completed, the facility will supply electric power to the city's municipal power system. Project plans call for plant operations beginning in late 1994 or early 1995.

The plant will employ an Integrated Coal Gasification Combined Cycle (IGCC) process. The IGCC process, one of the most efficient and encironmentally clean technologies for electric power production, first converts coal to a fuel gas. Then, after a gas cleaning stage, it burns the gas in a gas turbine to drive a generator. Gases exiting the turbine remain hot enough to produce steam for a more conventional steam-turbine power system.

The technology chosen for the project could lower sulfur emissions by more than 99 percent. Sulfur pollutants have been linked to acid rain.

The DOE's clean-coal program, an outgrowth of a 1985 U.S.-Canadian agreement to reduce pollutants causing acid rain, is a $5-billion government effort to advance clean coal-based technologies. Coal is the nation's most abundant energy source, with supplies expected to last more than 300 years.

The two companies and DOE will next work out a cooperative agreement that will define the scope and research objectives for the project. The department's Morgantown Energy Technology Center will manage the effort for DOE.

TECO Energy is a diversified, energy-related holding company headquartered in Tampa, Fla.

CRSS (NYSE: CRX), headquartered in Houston, is one of the most diversified and largest design and construction services companies in the nation.

LOUISVILLE, KY (JAN. 11) PR NEWSWIRE - After a corporate review with its new parent company, Emerson Electric Corporation, regarding long-term strategies, Vermont American Corporation (AMEX: VAC.A) President, Robert

I. Baker, announced that the company will aggressively pursue its original plans to develop the business of Clairson International Corporation (NASDAQ-NMS: CLICC), a leading supplier of home storage and organization systems.

Vermont American's merger with Clairson is expected to close in early March, following the Clairson shareholders' meeting to vote on the merger.

"Vermont and Clairson both realize that obvious and enormous opportunities exist in the fast-growing storage and home organization industry. We have a number of projects on our agenda," said Robert A. Zriny, the 20-year Vermont American veteran identified by Baker as Vermont's designee for Clairson's presidency.

Zriny, president of Vermont American's Multi Metals Group for the past seven years, has begun arrangements to relocate from Louisville to Clairson's headquarters in Ocala, Fla.

When Vermont American's negotiations with Emerson, et al, concluded in late December, Vermont and Clairson proceeded with an amended merger agreement they had announced earlier that month. This agreement provides for all Clairson International shareholders to receive $8.79 per share in cash at the time of closing. At the end of three years, shareholders will also receive whatever is remaining in an escrow fund that will be established to guarantee Clairson's representations and warranties to Vermont American. Vermont will deposit $.71 per share in this escrow fund at closing.

Clairson manufactures and distributes the Closet Maid (R), Keije' (R), Cabinet Maid (R), SpaceBuilder (R) and Casteel TM brands of storage and household organizer systems. Clairson is observing the twentieth anniversary of the introduction of its Closet Maid (R) shelving and storage systems, which it distributes as installed systems and do-it-yourself kits and components nationally and in 30 other countries.

MONROE, CT (JAN. 11) PR NEWSWIRE - Taunton Technologies Inc. (NASDAQ: TTEK) today announced the consummation of a series of previously announced transactions intended to strengthen the company's strategic position and to facilitate the continuing development of Taunton's LV2000 laser-based corneal sculpting system.

Dr. John W. Warner, president of Taunton, announced Taunton's acquisition through merger of L'Esperance Research Incorporated ("LRI"), the company owning nine patents covering the LV2000 system. LRI was established by Dr. Francis A. L'Esperance, Jr., a pioneer in the use of lasers in the treatment of eye disorders. With the merger the shareholders of LRI will receive 1,070,000 net additional shares of Taunton stock. It is expected that several more patents on both apparatus and methods for corneal sculpting will be issued shortly.

Dr. Warner also announced that the company had raised $8 million through the private sale of 800,000 Taunton common shares at $10.00 per share. The financing and merger were effected with the simultaneous conclusion of a revised marketing agreement between Taunton and Alcon Surgical Inc. Under terms of the proposed agreement, Alcon retains exclusive marketing rights for the LV2000 system, and will work closely with Taunton during the clinical phase.

Taunton's LV2000 system is intended to utilize ultraviolet lasers to reshape the surface of the cornea to treat nearsightedness, farsightedness and astigmatism so as to reduce or eliminated a patient's dependence on corrective lenses. The device is also intended to treat other disorders of the cornea. The marketing of the LV2000 system will require the approval of the Food and Drug Administration and the process of attaining this approval is expected to take approximately two years. Taunton is currently awaiting FDA approval to resume clinical trials of its system at

multiple sites around the United States.

Dr. Warner said, "These recent transactions mark the beginning of an important phase in Taunton's development. We now believe that we have the financing to complete the approval cycle for the LV2000 system. In addition, by owning all of the basic patents behind both the laser sculpting system and the surgical method and with our new agreement with Alcon, we believe that we have improved economic prospects for Taunton."

Taunton Technologies was founded in 1986 to develop the Excimer 2015 laser system for corneal sculpting to be performed on a widespread commercial basis.

HOUSTON (JAN. 11) PR NEWSWIRE - Plains Resources (NASDAQ: PLNS) today announced that it would seek shareholder approval of a one for five reverse split of its common stock. Plains also said that it intended to list its common stock on the American Stock Exchange if shareholder

approval of the reverse split is obtained.

The company said that it had filed a preliminary listing application with the exchange and that the exchange had issued a favorable eligibility opinion, subject to the reverse split.

The reverse split and subsequent exchange listing are intended to broaden the market for Plains' common stock and increase the company's exposure in the financial community. Both of these actions should provide a market that will more closely reflect the company' underlying values, Plains said.

Approval for the reverse split will be sought at a special meeting of shareholders to be held in February 1990.

Plains Resources Inc. is an independent oil and gas exploration and production company with operations in the Mid-Continent areas of Oklahoma, the Texas Panhandle and Southwestern Kansas and in the Gulf Coast areas of Texas, Louisiana and Mississippi.

HUNT VALLEY, MD (JAN. 11) PR NEWSWIRE - Integrated Health Services (IHS), provider of specialized long-term care, rehabilitation, audiology services and senior housing communities, announced today that Dr. Thomas F. Frist Jr. has joined its board of directors in a previously unfilled position. Dr. Frist also serves on the boards of IBM and Vanderbilt University.

Dr. Frist is a co-founder of Hospital Corporation of America (HCA). He has held the position of president and chief executive officer of that company since 1977; and, in 1987 Dr. Frist additionally assumed the post of chairman.

His position with IHS will involve establishing short and long range planning objectives and directing growth and management. Dr. Frist will also serve as IHS liaison with the financial and business communities.

IHS President, Chairman, and Chief Executive Officer, Dr. Robert Elkins, commented, "It is an honor to have Dr. Frist on the board. His success in the development of HCA will be invaluable to IHS in its current mode of expansion. We are pleased to be in the company of such prestigious institutions as HCA, IBM, and Vanderbilt University.

Dr. Frist received a B.A. in 1961 from Vanderbilt University, Nashville, Tenn., and an M.D. in 1965 from Washington University School of Medicine, St. Louis, Mo. He completed his surgical internship at Vanderbilt

University Medical Center.

Integrated Health Services is a diversified and fully integrated health service provider for the elderly. IHS owns and/or operates 3320 beds in 23 facilities in 12 states. Many of the company's private pay, long-term care facilities feature 24-hour physician services, special Alzheimer's Wings and other medical specialty service units. The company is developing assisted living facilities which provide cooking and cleaning services, as well as assistance with daily chores and medical reminders, while allowing the elderly resident to remain largely independent in a comfortable homelike setting.

JACKSONVILLE, FL (JAN. 11) PR NEWSWIRE - Barnett Banks, Inc. (NYSE: BBI) achieved 1989 earnings of $256.7 million, an increase of 13 percent from 1988, Charles E. Rice, chairman and chief executive officer, announced today. Earnings per common share rose to $4.07, an increase of 12 percent from a year ago. Dividends declared in 1989 were $1.16 per share, up 15 percent.

BARNETT BANKS, INC. SUMMARY OF YEAR-END RESULTS

	Fourth Quarter			Full Year		
Dec. 31	1989	1988	Pct.	1989	1988	Pct.
Income:						
Net (millions)	$65.0	$57.5	13%	$256.7	$227.6	13%
Per common share	1.03	.92	12	4.07	3.65	12
Average Balances (billions):						
Assets	$28.3	$25.3	12%	$27.3	$24.5	12%
Deposits	24.3	22.1	10	23.6	21.3	11
Key Ratios:						
Return on assets	.92%	.91%	1%	.94%	.93%	1%
Return on equity	15.40	15.65	(2)	15.99	16.22	(1)

Fourth-quarter net income was $65.0 million and earnings per common share were $1.03. These were 13 percent and 12 percent higher, respectively, than a year ago.

Loan quality remained sound even as the economy slowed and non-performing loans and foreclosed real estate increased, moving the non-performing assets ratio from 1.22 percent at year-end 1988 to 1.44 percent. "This level remains very favorable compared to industry averages and has declined in the third and fourth quarters," Rice said.

Barnett's stringent charge-off policies resulted in net charge-offs of $124.2 million, representing .60 percent of average loans compared to .49 percent a year ago. Including $30.5 million for new loan growth, the provision for loan loss expense rose to $154.7 million, up nearly 40 percent; the loan loss allowance rose to 1.12 percent; and reserve coverage of non-performing loans remained virtually unchanged at 122 percent.

Consolidated assets grew 11 percent, reaching $29 billion. Return on assets improved to .94 percent from .93 percent in 1988. Return on shareholders' equity was 15.99 percent compared to 16.22 percent, after a 14 percent increase in average equity.

Barnett is a two-state multibank holding company with 563 offices. Its common stock (BBI) is listed on the New York Stock Exchange.

TERRE HAUTE, IN (JAN. 11) PR NEWSWIRE - The BFGoodrich (NYSE: GR) Company today announced a $19 million investment that will double the production capacity of its plastics compounding facility in Terre Haute. The expansion will include new processing equipment, an addition to the laboratory and a major addition to the plant's processing building.

"The decision to increase compounding capacity at Terre Haute demonstrates our commitment to expanding our involvement in the value-added segments of the plastics market," said William F. Patient, president of BFG's Geon Vinyl Division, which operates the Terre Haute plant.

The plant currently employs 59 people, and about 35 employees will be added as a result of this expansion project. Work will begin in March and is expected to be completed in the summer of 1991.

BFGoodrich purchased the facility in 1984 and has invested $8 million in improvements to the plant since that time. The plant manufactures plastic compounds that are used in end products such as appliance parts, packaging materials, computer housings and other special-purpose applications.

BFGoodrich, headquartered near Akron, Ohio, is the largest manufacturer of vinyl resins and compounds in North America. The company also produces a broad range of specialty chemical products and supplies services and components to the aerospace industry.

TROY, MI (JAN. 11) PR NEWSWIRE - V. Mikal Jackson, who headed up sales training and development for Inter-Continental Hotels, has been named senior vice president for lodging, leisure services and travel industries for Sandy Corporation, the publicly-traded (AMEX: SDY) performance improvement company, specializing in consulting, training and communications.

According to Robert J. Bennett, group vice president for the educational services group, Jackson, 39, is a superlative addition to the Sandy team.

"Mikal's credentials in the hospitality industry are superb!" Bennett said. "The overall excellence of the Inter-Continental and Marriott hotel chains is indicative of Mikal's abilities."

In addition to his work at Inter-Continental, Jackson worked for Marriott Corporation, including serving as director of human resources development, hotel division, and at National Distributors where he was director of training.

The hospitality work included six years of hotel property management at the U.S. corporate headquarters and in the international arena.

He received a Bachelor of Science degree in Psychology from Dana College and undertook post-graduate studies in clinical psychology at Northwestern and Depaul Universities.

Jackson and his wife will be relocating to Birmingham, Mich., from

Northern New Jersey.

MONTREAL (JAN. 11) PR NEWSWIRE - United Westburne Inc. announces that it has established a stock purchase plan for designated employees.

Under this plan, the corporation will lend $2.5 million to the trustees of the plan which will be used by them to purchase common shares of the corporation at the market price prevailing at the time of purchase.

The participants in the plan will then be permitted to purchase these common shares at a price per share equal to their average cost to the trustees.

Purchases by the plan are anticipated to take place between Jan. 11, 1990 and Jan. 11, 1991.

During that period, the trustees of the plan will not purchase more than 5 percent of the outstanding common shares of the corporation or more than 10 percent of the public float.

SAN FRANCISCO (JAN. 11) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) yesterday announced the settlement of a complaint which had been issued against The Pacific Lumber Co., Scotia, Calif., for violations of the Toxic Substances Control Act (TSCA).

The facility, located in Humboldt County, had been cited for polychlorinated biphenyl (PCB) leaks and spills from transformers and failure to mark the means of access to the transformers.

As a result of the consent agreement and final order, Pacific Lumber is required to remove, retrofill, replace and dispose of PCB equipment at a cost of over $3 million. In addition, Pacific Lumber will pay a penalty of $1,500. The company's commitment to removing PCBs from the Scotia facility contributes to EPA's goal of preventing pollution by reducing the potential of PCBs entering the environment.

TSCA directs EPA to control the manufacture, processing, distribution, use disposal and marking of PCBs. PCBs belong to a broad family of organic chemicals known as chlorinated hydrocarbons. They are toxic, extremely stable, and have been widely used in hydraulic systems, heat transfer systems, and as insulating fluid in electrical equipment. They are classified as a probable human carcinogen.

EPA banned the manufacture of PCBs in 1979 because of their toxicity and persistence in the environment.

AUSTIN, TX (JAN. 11) PR NEWSWIRE - Tracor Aerospace, Inc., a subsidiary of Tracor, Inc., recently was presented the Value Engineering Program Performance Award from the U.S. Army Materiel Command for accomplishments made during 1988.

David A. Rossi, group vice president for Tracor Aerospace, accepted the award from Richard M. Rogers, deputy and acting director for the Defense Contracts Administrative Services Management Area, San Antonio, Texas, on behalf of U.S. Army Gen. Louis C. Wagner Jr.

Rossi said, "The award is in recognition of Tracor Aerospace's successful application of engineering techniques and initiatives which provided an approximate savings of $457,000 in production of the MJU-7/B infrared decoy flare during 1988."

Tracor Aerospace previously received awards for Outstanding Achievement in Value Engineering for 1984 and 1985.

Tracor Aerospace is known for its industry leadership in the development and production of advanced countermeasures systems and expendables for air land, sea, and space applications. The company also is a major systems integration contractor and a manufacturer of airborne OMEGA/VLF navigation systems for military, general aviation, and commercial airline aircraft.
